Ideal high performance UV eraser for production or engineering applications. Erase time is approximately 15 minutes. Holds as many as 50 24-pin EPROM's on the maximum exposure area of the tray. Tray can accommodate an entire circuit board. Tray size: 10.5 x 8″ (266.7 x 203.2). Safe light intensity level assures long device life. 60-minute auto shut-off timer. Safety interlock switch. 10.5D x 12.75W x 4.75″H (266.7 x 323.85 x 120.65).

90F1016 Type ERALUV-000. **Each** **324.94**

ERAT8T and **ERAT8Z** feature 5 x 8" slide-out tray with antistatic pad. 60-minute timer with auto shut-off. Lamp life: 770 hours. Safety interlock switch. Intensity: 1500 micro-Watts/second at 1″ from center line UV indicator. Dimensions: 5D x 13W x 3H″. **Type ERAT8T** is a standard model for industrial use. Will erase 15 EPROMs in 20 to 30 minutes. **Type ERAT8Z** is a deluxe industrial-grade unit that will erase 30 EPROMs in 10 minutes or 15 EPROMs in 15 minutes. Also features a chrome parabolic reflector.

90F1018 Type ERAT8T-000. **Each** **135.79**
90F1017 Type ERAT8Z-000. **Each** **184.70**
(4559) (de51490)

UV EPROM ERASERS

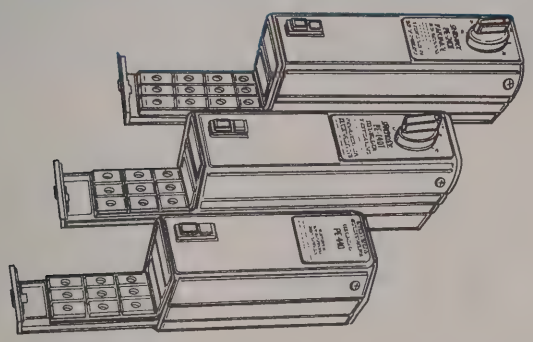
SPECIFICATIONS FOR UV EPROM ERASERS

All erasers styled of rugged, silver anodized aluminum and stainless steel. Have safety interlock mechanism to protect user against accidental exposure to short wave (254nm) UV radiation. All erasers (except **type PE-140**) have 60-minute exposure timer for automatic unit shut-off. All UV EPROM units on this page are UL listed and are OSHA compliant. *Order Spectroline EPROM erasers separately on this page.*

Type	Auto Timer Shut-Off	Chip-Erasing Capacity	Typical Intensity ($\mu W/cm^2$)
PE-140	No	9	8,000
PE-140T	Yes	9	8,000
PE-240T	Yes	12	9,600
PL-265T	Yes	30	9,600
PR-125T	Yes	25	17,000
PR-320T	Yes	42	17,000
PC-1100A	Yes	84	18,500
PC-2200A	Yes	168	18,500

(4457) (de00525)

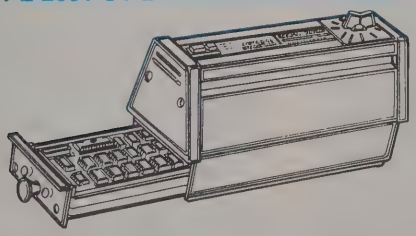
PE SERIES UV EPROM ERASING LAMPS



Small capacity, medium intensity. **PE-140, PE-140T** and **PE-240T** are personal user lamps specially designed for small systems users. They are the fastest, most efficient units of their size. The **PE-140** and **PE-140T** utilize a single 4-watt tube; the **PE-240T** uses two 4-watt tubes. Tubes have rated life of 6,000 hours. *Order replacement tubes* **BLE-2537S** *separately.* A UV-absorbing light indicator in the tray endcap shows tubes are operating, while protecting eyes from UV exposure. Tray has conductive foam pad to prevent electrostatic build-up and protect chips from possible static charge. **PE-140** and **PE-140T** erase 9 chips with an erasing time of 12.5 minutes for 1 chip; **PE-240T** erases 12 chips with an erasing time of 10.4 minutes for 1 chip. Automatic timer included on **PE-140T** and **PE-240T**. Inside tray dimensions are 2.00W x 6.63L x 0.63″H (50.80 x 168.40 x 16.00). *For specifications, refer to the chart shown separately on this page.*

87F3961 Type PE-140. **Each** **181.13**
87F3962 Type PE-140T. **Each** **222.53**
87F3963 Type PE-240T. **Each** **247.37**
87F3967 Type BLE-2537S. **Each** **22.77**
(4458) (de00526)

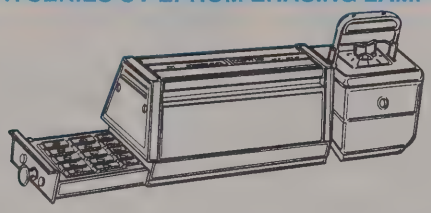
PL-265T UV EPROM ERASING LAMP



Ideal lamp for data-processing centers and medium capacity industrial requirements. Will erase up to thirty 24-pin EPROM chips at once. Erasing time: 10.4 minutes. Accommodates PC boards to 4.00 x 9.00″ (101.60 x 228.60). Lamp with timer utilizes two 6-watt tubes with rated life of 6,000 hours. UV-absorbing light indicator in tray endcap shows tubes are operating, while protecting eyes from UV exposure. Tray insert adjusts to varying heights to maintain optimum exposure distance and has a conductive foam pad to prevent electrostatic build-up and to protect chips from possible static charge. Inside tray dimensions: 4.13W x 9.88L x 1.38″H (104.90 x 250.95 x 35.05). *For specifications, refer to the chart shown separately on this page. Order* **type BLE-6254S** *replacement tube separately.*

87F3964 Type PL-265T. **Each** **351.90**
87F3968 Type BLE-6254S. **Each** **25.88**
(4459) (de00527)

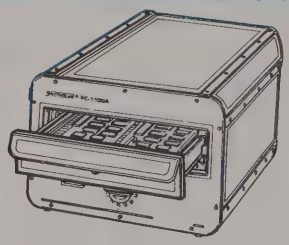
PR SERIES UV EPROM ERASING LAMPS



For large-volume EPROM users. Includes automatic timer and grid. Features high-intensity grid tube for fast, efficient erasing. **PR-125T** erases 25 chips; **PR-320T** erases 42 chips. Accepts PC boards to 4.00 x 9.00″ (101.60 x 228.60). Grid tubes have rated life of 5,000 hours and are OSHA compliant. UV-absorbing light indicator shows grid is operating, while protecting eyes from UV rays. Carrying handle for portability. Adjustable tray insert varies heights to keep optimum exposure distance. Includes conductive foam pad to prevent static damage to chips. Inside tray dimensions for **PR series:** 4.13W x 9.88L x 1.38″H (104.90 x 250.95 x 35.05). *For specifications, refer to the chart shown separately on this page.* Replacement grid for **PR-125T** is **G260NO,** 2.00 x 6.00″ (50.80 x 152.40) grid area, **PR-320T** is **G480NO,** 4.00 x 8.00″ (101.60 x 203.20) grid area.

87F3965 Type PR-125T. **Each** **615.83**
87F3966 Type PR-320T. **Each** **822.83**
87F3969 Type G260N0. **Each** **284.63**
87F3970 Type G480N0. **Each** **429.53**
(4460) (de00528)

PC SERIES UV EPROM ERASING CABINETS



For high-volume production. Typical peak irradiance of 18,50 $\mu W/cm^2$ provides erasure in as few as 6 minutes. Accepts metric cards, silicon wafers and PC boards. Cooling fans control chamber temperature to maintain maximum UV intensity and prolong grid life, rated at 5,000 hours. Feature 8.00 x 8.00″ (203.20 x 203.20) quartz grid assemblies mounted to specular aluminum reflector. UV-absorbing light indicator shows grids are operating, while protecting eyes from UV rays. Adjustable tray maintains optimum exposure distance. Tray comes with antistatic foam pad. **PC-1100A** with timer and grid erases 84 chips, inside tray dimensions 8.38W x 12L x 1.38″H (212.85 x 304.80 x 35.05). **PC-2200A** with timer and two grids erases 168 chips; inside tray dimensions 16.38W x 12L x 1.38″H (416.05 x 304.80 x 35.05). For specifications, *refer to the chart shown separately on this page.* Additional models available. *Contact your local Newark sales office for information.*

87F3971 Type PC-1100A. **Each** **1888.88**
87F3972 Type PC-2200A. **Each** **3015.74**

PIN GRID ARRAY SOCKETS

Current rating: 1A. Voltage rating: 10mV to 60V. Contact resistance: ≤7mOhms. Insulation resistance: $>10^{12}$ Ohms. Dielectric strength: >1000V (RMS). Material: Plastic; PBT glass-filled, rated UL94V-0. Sleeve: turned brass, 5µm tin plated. Clip: beryllium copper, 0.25µm gold plated. Solder tail contacts. Insertion depth: 2.4mm min. to 3.9mm max. Insertion diameter: 0.4mm min. to 0.56mm max. Mechanical life: 100 cycles. Operating temperature: -55°C to +125°C, 260°C for 5 sec. (solder bath resistant).

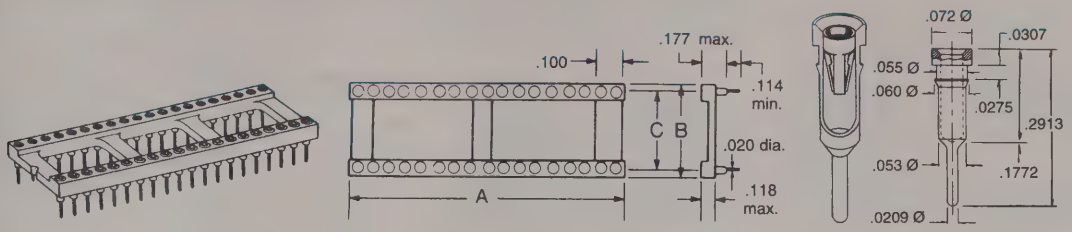
VOLTREX™ brand

VOLTREX™ BRAND LOW-PROFILE MACHINED PIN SOLDER-TAIL SOCKETS



- **Glass-Filled Polyester Insulating Body Conforms to UL94V-0**

Outer sleeves come in 2 versions: tin-plated-over-nickel-over-copper flash, per MIL-T-10727 Type I; gold-over-nickel-over-copper flash, per MIL-G-45204B. Inner contacts are beryllium copper with gold-over-copper flash, per MIL-G-45204B. Sockets available in tubes for use with automatic insertion equipment. Contact resistance: 0.004 ohms maximum. Overload voltage: 1500V eff. 50Hz. Working voltage: 10mV to 60V. Operating temperature: –55°C to +155°C. Soldering temperature: 260°C maximum for 5 seconds. Resistance against Freon, Frigen, Akrolone, Alpha-detergent (short treatment only). Able to withstand 1000-cycle insertions and withdrawals with steel pin diameter of 0.018″ (0.457).

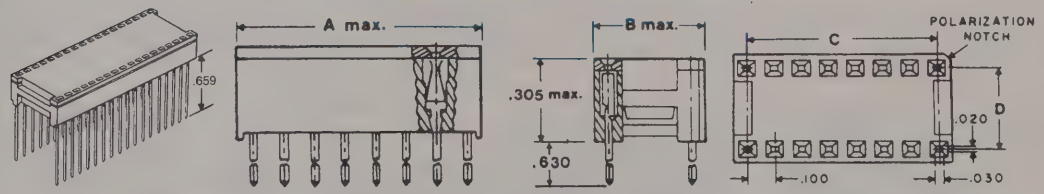
VOLTREX™ BRAND DIP SOCKETS



SP series standard-profile DIP sockets are available with solder or wire-wrap termination. Closed entry insulator design virtually eliminates contact damage. Sockets have mounting holes for fastening to circuit boards. Twin beam edge wipe contacts provide optimum performance, extended life. Contact material: phosphor bronze. Solder pin dimensions: 0.008″ x 0.025″ x 0.125″ long; solderless pin dimensions: 0.025″ square x 0.630″ long. Operating temperature range: –65°C to +125°C.

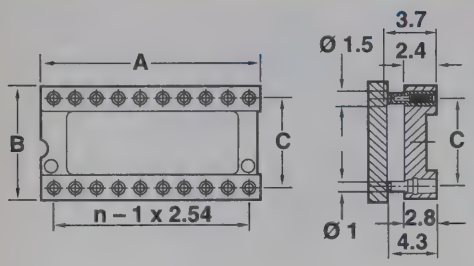
SOCKETS

NEW VOLTREX™ brand



SMT MACHINED DIP SOCKETS

Sockets are 4-finger clip with funnel design entry. Insertion diameter: 0.40mm minimum to 0.56mm maximum. Insertion depth: 2.4mm minimum to 3.8mm maximum. Process temperature: 260°C for 10 sec./215°C for 2 minutes. Side- and end-stackable. Pin 1 is polarized.

DIP SOCKETS WITH INTEGRAL DECOUPLING CAPACITOR

DIP sockets eliminate noise at the source before it can reach the chip—an advantage in high-speed logic and memory applications. Center-to-center pin spacing: 0.100″ (2.54). Integral glass-encapsulated ceramic capacitor: 0.1mF 50VDC. Capacitor leads are connected directly to the ground and voltage pin of socket to an interference fit. Insulator body material: glass-filled polyester, rated UL94V-0.

LOW-PROFILE DIP SOCKETS

ICD series low-profile DIP sockets feature high reliability contacts with a two-point contacting structure. Phosphor bronze contacts have a tin alloy plating rated at 1A, 250VAC. Contact resistance: 30MΩ maximum. Dielectric withstanding voltage: 500VAC rms for 1 minute. Housing standoffs accommodate board cleaning. Sockets can be stacked on 0.100″ (2.54) centers end-to-end. Visible polarization. Glass-filled polyester housing, rated UL94V-0. Operating temperature: –40°C to +120°C. **Sold in multiples of 5.**

SUPER-FLAT MACHINED PIN LOW-PROFILE DIP SOCKETS

Open frame design allows better access to printed circuit and improves cooling capacity. Contacts: inner four-finger contact, beryllium copper. Outer sleeves: tin-nickel over copper flash finish. Insulator: thermoplastic polyester with 30% glass fiber, self-extinguishing UL 94V-0. Resistance: <10 megohms. Overload voltage: @ 50Hz >1000Vrms. Contact resistance: <10 megohms. Operating temperature: –55°C to +185°C. Mounting height: 0.096″ (2.44) above board.

SOCKET PIN TERMINALS WITH DISPOSABLE CARRIER ASSEMBLIES

PTCA series pin terminal carrier assembly sockets are based on the very high specific pressure (VHSP) contact system. Heat-treated, four-finger contacts are gold-plated beryllium copper. Drilling low-profile board enables the contacts to be inserted down the shoulder and leaves 0.030″ (0.762) maximum profile above board. Closed bottom pin protects from wicking and flux contamination. Meets severe environmental requirements of high shock and vibration. Permits maximum air circulation under ICs and eliminates head entrapment under the insulator. Air-cooled. Throw-away metal carrier eases installation.

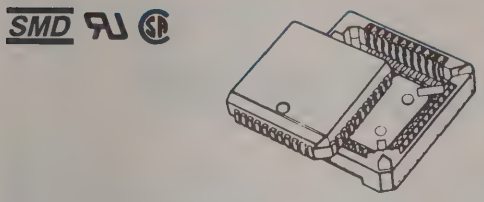
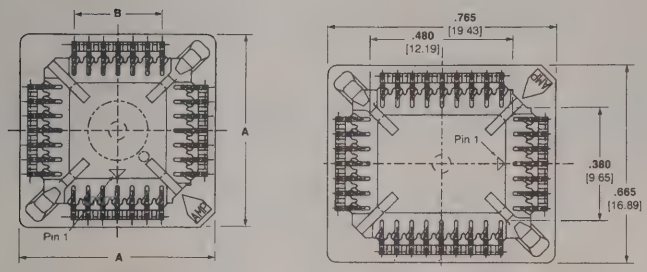
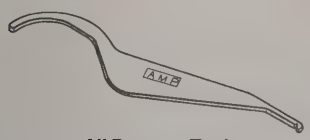
LOW PROFILE, LOW INSERT FORCE SURFACE MOUNT PLCC SOCKETS





Square Rectangular



All Purpose Tool

Extraction Tool

Low profile Plastic Leaded Chip Carrier (PLCC) sockets for surface mounting accommodate plastic "J" leaded, tin plated devices made to JEDEC specifications MS-018 (square packages) and MO-052-AE (rectangular packages). Low insertion force allows PLCC device to be easily inserted into socket. Low profile 0.185" (4.7) high allows high density PC board stacking. Features high normal force phosphor bronze contacts with tin-lead over nickel plating. One-piece polyphenylene sulfide housing that withstands vapor-phase or I.R. soldering temperatures and prevent flux and solvent entrapment. Plastic standoffs provide clearance for heat dissipation and cleaning. Compatible footprint allows for socket or direct mounting. Open bottom design enables easy socket placement on PC board footprint pattern, facilitates solder joint repair and inspection, and permits heat source to penetrate to solder pad and surface mount contact. Available with or without locating posts. UL recognized, CSA certified. *Order tools separately below.*

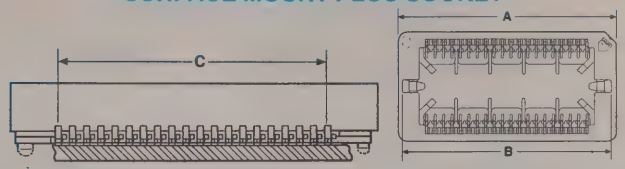
LOW-PROFILE, SOJ-STYLE SURFACE MOUNT PLCC SOCKET



The one-piece low profile housing is only 0.185" (4.70) high. It features an open bottom for easy placement, testing, inspection, and repair. Made from high-temperature polyphenylene sulfide material. The use of this socket allows expansion of memory up to 4MB initially or as required on video graphic accelerator boards. Without locating pins.

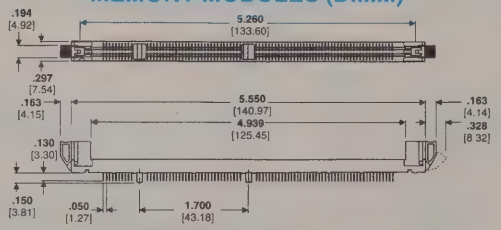
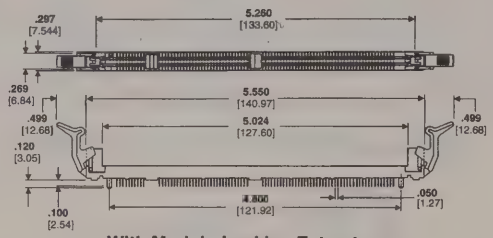
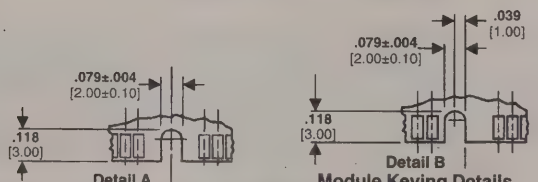
SIMM SOCKETS—8 BYTE DUAL IN-LINE MEMORY MODULES (DIMM)



With Standard Extractors



With Module-Locking Extractors



Module Keying Details

SIMM sockets for 8 byte DIMM are designed to accept 168-pin modules per JEDEC Standard MO161. Provide increased memory capacity in a space-saving design that's twice the density of standard SIMM sockets. Offer increased lead-in geometry to reduce insertion force. Advanced 5.0V and 3.3V keying protects against damage during assembly. Keying also allows for DRAM, SRAM and VRAM custom modules. Built-in standard or enhanced lever-type module extractors, at both ends or right end only, to provide easy removal of module board from socket. Feature 0.050" x 0.075" (1.27 x 1.91) hole pattern, cleaning channels and slots, automatic insertion and socket-to-board hold-downs. Liquid crystal polymer housing, rated UL 94V-0. Phosphor bronze contacts with gold over nickel in contact area and tin-lead over nickel on solder tail. Current rating: 1A per contact. Dielectric withstanding voltage: 1.0KVAC. Operating temperature: –55°C to +105°C. UL recognized, CSA certified.

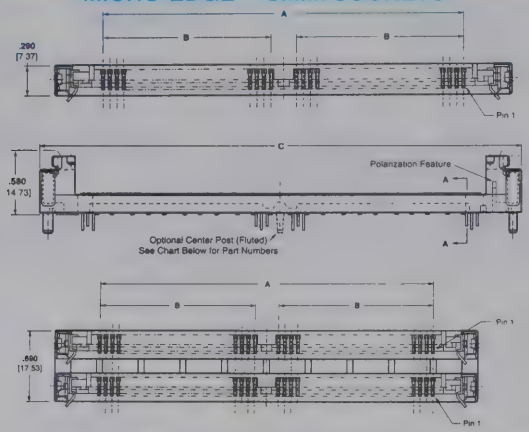
MICRO-EDGE™ SIMM SOCKETS



The metal latch version of the AMP MICRO-EDGE™ SIMM sockets eliminates the breakage associated with the misuse of SIMM sockets. Additionally, the metal latches will prevent shaving and/or skiving, as happens with plastic latches. The metal latch MICRO-EDGE™ sockets are available in 0.050″ (1.27) and 0.100″ (2.54) centerline configurations.

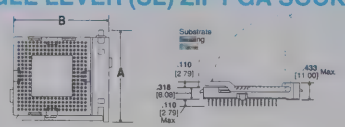
SINGLE LEVER (SL) ZIF PGA SOCKETS



Designed for Intel's upgrade devices, including Pentium™ processor. Zero insertion force sockets feature single-lever actuation that operates a free-moving cam, allowing the substrate to be inserted/extracted without force when in open position. Positive detent-locking lever eliminates inadvertent opening. High temperature thermoplastic housing; many permit attachment of quick connect/disconnect heat sink. Chromate treated zinc alloy actuator. Normally closed, full wiping copper alloy contacts plated with 30μ″ gold over nickel in contact area, tin-lead over nickel in solder tail area. Large funnel entry cavity. Contact resistance: 20mΩ initial/30mΩ final. Dielectric withstanding voltage: 1000VAC. UL listed.

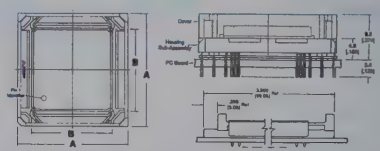
STANDARD AND METRIC MICRO-PITCH™ SOCKETS



Two-piece design aids handling and insertion of standard and metric JEDEC plastic quad flat pack (PQFP) ICs. Tin-plated sockets provide a minimum of 0.020″ (0.508) wipe. Low 0.375″ (9.53) profile. Phosphor bronze contacts with tin over nickel plate. High temperature thermoplastic housing and cover rated UL94V-0. *Order 1 housing and 1 cover per IC.* (*) To convert ceramic quad flat pack (CQFP) to outline configuration of plastic quad flat pack (PQFP), *order* **type 822054-2** *132-position MICRO-PITCH™ ceramic T-Quad converter separately below.*

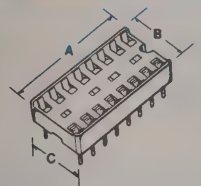
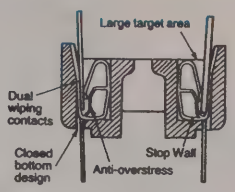
DIPLOMATE® DUAL LEAF (DL) DIP SOCKETS



Closed Frame



Thru-hole mount DIP sockets with closed frame construction. Feature dual wiping contacts with straight solder tail in tin or 30µ" gold plating over beryllium copper, phosphor bronze or copper alloy. Glass-filled thermoplastic housing with lead-in ramps for easy insertion and standoffs for easy board cleaning. Internal anti-over-stress walls prevent contact damage. Closed bottom design inhibits solder wicking and flux contamination and meets EIA 486, Class I. Stackable end-to-end or side-to-side (brickwalling) for high board density packaging. Visual polarization. Designed for automatic machine insertion. Accept 0.008-0.014" (0.203-0.355) thick IC leads. Low profile: 0.210" (5.33) above PC board. Contact spacing: 0.100" (2.54). Rating: 250VAC. Dielectric withstanding voltage: 1000VRMS minimum. Insulation resistance: 5000 megohms minimum. Contact resistance: 20 milliohms maximum. Meets EIA RS-415, MIL-S-83734 specifications. UL recognized, CSA certified.

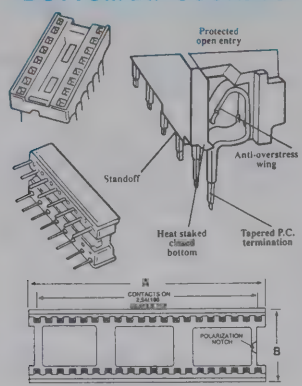
AUGAT® SOCKETS

200C SERIES STAMPED SINGLE BEAM CONTACT CLOSED BOTTOM DIP SOCKETS



Provides maximum normal force and consistent mechanical performance. Non-wicking, closed bottom design protects against flux and solder contamination. Protected open entry for easy insertion of ICs by hand or automatically. High normal force results in gas tight connections. Offers tapered PC termination for ease of targeting PC holes during insertion. Contacts on 0.100″ (2.54) centers. PC tail length: 0.125-0.135″ (3.18-3.43). PC board thickness: standard 0.062″ (1.57) and 0.092″ (2.34). PC board hole size: .035″ (0.889) ± 0.003″ (0.076) standard tail. Thermoplastic polyester insulator, rated 94V-0. UL recognized.

300C SERIES STAMPED DUAL WIPE CONTACT DIP SOCKETS

Low profile design for low contact resistance, high normal force. Closed bottom to prevent solder wicking. Dual wiping contacts on 0.100″ (2.54) centers. Large target area for easy insertion. Thermoplastic polyester insulator; rated UL94V-0. PC board thickness range: standard 0.062″ (1.57) and 0.092″ (2.34). PC board hole size range: 0.035″ (0.889) ± 0.003″ (0.076) standard tail. UL recognized.

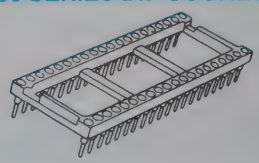
800 SERIES DIP SOCKETS



4-finger inner contact is machined beryllium copper with gold-over-nickel plating. Low-profile, XY stackable sockets feature open ladder construction for cooling, cleaning, inspection. Non-wicking, closed-bottom machined brass outer sleeve protects against flux and solder contamination. Thermoplastic polyester insulator, rated UL94V0. 0.125″ (3.18) PC termination. UL recognized.

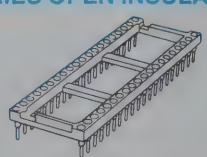
800 ECONOMY SERIES OPEN INSULATOR DIP SOCKETS



800 series low-profile DIP sockets feature precision 4-fingered, stamped beryllium copper inner contacts that provide concentric funnel entry for easy flat and round lead insertion. XY-stackable, open ladder thermoplastic polyester insulator, rated UL94V-0, facilitates cooling, cleaning, and inspection. Non-wicking, closed-bottom sleeve protects against flux and solder contamination. 0.125″ (3.18) PC termination. Type numbers with **ES suffix** have gold over nickel or tin-lead contact plating; type numbers with **ESL suffix** have low gold-over-nickel contact plating. UL recognized.

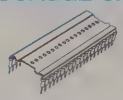
(4786) (de53382)

700 SERIES DISPOSABLE CARRIER SOCKETS



Aluminum carriers are for IC applications requiring maximum airflow for cooling. Allow gang-insertion of pins into PC boards and easy solder-joint inspection, cleaning, and repair. XY stackable to save PC board space and for circuit flexibility. 100% non-wicking of flux and solder. Outer sleeve is machined brass. 4-fingered inner contact is machined beryllium-copper with gold-over-nickel plating. Pins are aligned 0.100″ (2.54) centers. Standard mount.

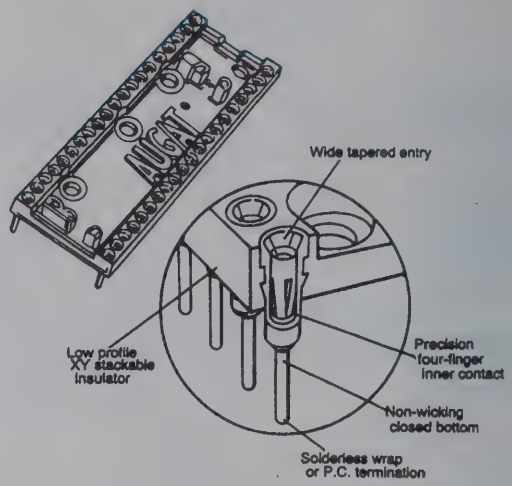
500 SERIES MACHINED CONTACT SOLID INSULATOR DIP SOCKETS



Wide tapered entry
Low profile XY stackable insulator
Precision four-finger inner contact
Non-wicking closed bottom
Solderless wrap or P.C. termination

Precision-machined beryllium copper four-finger inner contact provides entry for flat or round lead insertion, plus maximum mechanical and electrical performance. Low profile, machine loadable, X-Y stackable thermoplastic polyester insulator, rated UL94V-O. Non-wicking, closed bottom sleeve protects against flux and solder contamination. Available PC termination: 0.125″ (3.18) or solderless wrap. **Type 516-AG12F** has tin/lead contact and sleeve. Withstand high shock and vibration. Contacts on 0.100″ (2.54) centers. Machined brass outer sleeve. PC board thickness 0.062″ (1.57) and 0.092″ (2.34). PC board hole size: 0.035″ (0.89) + 0.003″ (0.076) PC termination; 0.055″ (1.40) + 0.0015″ (0.038) solderless wrap. Contact rating: 3A. UL recognized.

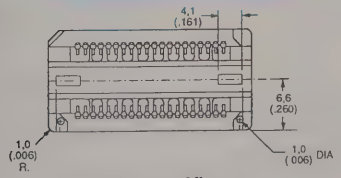
SOJ SERIES SOCKETS



Bottom View

For socketing SOJ devices. High normal force provides excellent retention and contact reliability. Open body permits inspection of solder joints. Thermoplastic housing and insulator allows IR soldering. Phosphor bronze contacts. Current rating: 1 Amp. Dielectric withstanding voltage: 600 VAC RMS (60 seconds). Insulation resistance: 10,000 Megohms/500 VDC. Operating temperature: –55°C to +105°C.

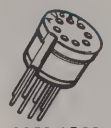
TRANSISTOR AND IC SOCKETS

8060 (Typical)

8059-2G5

8059-2G7

8080-1G



8058-1G32

8059-2G9

8060 series has pin circle diameter of 0.100″ (2.54); **8058 series** 0.200″ (5.08) diameter. Teflon® insulator. Two-piece machine socket terminal: gold plated brass outer sleeve and gold plated beryllium copper contacts. **8080-1G series** TO-3 power transistor sockets come with one or two solder lugs. Beryllium copper contacts with electro-tin plating and black phenolic insulator (Ph/ET), or silver plating with green diallyl phthalate insulator (Dp/SL), or 30µ″ gold plating and black phenolic insulator (Ph/GL). **8059 series** TO-5 transistor and IC sockets are ultra-low profile and come in red, blue, green, orange or yellow glass-filled polyamide nylon insulator rated UL 94V-0. Gold or tin/lead plated beryllium copper contacts. All have 0.255″ diameter, except **8058-1G23, 8058-1G49** and **8058-1G32** which have 0.406″ diameter.

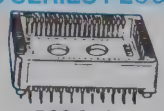
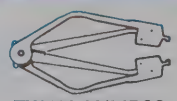
AUGAT® SOCKETS

PCS SERIES PLCC CHIP CARRIER SOCKETS



PCS Series



TX8136-20/84PCS

Solder tail allows through-hole board patterns in 0.100″ (2.54) grid. Accepts JEDEC type "A" plastic leaded chip carriers on 0.050″ (1.27) centers. Tin-lead over nickel-plated phosphor bronze contacts. High normal force (200 grams minimum) internal standoff assures proper positioning. UL recognized. *Order* **type TX8136-20/84PCS** *"universal" extraction tool for PLCC sockets separately below.*

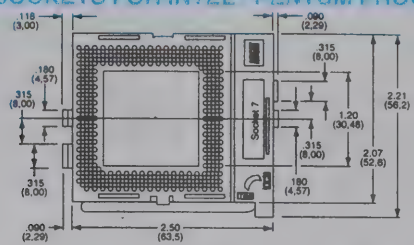
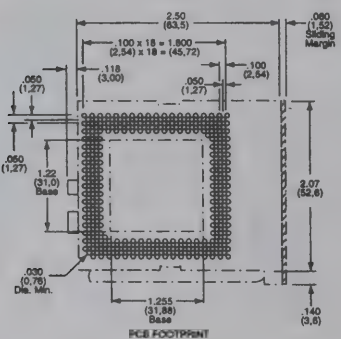
ZIF PGA SOCKETS FOR INTEL® PENTUM PROCESSORS





1-amp sockets feature 20 milliohms maximum contact resistance, 50 mate/unmate cycle performance. Meet or exceed EIA-364-28, Cond. 5 and are rated for one amp, for vibration and EIA-364-27 Cond. A for shock. Solderability is 95 percent coverage per EIA-364-52. Operating temperature: –55°C to +105°C. Acceptable lead diameter: 0.018″ ±0.002″. Acceptable lead length: 0.070″ minimum. Made of phosphor bronze (duplex plated with gold in contact area) with stainless steel mechanical lever and tin/lead on tails.

Stock No.	Type	W x H	Description	1-49

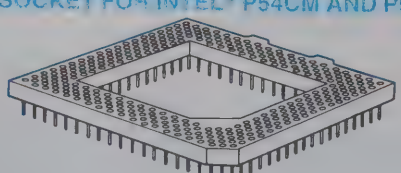
(4721) (de03529)

PGA (LIF) SOCKET FOR INTEL® P54CM AND P55 DEVICE



Low insertion force sockets designed for 0.062″ thick PCB. Includes gold inner contact. Will accommodate wire formed and metal frame heat sink clips from a variety of suppliers. Socket has 15% smaller surface area to allow more space for components. Contact rating: 3 amps. Dielectric withstanding voltage: 1000Vrms. Insulation resistance: 1000 megohms.

Stock No.	Type	Device	1-49
16F4417	PIM320-7D37B5-V	P54CM	12.73

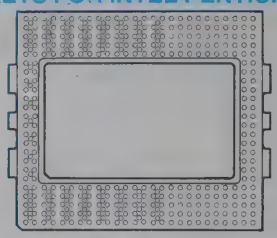
(4816) (ne08385)

PGA (LIF) SOCKETS FOR INTEL PENTIUM PRO DEVICES



Low insertion force sockets are designed to provide properly formed solder joints for 0.062″ and 0.093″ thick PCBs, greatly reducing costly solder-bridging of terminals. Will accommodate wire formed and metal frame heat sink clips from a variety of suppliers. 15 percent smaller surface area to allow more space for components. Contact rating: 3 amps. Dielectric withstanding voltage (DWV): 1000Vrms. Insulation resistance: 1000 megohms.

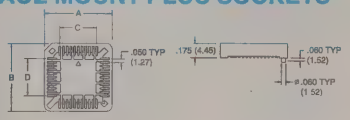
SURFACE MOUNT PLCC SOCKETS

SMD



Surface mount PLCC sockets feature a low profile, 0.175″ (4.45), and an inspection window. Center pad provides area for pick and place/socket bonding. Accepts standard JEDEC mounting pad layout. Temperature range: –50°C to +105°C. Current rating: 1A. Capacitance: 1.0 pF min. Insulation resistance: 1000MΩ max. Withstanding voltage: 600VAC. Contact material: phosphor bronze. Contact plating: 150µ″ tin/40µ″ nickel (min.). Insulator: hi-temp PPS. Flammability rated: UL94V-0, 220°C. Dimensions: *See chart below.*

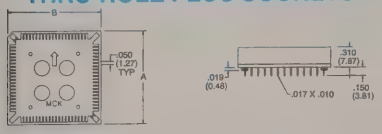
THRU-HOLE PLCC SOCKETS



Plastic leaded chip carrier sockets conform to EIA JEDEC outline for plastic leaded chip carriers on 0.050″ (1.27) centers. Polarization indicators identify positive chip carrier orientation. Operating temperature range: –55°C to +105°C. Current rating: 1A. Capacitance: 1.0pF max. Contact resistance: 30mΩ max. Insulation resistance: 1000MΩ min. Withstanding voltage: 600VAC. Socket body material: hi-temp PPS. Flammability rated: UL94V-0, 200°C. Contact material: phosphor bronze alloy 5210, full-hard. Plating: 0.000150″ tin/0.000040″ nickel (min.).

(4604) (ne06510)

SOJ SOCKET

SOJ socket has 40 positions. Contact resistance: initial = 15mΩ max.; final = 10mΩ max. after testing. Insulation resistance: greater than 10,000 ohms. Operating temperature: –50°C to +105°C. Dielectric withstanding voltage: 1000VAC rms (1 min.). Capacitance: less than 1.0pF at 1000kHz. Durability: 25 cycles.

Stock No.	Type	Description	1-9
66F8686	SOJ40P-4.0	SOJ Socket	0.67

(4606) (ne06512)

HIGH-PROFILE ELEVATED SIP SOCKET

Elevated SIP socket allows for greater package density, stacking of PCB, and maximizes airflow. Contact material: half-hard brass. Shell: beryllium copper.

Stock No.	Type	Description	1-9
66F8685	SIP1X32-011B	High-Profile Elevated SIP Socket	0.62

(4605) (ne06511)

SURFACE MOUNT PLCC SOCKETS

Surface mount PLCC sockets are designed to accept square and rectangular JEDEC chip configurations. Features an extremely low profile – 0.177″ (4.5mm). High normal force contacts are designed to enhance chip retention. Standoffs are provided to ease process cleaning and heat dissipation. Contact resistance: 20mΩ max. Durability: 25 cycles. Contact: phosphor bronze with tin-lead plating over nickel. Temperature range: –55°C to +85°C. *Order PLCC extraction tool separately below.* Optional polarization peg versions are also available for automated socket placement; *contact your local Newark sales office.*

DIMM Socket

DIMM SOCKETS

Surface mount compatible 0.50″ center DIMM (Dual In-line Memory Module) sockets accept all JEDEC module outlines. Come equipped with metal fork locks, which are preferred when used with wave soldering processes. Sockets also include polarizing posts to orient the socket on the PC board. Keyed to prevent mating with the wrong module. Voltage: 100V. Current: 1A. Contact resistance: 20mΩ max. Mating force per pair: 5 oz. max. Durability: 25 cycles. Contact: phosphor bronze with select paladium nickel/gold flash. Temperature range: –40°C to +85°C.

SIMM SOCKETS

Surface mount compatible 0.50″ center SIMM (Single In-line Memory Module) sockets have 2 points of contact with standard JEDEC modules. Include polarizing posts to orient the socket on the PC board and polarizing ribs to orient the module in the socket. Sockets also include metal latch. Voltage: 250V. Current: 1A. Contact resistance: 30mΩ max. Normal force: 150g. Durability: 25 cycles. Contact: phosphor bronze. Temperature range: –40°C to +85°C. Other circuit sizes are available; *contact your local Newark sales office.*

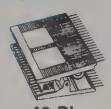
DIP CLIP IC TEST CLIPS

14-Pin

24-Pin



40-Pin

IC test clips with spring-loaded wiping action for positive connections. Molded contact barriers allow connections on live boards without shorting adjacent contacts. Spring-tempered nickel-silver contacts except **types 5120** and **5220** which are gold-plated beryllium copper. Rated 1 amp, +102°C.

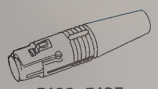
XLR STYLE AUDIO CONNECTORS



5109, 5125

5110, 5126

5117, 5130

15 amps; 133Vrms operating voltage. Temperature range: –55°C to +125°C. Satin-finish, nickel-plated zinc or aluminum shell. Low noise/vibration performance. Precision stamped tin-plated copper alloy contacts. Nickel-plated steel barrel. Cable clamp accommodates 3 to 8mm diameter cable. Mate with competitive units.

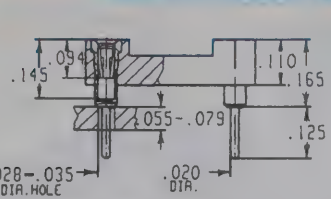
SOCKETS

LOW-PROFILE DIP SOCKETS



Standard low-profile DIP sockets have 0.020″ (0.53) diameter solder tail. Open frame design. Stamped beryllium copper, four-finger inner clip screw-machined brass receptacle sleeves. Glass-filled thermoplastic polyester insulator, rated UL 94V-0. Current rating: 3 amps. UL recognized. All are 0.100″ (2.54) pin spacing; 6th digit of type number indicates row spacing: **3** = 0.300″ (7.62), **4** = 0.400″ (10.16), **6** = 0.600″ (15.24).

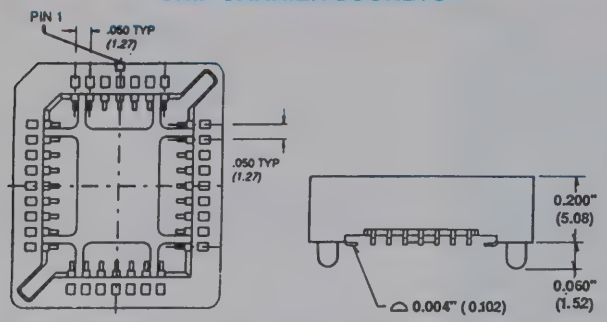
PLCC-SMT SERIES SURFACE MOUNT PLASTIC LEADED CHIP CARRIER SOCKETS



High-density, low-profile 0.200″ (5.08) height. Phosphor bronze contacts with tin-over-nickel plating. High-temperature, black polyphenylene sulfide insulator, rated UL94V-0, is compatible with IR reflow and wave soldering. Insertion force: 180g/pin maximum. Withdrawal force: 28.35g/pin minimum. Contact resistance: 20mΩ. Rated 1A. Temperature range: –55°C to +105°C. For automatic assembly.

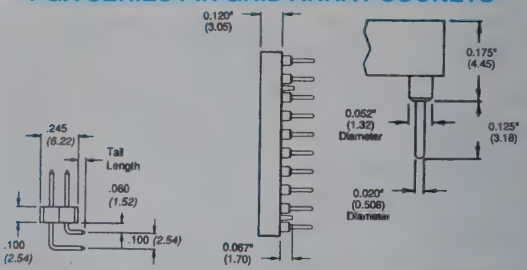
ONE-STOP SHOPPING . . . WITH ONE CALL AND ONE PURCHASE ORDER.

PGA SERIES PIN GRID ARRAY SOCKETS



6-finger beryllium copper contacts provide consistent insertion/withdrawal and contact resistance. Plated with 10μ″ gold over nickel on contact area and 200μ″ tin on terminal area. Low insertion force for easy installation and removal. Precision machined half-hard brass shell protects against flux contamination and solder wicking. Current rating: 1A. Temperature range: –65°C to +105°C. High temperature IR compatible. Black glass-filled polyester housing, rated UL94V-0.

Stock No.	Type	Pins	Grid	Dimensions A	Dimensions B	1-24

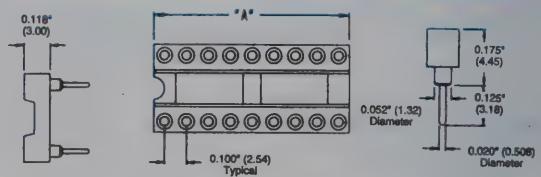
ICE SERIES SCREW MACHINE DIP SOCKETS



Reliable 4-finger beryllium copper contact provides stable contact resistance and prevents "IC walkout" during vibration. Plated with 10μ″ gold over nickel on contact area and 200μ″ tin on terminal area. Pin socket design prevents solder wicking and flux entrapment. Open body design provides excellent convection cooling. Black glass-filled polyester housing, rated UL94V-0. Current rating: 1A. Temperature range: –65°C to +125°C.

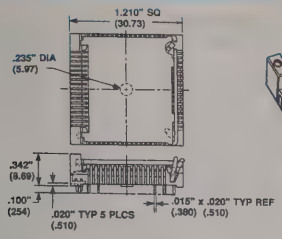
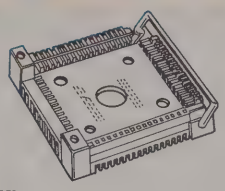
TEXTOOL™ IC SOCKETS

TEXTOOL™ LEADLESS CHIP CARRIER SOCKETS





68-lead sockets accept JEDEC leadless "type A" chip carrier package. 0.015 x 0.200″ (0.381 x 5.08) rectangular leads resist bending and distorting. 0.050″ (1.27) thick aluminum lid makes socket ideal for less demanding heat sink requirements. 0.100″ x 0.100″ (2.54 x 2.54) PC-pin pattern and 0.342″ (8.69) profile allow mounting on 0.500″ (12.70) centers. Device to socket and socket to PC board orientation polarized for 1-way fit. Hole in body facilitates board cleaning. Rated 1A. Socket material UL94V-0 rated. **Type 268-5400-00-1102** has full lid. **Type 268-5400-11-1102** has no lid. UL recognized file no. E68080.

TEXTOOL™ ECONO ZIP® SOCKETS

Zero insertion pressure DIP sockets are ideal for field device failure, IC update, reprogramming, and initial programming at installation. Contact material: beryllium copper. Insulator material: glass fortified polyetherimide UL94V-0 rated. Choice of contact plating: 250μ″ bright tin plate over 75μ″ copper; or gold flash 5μ″ MIL-G-45204, Type II, Grade C over 50μ″ nickel QQ-N-290, Class 2. Contact normal force: 150 gram min./ contact. Rated 1A. Dielectric withstanding voltage: 1000Vrms.

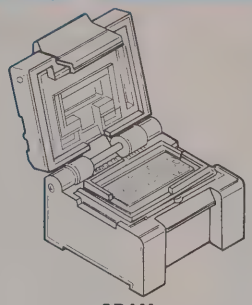
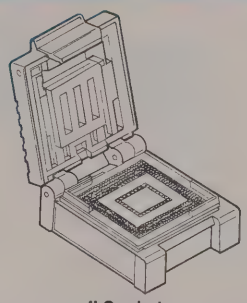
TEXTOOL™ BALL GRID ARRAY SOCKET PLATFORMS



SRAM



II Socket

Ball Grid Array (BGA) socket platforms are designed for testing and burn-in applications. 1.27mm pitch sockets feature modular construction that allows for a cost-effective socket proliferation for standard or custom packages. Course alignment on device body is followed by a secondary fine alignment to the solder balls. Flat contact head provides for low resistance and minimal solder ball deformation. Insulation material is polyethersulfone (PES), rated UL94V-0. Current rating: 1 amp. Dielectric withstanding voltage: 1000Vrms. Temperature rating: –55°C to +150°C. Can be adapted to either BGA or LGA formats; for other options, *contact your local Newark sales office.*

NEWARK CD-ROM 3.0 with Newark CONNECT

NEWARK ELECTRONICS

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Newark
CD-ROM 3.0

- Browse our inventory of over 150,000 components
- Access our Web site for up to date stock levels
- Search by stock number, part number, key-word, and more

Newark CONNECT®: stockroom and order management software

- Tracks stock automatically
- Choose minimum and maximum inventory levels
- Generates replenishing orders automatically
- Reduces costs and cycle time
- Gets your order shipped within 24 hours
- Makes record-keeping easy

From PC Board accessories to power switches, Newark stocks more components and represents more manufacturers than any other catalog distributor.

Call **1-800-4NEWARK** for more information, or visit our Web site at **www.newark.com.**

ISO 9002 Certified
REGISTERED
RS 35104

The new Newark CD-ROM 3.0

- **Over 150,000 products from over 300 manufacturers**
- **Newark CONNECT® stockroom and order management software**
- **Unique Internet access and Web site interface**

Call 1-800-4NEWARK for more information about Newark's CD 3.0.

Discover the most powerful resource in electronics-the Newark **CD-ROM 3.0.** This single **CD-ROM** puts more than **150,000 products** from over **300 manufacturers** at your fingertips.

The powerful search engine lets you find products in a variety of ways, including product name, manufacturer name, manufacturer part number, Newark stock number, key-word, product category or customer associated number.

Newark **CD 3.0** even offers Internet Access. Or, use your existing provider to interface directly from the **CD-ROM** to Newark's Website at **www.newark.com** and place your orders online.

We have it today, so you'll have it tomorrow.™

SUBMINIATURE SWITCHES

TSP, TST TINY SUBMINIATURE SEALED SWITCHES

Fig. 1

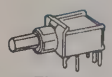

Fig. 2

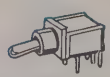

Fig. 3

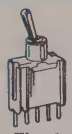

Fig. 4

Available in toggle or pushbutton versions. Specially designed for thru-hole and surface mount applications. Washable process sealed construction. Contacts: 0.4VA max. at 20VDC or peak AC; gold over nickel. Initial contact resistance: 20 milliohms max. Operating temperature range: –30°C to +85°C. 0.100″ pin spacing. Bushing: 0.170″. **Washable sealed construction.**

TT Series fit 0.100″ grid PC. Units indicating letter **"G"** in type number have gold contacts rated 0.4VA max. @ 20VDC or peak AC; other **TT** units have silver contacts rated 3A, 125VAC or 28VDC resistive. Type number code for PC terminal table below: **PC** = straight terminals, **RA** = right angle, **VRA** = vertical right angles. Type number suffix indicates actuator dimension and bushing: **1** =0.21″, **2** =.29″, **3** =.57″, **6** =.590″, **7** =.458″, **8**=.530″, **9**=.415″. **T** = 10-48 bushing, **T¼** = ¼-40 bushing. Units black, but red and white available on special order; *contact your local Newark sales office.*

TRD SERIES ROCKER AND PADDLE SWITCHES

WL Suffix
WLLR(*) Suffix

Panel mount rocker uniquely fits in 15/32″ round hole. Contact rating: gold 0.5VA max. @ 20VDC or peak AC. Silver 1.5A @ 125VAC or 28VDC. **TRD11** prefix = gold, **TRD13/23** = silver. Contact timing: break-before-make. Dielectric strength: 1500VRMS at sea level. Operating temp.: –20°C to +80°C. Case material: thermoplastic. Terminals/fixed contacts: gold over nickel or silver plate. Paddle switch **suffix: 20WL**; rocker; **10WL**. Type numbers with **WLLR** feature red LED in rocker.

SWITCHES AND VOLTAGE DIVIDERS

MT SERIES MINIATURE TOGGLE SWITCHES

Feature molded-in, gold flash terminals to prevent solder, flux and contaminants from entering contact area. Contacts are solid silver and are rated 6A at 125VAC, 3A at 250VAC, 4A at 28VDC. Cases are green diallyl phthalate. All have ¼-40 high-torque bushings except **MTG**: 15/32" bushings. UL listed. ( ) denotes momentary position.

MTA SERIES WITH MINIATURE BAT TOGGLES AND LUG TERMINALS

Terminals accept two 20AWG wires.

D5 SERIES DIGITAL VOLTAGE DIVIDERS

3-Digit Voltage Divider

Use pushwheel switches having Kelvin-Varley circuit for resistance selection. Changes in output voltage obtained by adjusting individual switches in an assembly, using lightly detented pushbuttons. Front panel mounting, resistors are laser-trimmed, thick-film, surface-mount arrays. Gold contacts. Power rating: 1 watt @ 25°C max. Accuracy: 0.1% of input voltage. Life expectancy per selection: 100,000 cycles. Operating temperature: -20°C to +80°C. Voltage dividers are miniature with 0.945H x 0.300W x 1.29″D.

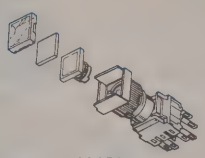
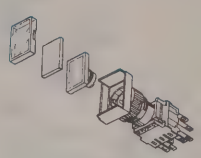
LIGHTED PUSHBUTTON SWITCHES

COMMAND SERIES 16mm LIGHTED PUSHBUTTON SWITCHES

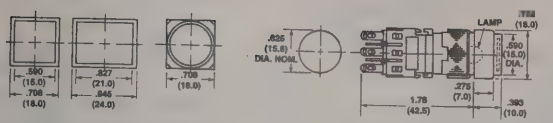
164EL



164SL



164TL



Instrument-grade switches feature snap-acting double-break, gold-plated, silver-clad contacts that satisfy logic level and power switching requirements. Electrically independent of one another and isolated from the lamp circuit, contacts are rated 0.4VA at 20VDC or peak AC, 5A at 250VAC or 24VDC resistive. Dielectric strength: 1,500Vrms. Life: 100,000 operations. Fit 0.625″ (15.8) D panel hole. UL recognized E-51302. Units accept T-1¾ midget flanged base lamp. *Order lens button sets separately on this page.*

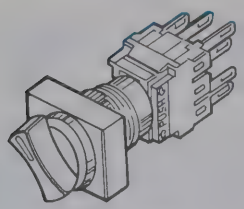
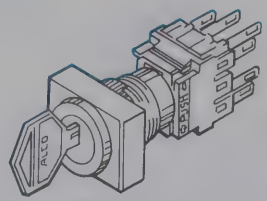
ROTARY AND KEYLOCK SWITCHES

COMMAND 164 SERIES SELECTORS & KEYLOCKS



164P Selector



164J Keylock w/2 Keys

Feature snap-acting double break gold plate over silver-clad contacts. Rated 0.4VA at 20VDC or peak AC, 5A at 250VAC or 24VDC resistive. 90° throw. Contacts provide reliable operation at logic levels and for power switching applications. Contacts electrically isolated from one another. Life: 100,000 operations. Temperature range: –20° to +70°C. UL recognized.

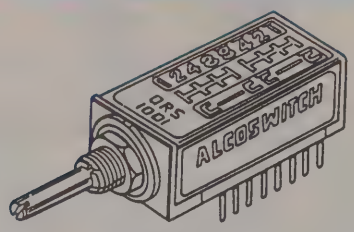
DRS SERIES ROTARY DIP SWITCHES WITH METAL SHAFT ACTUATORS



DRS-1001

Heavy gold-flashed nickel contacts rated 0.4VA maximum @ 20VDC or peak AC. Initial contact resistance: 50 milliohms maximum. Dielectric strength: 500V RMS at sea level. Life expectancy of 10,000 rotations. Operating force of seven inch-ounces maximum torque. Dual in-line mounting. **Types DRS-1-12** and **DRS-2-6** are decimal code switches. **Type DRS-1001** is a BCD and BCD complement. 2.05″ L x 0.590″W (52.07 x 14.99).

Stock No.	Type	No. Poles	Positions	1-24	25-49	50-99	100-249

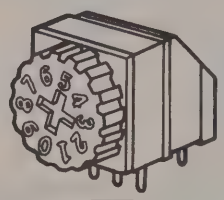
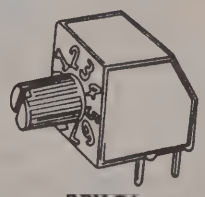
(4784) (de52138)

DR SERIES ROTARY DIP SWITCHES

DRD



DRW



DRM-RA

Gold-flashed brass contacts rated 0.4VA @ 20VDC max. Dielectric strength: 300 VAC rms. PC and right angle PC ("**RA**" suffix) terminals. Circuit type reference for table below: A = 10-position BC decimal; B = BCD complement; C=16 position Hexadecimal; D = 16-position Hexadecimal complement. **DRD** are flush actuators with 0.236H x 0.394W x 0.394D. **DRM** are mini-shaft actuator with 0.523H x 0.394W x 0.394D. **DRW** are flush rotary wheels with 0.39H x 0.39W x 0.48D.

MSS, MSSA SERIES TELECOM GRADE SLIDES

MSS-2250RG

MSSA1450

Compact PC board units have silver contacts rated 300mA at 125VAC, or gold (**G suffix**) rated 0.4VA at 20VDC or peak AC. Initial contact resistance: 20mΩ maximum. **MSS** contacts: moving, beryllium, fixed, brass; electrical, make-before-break. Epoxy terminal seal. **MSSA** contacts: moving, beryllium copper, fixed-brass. Lever type UP = upright, RA = right angle.

ASE/F SERIES AUTO-INSERTABLE SLIDES

ASE-42

ASF-42

ASF-62R

Units withstand aqueous or solvent cleaning processes. High temperature antistatic plastic withstands surface mount, vapor phase reflow or wave soldering. **Type ASE** extended actuator open-ended case allows washout after cleaning. **ASF**: DIP package with flush actuator allows auto insertion on standard IC equipment. Tape seal and closed case provide process seal. Bevel length 0.260″ (6.60) except 4P3T: 0.360″ (9.14). Surface mount terminals (not shown) 0.100″ (2.54) on center. R = right angle. L = surface mount.

VX SERIES SOLID-STATE BASIC SWITCHES

Plunger or lever operated Hall-effect switches are physically interchangable with **V3** or **V7 series**. Tested to over 100 million electrical operations. Digital current sink output. Supply voltage: 4.5-24VDC. Supply current: 15mA max. Current per output: 10mA. UL recognized, CSA certified. 0.62H x 0.40W x 1.135″L. Switches with different operating forces than those listed below are available; *contact your local Newark sales office.*

Stock No.	Type	Lever Style	Operating Force

SPDT circuitry for power load switching and motor handling capacity applications. Rated: 125, 250, and 480VAC. Cover and case are general-purpose phenolic. **HT series** High temperature versions, that withstand temperatures up to +1000°F, are also available; *contact your local Newark sales office.* Type number suffix descriptions: **-A2** = bottom-facing screw terminals (6-32 screws); **-P4** = side-facing screw terminals; no suffix = solder terminals. Meet ML-S-8805 standard. UL recognized, CSA certified.

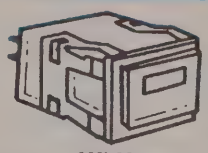
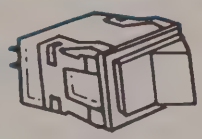
AML32 SERIES PUSHBUTTON & AML34 SERIES ROCKER POWER DUTY SWITCHES



AML32



AML34

AML32 series switch is a rectangular pushbutton unit with black bezel. 125-volt red neon lamp (included), and 0.187 x 0.020" (4.75 x 0.508) solder/quick connect terminals with integral lamp circuit. Switch is alternate action, DPST, normally open, form X. **AML34 series** switch is a rectangular rocker unit with black bezel, 0.187 x 0.020" (4.75 x 0.508) solder/quick connect terminals, 2-pole 2 form A silver contacts, maintained action. UL recognized. CSA certified. *Order switch buttons and rockers separately on this page.*

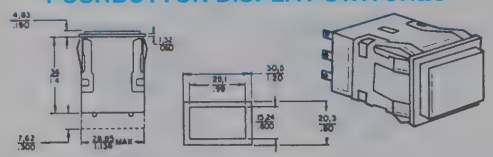
(4923) (de51472)

PUSHBUTTON SWITCHES

AML11 SERIES LIGHTED & NON-LIGHTED SOLID-STATE PUSHBUTTON DISPLAY SWITCHES



Hall-effect reliability and low-volt signals interface with nearly all DC logic level loads. Max. supply current: 3.5mA (released). Black bezel. Type numbers with 9th digit **"2"** have 0.110″ x 0.020″ (2.79 x 0.508) solder/QC terminals; **"3"** have 0.025″ (0.635) sq. PC terminals. All are 5VDC sinking, momentary action. Alternate action units are also available. Panel cutout: 1.14″ x 0.750″. Lighted units use incandescent T-1 ¾ wedge base lamp nos. 73, 85, 86 ordered separately; *contact your local Newark sales office. Order* **AML51** *switch buttons separately on this page.*

NON-LIGHTED

Stock No.	Type	Terminal	Bezel	Each	2-5	6-10
23F4316	AML11BBA2AA	Q-C	Square	12.09	11.28	10.58

LIGHTED

23F4318	AML11CBA2AA	Q-C	Square	14.25	13.30	12.47
23F4320	AML11CBA3AA	PC	Square	14.25	13.30	12.47
23F4321	AML11FBA3AA	PC	Rectangle	15.20	14.18	13.29

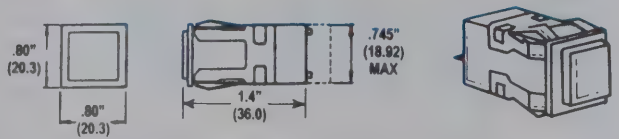
(4860) (de01379)

AML21 SERIES INCANDESCENT & NON-LIGHTED ELECTRONIC CONTROL PUSHBUTTON SWITCHES



Meet CEE requirements. Type numbers with 10th digit **"A"** have silver contacts rated 2A, 250VAC and 24VDC resistive; 3A 125VAC. 10th digit **"B"** have gold contacts rated 100mA, 12VAC/DC resistive. Terminals are solder or quick-connect, except those with ninth digit **"3"**, which are PC board or push-on. Panel cutout: 0.75″ square. Lighted units use incandescent T-1¾ wedge base lamp nos. 73, 85, 86 *ordered separately; contact your local Newark sales office. Order* **AML51** *switch buttons separately on this page.*

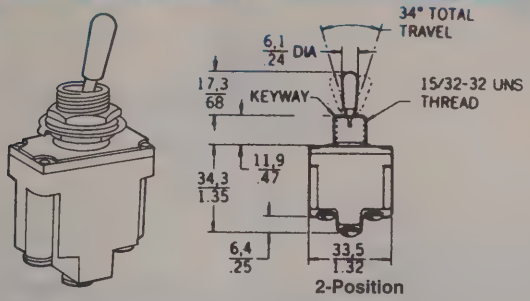
TOGGLE SWITCHES

TL SERIES 2-POSITION ENVIRONMENTAL SEALED TOGGLE SWITCHES, MILITARY APPROVED TO MIL-S-3950



2-Position

Sealed switches feature strong non-tracking case, screw terminals, silver-cadmium oxide contacts. **A, D,** and **E** suffixes in type numbers denote pull switches: **A** locks in 3-positions, **D** locks out of center position, **E** locks in center position. Operating temperature range: –65°C to +71°C. Lever operates on direct-action, spring-loaded mechanism. L191 UL/CSA rating code: 15A-125/250/277VAC; ½HP-125VAC; 1HP-250/277VAC; 5A-120VAC. L192 UL/CSA rating code: 10A-125/250/277VAC; ¼HP-125VAC; ½HP-250/277VAC; 3A125VAC. ( ) indicates momentary action.

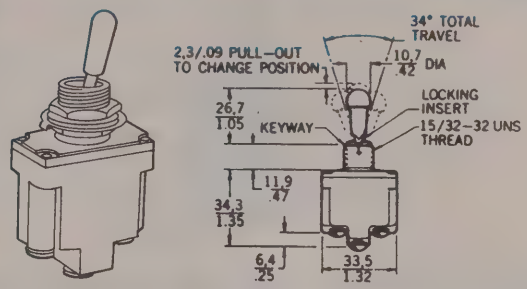
TL SERIES 3-POSITION ENVIRONMENTAL SEALED TOGGLE SWITCHES, MILITARY APPROVED TO MIL-S-3950



Sealed switches feature strong non-tracking case, screw terminals, silver-cadmium oxide contacts. **A, D,** and **E** suffixes in type numbers denote pull switches: A locks in 3-positions, **D** locks out of center position, **E** locks in center position. Operating temperature range: –65°C to +71°C. Lever operates on direct-action, spring-loaded mechanism. L191 UL/CSA rating code: 15A-125/250/277VAC; ½HP-125VAC; 1HP-250/277VAC; 5A-120VAC. L192 UL/CSA rating code: 10A-125/250/277VAC; ¼HP-125VAC; ½HP-250/277VAC; 3A125VAC. ( ) indicates momentary action.

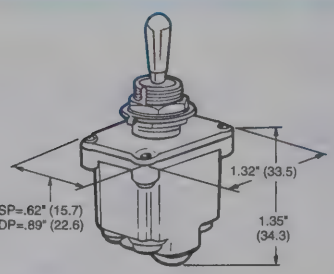
SEALED TOGGLE SWITCHES

NT SERIES TOGGLE SWITCHES



Features• Screw terminals
- **Completely sealed switching chamber (complies with UL 508, paragraph 13.3 hose-down tests**
- **Step-design case for added space between terminals preventing shorting**
- **Pull to unlock levers available**
- **Spring-loaded actuating mechanism provides excellent tactile feedback**
- **High-impact strength, non-tracking case enhances electrical stability**
- **Temperature range: –40° to 71°C (–40° to 160°F)**
- **UL recognized, CSA certified**

Designed to meet severe environment application needs for a rugged, cost-effective toggle switch. Quality construction features include a molded in elastomer seal between the toggle lever and bushing, and between the cover and case. Terminal inserts are molded into the high-impact strength thermoplastic case. Includes mounting hardware. "NONE" in table indicates toggle lever is blocked from these positions. Toggle becomes 2-position with center being one extreme position. See table below for electrical ratings. 15⁄32"-32 UNS thread.

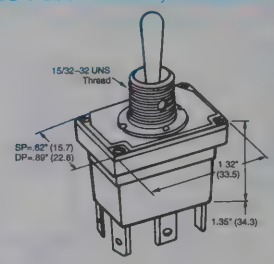
NT SERIES FLAT BASE, SEALED TOGGLES



Features• Quick connect
- **Sealed switching chamber**
- **Flat base with quick-connect terminals mating connectors are available separately; *contact your local Newark sales office***
- **Spring-loaded actuating mechanism provides tactile feedback**
- **High-impact strength, non-tracking case enhances electrical stability**
- **Temperature range: –40° to –71°C (–40° to 160°F)**
- **UL recognized, CSA certified**

Designed to meet severe environment application needs for rugged cost-effective manual switches. Identical to the stepped base style in construction and features. Allows for PC Board or connector use for easy wiring/connection. See table below for electrical ratings. 15⁄32"-32 UNS thread. Mounting hardware included.

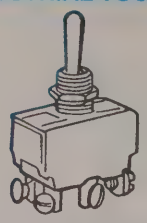
TOGGLE AND PUSHBUTTON SWITCHES

TS SERIES INDUSTRIAL TOGGLE SWITCHES



For use in light industrial applications. Provided with lever-to-bushing seals. Electrical ratings: 15A @ 125, 250, 277VAC; ½HP @ 125VAC; 1HP @ 250/277VAC. 5A @ 125VAC. UL recognized. CSA certified. Models with **"15"** suffix have screw terminals, **"115"** have solder terminals, and **"95"** have quick-connect terminals. **"511"** prefix identifies models having a pre-molded, pressed-in seal instead of a standard O-ring. 1-POLE versions are 1.08H x 0.62W x 1.13L" (27.40 x 15.70 x 28.70); 2-POLE versions are 1.06H x 0.75W x 1.31L" (27.00 x 19.00 x 33.30).

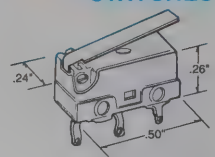
UX SERIES EXTRA- SUBMINIATURE SNAP-ACTING SWITCHES

NEW



UX

- **Small Size with Power Duty or Low Energy Power Ratings**
- **Cost-Effective, Rugged Construction**
- **Similar Size and Mounting as SX Series**
- **Variety of Termination and Lever Options**

Extra-subminiature switches feature choice of solder or PCB mount terminals, low-energy or power-duty ratings. Operating temperature: –25° to +85°C. UL recognized, CSA certified. Mounting similar to SX-style switches.

Stock No.	Type	Ratings	Oper. Force	Terminal	Actuator	Each

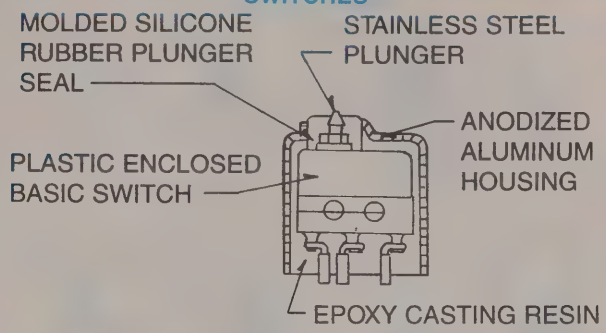
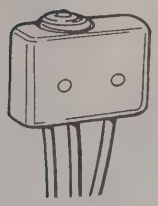
SE/XE SERIES MINIATURE SEALED BASIC SNAP-ACTING SWITCHES





Epoxy potted in corrosion-resistant aluminum housing. **Types 1SE, 5SE** switches enclose an **SM series** basic switch and **type 1XE** switches use an **SX series** basic switch and are qualified to MIL-S-8805. Operating force 5-17 oz. Units with **"T"** suffix have solder terminals; listings without suffix (i.e., **type 1SE1**) have 1′ wire leads. Numerical suffixes signify lead wire length in feet (i.e., -3=3′. Dimensions: **Type SE:** 0.75H x 0.34W x 0.88″L. **Type XE:** 0.75H x 0.32W x 0.62″L.

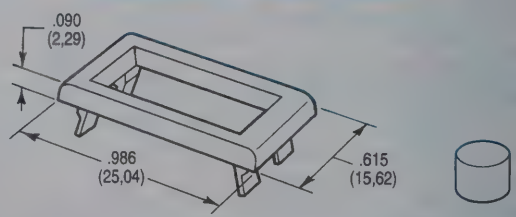
HARDWARE FOR SWITCHES



Plastic caps for miniature and subminiature pushbutton switches. Nickel-plated hex nuts and dress nuts for miniature and subminiature toggle and pushbutton switches. Bezels snap into panel opening and are independent from switch mounting. Accurate positioning of the PC-mounted switch relative to the panel opening is necessary to provide proper clearance between actuator and bezel. Material: nylon. Finish: Round caps-Gloss; Square cap-Matte.

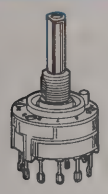
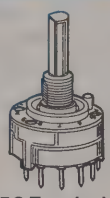
A SERIES ROTARY SWITCHES



Solder Terminals



PC Terminals

Switch rating: 2.5A at 125VAC; 350mA at 125VDC. Nonshorting contacts. Indexing: 30°. Operating temperature: –30°C to +65°C. Actuator: Gf nylon. Housing and bushing: Gf nylon. Movable contacts: coin silver, silver-plated. Stationary contacts and terminals: brass, silver-plated. Panel mounting: 0.386″ (9.80) dia. hole. Hardware: nut, lockwasher, stop ring for user-selectable stops. UL recognized, CSA certified.

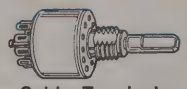
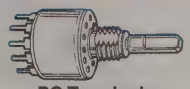
M SERIES HALF-INCH ROTARY SWITCHES



Solder Terminals



PC Terminals

Carry rating: 6A continuous. Switch rating: 250mA max. at 125VAC or 28VDC. Nonshorting contacts. Indexing: **prefix ME** and **MF** in type number = 36°; **prefix MG** and **MH** in type number = 30°. Operating temperature: –30°C to +85°C. Actuator: zinc alloy, nickel-plated. Housing and bushing: zinc alloy. Base: diallyl phthalate or melamine phenolic. Contacts and terminals: copper alloy, silver-plated. All terminals insert molded. Panel mounting: 0.250″ (6.35) dia. hole. Hardware: nut, lockwasher. All models have 360° rotation with no stops. Stop rings are supplied for user-selectable stops.

PN SERIES ALTERNATE ACTION PUSHBUTTON SWITCHES

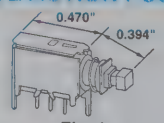

Fig. 1

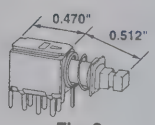

Fig. 2

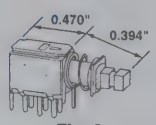

Fig. 3

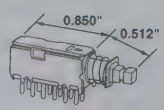

Fig. 4

PN-1 = momentary, PN-2 = locking. Incorporate a bifurcated wiping contact design that offers high reliability. Rating: 0.2A @ 30VDC max. Electrical life: 10,000 make-and-break cycles at full load. Mechanical life: 10,000 on/off cycles. Operating temperature: –10°C to +60°C. Actuator: polyacetal. Movable contacts: silver-plated (or clad) phosphor bronze. Terminals: silver-plated brass, epoxy seal.

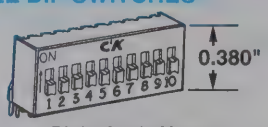
Vertical Mount



Right-Angle Mount

Withstands machine soldering and cleaning. Carry rating: 100mA max. at 50VDC. Switch rating: 100mA max. at 5VDC or 25mA max. at 25VDC. SPST function. Operating temperature: –40°C to +85°C. Actuator: Gf nylon (UL94V-0). Housing: Gf polyester (UL94V-0). Terminals: Tin-lead alloy. Terminal spacing: 0.100″ (2.54).

TD SERIES ULTRA-MINIATURE SURFACE MOUNT HALF-PITCH DIP SWITCHES

Surface mountable, low-profile SPST DIP switches with spacing of 0.050″ between terminals. Body height of 0.098″. Gull wing terminals are tin-lead plated. Taped sealed switch is vacuum pick and place compatible and will withstand machine soldering and cleaning. Can withstand vapor phase and IR soldering up to 260°C. Contact rating: 0.4VA @ 20VDC. Contacts: gold plated. Life expectancy: 1,000 cycles min. Initial contact resistance: 50 milliohms max.

Stock No.	Type	Pos.	Term.	1-24	25-99	100-249

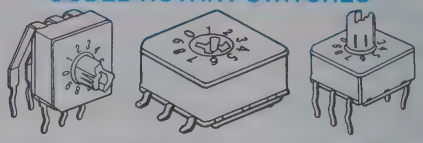
(4980) (ne07384)

CD SERIES ULTRA-MINIATURE DIP CODED ROTARY SWITCHES



Withstand machine soldering and cleaning. 8- and 10-position with BCD output and 16-position with hexadecimal output, real or complement codes. Flush version with cross-slotted rotor, or available with extended shaft actuator. PC or right angle terminals. Surface mount, gull wing terminals available on upright version, vapor phase or IR reflowable to 260°C. Contact rating: 0.4VA @ 20VDC. Electrical life: 20,000 position changes. Initial contact resistance: 50m max. Insulation resistance: 100MΩ min. Operating temperature: –25°C to +85°C. Contacts: gold over nickel. Terminals: 90/10 tin-lead. 8mm square case made with UL94V-0 materials. Switch body approximately 0.315 sq. x 0.158 high.

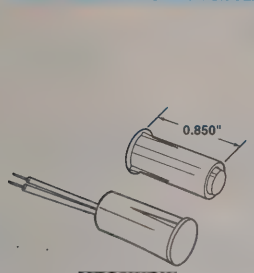
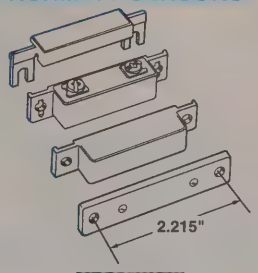
SWITCHES AND SENSORS

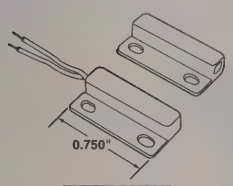
MPS SERIES MAGNETIC PROXIMITY SENSORS



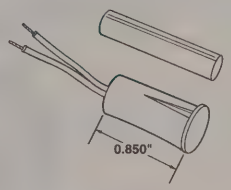
MPS9WGW



MPS20WGW



MPS45WGW



MPS95WGW

Sensors have SPST normally open reed switch. Reed switch opens when separately encased magnet is removed from proximity. Contacts are held closed when magnet is within actuation range. Contact rating: 0.3A @ 100VAC; 100VA max. @ 100 VDC; max. carry current 1.0A. Max. operating time: 1 ms, including bounce. Life expectancy: 10 million operations. Housing: UL94V-0, impact-resistant white ABS plastic, with patented O-ring protecting the reed switch. Potted 12″ wire leads, 22AWG.

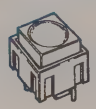
KS SERIES PUSHBUTTON KEY SWITCHES



KS series pushbutton key switches are rated 25mA at 50VAC or DC max. Operating temperature: –30°C to +65°C. Actuator: ABS or polycarbonate/ABS blend. Housing: nylon (UL 94V-0). Base: 0.488″ (12.40) square. Movable contacts: beryllium copper, silver-plated. Stationary contacts and terminals: copper alloy, silver-plated, epoxy seal. **Types KS11** are SPST Off-(On) and **type KS12** is SPDT On-(On).

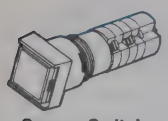
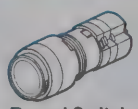
LIGHTED SWITCHES AND INDICATORS

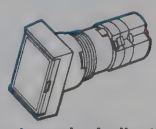
LUMOTAST 75 SERIES LIGHTED PUSHBUTTON SWITCHES AND INDICATORS



Square Switch



Round Switch



Rectangular Indicator

High quality, long-life SPDT and DPDT momentary and maintained pushbutton switches and indicators. Threaded mounting ring included, fits standard 0.638" (16.20) mounting hole dia. Three bezel styles, color: black. 4A at 250V AC or DC. Electrical Life: 60,000 - 2,000,000 operations, depending on load. Operating Temperature: –25°C to +55°C. T-4½ incandescent lamp. Housing: Polyamid, with solder terminals. Complete assembly length: 2.24" (57). Additional lens colors and LED lamps available. *For complete assembly, order switch lens, housing, lens, diffuser and lamp separately; contact your local Newark sales office.*

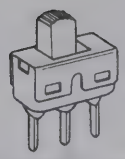
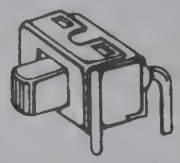
Solder terminals, panel mount



PC terminals, vertical mount



PC terminals, right-angle mount

"Q" in type number indicates that type is rated 6 amps at 120VAC or 28VDC; 3 amps at 250VAC. End contacts: coin silver, silver-plated. Center contact and terminals: copper alloy, silver-plated, epoxy seal. "B" in type number indicates that type is rated 0.4VA max. at 20 VAC or DC max. Contacts and terminals: copper alloy, with gold plate over nickel plate, epoxy seal. Actuator: black nylon. Housing: stainless steel. Case: diallyl phthalate (UL 94V-0). Switch support: brass or steel, tin-plated. Operating temperature: –30°C to +65°C. Panel mounting: 0.094″ (2.39) diameter holes, 0.690″ (17.53) spacing. Action for all switches is On-None-On. UL recognized, CSA certified.

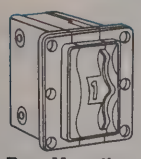
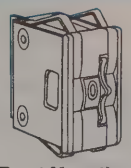
THUMBWHEEL SWITCHES

3 SERIES THUMBWHEEL SWITCHES



Rear Mounting



Front Mounting

Multi-section switches can be made by ordering number of sections desired and accessories such as screws, nuts, endplates, blank sections and connectors. Type numbers indicate individual switch sections. Thumbwheel is matte black with unsealed switch contacts. Operates at 50mV to 28VDC or 120VAC. Operating temperature range: –10°C to +65°C. ABS plastic body and wheel. Rotor contacts: precious metal on copper alloy. Stator contacts: hard gold over nickel over copper on epoxy fiberglass. Rated 1A continuous carry current, 100mA maximum switch current. Insulation resistance 10 ^{9} ohms minimum. Dielectric strength: 500Vrms minimum at sea level between common terminal and any output. *Order hardware separately on this page.*

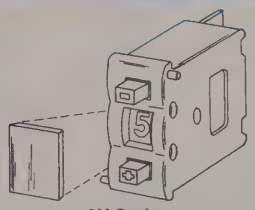
3U SERIES TINY PUSHWHEEL SWITCHES



3U Series

Subminiature switches are 0.622″ (15.80). Rating: carry-1A continuous. Switches are 100mA max. Operating voltage: 50mV to 28VDC. Operating temperature is –10°C to +65°C. Rotor contacts are gold over nickel on copper alloy. Stator contacts are hard gold over nickel. Housing is polycarbonate (UL94V-0) black. Pushwheel and pushbutton are polycarbonate (UL94V-0) black. *Order switch sections, endplates, blank sections, and spacers individually; contact your local Newark sales office.*

TM SERIES MINIATURE SNAP-ACTING SWITCHES

Contact rating: from low level to 15A @ 250VAC. Electrical life: 150,000 cycles at 15A @ 250VAC. Mechanical life: 1,000,000 cycles typical. Insulation resistance: 1000 meg-ohms min. Operating temperature: –55°C to +150°C. Movable contacts: gold alloy for ratings 1A @ 125VAC or less; fine silver for ratings greater than 1A @ 125VAC. Mounting: torque screws 2-5 in-lb.

Double throw switches are rated 20 amps, 125/250/480VAC; ½ amp, 125VDC; ¼ amp, 250VDC. Mounting holes will accept pins or screws of 0.139″ diameter maximum on centers 1.000″ ±.002″. Type numbers with **1C suffix** are recessed solder lug terminals of tinned copper; with **5C suffix** are screw terminals. Contact separation is 0.020″ except (*), which are 0.025″. To determine actuator type, see actuator code column: PO = pin, LO = leaf spring, TO = rigid lever, TX = adjustable rigid lever, AO = roller lever, RO = large plunger. UL recognized, CSA certified.

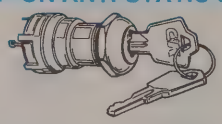
SWITCHLOCKS

A SERIES SNAP-ON ANTI-STATIC SWITCHLOCKS



Rated switch: 2.5 amps at 125VAC, 350mA at 125VDC. Rated carry: 5 amps continuous. Static resistance: >20kV at sea level. Lock: zinc alloy with stainless steel facing. 4-tumbler, single-bitted mechanism with 2 nickel-plated keys. Switch housing: gf nylon. Switch snaps onto lock. Movable contact: coin silver, silver-plated. Stationary contacts and terminals: brass, silver-plated. Key Pull Position: 1. Mounting hole: 0.760″ (19.30) dia. Mounting nut supplied. UL recognized, CSA certified.

8500 SERIES MIL-S-3950 SEALED SWITCHES

One Pole Two Pole Four Pole

Offers highest degree of environmental seal. Fine silver stationary contacts provide lower level current performance. Silver plated cad oxide moveable contacts for improved higher current performance. Screw terminals only. 15/32"-32 threaded bushing, with 0.076" keyway slot. Self-extinguishing base material. Current ratings (maintained): 20A res., 15A ind., 5A lamp load @ 28VDC; 18A, ¼hp @ 125VAC; 9A, ½hp @ 250VAC. Temperature range: -85°F to 160°F.

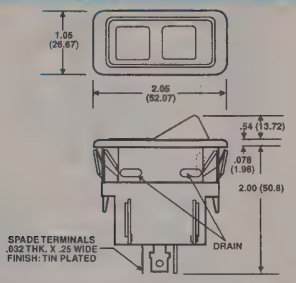
PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

ROCKER AND PUSHBUTTON SWITCHES

STANDARD SEALED ROCKER SWITCHES

NEW



Standard, non-illuminated, sealed rocker switches for harsh environmental applications. Feature totally sealed switch chamber; watertight to MIL-STD-108E. High capacity contacts eliminate interposing relays. Rocker button is easily replaced if damaged. Stainless steel retention tabs resist corrosive environments. Ratings: 18A @ 125VAC, 9A @ 250VAC, 1HP @ 250VAC, ½HP @ 125VAC, 20A @ 28VDC. Special rocker buttons available which allow for insertion of icons for marking purposes; *contact your local Newark sales office.*

NEW GENERATION ROCKER SWITCHES

Full-size rugged switches feature ergonomic design and are sealed to resist splashing and dust, IP42. Ratings: 15A at 125VAC, 10A at 250VAC, 15A at 28VDC. Slow-make/slow-break contact mechanism. Mechanical life: 250,000 operations min. Terminals: standard 0.250″ spade; silver-plated copper alloy. Dielectric: 1,000Vrms min. ( ) in table denotes momentary contact. Circuits available: SPST, SPDT, DPST, and DPDT, maintained and momentary action. Switches have thermoplastic base and rocker. Units featured are black frame, rocker and paddle style. Illuminated switches listed have 2 14VDC incandescent lamps, except **type NGR2501**, which has one lamp. Standard rocker actuator is two face, matte black, and snaps on and off the switch. Fits in panel cutouts 1.734 x 0.867″. *Rockers and lenses must be ordered separately.*

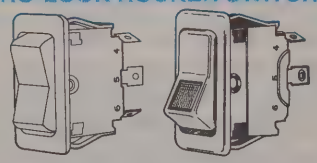
EURO-LOOK ROCKER SWITCHES



Standard and full-size rugged rocker switches are snap-mount with matte finish and easy actuation. Ratings: 15A at 125VAC. Slow-make/slow-break; butt-action designed for AC and low voltage DC applications. Featured units are sealed, with black mounting frame and standard brass 0.250″ spade terminals. Switches and actuators are black. Full and standard size switches featured have two lenses and a 14VDC bulb, except switch **type 8005K23** , which has one lens and 14VDC bulb; Thermoset base; thermoplastic rocker actuators. Dielectric: 1,000Vrms min. ( ) in table denotes momentary action. Other lens, contact, configuration and rocker versions available. Order lenses separately for illuminated switches. UL recognized, CSA certified.

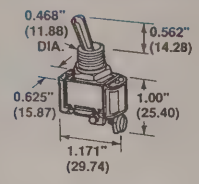
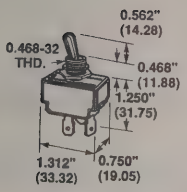
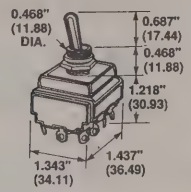
GENERAL-PURPOSE AC RATED TOGGLE SWITCHES



Single-Pole Screw Terminal



Double-Pole Spade Terminal



Three- and Four-Pole Solder Terminal

AC toggle switches are ideal for power applications. Employ slow-make/slow-break butt-action contact mechanism. Phenolic-metallic housing. All are one hole mount. Contact ratings: (for **types 7580** and **7590**): 6A @ 125VAC or 28VDC, 3A @ 250VAC; (for **types 7500, 7700, 7560** and **7690**): 15A @ 125VAC and 28VDC, 10A @ 250VAC. Bushing length is 0.469″(11.91), except (*) which is 0.344″ (8.74). One hexagon locknut and one knurled facenut included. UL recognized, CSA certified. NOTE: "( )" denotes momentary action.

PB SERIES MINIATURE PUSHBUTTON SWITCHES

Panel-mount units have solder lug terminals and coin silver contacts rated 6A @ 125VAC and 28VDC resistive, 3A @ 250VAC. For **types PB123**, action is On-None-On. For **types PB126**, action is On-None-(On). Base diallyl phthalate, bushing nickel-plate brass. Include 2 hex nuts, 1 lockwasher, black cap. UL recognized. Cap included.

Stock No.	Type	Cap Diameter	1-24	25-49	50-99

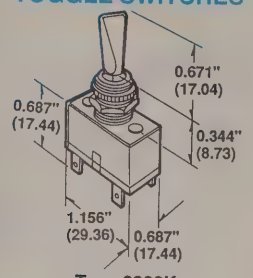
INDUSTRIAL AND MILITARY TOGGLE SWITCHES

DESIGNER LINE GENERAL-PURPOSE AC/DC RATED TOGGLE SWITCHES



Type 8280K

Designer line AC/DC switches feature quick-make, quick-break contact mechanism with nonteasable, self-cleaning, wiping contact action. All switches listed are rated 6A @ 125VAC/DC, 3A @ 250VAC/DC, except **type 8282K**, which is rated 3A @ 125VAC/DC, and 1A @ 250VAC/DC. **Type 8280K** has no rating @ 125VAC/DC. Come with "C" style lever. Units are one-hole mounting and are UL recognized, CSA certified. Threaded black bushing: 0.468″ -32. Solder lug terminals. Thermoplastic lever and black mounting hardware included. On/off plates and hardware available for designer line switches; *contact your Newark representative for pricing.*

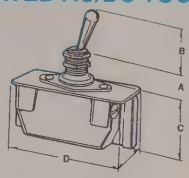
INDUSTRIAL-RATED AC/DC TOGGLE SWITCHES



Quick-make, quick-break action switches feature nonteasable, self-cleaning, wiping action contacts. All feature On-None-Off switching action *except* **type 8690K2** which is On-None-On. Units are one-hole mounting and have screw terminals. Mounting hardware, consisting of one hexagon locknut and one nickel-plated facenut, and terminal hardware are furnished unassembled. 0.071″ wide x 0.038″ deep keyway provides anti-rotation feature. UL recognized, CSA certified.

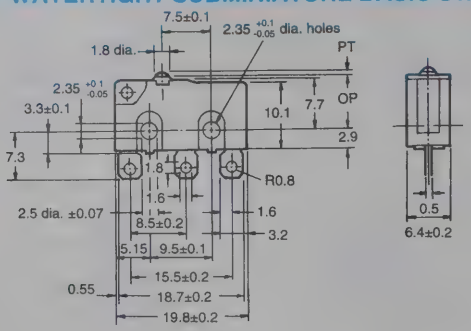
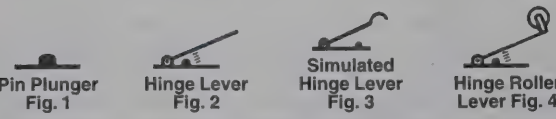
D2SW WATERTIGHT SUBMINIATURE BASIC SWITCH





Monoblock construction allows high sealing capacity. Switch has a wide operating temperature range (–40°C to 85°C). Used for automobiles, agricultural machinery, refrigerator, hot-water supply, air conditioner, factory machine industries and other applications requiring highly environment-resistive capabilities. Meets IP67 requirements (IEC 529). All models listed: 3A @ 125 VAC. O.1A models also available; *contact your local Newark sales office.*

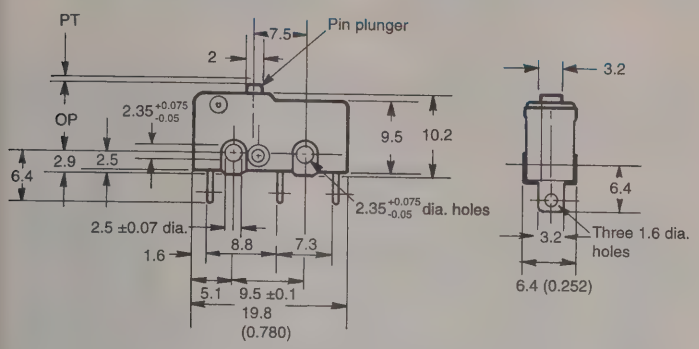
SS SERIES SUBMINIATURE SNAP-ACTION SWITCHES



SS-01-FT

SS series are subminiature, basic switches. Set easily; no overtravel restrictions. Switching capacity ranges from 1mA at 5VDC to 10.1A at 250VAC. Service life: 30 million operations min. SPDT models are shown. SPST-NO and SPST-NC contact forms available. UL recognized, CSA certified; SEV and SEMKO approved.

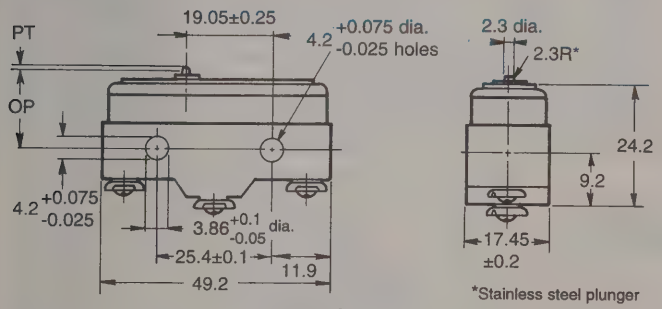
A SERIES SNAP-ACTION SWITCHES



A-20G-B

A series are high capacity switches, capable of handling 20A loads with large inrush currents. (Resistive load: 20A, 250VAC.) Typical applications include halogen lamps, motors, and solenoids. Operating force: 400-625g. Mechanical service life: 10×10^6 min. UL recognized, CSA certified, SEV approved

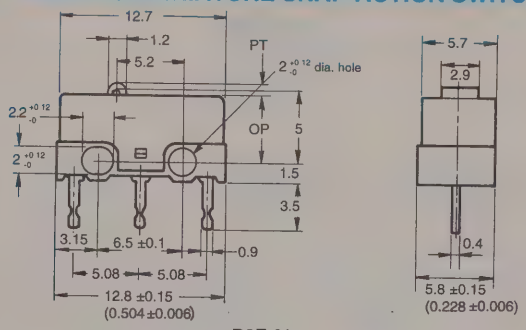
D2F SERIES SUBMINIATURE SNAP-ACTION SWITCHES



D2F-01

D2F series are subminiature, snap-action switches. Suitable for a wide range of applications such as household appliances, office equipment, and audio equipment. Capable of switching 3A, 1A, and 0.1A loads. High-precision, dual-spring, reverse-action mechanism supports long life.

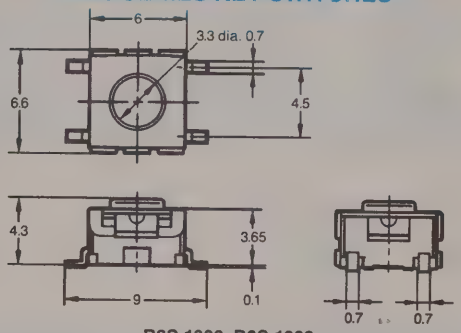
(4974) (ne07070)

B3S SERIES KEY SWITCHES



B3S-1000, B3S-1002

B3S series are surface mount switches ideal for high-density packaging. Sealed construction allows key switches to be mounted and soldered to a PC board. Ideal for applications such as audio, office, and communications equipment, measuring instruments, industrial robots, VCRs, TVs, and vending machines.

Stock No.	Type	Operating Force (gms)	1-24	25-49	50-99

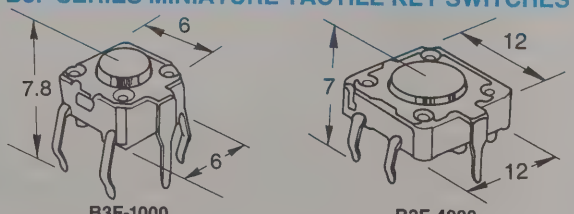
B3F SERIES MINIATURE TACTILE KEY SWITCHES



B3F-1000 B3F-4000

B3F series are miniature and low profile. Extended mechanical and electrical service life. Suited for audio, office and communications equipment, measurement instruments, TVs, and VCRs. Flux tight base structure allows automatic soldering of the key switches onto a PC board. **Type B3F-3** has right-angle terminal. Snap action mechanism.

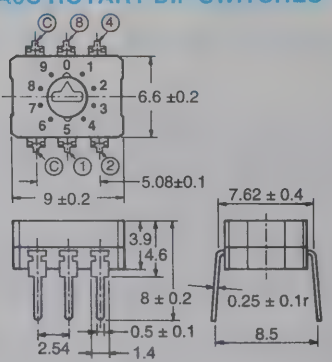
A6C ROTARY DIP SWITCHES



Subminiature switches feature precision rotary cam and contactor. Molded base and rotor sealed by O-ring make tape sealing unnecessary. 10-position switches feature BCD output code; 16-position switches use BCD hexadecimal output code. Switching capacity: 100mA, 30VDC. Operating force: 15-100g - cm. Ambient operating temperature: –20°C to +70°C. Service life: mechanical 10,000 ops. min; electrical 2,000 ops. min. Side actuated types available; *contact your local Newark sales office.*

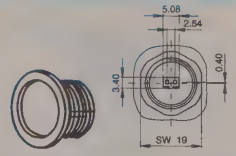
PIEZO EFFECT ELECTRONIC SWITCHES



Piezo electric materials have the capacity to transform mechanical energy into electrical voltage. It is possible to use this voltage to open and close a transistor through micro-electronics. A piezo switch consists of a small element of piezo electric ceramic. Compressing this element distorts its crystal structure in such a way as to create a voltage between its surfaces, which can be amplified and interpreted as a switching signal. The presence of this switching signal is depending on the actuating force and the applied time of the force. Schurter's new PSE piezo switch family includes a complete range of housing colors, sizes and functions. Long-life vandal-proof plastic or metal. Point or ring illumination also available. Piezo switches available in anodized aluminum, brass chromium plated and high-grade steel material terminal pin models. All have a maximum switching voltage of 100V DC/70V AC and 100mA maximum switching current. Storage temperature: -40° to +85° C. Hermetically sealed to IP 67 protection. "EX" version meeting ignition protection requirements of EN 50020 for intrinsic safety and "eT" version rated for extreme temperatures, also available, *contact your local Newark sales office.*

KEYTOP SWITCHES

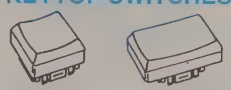

Fig. 1 Fig. 2

Momentary action, medium-stroke pushbutton switches for PC board or panel mounting. Feature normally open silver contacts. Rated 250mA @ 42 volts. Through-shaped enclosed base prevents entry of water or cleaning agents. Choice of 0.724″ (18.40) square which is available with lighted LED or 0.724x1.098″ (18.40x27.90) rectangular shape keytop. Chrome-plated steel snap dome, gold plated on contact side. Available in other colors; *contact your local Newark sales office.*

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm – kΩ	1,000 or $1x10^3$ ohms
1 Megohm – MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt – mV	1/1,000 or $1x10^{-3}$ volt
1 microvolt – µV	1/1,000,000 or $1x10^{-6}$ volts

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere – mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere – µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz – kHz	1,000 or $1x10^3$ hertz
1 Megahertz – MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz – GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond – ms	1/1,000 or $1x10^{-3}$ second
1 microsecond – µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond – ns	1/1,000,000,000 or $1x10^{-9}$ second

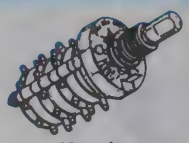
ADJUSTABLE OR FIXED STOP ROTARY SWITCHES

42D/44D SERIES ROTARY SWITCHES



42 series

Fully enclosed, adjustable stop switches interchange with fixed stop models. Rated make/break 1A, carry 10A at 115VAC resistive. Insulation resistance: 50,000 megohms initial, 10,000 megohms minimum. Non-shorting contacts. ⅜-32NEF bushing. Behind-panel depth: 1-deck, 1.025″ (26.04); 2-deck, 1.371″ (34.82). **42D series**; 10-position. 36° indexing. 1″ (25.4) diameter. **44D series**; 12-position. 30° indexing. 1.162″ (29.51) diameter. UL recognized.

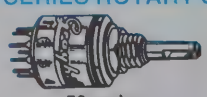
50 AND 51 SERIES ROTARY SWITCHES



50 series

50/51 series single-deck adjustable stop switches with non-shorting contacts. Make/break 150mA, 115VAC resistive, 200mA, 28VDC resistive for 25,000 cycles. Insulation resistance 1,000 megohms minimum. Type number with "**P**" PC mount, others solder lug. Type number with "**C**" military style. **50 Series** is 36° indexing, **51 series** is 30°. 0.5″ (12.70) diameter.

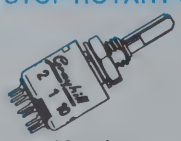
56 SERIES STOP ROTARY SWITCHES



56 series

Single-deck adjustable stop commercial grade switches with non-shorting contacts make and break 10,000 cycles at 200mA 30VDC or 115VAC resistive. 0.5″ (12.70) diameter. Bushing: ¼-28 UNF - 2A thread, 0.25″ (6.35) long. Shaft: 0.125″ (3.18) dia., 0.375″ (9.53) long. Panel to PC board: 0.377″ (9.58). Circle of terminal centers is 0.340″ (8.64) for 10-position switches and 0.366″ (9.30) for 12-position switches. Type number with **P** is PC mount; others solder terminal. Type number with **S** has shaft-and-panel seal.

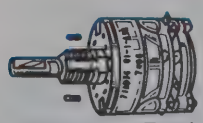
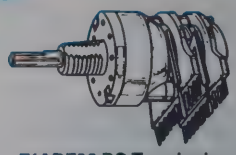
71 SERIES ¼-AMP, 0.5″ (12.7) DIAMETER STOP ROTARY SWITCHES



71AD36 Solder Lug Terminals



71ADF36 PC Terminals

71 series multi-deck, single shaft switches are adjustable stop. Make/break: 250mA, 115VAC or 30VDC resisting 20,000 cycles. Insulation resistance: 10,000 megohms minimum. Voltage breakdown: 500VAC minimum. Meet moisture, shock, salt spray, explosion and stop strength requirements of MIL-S-3786. **71AD** are standard style with solder lug terminals and 0.125″ (3.18) diameter shaft; **71BD** same but have 0.250″ (6.35) diameter shaft. **71ADF** are PC mount with 0.125″ (3.18) diameter shaft; **71BDF** same but have 0.250″ (6.35) diameter shaft. **Suffix 30** or **36** indicates angle of throw by degrees. Behind-panel depth: 1-deck, 0.75″ (19.05); 2-deck, 1″ (25.4).

19 SERIES POWER TAP ROTARY SWITCHES

• Solder Terminals • Faston® Terminals

Single-pole, single-deck units have 2 to 11 positions plus common, with 30° indexing. Available in solder lug terminal with 0.125″ (3.18) wire hole or Faston® terminal with 0.080″ (2.03) wire hole. 15 amps, 120VAC, noninductive load. Contact resistance 10 milliohms at 2VDC and 100mA; contacts are non-shorting. Insulation resistance: 100,000 megohms. Voltage breakdown: 2500VAC.

76 and 78 Series single pole, single throw (SPST) and single pole, double throw (SPDT) switches feature high pressure spring-loaded ball contact system and standard epoxy-sealed bases. **90 Series** machine insertable MIDIP switches (**type 90B**) are compatible with TO-116 equipment. Last two numbers of type indicate number of switch positions. **"S" suffix** on type number indicates top tape seal to protect contacts during board cleaning. Each switch position makes and breaks 10,000 operations at 1mA, 5VDC or 50mA, 30VDC; 150mA, 30VDC. Contact resistance: 30 milliohms. Dielectric strength: 750VAC rms minimum. Terminals are copper alloy, 95/5 solder-plated over nickel barrier.

90 SERIES SURFACE MOUNT DIP SWITCH

Surface Mount

Type 90H withstand vapor phase and infra-red solder reflow processes to 250°C. Available with gull wing (**type 90HBW**) and J-bend (**type 90HBJ**) terminals. Switches are SPST circuitry with recessed sides. All types make and break 2,000 operations per switch position at 10mA, 50mVDC. Contact resistance: 20 milliohms. Dielectric strength: 500VAC rms minimum. Terminals are brass, 95/5 solder-plated over nickel barrier. Contact area is gold-plated. Last two numerals in type number indicate the number of switch positions. **"S" suffix** in type number indicates required top seal to protect contact surface from contaminants during cleaning processes; molded base prevents leakage.

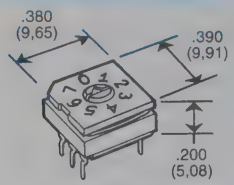
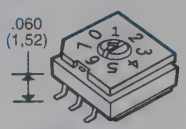
SWITCHES AND ENCODERS

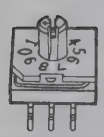
94 SERIES CODED ROTARY DIP SWITCHES



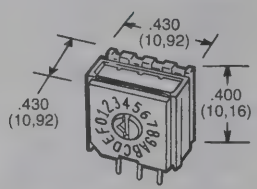
Flush Actuator



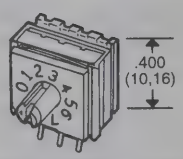
Surface Mount



Extended Actuator



Flush Actuator - Right Angle



Extended Actuator - Right Angle

94 series actuator sealed rotary DIP switches have binary (octal, BCD, hexadecimal) output with 8, 10 or 16 positions. Complement codes are also available. Perpendicular or right-angle mounting with flush or choice of two shaft lengths. Switches carrying current at 100mA @ 50VDC with a make and break rating at 30mA @ 30VDC for 10,000 cycles of operation (320,000 switch operations for a 16 position switch). Perpendicular and surface mount types have terminals on 0.1″ (2.54) by 0.3″ (7.62) grid. Right-angle mount on a 0.1″ (2.54) by 0.1″ (2.54) grid. Terminals are copper alloy, 90/10 tin-lead solder plated. Maximum process temperature: 250°C for 10 seconds. **Suffix RA** right-angle mount; **suffix W** = surface mount.

ALL PRODUCTS LISTED ARE STOCKED.

61 SERIES OPTICAL ENCODERS

Light passage is allowed or interrupted as switch is operated. Provides million-cycle life. Encoders produce a 2-bit, 4-state code. The code repeats every 4 positions. Number of changes and direction of rotation can be sensed. Panel mount, operator input versions are available in economical (thermoplastic shaft and bushing), **type 61C** and ruggedized (zinc, die-cast bushing), **type 61B** and **type 61R** are high-resolution encoders. All units require a 5VDC external source. Panel mount versions require user-supplied pull-up resistors dependent on the type of logic that is used. Switching current: 30mA max. Temperature range: –40°C to + 65°C.

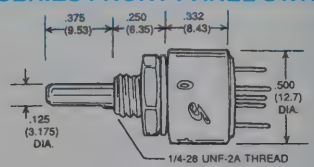
26 SERIES FRONT PANEL SWITCH



- **½″ Diameter**
- **Shaft and Panel Seal**
- **1-Pole with Adjustable Stops**
- **2-8 Positions or 2-16 Positions**
- **Panel Mount**

Series 26 binary-coded, ½″-diameter switch is rated to make and break logic-compatible loads for 25,000 operations; a cycle is 360° and a return thru all positions. The 4 output terminals are on 0.3 x 0.2″ (7.62 x 5.08) centers with the common terminal in the center. The switch may have continuous rotation, or may be adjusted to limit the rotation. All switches have shaft and panel seal. The panel seal ring can be removed to expose the stop pin holes on the front of the switch. 2 stop pins are supplied with the switch. One or both may be used to limit the rotation as desired.

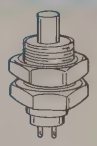
ENCODERS AND PUSHBUTTON SWITCHES

MINIATURE LIMIT PUSHBUTTON SWITCHES



39 series have an adjustable location setting and are available in a plunger-sealed version. Circuitry is SPST, normally open (normally closed for sealed, no overtravel). Contact resistance: 25 milliohms maximum on a new switch. Voltage breakdown: 1000VAC between mutually insulated parts. Insulation resistance: 1000 megaohms minimum. Operating temperature: –40°C to +85°C. Rated to ½amp at 115VAC resistive, with up to 500,000 operations. Dimensions: switch diameter is 0.287″ (7.29) max., height is 0.450″±.015″ (11.43±0.38) for **type 39-101**; 0.600″±.015″ (15.24±0.38) for **types 39-102, 39-103** and **39-701**; 0.410″±.015″ (10.41±0.38) for **type 39-702.**

MINIATURE PC BOARD PUSHBUTTON SWITCHES

SMD

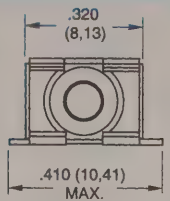

Fig. 1

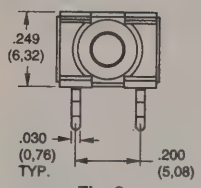

Fig. 2

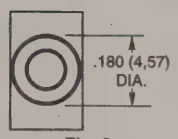

Fig. 3

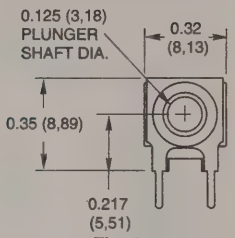

Fig. 4

38 series pushbutton switches designed for PC board edge mounting. **Fig. 1**, **2**, and **3** are SPST-NO; **Fig. 4** is SPST (alternate action, push on/push off). **Fig. 1** is surface mount compatible and mounts horizontal to board. **Fig. 2** is thru-hole horizontal mount. **Fig. 3** is thru-hole, vertical mount. **Fig. 4** is thru-hole, horizontal mount. Approximate switch body measurements for **Fig. 1**, **2**, and **3**: 0.320W x 0.365L x 2.50″H (8.13 x 9.27 x 6.35). Nonthreaded bushing extends 0.162″ (4.11) from switch body; plunger extends 0.215″ (5.48) from bushing. Flush plunger version also available. Approximate body measurements **Fig. 4**: 0.320W x 0.800L x 0.360″H (8.13 x 20.32 x 8.89). Plunger extends 0.425″ (10.80) from switch body. Also available with 0.575″ (14.61) plunger protection. Logic level switching, 200mA @ 20/28VDC; high current switching, 1A @ 120VAC; alternate action, 1A @ 25VDC. Surface mount version available only in low current switching with sealed plunger; all other versions available with plunger seal.

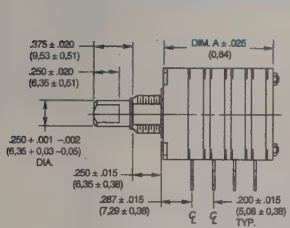
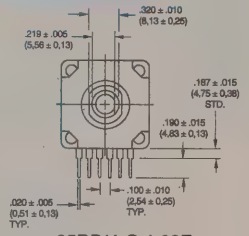
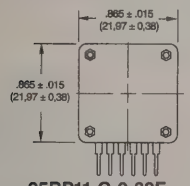
MULTI-DECK MECHANICAL ENCODERS



25BP11-G-1-32F



25BP11-Q-1-32F



25BP11-G-2-32F

Number of Decks	Dimension A
1	.499 (12.67)
2	.699 (17.75)
3	.899 (22.83)
4	1.099 (27.91)

25 series make and break 150mA @ 120VAC or 28VDC for 50,000 cycles of operation. Binary, binary complement, quadrature, or gray code outputs. Available in 1, 2, 3, or 4 decks. Measure 0.865″ (21.97) square plus PCB termination 0.190″ (4.83) off board. Terminals all on same side of switch. Shaft diameter is 0.250″ (6.35), projects 0.375″ (9.53) from bushing, 0.375″ (9.53) diameter projects 0.250″ (6.35) from switch body. One deck extends 0.499″ (12.67) behind panel; each additional deck adds 0.200″ (5.08) behind panel. Shaft is stainless steel, bushing is plated zinc. Terminals are gold-plated, beryllium copper. Thermoplastic switch body. Offered in 12, 16, 24, and 32 positions with stop between first and last position. Also available in 4, 6, 8, 10, or 20 positions (complete rotation), with continuous rotation or stops at any desired location. Optional shaft and panel seal. Also available are 3- and 4-deck encoders and custom designs; *contact your local Newark sales office.*

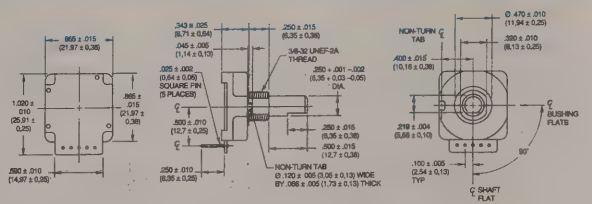
ECONOMICAL SINGLE DECK MECHANICAL ENCODERS



25L series encoders are an economical, single-deck version of the **25 series** mechanical encoder. Rated to make and break 1.5mA @ 115VAC or 150mA @ 14VDC for 100,000 cycles of operation. Hexadecimal, gray, or quadrature code outputs. Measure 0.865″ (21.97) square plus terminal board. Shaft diameter is 0.250″ (6.35) and projects 0.500″ (12.7) from bushing 0.375″ (9.53) diameter, projects 0.250″ (6.35) from switch body. **25L series** encoders extend 0.343″ (8.71) behind panel plus terminal extension 0.250″ (6.53). Shaft, bushing, and housing are reinforced thermoplastic. Housing color: black. Available in 8, 10, 12, 16, 20, 24, 32, and 36 positions (continuous rotation only).

PUSHBUTTON SWITCHES

23, 4000/10 SERIES WIPING CONTACT, AND 2200 SERIES SNAP ACTION SWITCHES

Type 23-1

Types 10-09, 40001, 4002

Types 2201, 2202

For low voltage and high current applications. Rated to make and break at 115 VAC. **Type 23-1** clean wiping contact N.O. switches have consistent contact resistance of low voltage applications. Rating: 250mA; 100,000 operations. Behind panel: 0.663″ (16.84) x 0.468 (11.89) dia. Fit 0.328″ (8.33) hole. **Types 10-09, 4001** and **4002** clean wiping contact N.O. and N.C. switches rated 1A, 100,000 operations; or 3A, 6,000 (UL) operations. Behind panel: 0.965″ (24.51) x 0.800″ (20.32) dia. Fit 0.48″ (12.30) hole. **Types 2201** and **2202** have audible click and rapid spring action for switching high currents. Rating: 15A, 25,000 operations. Behind panel: 1.239″ (31.47) x 0.880″ (22.35) dia. Fit 0.484″ (12.30) hole. Units have SPST-N.O. circuitry, except types with "†", which are SPST-N.C.

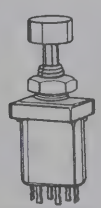
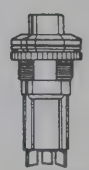
46 SERIES SPDT AND DPDT 1/4 AMP WIPING CONTACT SWITCHES

Type 46-101

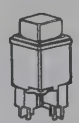
Type 46-102



Type 46-200



Type 46-05-08



Type 46-01-08

Type 46-05-05, 46-05-07

Clean wiping contact switches have consistent contact resistance for low voltage applications. **46 Series** rated to make and break 250mA, 115VAC for 250,000 operations. All switches have break before make contacts. **Type 46-101 RED** and **46-101 BLK** behind panel: 0.890″ (22.61) x 0.437″ (11.10) dia. Use 0.266″ (6.75) hole. **Types 46-102 RED** and **46-102 BLK** same but have wide 0.375″ (9.53) dia. button. **Types 46-200RED** and **46-200BLK** have DPDT circuitry. Behind panel 0.921″ (23.39) x 0.625″ (15.88)W. Use 0.266″ (6.75) mounting hole. **Type 46 1-08-500-0303** has DPDT circuitry and square bezel. Behind panel: 1.194″ (30.33) x 0.605″ (15.37) square. Use 0.610″ (15.49) square hole. **Types 46-05-05** have round bezel mounting. Behind panel: 1.179″ (29.95) x 0.640″ (16.26) nut dia. Use 0.516″ (13.10) hole. **Types 46-05-07** same except Alt. action circuitry. **Types 46-05-08** DPDT circuitry. Behind panel: 1.151″ (29.24) x 0.76″ (19.43) nut dia. Use 0.641″ (16.27) hole.

39 SERIES 1/4 AMP AND 30 SERIES 1 AMP MINIATURE SPST BUTT CONTACT SWITCHES

Types 39-1, 39-2, 39-3
Types 30-1, 30-2, 30-3 30-15

Type 30-17

Types 30-05-01-502
30-05-04-502

Gold contact N.O. and N.C. switches provide low level switching. **Types 39-1** and **39-3** are rated ½A res. at 115VAC and ¼A res. at 220VAC, 1,000,000 operations. Behind panel: 0.135″ (8.0); diameter 0.25″ (6.35). **Type 39-2** is rated ¼A at 115VAC and ⅛A at 220VAC. Behind panel: 0.315″ (8.0); diameter 0.25″ (6.35). **Type 39-2** is rated ⅛A at 115VAC and ¼A at 220VAC. Behind panel: 0.49″ (10.1); diameter 0.25″ (6.35). **Type 30-1** and **30-3**. Behind panel: 0.572″ (14.53); diameter 0.375″ (9.53). Mounting hole 0.266″ (6.76). Rated 0.5A, 115VAC, 1,000,000 operations. **Type 30-2** behind panel: 0.605″ (15.37). Rated 1A, 115VAC, 500,000 operations. **Type 30-15** has .02″ (0.51) overtravel. Behind panel 0.605″ (15.37). Rated 1A, 115VAC, 200,000 operations. **Type 30-17 RED** has overtravel and positive feel. Behind panel: 0.958″ (24.33), diameter 0.562″ (14.27), mounting hole 0.484″ (12.30), cap diameter 0.375″ (9.53). Round bezel. Decorative mounting, rated same as **30-1**. **Type 30-05-01** behind panel: 0.710″ (18.03), diameter 0.625″ (15.88), mounting hole 0.516″ (13.10). Decorative mounting rated same **30-15**. **Type 30-05-04** has overtravel and positive feel. Behind panel 0.910″ (23.11). Units have SPST-N.O. circuitry, except types with "†", which are SPST-N.C.

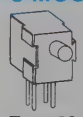
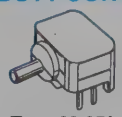
PC MOUNT BUTT CONTACT SWITCHES



Type 32



Type 39-251

Type 39-501

Type 32 pushbutton switches and LEDs that interlock and mount on PC board edge. Ideal for reset and status indication applications. 0.200″ (5.08) between centers when interlocked. 0.272″ (6.91) high and 0.230″ (5.84) deep. Assemblies are process compatible. Switches have a N.O. and a N.C section. Logic loads to 150mA switching for 100,000 operations. **Type 39-501** gold contact, momentary switches provide test or cursor key function. Rated 150mA, 28VDC, 1,000,000 operations. Overall length is 0.6″ (15.24) includes button, diameter 0.25″ (6.35). Terminals on 0.1″ (2.54) centers, front support plate on 0.2″ (5.08) centers. Height above board 0.3″ (7.62) approximate. Rated to make and break 250 mA at 115 VAC, 500,000 operations. **Type 39-251** has SPDT-2 circuit momentary circuitry for push-to-test PC board functions. Switch is 0.500″ (12.70) x 600″ (15.25) x 0.260″ (6.60) above board. Terminals are on 0.300″ (7.62) x 0.100″ (2.54) centers. End of button to the closest, N.C. terminal pair is 0.360″ (9.14). **Type 32-01** has a black button. Other units have either black, **"BLK"** in type, or red, **"RED"** in type, buttons.

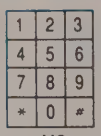
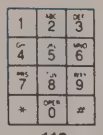
* 12 BUTTON 2.35 (59.69)
16 BUTTON 3.1 (78.74)

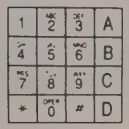


-112



-113

-014



-016

84S series 12- or 16-button keypads have a 1-piece black silicone rubber boot which completely seals the switch contacts and the panel cutout. Available snapdome contact is gold-plated. Resistance is MOS, TTL, and DTL compatible. Life is 3 million operations per button. RFI/EMI shielding is optional. White buttons on 0.75″ (19.05) centers are removable and interchangeable. Keyboards are 0.5″ (12.7) above panel. They are mounted by 4 studs #6-32; mounting nuts are included. **C** in type number indicates single-pole/common bus circuitry; others have matrix (XY) circuitry. Type number suffix indicates legend.

81 SERIES FULL–TRAVEL KEYPADS

NEW

81 series rated for 3 million operations. Feature long keystroke, silicone rubber actuators, conductive ink contacts, and membrane matrix circuitry. Suffix in type numbers indicates choice of flex tail termination: **suffix C** = (2) 0.100″ spacing single-row connectors, **suffix Z** = exposed traces for (2) 0.100″ spacing zero insertion termination force connectors. All keypads have black legends on white keycaps, legends are molded into plastic keys for long life. Keypad can be mounted directly to PC board or front panel. Available in four different formats: **"-112"** in type number indicates alphanumeric legends; **"-113"** in type number indicates alphanumeric telephone legends; **"-114"** in type number indicates keypad with 0 thru 9 and A thru E legends; **"-116"** in type number indicates alphanumeric telephone plus A thru D legends. Operating temperature: –40°C to +80°C. Contact resistance: less than 100 ohms.

82 SERIES PC-MOUNTABLE KEYBOARD MODULES AND LEGEND SHEET

82 series insertable legend keyboard modules plug into PC boards from 0.063″ (1.57) to 0.125″ (3.18) thick and mount in any configuration while maintaining 0.687″ (17.45) button centers. Button height above board is 0.75″ (19.05). Long-stroke, wiping contact is ideal for applications with low voltage or which require constant data entry. Housing gray, base black. Rating at 5VDC: 10mA for 1 million operations. Legend insertable assortment includes symbols, terms.

96 SERIES CONDUCTIVE RUBBER KEYPADS

96 series are economical 3x4 and 4x4 conductive rubber keypads. 3 million operations per button. Compatible with high resistance logic circuitry and excellent operator feedback. Matrix circuitry. Rated for 5mA @ 12VDC for 0.5 sec. –30°C to +80°C operating temperature. Front (top) panel or rear (flush) panel mounting. Type numbers with **-102** and **-006** feature black-on-white legends. Type numbers with **-152** and **-056** feature white-on-black legends. 4x4 legends are alphanumeric telephone plus A thru D; 3x4 are numeric telephone. **(Suffix-F)** in type number indicates front mount, **(suffix-S)** indicates shielded, and **(suffix-EL)** indicates EL backlight.

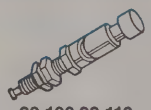
29 SERIES BINDING AND PUSH POSTS

29-1



29-100 29-110

29-104

Type 29-1 straight skirt binding posts fit 0.375″ (9.53) dia. hole for close spacing. Rated 120VDC, 15 amps continuously. Insulation resistance between stud and mounting panel: 120,000 megohms. Voltage breakdown: 1500VAC. Panel thicknesses to 0.187″ (4.75). Insulated per MIL-M-14, type CFG. **Types 29-100** and **29-110** are standard push posts: **type 29-104** is insulated push post with black phenolic washers. All are rated 120VDC, 20 amps continuously. With push posts, you press button top, put lead in slot, and release button. Spring pressure assures positive contact. Extends 0.875″ (22.23) above mounting board.

NEW TOGGLE AND PUSHBUTTON SWITCHES

SUBMINIATURE TOGGLE SWITCHES

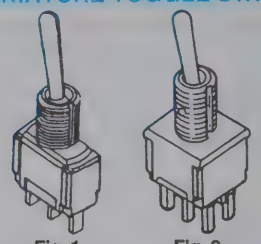

Fig. 1 Fig. 2

Toggle switches fit 0.100″ PC board grid. Type numbers with (*) have gold contacts rated 0.4VA max. @ 20VDC (or peak AC). Type numbers with (+) have silver contacts rated 3A 125VAC or 28VDC resistive. Feature chrome-plated brass actuator, nickel-plated brass bushing, and stainless steel housing. Case rated UL94V-0. End contacts: silver-plated coin silver. Epoxy sealed silver-plated brass center contact and terminals. Operating temperature: -30°C to +85°C. UL listed.

SNAP-ACTING MOMENTARY PUSHBUTTON SWITCHES

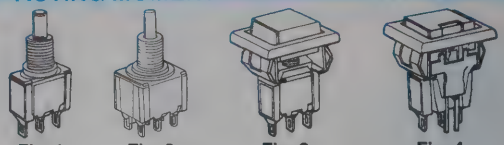

Fig. 1 Fig. 2 Fig. 3 Fig. 4

All switches have On-(On) action. Rated 0.4VA max. @ 20VAC or DC max. or 1A @ 120VAC or 28VDC. Brass contacts with gold-over-nickel plating. Brass common contacts and terminals with gold-over-nickel plating, epoxy sealed. Feature glass-filled nylon or polyester actuator, nickel-plated brass bushing, stainless steel housing, and diallyl phthalate case. Panel mounting: 0.250″ (6.35) diameter. Includes hole hardware: 2 hex nuts, locking ring, and lock washer. Operating temperature: -30°C to +85°C. UL listed.

SUBMINIATURE PUSHBUTTON SWITCHES

Fig. 1 Fig. 2 Fig. 3 Fig. 4

All switches have SPDT circuit and silver contacts rated 1A @ 120VAC or 28VDC, except type numbers with (*) which have gold contacts rated 0.4VA max. @ 20VDC (or peak AC) and have a 0.2″ diameter x 1″H black cap. All feature a black, thermoplastic polyester 0.1 diameter x 0.155″ actuator, nickel-plated brass 0.22″-long bushing, stainless steel housing, diallyl phthalate case, and epoxy sealed silver-plated brass center contact and terminals. Operating temperature: -30°C to +85°C. UL listed.

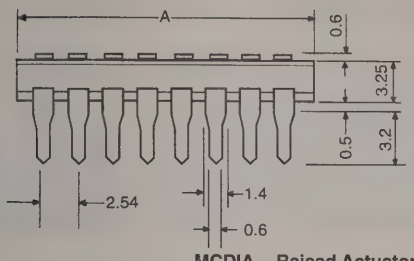
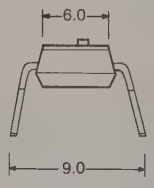
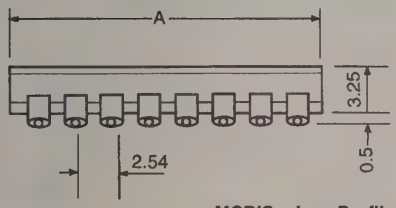
MCDIA

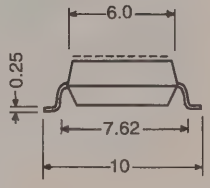
MCDIS





MCDIA -- Raised Actuator





MCDIS -- Low Profile Actuator

Modeled 0.3″ integrated circuit package outline allowing auto-insertion. Twin contact design provides stable connection. Highly resistant to physical shock and vibration. Molded parts of selected material, rated UL94V-0. Terminal contacts plated with 3μ″ gold. Top tape sealed to withstand wave soldering. Switching capacity: 100mA @ 6VDC (25mA @ 24VDC). Carry current: 100mA @ 60VDC. Contact resistance: 30mΩ maximum. Dielectric strength: 500VDC/1 minute. Electrical operating life: 2000 operations. Operating temperature: –30°C to +80°C.

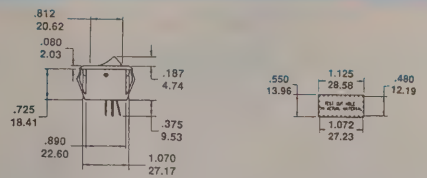
ROCKER SWITCHES

CURVETTE SNAP-IN ROCKER SWITCHES



Miniature rocker switches are 1-pole, slow-make and break action. 0.250″ (6.35) quick connect terminals. Ratings: 10A/125VAC, 10A/250VAC; **type RD221** is 8A/250VAC, 12A/125VAC. Rated life 50M cycles @ rated load. Base is black; available with Visi-Rocker two-color molded with "on" indication. For neon illuminated switches: **RS** in type number indicates rocker is solid red; **CR** indicates clear red; **CA** indicates clear amber. UL recognized, CSA certified, VDE, SEV, SEMKO and BEAB approved; **type RD221** is UL recognized, CSA certified. *Features on/off legend.

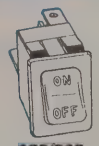
622/632 SERIES MINIATURE ROCKER SWITCHES



622/632

Miniature rocker switches available in illuminated (**632 series**) 12A, 125VAC ½ HP and non-illuminated (**622 series**) 8A, 250VAC ½ HP models and single and double pole configurations. 0.187″ quick connect terminals. Last digit **A** in type number indicates rocker legend says "ON" "OFF"; **E** indicates "IO". All types listed have vertical rocker legends. Action is On-None-Off. Operating temperature: –20°C to +85°C. Switch dimensions: 0.825L x 0.590W x 0.710″H. UL recognized, CSA certified.

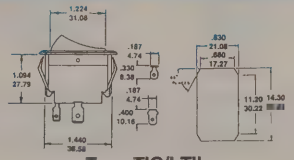
HEAVY DUTY SNAP-IN ROCKER SWITCHES



Type TIG/LTIL

Constructed with a snap-in bracket system that provides front panel dust/moisture protection. Action is On-None-Off. Ratings: 15A/125VAC, 28VDC; 10A/250VAC, ¾ H.P. Dielectric strength: 1000V. Available in lighted and non-lighted versions. 125V neon models: "**RC**" in type number designates red; "**AM**" designates amber. UL recognized, CSA certified.

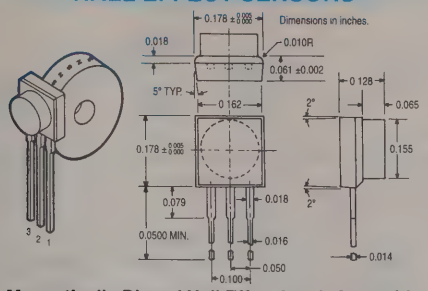
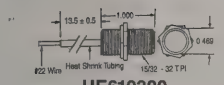
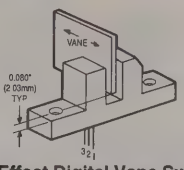
HALL EFFECT SENSORS



Magnetically Biased Hall Effect Latch Assembly



HE610300



Hall Effect Digital Vane Switch

Type HE-6450 is a magnetically activated Hall-effect vane switch. Withstands hostile electrical, chemical, and mechanical environments. Packaged in a 0.970L x 0.242W x 0.425″H (24 x 6 x 11) three-pin plastic housing with 0.050″ (1.27) lead spacing. Protects magnet and electronic circuitry. Circuit board mountable. Digital output. **Type HE-3135** Hall-effect latch assembly provides interface between electromechanical equipment and bipolar magnetic switching characteristic or MOS logic circuits at switching frequencies of up to 25kHz. Bipolar output. ON threshold 25G typical, 50G max. OFF threshold: –25G typical, –50G min. Catch device requires magnetic field reversal to change sensors output. **Type HE-6103** hall effect switch senses proximity of magnetic field. Activated by exposure of face end of assembly to a south magnetic field. Typically 300 gauss of field required at the face of the sensor for turn-on. **Type HE-6104** actuator magnet is intended for use with **type HE-6103** hall effect switch. Can activate at an airgap of 0.4″. Easy installation. Adjustable operating distance to the **type HE-6103** sensor.

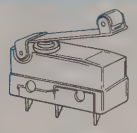
INTERNATIONAL WATERPROOF SWITCHES



DC series subminiature switches have long life coil spring construction. Encased in thermoplastic. Dust and waterproof in accordance with IP67. Automatic assembly supports consistent quality. Available in three current ratings: **DC1** 5A, **DC2** 10.1A and **DC3** 0.1A. All wire terminals. *Contact your local Newark sales office for information on bulk purchase price breaks.* UL listed, CSA certified.

E51 AND E53 SERIES LOW-TORQUE SWITCHES

Low torque switches feature combination quick-connect/solder terminals. Operating torque max.: 4.000 inch-grams. **E51 series** is rated 6A, 250VAC. **E53 series** is 0.1 amps, 125VAC with gold crosspoint contacts. Both series 1.218Lx0.687Wx0.875″H (30.94x17.45x22.23). UL listed, CSA certified, VDE approved. *Order wireform actuator separately below.*

KW SERIES MINIATURE SWITCHES

NEW

SPDT switches feature ampere ratings from 50mA to 25A. Electrical life: 100,000 operations. Temperature rating: 85°C or 150°C. **Suffix QACA** in type number denotes 0.187″ x 0.020″ straight terminals. **Suffix VACA** in type number denotes 0.250″ x 0.032″ straight terminals. UL recognized, CSA certified. Snap-over hinged lever and roller actuators have standard ratio pivot position providing higher operating force and smaller movement differential than high-ratio version actuator. Actuators with high-ratio pivot position configuration available separately ; *contact your local Newark sales office.*

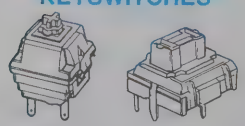
KEYSWITCHES



MX ML

Low profile DIN-compatible keyswitches for numerous high speed wordand data processing applications. Gold wire crossbar contact configuration provides contact area that eliminates closure interference by contaminants.Low contact resistance and power consumption. Clean IC logic signals. Contact rating: 28V maximum **(type MB),** 12V maximum AC/DC for **types MX** and **ML.** Switching current: 0.125A maximum. Carrying current: 0.5A maximum. DC resistive: 3 watts maximum. AC resistive: 3VA maximum. **M81A-0100**—0.46″H (top of 6mm keycap to pins) x 0.49″W x 0.53″D. 0.13″ pins. **MX**—0.60″H (top of keystem to pins) x 0.60″W x 0.61″D. 0.13″ pins. **ML** keymodule-0.27″H (top of keystem to pins) x 0.47″W x 0.44″D. *Order keycaps separately; contact your local Newark sales office.*

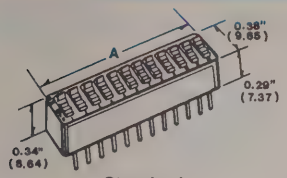
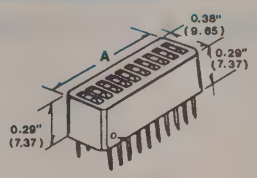
7100 SERIES SPST DIP SWITCHES



Standard



Low Profile

Standard and low profile DIP switches are designed for life of 2000 cycles per pole. Spring contacts and leads are copper alloy with gold over nickel plating in contact area. Rated 60mA at 5VDC. Dielectric strength: 500VDC. Operating temperature: -55°C to +105°C. Low-profile version has recessed cams to prevent accidental change of rocker position. Blue polyester housing and white thermoplastic rockers are rated 94V-0. Available sealed or unsealed.

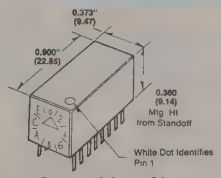
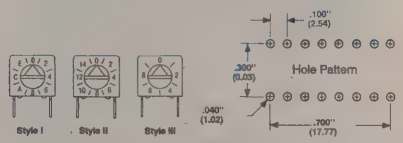
PREPROGRAMMED PC BOARD SWITCHES



Screwdriver Slot



Four form C switches operated by encoded cams in DIP package. Two actuating methods available: screwdriver slot and extended D shaft. Regardless of actuation method, cams are bidirectional and have positive detent setting. Choice of 10- and 16-position configurations. Rated 120Vm max.; 1A max.; 2.8 volt/amp max. Contact resistance: 100 milliohms. Dielectric strength: 300VAC, 60Hz. DC insulation resistance: 1000 megohms. Copper alloy contacts with gold-over-nickel plating. Glass-filled polyester housing. For extended D shaft, *contact your local Newark sales office.*

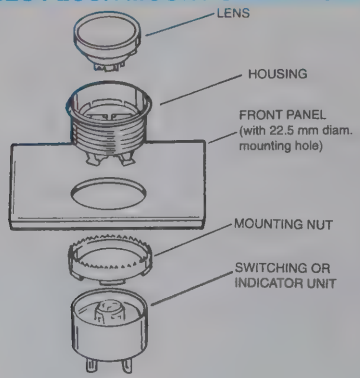
FLUSH PANEL MOUNTED SWITCHES

84 SERIES FLUSH MOUNT SEALED SWITCHES



- New Appearance
- "Full Lens" LED Illumination
- Flat Panel Security
- Easy Mounting and Connecting

84 series switches offer front-panel mounting and QC termination. Contacts are gold-plated, low-level, and have ≤ 100mΩ resistance in a new state. 42VAC/DC, 100mA. Power rating: 2W max. Continuous current: 100mA. Mechanical life ≥ 1 million operations. Switch configuration: snap action, 1 N.O. contact. Operating temperature: –13°F to +158°F/–25°C to +70°C. Choice of coordinating units listed for custom selection. Meets NEMA standards 4 and 13.

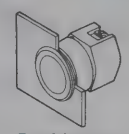
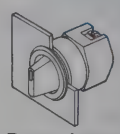
04 SERIES FLUSH PANEL MOUNT SWITCHES



Pushbutton



Rotary Lever

04 series mount in a standard 30.5mm hole. These updated flush mount switches meet NEMA enclosure types 4, 13, and meets IEC enclosure IP65 classification. Compatible with T-3¼ bayonet lamps, neon lamps, or LEDs. NOTE: The last numeral in the type number indicates lens color: **2** = red, **4** = yellow, **5** = green. UL recognized, CSA certified, VDE approved, SEV approved, and ISO9001 certified. *Order* **04 series** *contact blocks separately on page 1480.*

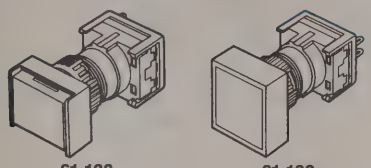
KEYPADS, SWITCHES AND INDICATORS

61 SERIES 16mm LIGHTED PUSHBUTTON SWITCHES



61-133 61-132

Modular switches feature constant back-of-panel depth to allow convenient PCB installation. Convertible actuator function enables user to change momentary switch action to maintained by using a screwdriver. Sealed to NEMA enclosure types 4 and 13 and meets IEC enclosure IP65 classification. Mounts in 16mm round hole. Switch module has gold-plated silver contacts which operate certified from 1V to 250 VAC and 10mA to 5A. UL recognized, VDE, SEV, and CE approved. Rated 250VAC/6A; CSA: 300VAC/5A. ISO9001 certified. **61 series** use a T-1¾ midget-groove lamp in either neon, incandescent, or LED version; *order lamps and lenses separately; contact your local Newark sales office.*

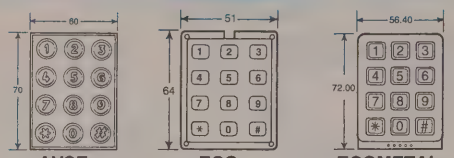
KEYPADS



AVSE ECO ECOMETAL

Type AVSE keypads feature vandalproof aluminum keys with engraved legends. Shoulders prevent keys from being removed by force when the keypad is mounted behind a metal panel. For application in public places such as telephone and ATM facilities where abuse and vandalism are common. Available in 12- and 16-key formats. **Type ECO** is available in 12-key telephone format and are engineered for more than 1 million operations. Suited for data entry, encoding, remote control, telephone and other high-volume applications. Key and case are rugged polycarbonate. **ECOMETAL** keypads are available in 12-key telephone layout with a matrix circuit. Designed for more than 1 million operations. Suited for public telephone, vending machines, entry security, ATMs and other high-volume applications. Easy weatherproof mounting. **AVLE series** illuminated keypads are also available; *contact your local Newark sales office for details.*

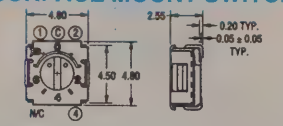
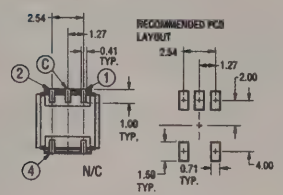
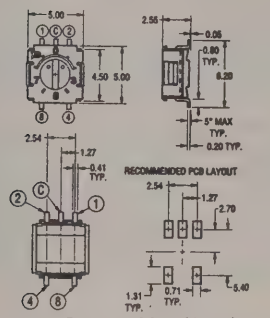
SERIES 7744 SQUARE SEALED CODED SURFACE MOUNT SWITCH

SMD





7744J-8 position (4mm)



7744G-10 position (4mm)

Available in binary-coded 8- or 10-position design. **008** in type number = 8 position; **010** in type number = 10 position. Rugged lead frame construction. J-Hook or Gullwing terminals. Compatible with all SMD soldering processes. Contact rating: 100mA max. @ 24V. Operating temperature: –55°C to +125°C.

Stock No.	Type	Positions	Terminals	1-24	25-49	50-99
52F206	7744J-001-008	8	J-Hook	2.16	2.03	1.82

(5151) (ne06357)

7813 SERIES SURFACE MOUNT 3mm SQUARE SPDT SEALED ROTARY SWITCHES

Max. contact rating: 100 mA @ 24V. Min. insulation resistance: 100 MΩ @ 500 VDC. Dielectric strength: 250 VAC. Operating temperature: –55°C to +125°C.

Stock No.	Type	Rotational Life	Each
95F7182	7813J-1-051E	50 cycles	1.59

(5029) (de02967)

7643 SERIES 10-POSITION 6mm SQUARE SURFACE MOUNT SELECTOR SWITCHES

Max. contact rating 100mA @ 24V. Gullwing (**G**) or J-lead (**J**) styles. Break before make timing. Packaging in 50-pc. tubes or 500-pc. reels. Vertical adjust. Types with **E suffix** also available in reels of 500 pieces. Other types without suffix are also available in tubes of 50 pieces. *Contact your local Newark sales office.*

Stock No.	Type	Configuration	Each
66F2842	7643G-001-010	Gullwing	2.16

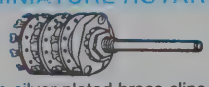
ROTARY SWITCHES, ASSEMBLIES AND KNOBS

D4 SERIES MINIATURE ROTARY SWITCHES



9-amp capacity switches have silver-plated brass clips and rotor contacts. Make and break resistive load 1.5 amp, @ 28VDC; 0.5 amp, @ 115VAC.

D4G SERIES GLASS EPOXY INSULATED SWITCHES

1.437″ diameter switch is standard NEMA XXXP, MIL-P-3115P, type GIO insulation material. Single hole, bushing mount. Positive, 30° and 60° indexing. 25,00 cycles minimum. Shaft dia. = ¼″. *Order knob separately on this page.*

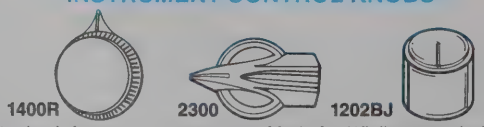
INSTRUMENT CONTROL KNOBS



1400R pointer knob features one set screw. Made for ⅛″ diameter shafts. **Type 2300** pointer has one set screw and is 1¼″ long for ¼″ diameter shafts. Color: black. **P-168** pointer knob features brass insert and two set screws. 2″ (50.8) length. Knob **type 1202BJ** is round with a silver colored cap. It fits ¼″ shafts. **Type 1910DG** inner knob with skirt has a silver colored cap. It fits ⅛″ shafts.

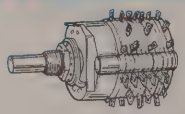
ROTARY SWITCHES

SERIES C4 & C7 ROTARY SWITCHES



Series C4 offer a fully enclosed environment-proof package for commercial applications. Specifications: Silver-plated brass contacts rated 0.3A α 125VAC, 0.5A 28VDC with an initial contact resistance of .003 max (ohms). Current carrying capacity 15 Amps. Minimum mechanical life 25,000 cycles. Available index angles 30°, 60°, 90°. Shaft length: 0.375″; Shaft dia. = ¼″. **Series C7 Specifications:** Silver-plated brass contacts rated 0.5A @ 125VAC, 1A @ 28VDC, with contact resistance .003 or less-silver alloy contacts rated 1A @ 125VAC, 2A@28VDC, with contact resistance .002 or less. Current carrying capacity 25A. Minimum mechanical life 25,000 cycles. Available index angles 15°, 30°, 60°, 90°. Dimensions: Dia. = 2.03″, shaft length = 0.375″, shaft dia. = ¼. Available in standard lug terminals. *Order knob separately on page 1054. Shorting type switches are also available; contact your local Newark sales office.*

D7 SERIES CERAMIC INSULATED SWITCHES

D7

D7 series 1.875″ (47.6) diameter, 30° indexing, heavy-duty switch is MIL-1-10A grade L-422 insulation material. 2.25A @ 28VDC; 1A @ 115VAC. 9A capacity. 0.25″ shaft diameter. *Order knobs separately, contact your local Newark sales office.*

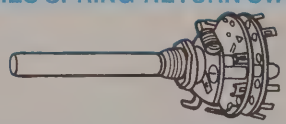
E3 SERIES SPRING-RETURN SWITCHES



E3 series offer spring-return action with an open frame construction. Standard parts are available in ½″ diameter, 2 or 3 positions, 30° indexing, solder lug terminals, and 25,000 life cycles minimum. *Order knobs separately on page 1054.* Shorting switches are also available; *contact your local Newark sales office.*

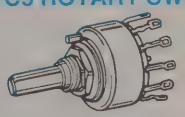
(13142) (ne10206)

SERIES C5 ROTARY SWITCHES



Series C5 Specifications: Silver-plated brass contacts rated 1.0A 125VAC with initial contact resistance of less than 0.020 (ohms). Current carrying capacity: 5A. Minimum mechanical life 25,000 cycles. Available index angle 30° only. Dimensions: Dia. = 0.920″, Shaft length = .312″; Shaft dia. = ¼″. Available in standard solder lug terminals and optional rear PC or flag terminals. *Order knob separately on page 1054.*

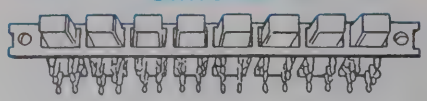
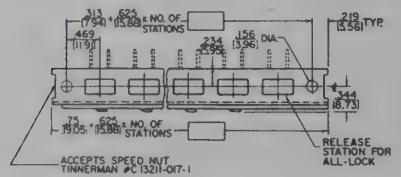
CALL NEWARK FOR INFORMATION ON WHAT'S CURRENTLY IN STOCK.

65000 & 67000 SERIES DOUBLE WIPE MULTI-STATION SWITCHES





Factory assembled and tested, these switches are DPDT modules with solder lug terminals. U-shaped bifurcated contacts, rated 3 amps AC or 0.5 amps DC, 125 volts. All interlock with lockout. Panel cutout: 0.313″(7.94) + 0.625″(15.88) x number of stations = hole-to-hole distance. **67000 series** switches accept T-1¾ flange base lamps in 6V, 6.3V and 28V sizes. One lamp per station. *Order lamps separately; contact your local Newark sales office.*

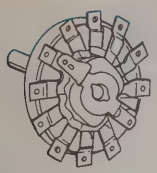
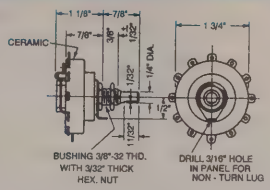
ROTARY TAP SWITCHES

111 SERIES 15-AMP 125VAC ROTARY TAP SWITCHES





Slow-break, quick-make action for switching AC current, and all-soldered, all-riveted metal and ceramic construction to provide reliable operation. Self-cleaning silver alloy contacts, rounded common contact. Arc-proof ceramic body. Use ⅜-32 bushing and hex nut for ¼″ thick maximum panel mounting. A 3/16″ hole is required for the non-turn washer. Ratings: 15 amps, 125VAC, 20VDC noninductive. Shaft torque: 1.5-3.8 in. lbs. Soldering type terminals. UL listed, file no. E14245. *Order mounting hardware kit and knobs separately on this page.*

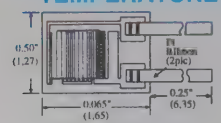
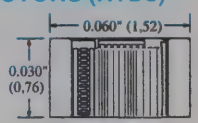
TEMPERATURE AND HUMIDITY SENSORS

THIN FILM PLATINUM RESISTANCE TEMPERATURE DETECTORS (RTDs)



Ribbon Leaded



Surface Mount

Provide a resistance change with temperature, high-quality linearity, interchangeability, sensitivity, and long-term stability. Applications include HVAC romm, duct and refrigerant equipment, temperature compensation in instrument and probe assemblies, and temperature regulation in process control. RTD type: 1000Ω/375 Alpha or 100Ω/385 Alpha. Interchangeability: ±0.1% (±0.3°C) or ±0.2% (±0.5°C) @ 0°C. Temperature Range: –55°C to +150°C, SMT. –200°C to +540°C ribbon lead. Type numbers with **suffix A** are ribbon leaded; type numbers with **suffix C** are surface mount.

Stock No.	Type	Resistance @ 0°C	Resistance Interchangeability	Temperature Coefficient of Resistance* 0-100°C	Each
91F7118	HEL-700-U-0A	1000Ω	±0.2%	3.75Ω/°C	19.95

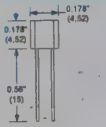
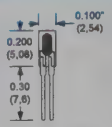
THRU-HOLE PLATINUM RESISTANCE TEMPERATURE DETECTORS (RTDs)



EL-777



EL-775

Ideal for air temperature sensing on circuit boards and assemblies. Applications include HVAC room, duct and refrigerant equipment, temperature compensation in instrument and probe assemblies, and temperature regulation in process control. RTD type: 1000Ω/375 Alpha or 100Ω/385 Alpha. Interchangeability: ±0.1% (±0.3°C) or ±0.2% (±0.5°C) @ 0°C. Temperature Range: –55°C to +150°C.

Stock No.	Type	Resistance @ 0°C	Resistance Interchangeability	Temperature Coefficient of Resistance* 0-100°C	Each
91F7123	HEL-777-A-U-0	1000Ω	±0.2%	3.75Ω/°C	19.05
91F7124	HEL-777-A-U-1	1000Ω	±0.1%	3.75Ω/°C	20.68

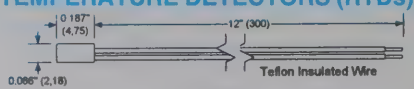
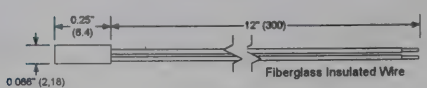
CYLINDRICAL WIRE LEADED PLATINUM RESISTANCE TEMPERATURE DETECTORS (RTDs)



EL-705



EL-707

Small cylindrical ceramic bodies are designed for drill holes and probe assemblies. Applications include HVAC room, duct and refrigerant equipment, temperature compensation in instrument and probe assemblies, and temperature regulation in process control. RTD type: 1000Ω/375 Alpha or 100Ω/385 Alpha. Interchangeability: ±0.1% (±0.3°C) or ±0.2% (±0.5°C) @ 0°C. Temperature Range: –200°C to +260°C, Teflon®; –75°C to +540°C fiberglass. **Types EL-705** have Teflon® insulated wire; **types EL-707** have fiberglass insulated wire.

Stock No.	Type	Resistance @ 0°C	Resistance Inter-changeability	Temperature Coefficient of Resistance* 0-100°C	Each

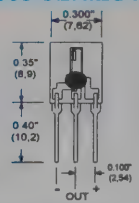
HIH-3605 SERIES HUMIDITY SENSORS



IH-3605-A

IH-3605-B

Features:
- **Linearity: ± 2.0% RH**
- **RH Range: 0–100% RH**
- **Temperature Range: –40°C to +85°C**
- **Accuracy*: ±2.0% RH**
- **Voltage Output: Vout = Vsupply (0.0062 (% RH) + 0.16) @ 25°C**
- **Temperature Compensated: True RH = (% RH)/(1.0546-0.00216 T); T=°C**

Applications:
- **Refrigeration.**
- **Drying**
- **Battery-powered systems**
- **OEM assemblies**

Laser-trimmed RHIC chip provides linear voltage output Vs % RH, fast response, and resistance to wetting and chemicals with good stability. Supply voltage: 4–9VDC.

Stock No.	Type	Lead Space	Data Included	% RH Interchange-ability	Each
91F7135	HIH-3605-A	0.100″	No	±5%	33.65
91F7136	HIH-3605-A-CP	0.100″	Yes	±5%	38.51
91F7136	HIH-3605-A-CP	0.050″	No	±5%	38.51

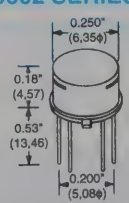
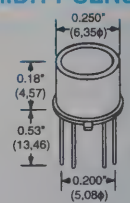
(ne10701)

HIH-3602 SERIES HUMIDITY SENSORS



TO-39 Package



TO-5 Package

Features:
- **RH Range: 0–100% RH**
- **Temperature Range: –40°C to +85°C**
- **Accuracy*: ±2.0% RH**
- **Voltage Output: Vout = Vsupply (0.0062 (% RH) + 0.16) @ 25°C**
- **Temperature Compensated: True RH = (% RH)/(1.0546-0.00216 T); T=°C**

Applications:
- **Refrigeration**
- **Drying**
- **Meterology**
- **Battery-powered systems**
- **OEM assemblies**

RHIC chip provides linear voltage output Vs % RH. TO-5 package provides hydrophobic sintered SST filtered for maximum protection in harsh or splash prone environments. TO-39 slotted package provides gross mechanical protection and faster response time. **Types IH-3602-A** and **IH-3602-C** also include an on-board thermistor or platinum RTD temperature sensor. Linearity: ±2.0% RH. Supply voltage: 4–9VDC.

Stock No.	Type	Temp. Sensor	Interchange-ability	Data Included	Package	Each
91F7139	HIH-3602-L	None	±5%	No	TO-39	72.97

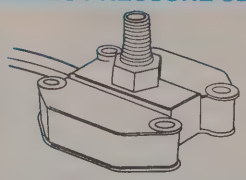
PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

PRESSURE SENSORS

240PC SERIES PRESSURE SENSORS



240PC series pressure sensors feature rugged die-cast aluminum housing and internal O-ring seals for contamination resistance. Output proportional to pressure input. Screw-in or flat pack mounting. 1/8″-27 NPT. Operating temperature -40°C to + 85°C. Recommended excitation: **242PC:** 8VDC; **249PC:** 24VDC with 25 ohm lead. 2.20L x 2.26″W.

Stock No.	Type	Pressure Range	Over-Pressure	Span	Sensitivity psi	Each
23F2282	242PC100G	0-100	200 psi	5V	50mV	**153.94**

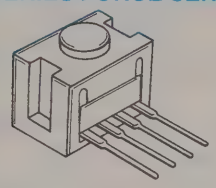
(5037) (de03222)

FS SERIES FORCE SENSOR



Provides precise, reliable force sensing performance in a compact, commercial-grade package. The sensor operates on the principle that resistance of piezoresistors will increase when flexed under an applied force. The sensor concentrates force from the application through the stainless steel plunger directly to the silicon sense element. The circuit resistance changes as force is applied, resulting in a corresponding mV output level. Resolution to 1.0 gram force (grf). Force range: 0-1500 gram. Span, mV: 360 (typ.) Recommended excitation: 10VDC. Operating temperature: –40°C to +85°C. Over force: 5.5 kg max. Dimensions: 0.44L x 0.3W x0.5″D.

16F5452 Type FSG-15N1A. **Each** **59.89**
(5167) (ne08566)

26PC SERIES TEMPERATURE COMPENSATED FLOW-THROUGH PRESSURE SENSORS

Large Port Sensor

- **Can Be Used to Measure with Vacuum or Positive Pressure**
- **Silicon Piezoresistive Sensor Chip**
- **Temperature Compensated from 0°C to 50°C**
- **24″ Wire Harness with Splash-Proof Connector**

Flow-through port design fits in-line with application. Small port design: 0.144″ O.D. (⅛″ I.D. tubing). Large port design: 0.315″ O.D. (¼″ I.D. tubing or STD connectors). Operating temperature: –40°C to +85°C. Recommended excitation voltage: 10VDC ratiometric (16VDC max).

Stock No.	Type	Pressure Range	Port Style	Full Scale Output	Sensitivity (mV/psi)	Each
16F3211	26PCAFG5G	0-1 psi	Small Port	16.7mV	16.7	**57.67**

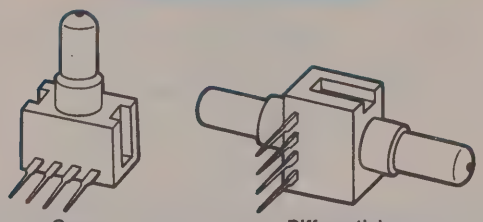
(5170) (ne08569)

26PC SERIES TEMPERATURE COMPENSATED PRESSURE SENSORS



Gage **Differential**

- **Differential and Gage Pressure Measurement**
- **Miniature Package**
- **Silicon Piezoresistive Sensor Chip**
- **Can be Used to Measure with Vacuum or Positive Pressure**
- **Temperature Compensated for Interchangeability from 0°C to 50C°**

Contain straight port, compensated circuitry and fluorosilicone seals. Temperature compensated from 0°C to +58°C. Null and full-scale output are calibrated. .400″ long 4-pin SIP termination. Operating temperature: –40°C to +85°C. Recommended excitation voltage: 10VDC ratiometric (16VDC max.).

Stock No.	Type	Pressure Range	Measurement	Full Scale Output	Sensitivity (mV/psi)	Each
52F7257	26PCAFA6G	0-1 psi	Gage/Vac	16.7mV	16.7	**25.79**

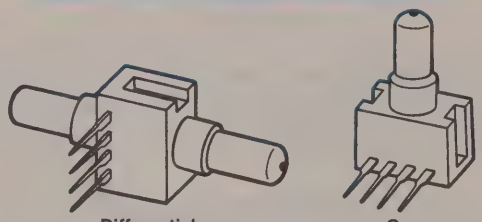
24PC SERIES NON-TEMPERATURE COMPENSATED MINIATURE PRESSURE SENSORS



Differential **Gage**

- **Differential and Gage Pressure Measurement**
- **Miniature Package**
- **Silicon Piezoresistive Sensor Chip**
- **Can be Used to Measure with Vacuum or Positive Pressure**

Contain straight port, non-compensated circuitry and fluorosilicone seals. Operating temperature: –40°C to +85°C. 2mA constant excitiation current significantly reduces sensitivity shift over temperature range. Recommended excitation voltage: 10VDC ratiometric (16VDC max). Dimensions: Differential: 1.35L x 0.50″W; Gage: 0.86L x 0.50″W. 4-pin SIP termination*.

Stock No.	Type	Pressure Range	Measure-ment	Full Scale Output	Sensitivity (mV/psi)	Each

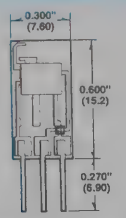
SOLID-STATE SENSORS

SS94 SERIES LINEAR HALL-EFFECT TRANSDUCERS



Operated by a magnetic field, the output voltage varies proportionally to the field strength. All sensors feature temperature compensation circuitry. **SS94A2** features silver back for improved noise immunity. Gauss range of –500 to +500 except **SS94A1F** at -100 to +100. **SS94A1F**–High sensitivity.

Stock No.	Type	Supply VDC	Supply mA	MV/Gauss Output @ 25°C*	Linearity % of Span
50F5179	SS94A1	6.6-12.6	30.0	5.000	1.5% max

TYPES SS4/SS1 HALL-EFFECT SENSORS

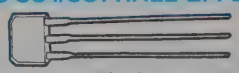

Fig. 1

Fig. 2

Position sensors have digital current sink output. **Types SS4** are for through-hole TO92 PC board mounting. **Types SS5** have SOT89 package for surface mount. **SS4** and **SS5 series** feature temperature compensation. Operating speed: 0 to over 100kHz. Supply voltage: 3.8-24VDC. Output voltage: 0.4V max. Dimensions: PC board packages are 0.160 × 0.118″ (4.06 × 3.00); surface mount packages are 0.177 × 0.136 × 0.059″ (4.50 × 3.45 × 1.50). **Type SS19** is SOT89 package for surface mount. All sensors can be supplied on tape and reel. **Type SS5 series** surface mount versions supplied standard in tape and reel.

2SSP/SS2 SERIES ULTRA-SENSITIVE MAGNETICALLY OPERATED SENSORS

2SSP/2SS52M

SS2

Feature magneto-resistive sensor with digital current sink output. Can be operated with either north or south magnetic pole. 3-pin, in-line PC board terminals on 0.100″ (2.54) mounting centers except **type 2SS52M**, which is 0.050″(1.27). For **SS21** and **SS22** output voltage: 0.4V max. Typical OP @ 25°C: 15 gauss. Typical RL @ 25°C: 11 gauss. Typical DF @ 25°C:4. 0.3″ × 0.3″ (7.62 × 7.62), with epoxy chip protection. **Type 2SSP** and **type 2SS52M** 0.18″ × 0.18″ (4.57 × 4.57) plastic package.

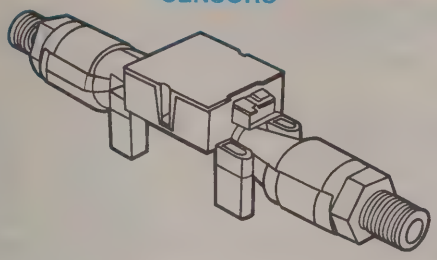
PRESSURE SENSORS

AWM 5000 SERIES MICROBRIDGE HIGHFLOW AIRFLOW SENSORS

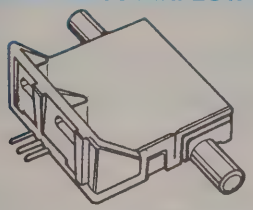


Sensors feature a venturi-type flow housing. They measure flow as high as 20 standard liters per minute (SLPM) while inducing a maximum pressure drop of 2.25″ H_2O. The microbridge chip is in direct contact with the flow stream, greatly reducing error possibilities due to orifice or bypass channel clogging. Maximum output voltage: 5.0VDC. Supply voltage (recommended excitation): 10VDC. Common mode pressure 50PSI max. Gas calibration: CO_2, N_2, and Argon. Weight: 30 grams. Operating temperature range: –20°C to +70°C. Response time 60 msec max. Dimensions: 1.4H x 1.3W x 6.4″ L.

Stock No.	Type	Measurement	Flow Range	Each
92F2998	AWM5101VN	Massflow	0-5SPLM	155.24
92F3001	AWM5104VN	Massflow	0-20SPLM	155.24

(5138) (ne03910)

MICROBRIDGE MASS AIRFLOW SENSORS



Operates on theory of heat transfer due to mass airflow directed across surface of a micromachined silicon sensing element. Output voltage mV or V varies in proportion to mass air or other gas flow through inlet and outlet ports of package. Accurate sensing of low differential pressure from 0.001″ to 4.000″ H_2O. Supply voltage (recommended excitation): 10VDC. Common mode pressure: 25PSI max. Weight: 10.8 grams. Operating temperature range: –25°C to +85°C. Response time: 1.0 msec typ. Dimensions: 1.2H x 0.6W x 1.2″D.

AMPLIFIED OUTPUTS

Stock No.	Type	Measurement	Flow Range	Output	Each

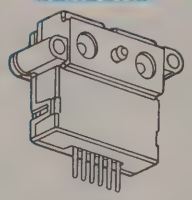
(5139) (ne03911)

AWM 40000 SERIES MICROBRIDGE MASS GAS-FLOW SENSORS



Provides mass gas-flow sensing in a unique manifold mount package. Provides highly accurate, stable, and repeatable performance. Features: precision ceramic flow tube resulting in a non-outgassing flow channel, high common mode pressure capability (250 PSI max.), high operating temperature (to +125°C), and hydrogen compatibility. Provides either mV or V output for flow ranges up to 6 standard liters per minute. Recommended excitation: 10VDC. Dimensions: 1.2H x 0.5W x 1.3″D. Response time: 1 msec. typ.

NON-AMPLIFIED

Stock No.	Type	Flow Range	Output	Each

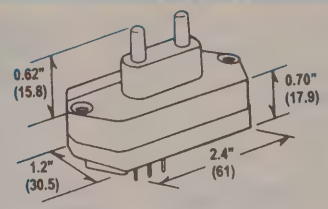
140PC AND 160PC SERIES PRESSURE SENSORS



140PC series sensors are for use in applications where high accuracy is desired. Supply current is 20mA max. Full-scale output: 5V. Shock specs meet MIL-STD-202, Method 213. Temperature range: –40°C to 85°C. **160PC series** pressure sensors are for use in low-pressure measurement applications. Recommended supply voltage: 8VDC. Input current: 8mA. Differential styles have two ports that allow connection to two pressure sources, and differential style functions same as gage when Port 1 is left open to ambient temperatures.

Stock No.	Type	Pressure Range	Measurement	Each
51F2590	142PC01D	0-1 PSI	Differential	85.90
23F2249	142PC05D	0-5 PSI	Differential	78.66

(5136) (ne03223)

180PC SERIES MINIATURE PRESSURE SENSORS

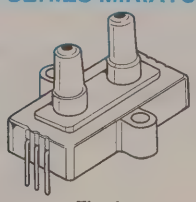

Fig. 1

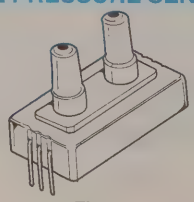

Fig. 2

Solid-state sensors are temperature compensated and amplified. Analog output voltage signal is linearly proportional to input pressure. Gage styles have one port with vent hole at the Port 1 location. Differential styles have two ports that allow connection to two pressure sources, and differential style functions same as gage when Port 1 is left open to ambient temperatures. Full-scale output: 5V. Recommended supply voltage: 8VDC. Dimensions: 1.2W x 0.6″W. Housing mount versions available; *contact your local Newark sales office.*

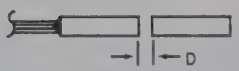
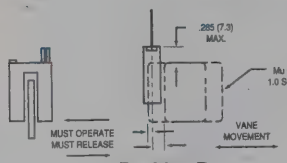
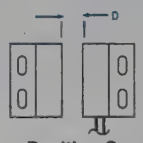
59125



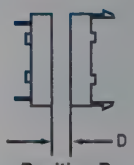
Position A



Position B



Position C



Position D

Recommended Activating Positions

Sensor contacts are activated by an approaching magnetic actuator or selected magnet and released as it is withdrawn. Sensors are connected in series with the load. No additional power is required for operation. They are unaffected by any non-ferrous material placed between sensor and actuator. Contacts are hermetically sealed for protection from hostile environments. Operating Characteristics: Typical operate time: 1ms. Operation and storage temperature: –40°C to +105°C. Shock without false operation: 50G's 11ms, ½ sine wave. Typical life @ 5Vdc, 10 ma. 50×10^6. **Type 59150** is identical to **59145** except leads exit from opposite ends of package. Notes: 1) 59085 contains both sensor and magnet. Actuation is obtained by inserting a ferrous vane between them. Operate and release positions depend on thickness of vane. (See position B.) 2) 59050 PINS 0.0185D x 0.130L, 0.8 spacing. 3) 59125 terminals 0.025 ., 0.240L, 0.100 spacing. 4) 59135-12″ Flying leads, 20 AWG, 19 x 32 teflon-insulat. 200°C, 300V, UL 1180. 5) All others-12″ Flying leads, 24 AWG, 7/32 PVC, 105°C, UL 1430 or UL 1569, 59135 Series CSA approved

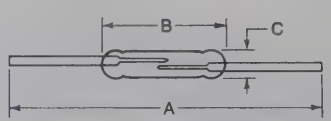
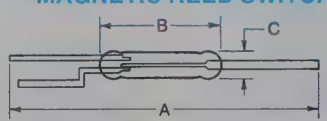
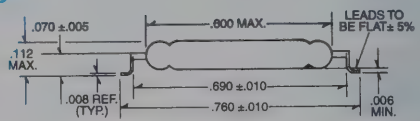
MAGNETIC REED SWITCHES



Form A



Form C



SMD

Reed switches are activated by a magnetic field from either a magnet or coil. Contacts are hermetically sealed in inert gas to provide long life with stable electrical and operating characteristics. *See Hamlin Reed Relays and Position Sensors for packaged switches.* *Combination of switching voltage and current should not exceed wattage rating.

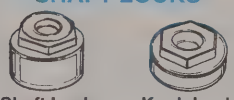
(5254) (de52800)

SHAFT LOCKS



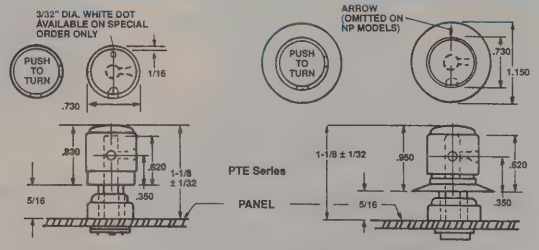
Shaft Lock Knob Lock

Prevent control shaft from rotating under shock, vibration, or accidental contact. Tapered nylon collar grips control shaft tightly and exerts even, frictional drag. All are shaft-type locks except **SL-110B**. **Type SL-110B** is a knob-type lock, and should be used with **90 series** or larger knobs. **Type SL-105B** has a shaft diameter of ⅛″; all others ¼″. Mount in place of nut and washer on most potentiometers.

Stock No.	Type	Thread NEF2	1-9	10-24
26F314	SL-100B	⅜-32	2.41	2.29
26F937	SL101R	⅜-32	5.01	4.76
26F315	SL-105B	¼-32	2.59	2.46
26F938	SL110B	⅜-32	2.59	2.46

(5255) (de52801)

SELF-LOCKING PUSH-TO-ENGAGE KNOBS



Designed for applications in which control setting must be maintained under conditions of shock and vibration. Setting can not be changed accidently, since knobs must be depressed before movement. Knobs are available in matte or mirror finish.

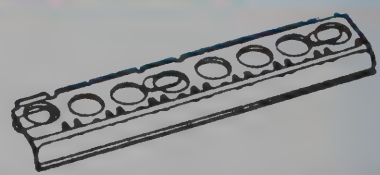
PRESS FIT TERMINAL BLOCK COVERS



Provide shock-resistant dead front for terminal blocks, while allowing screwdriver access to termination screws. Covers are end-to-end stackable. Centerline spacing: 0.325" on Type **TC4 series**; 0.375" on **TC6 series**; and 0.4375" on Type **TC8 series**. All are made of black, UL recognized thermoplastic.

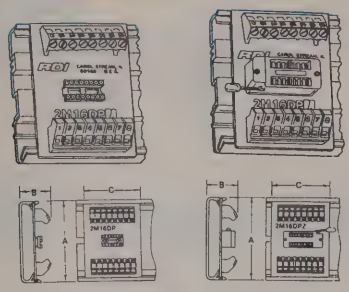
RDI® INTERFACE MODULES

ZERO INSERTION FORCE (ZIF) AND DIP SOCKETS TO SCREW TERMINAL BLOCK INTERFACES



ZIF DIP

Rated 5A, 150V. Inner-machined contacts have gold over nickel plating; outer-machined brass contacts have tin over copper plating. 3-48 UNC zinc-plate screws. Wire range 12-22AWG. Fit **2TK, 2TDK series** SNAPTRACK®.

ZIF SOCKET/TERMINAL BLOCK INTERFACES

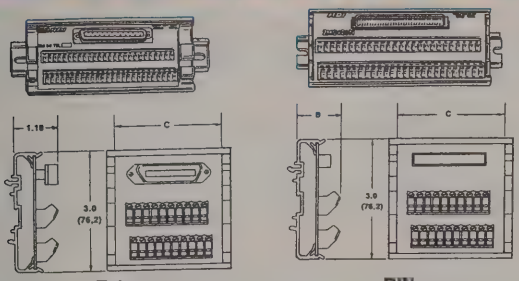
(5191) (de00256)

TELCO & DIN CONNECTOR INTERFACE MODULES



Telco DIN

Convert DIN 41612 standard connector or Telco connector to field wiring. Fit **2TK2** and **2TKD series** SNAPTRACK® *(order track separately)*. UL94V-0 thermoplastic housing. Ready-to-wire terminals fit 12-22AWG wire.

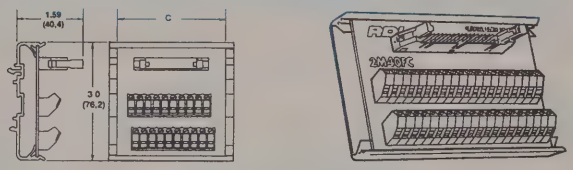
(5193) (de00258)

FLAT CABLE CONNECTOR TO TERMINAL BLOCK INTERFACES



Feature four-sided notched sockets to assure correct polarity connections. Rated 1 amp, system consists of gold over nickel-plated, 94V-0 thermoplastic header; gold over nickel-plated beryllium copper strain relief connector for 26-30AWG solid, 28AWG stranded wire range; 12-22AWG wire range terminal block with 3-48 screws. Fit **2TK** and **2TDK series** SNAPTRACK®.

RDI® SNAPTRACK® SYSTEM

SOCKET MOUNTING TRACK SYSTEM

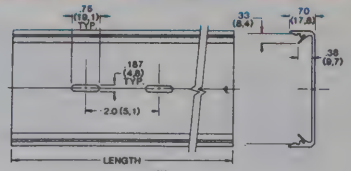

Fig. 1

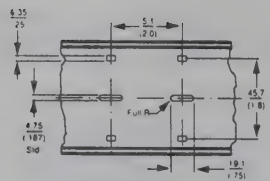

Fig. 2

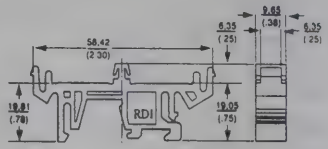

Fig. 3

- **Saves 30% Installation Time**
- **Saves 50% Wiring Time**

SNAPTRACK® is a nonconductive, rigid extruded PVC chassis for mounting socket assemblies and custom circuit boards. Mounts panels with rivets, screws or double-faced tape. PC boards snap-in from front, and are held securely by integral ribs that absorb shock when PC board is flexed. SNAPTRACK® allows convenient PC board removal for field servicing. Available in 4 lengths and 4 widths. Slots on 2″ (50.8) centers for fast, easy installation.

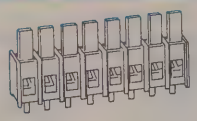
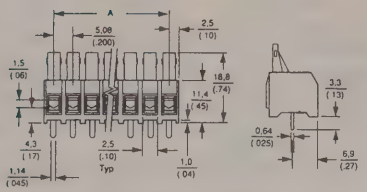
2SV SERIES SUBMINIATURE SCREWLESS TERMINAL BLOCKS





2SV series screwless vertical mount terminal blocks are 0.45″H x 0.2″D (11.43 x 13.21). Wire range: 18-24AWG. 20A, 300V UL recognized; 20A, 150V CSA certified (except 24AWG). Solder terminal connections on 0.2″ (5.08) centers. Handle multiple wires per terminal. Thermoplastic polyester body, flammability classification UL94V-0. Acid-tin plated copper alloy terminals. Standoffs for flux removal.

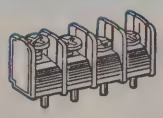
4DB SERIES TERMINAL BLOCKS



Standoffs for flux removal; acid-tin plated brass terminals and #6-32 zinc-plated phil/wire clamp screws. Maximum operating temperature: 105°C. UL94V-0. Center spacing: 0.325″ (8.26). Serrated terminals for secure wiring and thermoplastic polyamide barriers. PC pin terminal style. Wire range: 14-22 AWG. Rated 20A, 150V UL recognized; 20A, 300V CSA certified.

NC6 SERIES TERMINAL BLOCKS

NC6 series designed with thick thermoplastic polyamide barriers for more demanding applications. Meet UL94V-0 flammability classification and have a maximum operating temperature of 130°C. Brass, printed circuit style terminals with acid-tin over copper plating. Wire-ready, raised, #6-32 zinc-plated wire clamp screws. Feature 0.040″ (1.02) high standoffs for flux removal. 0.375″ (9.53) center-to-center spacing. Wire range: 12-22 AWG. Rated: 20A, 300V; UL recognized, CSA certified.

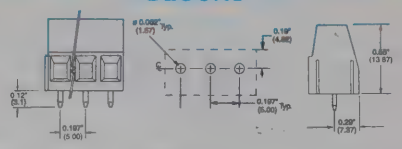
RDI® TERMINAL BLOCKS

5KEV SERIES VERTICAL ELEVATOR CLAMP TERMINAL BLOCKS



Wave solder directly to PC board. Elevator-action wire cage clamping mechanism provides secure connections for 12-22AWG wire range. High density 0.197″ (5.00) centers. Modular glass reinforced polyester housing, rated UL94V-0 @120°C. Bright acid-tin over copper-plate alloy terminal. Box and captive screw zinc-plated steel with yellow chromate coating. Available to 24 positions and other color (black); *contact your local Newark sales office.* UL recognized, CSA certified, in accordance with VDE0110. 10A @ 300V/15A @ 150V. Color: green.

Stock No.	Type	Positions	1-24
97F9991	5KEV-02	2	0.73
97F9992	5KEV-03	3	1.09

2EHDV/2EHDR SERIES EURO VERTICAL/RIGHT ANGLE HEADERS

Right Angle Vertical

Green **2EHDV/2EHDR series** headers mate with **2ESDV series** terminal blocks, *ordered separately.* Closed-end headers available with straight or right angle pins on 2.000″ (5.08) centers. Also available on 0.197″ (5.00) centers; *contact your local Newark sales office.* Zinc-plated steel captive screws with clear chromate coating. Glass reinforced polyester housing rated UL94-V0 @105°C. Bright acid-tin over copper-plated copper alloy terminals. (*)Available to 24 positions; *contact your local Newark sales office.* UL recognized, CSA certified at 10A, 300V/15A, 150V (limited ratings). Designed in accordance with VDE 0110. Meet MIL-STD-202, method 208 solderability.

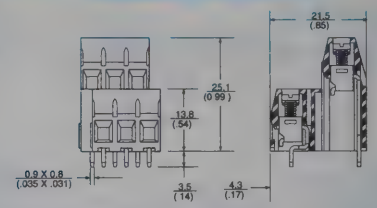
2LEEV/5LEEV SERIES DOUBLE-DECKER CLAMP TERMINAL BLOCKS



Built-in wire guard reduces possiblity of miswiring when clamp is in raised position. Ideal for hard-to-reach applications. End-to-end stackability with locking dovetails. Captive M2.5 screws. UL recognized thermoplastic housing and tin-plated copper alloy terminals. Rated at 100 Amps, 300 Volts/15 Amps, 150 Volts. Color: green. Other models available; *contact your local Newark sales office.*

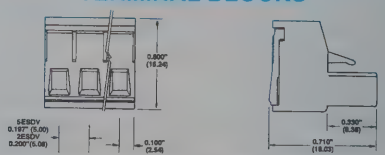
(5203) (de00933)

2ESDV SERIES DEPLUGGABLE CAGE CLAMP EURO TERMINAL BLOCKS



Mate with **2EHDR, 2EHDV series** headers, *ordered separately.* Elevator wire cage clamping mechanism provides secure connection for 14-22AWG wire range. **2ESDV series** 0.200″ (5.08) high density centers. Zinc-plated steel box and captive screws with yellow chromate coating. Wave solderable, glass reinforced polyester housing, rated UL94V-0 @105°C. Bright acid-tin over copper-plated copper alloy contacts. (*)Available to 24 positions; *contact your local Newark sales office.* UL recognized, CSA certified at 10A, 300V/15A,150V; designed in accordance with VDE 0110. **5ESDV series** 0.197″ (5.00) for **5EHDV, 5EHDR** also available; *contact your local Newark sales office.*

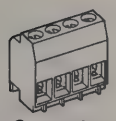
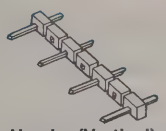
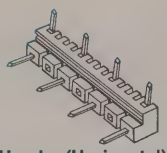
FLUSH MOUNT PLUG-IN CONNECTORS/HEADERS



Connector



Header (Vertical)



Header (Horizontal)

Allows for vertical or horizontal PCB mounting with 0.330" (1.30) diameter round pin or 0.254" (1.00) square pin headers. Up to 24 terminals in 1.27" (5.00) design. Features cage clamp and captive screws. Contact system: Brass, tin plated. Terminal spacing: 1.27" (5.00). Insulating material: polymide, type 6/6. Flammability: UL94V-0 rated. Color: black (5.00mm) and blue (5.08mm). Current: 15A max. Operating voltage: 300V. Wire range: 12-30 AWG. Temperature range: –60°C to +105°C (tin). Tightening torque: 0.5Nm (4.4 in.-lbs.). UL recognized, CSA certified.

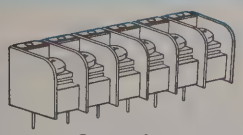
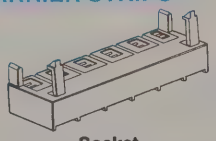
FIXED OR PLUG-IN TRI-BARRIER STRIPS



Connector



Socket

Connector can be direct or socket mounted. Secure mating with built-in locking arms. Features wire-ready clamping plate screws. Sockets available in up to 12 terminals and can be end-to-end stackable to create longer sizes. Maximum circuit isolation. Contact system: brass, tin plated. Terminal spacing: 0.325" (8.26). Insulating material: connector, polypropylene; socket, nylon. Flammability: UL94V-0 rated. Color: black. Current: 15A. Operating voltage: 300V. Wire range: 14-22 AWG. Temperature range: –60°C to +105°C. Tightening torque: 9.0 in-lbs. UL recognized, CSA certified.

8191 AND 8291 SERIES MODULAR PC BOARD TERMINAL STRIPS

- ISO 9001 Certified

8191 and **8191Z series** have 5mm pin spacing and **8291** and **8291Z series** have 5.08mm pin spacing. All can be interlocked to form different configurations. Fully enclosed parts, nickel-plated brass cage clamp, and test point provisions. Ratings: Field wiring 300V, 20A; factory wiring 300V, 30A, #12 AWG max. **8191Z** and **8291Z** also feature a closed bottom design. Polyamide 6.6. Rated 94V-0. UL recognized, CSA certified, VDE approved.

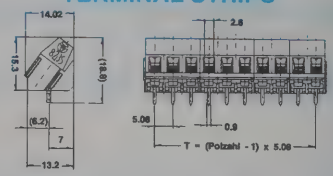
8135 SERIES 35° ANGLE MODULAR PC BOARD TERMINAL STRIPS



35° angle wire entry ideal for limited-space applications. Modular units assemble to form any pole configuration. Field wiring rated 300VAC, 20A, 12-22AWG; factory wiring 300VAC, 30A, 12-30AWG. Body: Polyamide 6.6 rated 94V-0. Clamping screw: dichromated steel; clamping body is nickel plated copper alloy. Light grey. UL recognized, CSA certified, VDE approved.

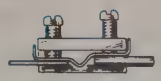
DIVISIBLE EUROPA STRIPS



Feature phosphor bronze wire guard between screw and conductor to prevent damage to conductors. Polyamide 6 insulating body easily cut with knife or saw. Nickel-plated connectors and zinc-plated clamping screw. UL recognized, CSA certified, VDE approved 0110 Gr. C. To double voltage performance to 600V from 300V, *order spacers separately below.* **Type 6EH DS** offers 600 volt rating without requiring a spacer. Other sizes available; *contact your local Newark sales office for details.*

Open Bottom

CLOSED BOTTOM TERMINAL STRIPS WITH INSULATING PLATES (NO PINS)

Low profile, ultra-compact modular terminal strips for high-density PC boards. Terminal strips are configurable to any length. 3.50mm pin spacing, available in 2- and 3-pole units, and easily interlock to form any number up to 24 poles. Molded of flame-retardant polyamide, rated UL94V-0. Copper alloy rising cage clamp and built-in test points. Height: 9.5mm. CSA certified, VDE approved. Marked versions also available; *contact your local Newark sales office.*

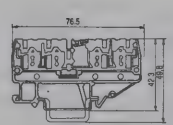

Fig. 2

JUMPER BARS (CROSS CONNECTORS)—FIG. 3

Preassembled jumper bars achieve good electrical conductivity and provide fast interconnection Material: electrolytic copper, supplied with necessary screws. Standard 24″ length or 2-, 3-, and 4-pole precut lengths. Can be cut diagonally by user. The jumper bar can be fixed directly onto the terminals; no bushing or sleeve required. Standard 24″ jumper bar and jumpr bars for 2, 3 and 4 pole precut lengths available for Block WK6/U, *contact your local Newark sales office.*

RAPID UNMARKED MARKING STRIPS—FIG. 5

Tear-apart strip of 10 unmarked marking tags. Help reduce marking time. Constructed of Polyamide 6.6 material. Fit easily into the molded slots of the insulating terminal block body. **Type 9705A/5/10** for terminals 10mm wide and 5mm wide; **type 9705A/6/10** for terminals 6mm wide; and **type 9705A/8/10** for terminals 8mm wide. Rapid mounting tool (Fig. 6), also available, *contact your local Newark sales office.*

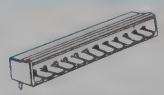
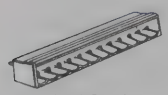
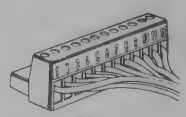
8113 AND 8213 SERIES PLUGGABLE PC TERMINAL STRIPS



Horizontal Socket



Vertical Socket



Plug

8113 and **8213 series** 2-piece, plug-in terminal strips provide quick connect and disconnect of PC board wiring. They are available with 2 to 24 poles and in either horizontal or vertical socket configurations. All metal parts are recessed or enclosed in the insulating body to provide circuit protection and dead-front safety. Insulating housings made of polyamide 6.6. Materials rated 100°C, UL94V-0. Terminal block connectors also have captive wire protection, and nickel-plated brass screws are secured against loosening. Contact springs and solder pins are tin-plated bronze. Rated 300V, 15A, 12 AWG. **8113 series** are black and have 0.039″ (1.00) square pins for 0.197″ (5.00) spacing. UL recognized, CSA certified, VDE approved 0110 Gr. B.

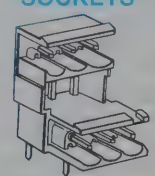
8213 SERIES TWO-TIER PLUGGABLE PC TERMINAL SOCKETS



3 Pole Horizontal

8213 series modular, slide-together, two-tier sockets allow for increased end-to-end pin density. Flush mount PC boards. All metal parts recessed or enclosed for circuit protection. Gray polybutylene terephthalate material rated 105°C, UL94V-0. 0.039″ (1.00) square solder pins are tin-plated bronze; for 0.200″ (5.08) spacing. 300VAC, 12A, 12AWG max., 250VAC, 15A, 12AWG max. UL recognized, CSA certified, VDE approved 0110 Gr B. **8113 series** *with 1.97″ (5.00) spacing available; contact your local Newark sales office.*

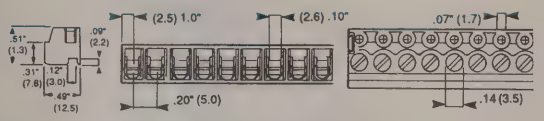
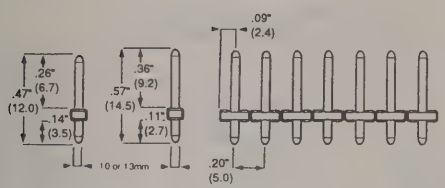
8142 SERIES TWO-PIECE PC DISCONNECT STRIPS



Connector Strip



Pin Strip

Solderable socket connector strip for 0.197″(5.00) spacing allows connection and disconnection of up to 24 poles to and from printed circuit in one simple plugging operation. Wires connected to flush-mounted strip by screws having wire protection spring. Two connector pins available: 1.3mm diameter above board and 1.0mm diameter below board or 1.3mm diameter above board and 1.3mm diameter below board. Tin-plated socket contacts. 20 amps, 300 volts, 12-22 AWG. UL recognized, CSA certified, VDE approved.

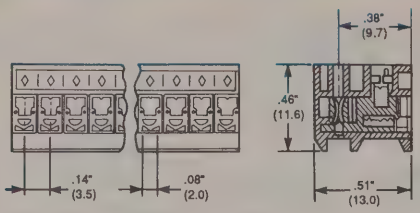
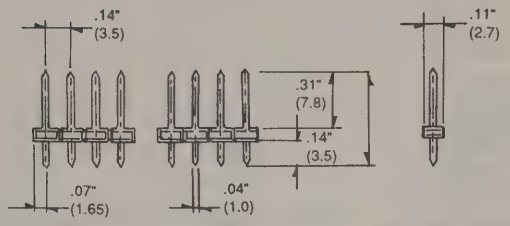
8543 SERIES HIGH-DENSITY DISCONNECT STRIPS



Connector Strip



Pin Strip

Terminal strip has 0.138″ (3.5) pin spacing, mounts flush to PC board with height of only 0.456″ (11.6). Connecting pins insulated within terminal housing, have opening for easy circuit testing. 2 to 12 pole configurations. Rated 250 volt, 10 amps. 22-16 AWG solid or stranded. Pin strip is polyamide 6.6, has nickel-plated copper alloy 0.0394″ (1.0) diameter pins. UL listed, VDE approved and meets international standards.

BLZ/SL 5.00mm SERIES PCB PLUGS AND HEADERS

Feature black PBT (polyester) moldings and screw clamp connectors. All BLZ/SL 5.00mm series headers and 180° plugs are available to 24 poles, and are available with alternate color moldings, *contact your local Newark sales office.* Rated: 300V/10A. Wire range: 22-12 AWG. Strip length: 0.24″ (7). UL recognized, CSA certified.

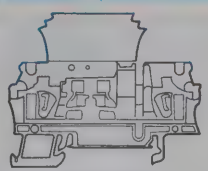
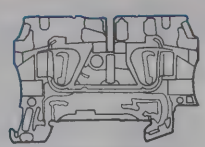
TERMINAL STRIPS, BLOCKS AND ACCESSORIES

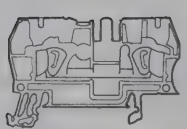
TENSION CLAMP (Z SERIES) FOR TS35 DIN-RAIL



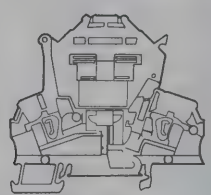
Type 160877



Type 163208



Type 160851



Type 161640

Vibrationproof clamping system made from corrosion-resistant stainless steel. Current-carrying components, including jumpers, are completely insulated for touch-safe use. High density (0.2″ per block for 12 AWG). Expanded marking options, ideal for use with PLC circuitry. Wemid thermoplastic moldings combine UL94V-0 with an operating temperature range up to 250°F and the resilience of nylon. UL listed, CSA certified, VDE approved.

DEKAFIX MARKING TAGS

Use to mark terminal blocks and assemblies. White Dekafix tags are printed with large, black numbers, symbols, or characters. Tension clamp feed-through terminal blocks can hold 1 Dekafix tag on each side of the block, in addition to a center marking area. **W series** terminal blocks can hold 2 Dekafix tags on each side. To select the proper tag, make sure the width of the tag is no greater than the width of the terminal block. Both horizontal and vertical printing are available. Print on all tags is rub- and oilproof. Width: * 5mm, † 6mm. Other styles and custom printing available; *contact your local Newark sales office.*

LM SERIES 5.00/5.08mm TERMINAL BLOCKS

NEW

LM series 5.00/5.08mm pitch low-profile printed circuit board terminal blocks provide an excellent alternative in a broad range of applications where space saving is critical. Provide vibration-proof and gastight connection due to a superior mechanical clamping design. Color: black. Also available in orange; *contact your local Newark sales office.* UL listed, CSA certified VDE approved. UL rated at 300V and 10 amps.

IEC TYPE TERMINAL BLOCKS

M SERIES IEC TERMINAL BLOCKS AND END BARRIERS

All modular blocks require one end barrier, *ordered separately below.* Terminal blocks can be mounted on DIN 3 rail, which can also be *ordered separately on this page.* Sections and barriers are molded of thermal plastic Ultranid A3K. Color: gray. Working temperature range: –55°C to +110°C, with a maximum peak temperature of +190°C for less than one hour. Blocks are designed to IEC standards and VDE approved; also UL recognized, CSA certified. *Order marking and jumper bar accessories on this page.*

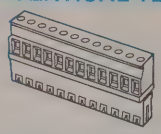
TERMINAL BLOCKS

SIDE WIRE ENTRY VERTICAL TERMINAL BLOCKS



Vertical right angle- and left-side wire entry plugs available with 5.00mm or 5.08mm spacing. Mate with horizontal or vertical headers, *ordered separately on page 1094.* Cage clamp style allows connection to be easily disconnected and then securely restored numerous times. Wire size: 22-10 AWG. Nickel-plated finish on brass alloy cage clamp and tin-plated finish on solder tag provides low contact resistance, maximum corrosion resistance, and easy soldering. Unbreakable insulating polyimide housing, flammability rated UL94V-0. Size: 26.5H x 12.5mmW. UL recognized, CSA certified, VDE approved. Other pole positions available; *contact your local Newark sales office for details.*

FRONT CABLE INLET TERMINAL BLOCKS

1803

Choose single or double front cable inlet 1-piece terminal blocks. Cage clamp style allows connection to be easily disconnected and then securely restored numerous times. Wire size: 22-12 AWG, single; 22-14 AWG, double. Feature nickel-plated finish on brass alloy cage clamp and tin-plated finish on solder tag to provide low contact resistance, maximum corrosion resistance, and easy soldering. Unbreakable insulating polyimide housing, flammability rated UL94V-0. Size: 19H x 10.5mmW, single; 34H x 21.5mmW, double. UL recognized, CSA certified, VDE approved.

1-PC. BOARD MOUNT TERMINAL BLOCKS

Terminal-screw style 1-piece blocks with wire guard, except **type 1894** which is a cage clamp style that allows connection to be disconnected and then restored numerous times. Nickel- or tin-plated finish provides low contact resistance, corrosion resistance, and easy soldering. Wire guards protect conductors against strain. Insulating polyimide housing, rated UL94V-0. UL recognized, CSA certified, VDE approved.

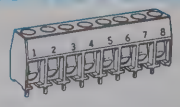
TERMINAL BLOCKS

85 SERIES EUROSTYLE® PC TERMINAL BLOCKS



Straight PC wire entry to 14AWG; 12AWG minimum stranded or multiple. 0.197″(5.00) contact spacing provides up to 5 terminations per inch. Dead front construction; recessed, captive screws. Closed side prevents wires from passing through. Black thermoplastic insulator rated UL94V-0. 15A, 6500Vrms. 0.475H x 0.350″W (12.07 x 8.89). UL recognized, CSA certified. (*)Available in 10mm contact spacing; *add* **suffix 10mm** *to type number.*

86 SERIES EUROSTYLE® PLUGGABLE PC BOARD TERMINAL BLOCKS

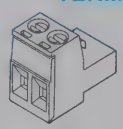

Fig. 1

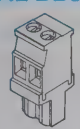

Fig. 2

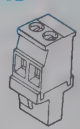

Fig. 3

Eurostyle® terminal blocks for PC boards are 2-piece plug and header system that are polarized with the industry standard scalloped design. Available in **86 series** 0.200″ (5.08) units. Rising cage pressure clamp compresses wires for higher-pressure, gas tight interface. Phosphor bronze contacts. Accepts 12-30 AWG wire. Black polyamide body, rated UL 94V-0. UL Class B commercial 15A @ 250V. Class C industrial 10A @ 300V. CSA 15A @ 300V. VDE 0110 Gr. C 12A @ 250V.

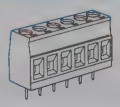
88 SERIES SINGLE-PIECE FIXED TERMINAL BLOCKS



Permanent-mount Eurostyle® blocks in 0.200″ (5.08) or 0.197″ (5.00) spacing. Tin-plate brass pressure clamps compress wire uniformly. Straight thru terminals. Polyamide insulator rated UL94V-0. Closed bottom prevents solder wicking. Hot tin dip phosphor bronze contacts. Zinc chromate-plated steel screws. Wire range: 12 to 30 AWG. 0.33″ (8.38) wide footprint. Withstanding: 6500VDC. Contact resistance: <10 milliohms initial. Operating temperature: –55° to +100°C. UL recognized 15A @ 250V/10A @ 300V; CSA certified 15A @ 300V. VDE approved 16A @ 250V.

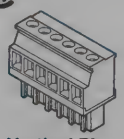
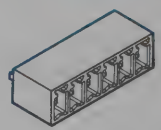
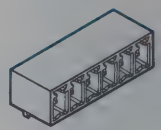
90 SERIES EUROSTYLE® 3.81MM PLUGGABLE TERMINAL BLOCKS



Vertical Plug



180° Header



90° Header

High-density terminal blocks for PC boards are two-piece plug and header design polarized with the industry standard interface. Available from 2 to 21 poles in .150″ (3.81) centers. Optional locking screws available. Beryllium copper terminal contact provides optimum contact forces. Rising cage pressure clamp compresses wire for high-pressure, gas tight termination. 16 through 30 AWG wires. Black polyamide UL 94V-0 plug body. High-temperature black UL 94V-0 PBTB header body. Rated 10A at 300V. UL recognized, CSA certified.

93 SERIES EUROMATE® 3.81mm PLUGGABLE TERMINAL BLOCKS

93 series terminal blocks offer unique design and user-friendly open screw terminals. Terminates using standard blade or phillips screwdriver. Euromate® plug mates with any Euro header polarized with the industry – standard interface. Available from 3-21 poles in 0.150″ (3.81) centers. Optional locking screws available. Beryllium copper terminal contact allows for optimum contact forces. Accepts 14 through 30 AWG wires. Black polyamide UL 94V-0 body. Rated 10 amps at 300V. **930800 series** type numbers designate vertical right-hand plug. Vertical left-hand plugs, series 930900 also available. *Call your local Newark sales office.* UL recognized, CSA certified.

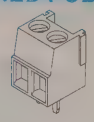
TERMINAL BLOCKS, STRIPS AND CONNECTORS

83 SERIES 3.5mm FIXED PCB TERMINAL BLOCKS



Eurostyle® **83 series** rising cage pressure clamp terminal blocks feature high pitch density 3.5mm pitch screw terminal. Allow for simple and reliable field termination in tight spaces. Low-profile design is 0.335″ high and 0.275″ in depth. Dovetail construction allows several blocks to be assembled into a larger size. Phosphor bronze contacts ensure repeatable wire clamping. Serrations provide a high-pressure, gas-tight interface. Wire range: 16 to 26 AWG. Contact resistance: <10 milliohms initial. Operating temperature: –55°C to +85°C. VDE approved, rated at 8A @ 250V.

Stock No.	Type	Poles	Length	Center Space	1-24

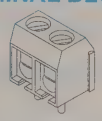
84 SERIES 5.0mm ECONOMICAL SCREW TERMINAL BLOCKS



Eurostyle® **84 series** screw terminal blocks feature a modular, snap-together design. Allow for simple and reliable field termination in tight spaces. Low-profile design is 0.395″ high and 0.295″ in depth. Modular dovetail construction allows two or three blocks to be assembled into any length. Phosphor-bronze contacts provide repeatable wire clamping. Wire range: 14 to 24 AWG. Contact resistance: <10 milliohms initial. Insulator: polyamide, UL94V-0, gray. Terminal: brass, tin plate. Zinc-chromate plated steel screws. Operating temperature: –55°C to +85°C. UL recognized, CSA certified 14A @ 300V, VDE approved, rated 16A @ 250V.

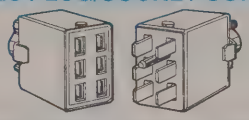
5400 SERIES PLUG/SOCKET CONNECTORS



5400 series plugs and sockets rated 15A, 1750Vrms. Interchangeable with **2400** or **400 series** type connectors. Applications include traffic control equipment, industrial machinery, heating and cooling equipment, and signal systems. UL recognized, CSA certified. Cable clamp top. *To order side entry cable clamp substitute* **CCE suffix**; *deep bracket substitute* **DB suffix**; *shallow bracket substitute* **SB suffix**.

HIGH BARRIER SINGLE-ROW TERMINAL STRIPS

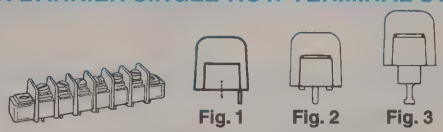

Fig. 1 Fig. 2 Fig. 3

- **70 Series: 20 Amp @ 300V, 0.325″ (8.23) Centers**
- **72 Series: 25 Amp @ 300V, 0.375″ (9.53) Centers**
- **63 Series: 25 Amp @ 600V, 0.438″ (11.1) Centers**

Barrier strips are UL94V-0 glass-filled flexible thermoplastic. Choose from 4 terminal styles: closed back, screws only top-side termination; printed circuit bottom-side; insulated solder turret bottom-side; wire wrap bottom-side. Terminals are welded, resulting in no solder joint fatigue caused by twisting the tails. Terminals are tin-lead plated brass with 6-32 x ¼ binding head screws. 0.66″H x 0.6″W (16.76 x 16.00). UL recognized, CSA certified.

FRIENDLY, QUALITY SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

TERMINAL STRIPS

76 SERIES 20 AMP BARRIER TERMINAL STRIPS

Double row, closed-back high barrier strips with 0.375″ (9.53) terminal centers. Glass-filled thermoplastic insulator, rated UL 94V-0 with 110°C temperature index. Zinc-chromate-plated steel no. 6-32 x 0.250″ (6.35) binding head screws. Wire size: 14 AWG maximum. 0.88″ (22) wide x 0.63″ (16) high. Voltage rating: UL recognized 250Vrms Class B, 150Vrms class C; CSA certified 300 volts @ 20A. Withstanding voltage: 10500Vrms.

141 series power distribution and splicer blocks feature small size, high-impact thermoplastic rated at 125° C. May be ganged together to form various line lengths. All other types are general-purpose phenolic rated at 150° C. All are 600 volt, have 1 line, 1 load opening per pole, except all power distribution blocks. High conduction tin-plated connectors. UL recognized, CSA certified, ISO9002 certified.

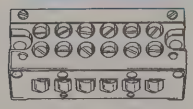
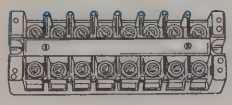
HEAVY-DUTY TERMINAL BLOCKS



1100, 1103P, 1200



1500

1100, 1103P and **1200 series** are deadfront style. **1500 series** are barrier style, available in six types denoted by type number suffix: **STD** = standard connector; **DJ** = removable connector with brass insert; **ST** = 10-32 stud; and **SC** = short circuiting bar with brass insert, 4 shorting pins per block. All have general purpose phenolic molded base, rated 150°C. UL recognized file no. E62806, CSA certified file no. LR19766. ISO9002 certified.

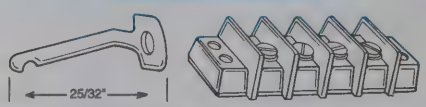
140, 140-Y SERIES SCREW TERMINAL BARRIER BLOCKS



140 and **140-Y series** 0.375″ (9.53) density terminal blocks feature interposing barriers between terminals to boost electrical ratings and provide added protection against frayed wire shorting. **140** have binder screws; **140-Y** have Y terminals installed. See specifications guide *on this page.* Temperature range: –55° to +300°F. Rated at 250V. UL recognized. *Order jumpers separately on page 1103. Order fanning strips separately; other sizes available, contact your local Newark sales office.*

SOLDERLESS TERMINALS

CRS SERIES RING TONGUE TERMINALS

OSHA

1. Funnel design guides wire into position

2. No wire strand hang-up as wire is inserted. Fast positive installation

3. Wire in place, ready for crimping

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Wire guide barrel provides excellent electrical and mechanical connection. 1-piece, burr-free construction for maximum electrical conductivity. Electro-tin plating for maximum corrosion resistance. Constructed of pure electrolytic (ETP) copper, annealed to relieve stress points and to provide maximum installed strength. Barrel-to-pad transition designed to minimize flexing and bending. Multiple "V" grooves in barrel give maximum holding power and current flow. Insulation is molded of tough, resistant electrical-grade vinyl or nylon. Color coding. Molded flange for accurate location of crimp tool. Open-end design permits visual inspection of wire location before and after crimping. UL recognized, CSA certified, OSHA compliant. Made in the U.S.A. **Sold in packages of quantities indicated below.**

SOLDERLESS TERMINALS

VOLTREX™ BRAND SPADE (FORK) TONGUE TERMINALS

OSHA

VOLTREX™ brand MADE IN USA

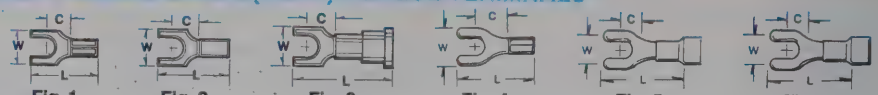

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6

Types CBS-TO and **CSS-TO** are noninsulated butted seam terminals used where special characteristics are not required. **Type CBS-ZO** noninsulated brazed seam terminals allow crimp at any location on barrel. Seam is silver brazed and cannot open under crimping or operating pressure. **Types CBS-TV** and **CSS-TV** vinyl insulated terminals with "wire guide" barrel consists of butted seam with flared, rigid PVC sleeve. Flexure occurs over wide area on the wire insulation rather than at juncture. Funnel shaped sleeve guides wire strands into barrel. **CBS-ZV** vinyl insulated brazed seam terminals with "wire guide" barrel have same features as **CBS-TV** plus the advantage of the brazed seam over the butted seam. **Types CBS-DY** and **CSS-DY** nylon insulated terminals with "sure-grip wire guide" barrel consist of a butted seam with flared seamless brass sleeve covered with a flared injection molded nylon sleeve. UL recognized, CSA certified, OSHA compliant. Made in the U.S.A. **Sold in packages of quantities listed below.**

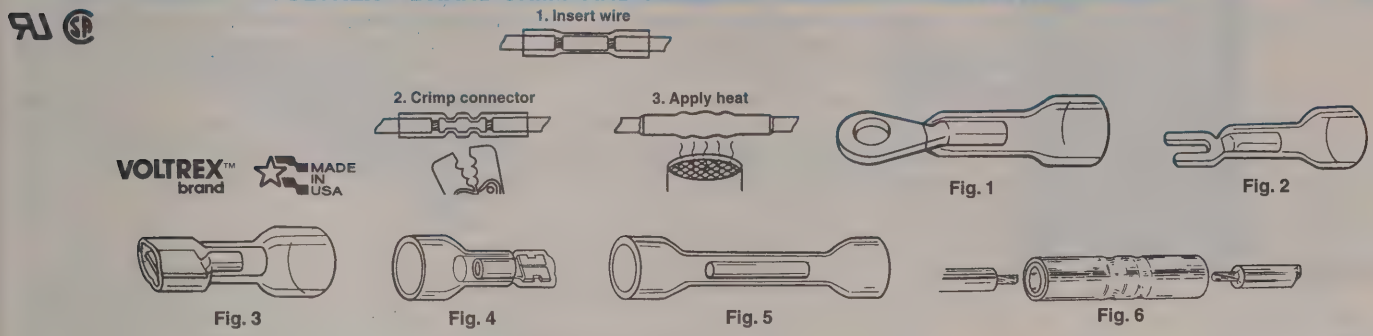
HEAT-SHRINK TERMINALS AND TUBING

VOLTREX™ BRAND CRIMP AND SEAL HEAT-SHRINK TERMINALS AND TUBING



Waterproof terminals and splices are environmentally sealed by a heat-shrinkable insulation that is part of the component. These terminals combine irradiated, cross-linked, heat shrinkable insulators with highly conductive connectors. As the tough polyolefin jacket shrinks, a hot adhesive lining seals out contaminants and glues the wires into place. Reliable and easy to install. Can be visually inspected through the translucent insulation. Corrosion and abrasion resistant. Ideal when corrosive fumes or liquid contaminants are present. Offers increased pull-out strength. Designed to withstand shock and vibration. Seamless butt splices and brazed seam ring and fork tongue terminals. UL recognized (file E58918), CSA certified (file LR22190M6). Made in the U.S.A. **Sold in packages of quantities indicated below.**

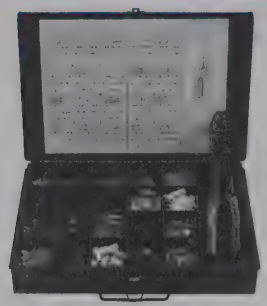
TERMINAL KITS AND CONNECTORS

NEW



VOLTREX™ brand

3647, 3648

VOLTREX™ BRAND 500-PC. INSULATED SOLDERLESS TERMINAL KITS

Type 3648 kit contains 25 each of 20 different kinds of solderless terminals including snap spade tongue, pin, ring tongue, block spade tongue, and wire butt splices. Feature vinyl-insulated and fully insulated styles. For wire gauge sizes 22-18, 16-14, and 12-10. Plus a crimp tool and a convenient identification chart in the lid of a durable metal storage case.

84N671 Type 3648. **Each** **99.99**

Type 3647 kit contains 25 each of 20 different kinds of quick-disconnect terminals including both male and female noninsulated, vinyl-insulated, and fully nylon-insulated styles. For wire gauge sizes 22-18, 16-14, and 12-10. Plus a crimp tool and a convenient identification chart in the lid of a durable metal storage case.

84N670 (34089) Type 3647. **Each** **99.99** (ne34089)

OSHA

VOLTREX™ brand

8403-QD

VOLTREX™ BRAND SOLDERLESS TERMINAL KITS

- **UL Recognized, CSA Certified, OSHA Compliant**

300-PC. QUICK-DISCONNECT KIT

Type 8403-QD kit contains 25 each of the 12 most popular quick-disconnect terminals including both male and female vinyl- and fully-insulated styles. For wire gauge sizes 22-18 and 16-14. Plus a crimp tool and a convenient identification chart in the lid of a durable plastic storage case.

23N3622 Type 8403-QD. **Each** **69.99**

300-PC. VINYL-INSULATED TERMINAL KIT

Type 8403-TV kit contains 25 each of the 12 most popular vinyl-insulated terminals including ring tongue, block spade, wire splice, spade tongue, and quick-disconnect styles. For wire gauge sizes 22-16, 16-14, and 12-10. Plus a crimp tool and a convenient identification chart in the lid of a durable plastic storage case.

31N005 Type 8403-TV. **Each** **59.99**

300-PC. "SURE GRIP" TERMINAL KIT

Type 8403-DY kit contains 25 each of the 12 most popular "Sure-Grip" terminals including ring tongue, quick-disconnect, and block spade tongue styles. For wire gauge sizes 22-18, 16-14, and 12-10. Plus a crimp tool and a convenient identification chart in the lid of a durable plastic storage case.

31N006 Type 8403-DY. **Each** **79.99**

300-PC. NONINSULATED TERMINAL KIT

Type 8403-TO kit contains 25 each of the 12 most popular noninsulated terminals including ring tongue, quick-disconnect, block spade tongue, and wire butt splice styles. For wire gauge sizes 22-18, 16-14, and 12-10. Plus a crimp tool and a convenient identification chart in the lid of a durable plastic storage case.

31N004 Type 8403-TO. **Each** **49.99**

115-PC. SOLDERLESS TERMINAL KIT

Type 1686 funnel entry solderless wire terminal kit contains 50 ring tongue terminals, 15 spade tongue terminals, 30 butt splices, 10 male couplers, and 10 female couplers. For wire gauge sizes 22-16, 16-14, and 12-10. Terminals insulated with heat-shrink tubing. Packaged in a durable plastic storage case.

92N3607 Type 1686. **Each** **54.81**

48-PC. HEAT-SEALABLE TERMINAL KIT

Type 1691 all-weather, heat-sealable terminal kit contains 15 ring tongue terminals, 15 spade tongue terminals, 10 butt splices, and 8 1″ strips of tubing. Terminals solder and seal 22-24 AWG connections in a one-step operation.

92N3612 (5515) Type 1691. **Each** **31.00** (ne00241)

SCREW-ON WIRE CONNECTORS

Color-coded for easy size selection.Thermoplastic shell shields against environmental extremes. UL listed, CSA certified.

STANDARD

Makes quick secure connections for positive continuity. Deep skirt design prevents exposure of bare wire.

Stock No.	Type	Color	AWG Min.	AWG Max.	Pkg. of	Per Pkg. 1-9
92N4727	2534	Blue	3 #22	3 #16	100	5.75
92N4728	2535	Orange	3 #20	4 #16 w/1 #20	100	6.75
92N4729	2536	Yellow	1 #14w/1 #18	4 #14	100	7.65
92N4730	2537	Red	2 #14	1 #10 w/2 #12	100	11.65

WINGED

Easy on-and-off without tools. Removable for reuse. Expandable spring instantly adjusts to shape and size of splice. Superior flash over protection. Deep skirt design prevents exposure of bare wire.

92N4731	2538	Yellow	2 #18	3 #12	100	9.75
92N4732	2539	Red	2 #14	5 #12	100	12.75
92N4733	2540	Blue	1 #10 w/1 #12	1 #6 w/2 #8	100	18.62
92N4734	2541	Green	2 #14	4 #12	100	17.59

GROUNDING

Offset wings enable firm ground connections with a twist of a hand. Features hold in tip for ground wire. Flame retardant shell resists punctures, cuts, abrasion and corrosion.

92N4734	2541	Green	2 #14	4 #12	100	17.59

UNI-LOCK UNIVERSAL

Designed to accept many wire combinations. "Mini-wings" provide additional torque. Long skirt covers stripped wires.

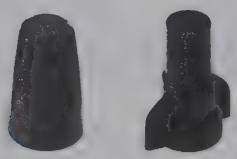
92N4735	2542	Yellow	4 #22	3 #12	100	12.41
92N4736	2543	Red	3 #20	5 #12	100	14.48

HEX-LOCK UNIVERSAL

Hex head allows automatic or manual installation. Multi-range Cu/Cu connector covers 95% of everyday applications.

92N4737	2544	Tan	3 #22	1 #8 w/1 #10 w/1 #12	100	13.45
92N4738	2545	Gray	3 #14	1 #6 w/1 #8	50	25.87

(17537) (ne10289)

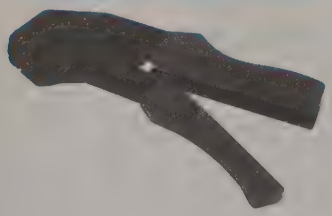


Standard Winged

Grounding Uni-Lock Hex-Lock

TERMINAL CRIMP TOOLS

INSULATED AND NONINSULATED TERMINAL CRIMP TOOLS



Ergonomic progressive pivoting design. High carbon steel construction. Accept interchangeable dies; *order separately below.* Reamed bearing holes. Pivots are centerless ground. Positive ratcheting assembly with emergency release. Meet or exceed UL tensile requirements. Molded finger and palm grips.

Type CTT-8420-01 crimp tool includes **type CTD-8420-02** die, which crimps conductor portion of insulated terminals. 3 crimp cavities: red 16-22 AWG, blue 14-16 AWG, yellow 10-12 AWG.

84N1440 Type CTT-8420-01. **Each** **107.64**
95N4327 Type CTD-8420-02. **Each** **37.68**

Type CTT-8440-01 crimp tool includes **type CTD-8440-02** die, which crimps conductor and strain relief portion of insulated terminals in 1 tool closure. 3 crimp cavities: red 16-22 AWG, blue 14-16 AWG, yellow 10-12 AWG.

84N1442 Type CTT-8440-01. **Each** **107.64**
95N4328 Type CTD-8440-02. **Each** **37.68**

Type CTT-8425-01 crimp tool includes **type CTD-8425-02** die, which crimps noninsulated terminals. 3 crimp cavities: red 16-22 AWG, blue 14-16 AWG, yellow 10-12 AWG.

84N1441 Type CTT-8425-01. **Each** **107.64**
95N4329 Type CTD-8425-02. **Each** **37.68**

Type CTT-8441-01 crimp tool includes **type CTD-8441-02** die, which crimps conductor and strain relief portion of insulated slide-on terminals in 1 tool closure. 2 crimp cavities: red 16-22 AWG, blue 14-16 AWG.

84N1443 Type CTT-8441-01. **Each** **107.64**
95N4330 Type CTD-8441-02. **Each** **37.68**

Type CTT-8318-01 crimp tool includes die which crimps conductor portion of insulated terminals. 3 crimp cavities: red 16-22 AWG, blue 14-16 AWG, yellow 10-12 AWG.

84N1439 Type CTT-8318-01. **Each** **107.64** (ne50816)
(5546)

CRIMP TOOLS FOR OPEN BARREL CONTACTS

Full-cycle ratcheting action for precise termination of open barrel contacts. Positioner holds contacts during crimp cycle for ease of operation. Cushion grips for comfort. Overall length: 9″.

Stock No.	Type	Pin Size	AWG	Each

MULTIPURPOSE CRIMP TOOL

NEW

VOLTREX brand

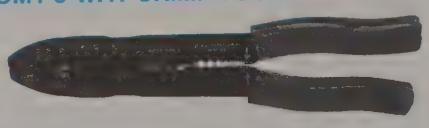
High-quality, compact crimping tool with cushioned vinyl handles. Features wire cutter, insulated and uninsulated terminal crimping stations, 5 position bolt cutter, funnel-shaped wire stripper and automotive 7 and 8mm ignition crimping station.

84N672 Type 3645. **Each** **22.99** (ne32388)
(32388)

ECONOMY 5-WAY CRIMP TOOL

NEW

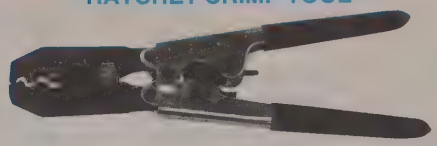
VOLTREX brand



Crimps both uninsulated and insulated terminals. Includes a wire and bolt cutter. Strips 22-10 AWG wire.

84N673 Type 3646. **Each** **7.99** (ne32204)
(32204)

RATCHET CRIMP TOOL



For crimping 22-10 AWG insulated and noninsulated terminals and connectors. Tool capability: crimps barrel and insulation grip independently on nylon or vinyl insulation, butted or brazed seam; standard or short barrel. Includes crimping dies: insulated 22-14 AWG (0.35-2.5mm^2) red and blue color-coded; insulated 12-10 AWG (4.0-6.0mm^2) yellow color-coded; noninsulated 22-14 AWG (0.35-2.5mm^2); and noninsulated 12-10 AWG (4.0-6.0mm^2). Positive closure: ratchet requires full closure of handles to complete proper crimp. Hardened steel jaws and handles with corrosion-resistant finish and black plastic grips.

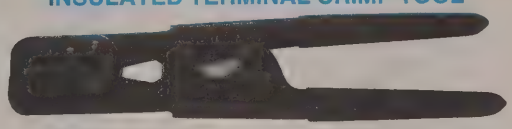
93N1848 Type 8403-004. **Each** **188.80** (ne50821)
(5551)

INSULATED TERMINAL CRIMP TOOL

Type CTR-100-IFD, 2-cavity, 4-jaw, full-cycle tool crimps red and blue insulated terminals and splices wire sizes 22-14 AWG in front cavity. Crimps yellow insulated terminals and splices wire sizes 12-10 AWG in rear cavity. Locator and wire stops orient terminals properly for consistent terminations. Conductor and insulation crimping jaws are 4150 thru-hardened steel, machined and gauged to industry specifications, with black oxide finish. Nests are identified by wire sizes and are color coded for fast identification. Ratchet makes a complete crimp cycle prior to release and is adjustable to compensate for wear after extended operation. Handles are 1051 thru-hardened steel, nickel plated, with black grips. Overall length: 9″.

81N5432 Type CTR-100-IFD. **Each** **134.55** (ne50817)
(5547)

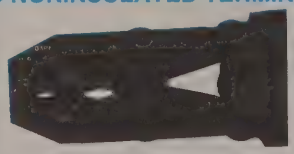
INSULATED TERMINAL CRIMP TOOL



Type CTR-100-IT, 3-cavity, 2-jaw, full-cycle tool crimps red insulated terminals and splices wire sizes 22-16 AWG in front cavity. Crimps blue insulated terminals and splices wire sizes 16-14 AWG in middle cavity. Crimps yellow insulated terminals and splices wire sizes 12-10 AWG in rear cavity. Jaws are 4150 thru-hardened steel, machined and gauged to industry specifications, with black oxide finish. Nests are identified by wire sizes and are color coded for fast, easy identification. Ratchet makes a complete crimp cycle prior to release and is adjustable to compensate for wear after extended operation. Handles are 1051 hardened steel, nickel plated, with black grips. Overall length: 9″.

81N5433 Type CTR-100-IT. **Each** **87.46** (ne50818)
(5548)

INSULATED AND NONINSULATED TERMINAL CRIMP TOOL



Crimps conductor portion of insulated and noninsulated terminals. 4 crimp cavities in sizes 8 AWG through 2 AWG. Cavities are identified by wire size and product type. High-carbon steel, heat treated for extended life.

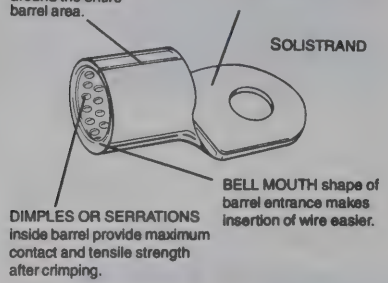
84N1444 Type CTT-8620-01. **Each** **174.92** (ne50820)
(5550)

NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY.

SOLISTRAND® TERMINALS AND SPLICES

Terminals meet requirements of MIL-T-7928, Type 1, Class 1 and 2. Temperature rating: 170°C max. UL listed; CSA certified LR7189. *Order* **type 49935** *crimp tool seperately on page 1117.*

BASIC TERMINAL MATERIAL is tin-plated, high-conductivity copper. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes.



BRAZED SEAM for uniform metal strength around the entire barrel area.
SOLISTRAND
BELL MOUTH shape of barrel entrance makes insertion of wire easier.
DIMPLES OR SERRATIONS inside barrel provide maximum contact and tensile strength after crimping.

PIDG® TERMINALS AND SPLICES

Each terminal consists of a tin-plated copper or tin-plated phosphor bronze body for spring spades with copper and insulation sleeves fitted over the terminal barrel. PIDG® terminals meet MIL-T-7928, Type II, Class 1 and 2 requirements. UL listed, CSA certified for 105°C, 300V. *Order* **types 47100-1** *and* **58433-3** *crimp tools separately on page 1117.*

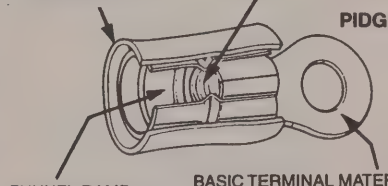
CONTINUED

COLOR-CODED NYLON INSULATION SLEEVE provides dielectric strength. Color-coded by wire range to prevent installation errors.

SERRATIONS inside barrel provide maximum contact and tensile strength after crimping.



FUNNEL RAMP ENTRY assures rapid wire insertion during high speed production and prevents turned back strands.

BASIC TERMINAL MATERIAL is tin-plated, high-conductivity copper, except Spring Spade versions which are tin-plated phosphor bronze. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes.

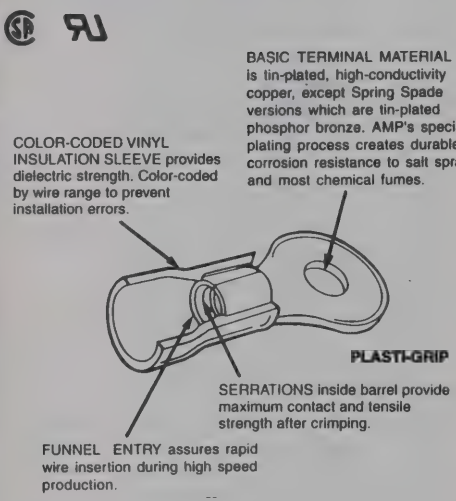
PLASTI-GRIP® TERMINALS AND SPLICES

Designed for economical insulated electrical terminations in most commercial and many industrial applications. Feature broad range of wire sizes, built-in pre-insulation, ease and speed of application, uniform reliability. When crimped, the wire and terminal barrel form a homogeneous mass of metal, providing a connection of maximum conductivity, tensile strength, and high resistance to corrosion. UL recognized to 600V; CSA certified, LR7 189 to 600V, 90°C maximum. NOTE: 22-16 terminals and splices are stamped 22-18 in accordance with MIL-T-7928. *Order crimp tools separately on page 1117.*



BASIC TERMINAL MATERIAL is tin-plated, high-conductivity copper, except Spring Spade versions which are tin-plated phosphor bronze. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes.
COLOR-CODED VINYL INSULATION SLEEVE provides dielectric strength. Color-coded by wire range to prevent installation errors.
PLASTI-GRIP
SERRATIONS inside barrel provide maximum contact and tensile strength after crimping.
FUNNEL ENTRY assures rapid wire insertion during high speed production.

ULTRA-FAST FASTON® RECEPTACLES AND TABS

Completely protected terminal and wire crimp with comparable electromechanical performance to open barrel "F" crimp Faston® terminals. Receptacles, flag receptacles and tabs are preinsulated assemblies featuring housing molded from type 6/6 nylon material with a +125°C UL temperature rating. The Faston® receptacles and tabs are recessed sufficiently within the housing to allow its use in 600V applications. Assemblies are color-coded by wire size: Violet–26-22 AWG, Red–22-18 AWG, Blue–16-14 AWG, and Yellow–12-10 AWG. Terminal base material is brass, except for type nos. with (†) which denotes a phosphor bronze terminal base.

HAND TOOLS FOR TERMINALS AND SPLICES

Type 47100-1 SUPER CHAMP® hand tool crimps PIDG® and PLASTI-GRIP® insulated terminals and splices 22-16, 16-14, 12-10 AWG, cuts and strips wire, and cuts bolts and machine screws 4-40, 6-32, 8-32, 10-32, and 10-24. Features stud size and strip length gauges for easy measuring. Constructed of tough high-carbon steel with cushioned handles for comfort.

Type 604252-1 SUPER CHAMP® IV hand tool crimps PIDG® and PLASTI-GRIP® insulated and uninsulated terminals and splices 22-16, 16-14, 12-10 AWG and 7mm ignition terminals. Offers all the same features as **type 47100-1** SUPER CHAMP® hand tool, *order separately above*, plus a unique, confined trapezoidal crimp.

Type 314966-1 wire stripper tool is designed to strip, cut, and bend solid or stranded wire sizes 22-10 AWG. Features wire size adjustment screw and safety lock.

Type 90287-1 AMP® Service Tool I crimps open- and closed-end barrel uninsulated terminals 22-10 AWG, FASTON® terminals (F crimp) 22-18 AWG, and PIDG® and PLASTI-GRIP® insulated terminals and splices 26-22, 22-16, 16-14, and 12-10 AWG. Features separate open and closed crimp notches, bolt cutter, and cushioned handles for comfort.

Type 90330-1 AMP® Service Tool II crimps open- and closed-end barrel uninsulated terminals 22-10 AWG, FASTON® terminals (F crimp) 22-18 AWG, and PIDG® and PLASTI-GRIP® insulated terminals and splices 26-22, 22-16, 16-14, and 12-10 AWG. Offers the same features as **type 90287-1** AMP® Service Tool I, *order separately above*, plus special crimping notch for Tab-Lok FASTON® terminals.

Type 58433-3 PRO-CRIMPER™ II hand tool frame, complete with **type 58423-1** interchangeable die set assembly, crimps PIDG® and PLASTI-GRIP® insulated terminals and splices 22-16, 16-14, and 12-10 AWG. Features angled head for comfortable hand and wrist position. Ratchet control provides complete crimping cycle plus emergency ratchet release and extra strong pivot pins for greater durability. Constructed of rugged high-carbon steel with cushioned handles for comfort. Various interchangeable die sets fit into tool frame, including replacement die set **type 58423-1**, *ordered separately below; contact your local Newark sales office for details.*

Type 55893-1 hand tool crimps pre-insulated sealed terminals and splices 22-18, 16-14, 12-10 AWG.

Type 49935 CERTI-CRIMP® hand tool with ratchet control provides a complete crimping cycle. Crimps SOLISTRAND® terminals and splices 22-16, 16-14, and 12-10 AWG. Features insulation crimp adjustment, a locator for proper terminal positioning and support, a wire stop, and color coding and/or wire information on the tool head or handles. Designed to exacting dimensions, requires minimum skill to operate, and is repairable. Suited for military, UL and CSA applications.

Type 59824-1 TETRA-CRIMP® hand tool crimps PIDG® and PLASTI-GRIP® insulated terminals and splices 26-22, 22-16, 16-14, and 12-10 AWG. Dies travel in arc-like path. Features multiple color-coded crimping cavities, terminal locator and wire stop, and ratchet control release.

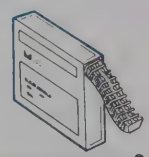
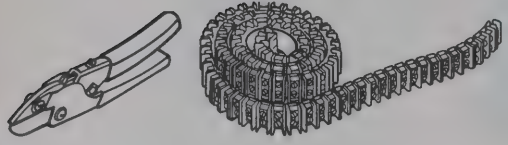
FLEXI-BLOCK® CUT-AWAY TERMINAL BLOCK SYSTEM



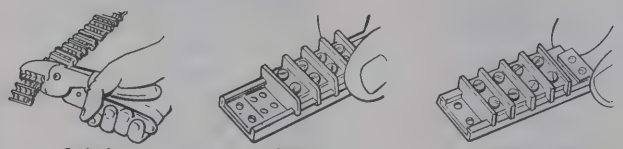
FLEXI-BLOCK®
Block Assembly on Tape



FLEXI-BLOCK®
End Stop

FLEXI-BLOCK®
Standard Track

FLEXI-BLOCK®
Flanged Track



Snip it | Slide it | Snap it

Custom-made terminal blocks are interchangeable with all standard terminal blocks. Just pull terminal blocks, assembled on tape, from convenient, stackable dispenser carton and cut to desired number of blocks with **type 604008-1** track and tape cutting tool, *ordered separately below.* Then cut standard track to length of terminal blocks plus two extra spaces to accommodate two nylon end stops. Slide terminals into track and secure with end stops to complete assembly. Predrilled holes in track allow quick mounting on flat or curved surfaces. In addition to direct application of wire ends under screw heads, terminal blocks accept up to four levels of single and double FASTON® jumper tab plates, *ordered separately below.* Available in two sizes: size #6 blue is rated 15 amps/300 volts maximum with 22-14 AWG wire; size #8 yellow is rated 30 amps/600 volts maximum with 22-10 AWG wire. UL recognized, CSA certified.

(5460) (de03166)

COLD SHRINK PLASTIC WRAP

Forms water-tight skin for long-term protection, even during prolonged immersion in water, with no heat or open flame. Tape amalgamates– "welds" itself into homogeneous mass– but does not transfer adhesive. Excellent electrical properties, water, ozone, and corrosion resistance. 0.020″ (0.508) thick. Black.

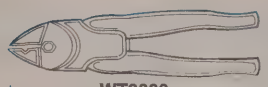
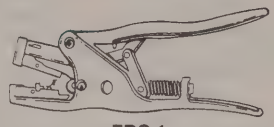
APPLICATION TOOLS AND WIRE STRIPPERS



WT2000

WT111M, WT112M

WT145A, WT145C



ERG-1

Plier-style hand tool **type WT2000** accommodates insulated and noninsulated terminals and splices. Used for cutting and stripping wire. Plier-style hand tools **type WT111M** for noninsulated terminals and **type WT112M** for insulated terminals can be used as wire cutter. Ratchet hand tools **type WT145A** for insulated terminals. **Type ERG-1** self-adjusting wire stripper, strips stranded or solid, and aluminum or copper.

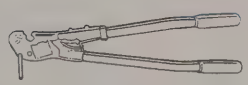
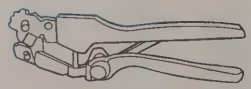
COMPRESSION TOOLS



TBM5



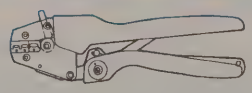
TBM25S

Type TBM5 installs connectors, joints, lugs, splices, and taps. Includes dies. **Type TBM25S** is equipped with SHURE STAKE® mechanism and has a 5 nested die wheel (color coded). Installs lugs and splices.

Stock No.	Type	AWG	Each
81F2297	TBM5	8-250 MCM (Copper) 10-4/0 (Aluminum)	388.90
92F5931	TBM25S	8-2 (Copper) 10-6 (Aluminum)	217.91

(5456) (de02272)

COMFORT CRIMP™ HAND TOOLS



Ratchet hand tools for installing Sta-Kon® terminals, disconnects and splices. SHURE STAKE® mechanism prevents dies from releasing terminal until proper compression has been fully completed. **Type ERG-2001** has color-coded nests to match with color of nylon or vinyl connectors.

Stock No.	Type	Range	Each
95F9609	ERG-2001	Insulated (10-22 AWG)	184.79
95F9610	ERG-2002	Noninsulated (22-10 AWG)	158.36

(5457) (de02273)

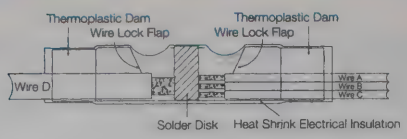
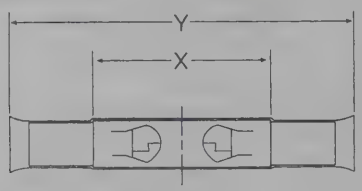
SOLDER SPLICE CONNECTORS





Solder, insulate, and seal multiple wires in one easy step without a crimp tool—just a standard heat gun. One-piece design, insulated with a flame-retardant, heat-shrinkable sleeve of flexible fluoropolymer, which provides outstanding clarity for easy inspection of the connection. After wires are inserted and held in place by barrel wire locks, the solder disk melts and connects the wires. Then, the thermoplastic dams melt to form a moisture seal. Finally, the sleeve shrinks, forming the electrical insulation. Works well with any wire connection that can be inserted, including solid or stranded bare copper or tinned wire. Resistance drop: <0.5 milliohms. Tensile strength: 200 lbs. (or wire failure). Service temperature: –55°C to +150°C. Insulation resistance: 10kV. Voltage drop: 0 to –1mV. UL listed. **Sold in packages of 10.**

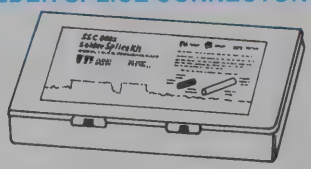
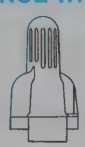
SOLDER SPLICE CONNECTOR KIT



Solder splice connector kit is for use in field applications where it is necessary to make a strong, reliable solder connection when no electricity is available to power a heat gun. Offers engineers and designers a selection of solder splice connector sizes for installation and repair projects and product development programs. Kit includes Master Appliance **type MT-10** pocket-size Ultratorch® cordless heat tool with refillable butane fuel cell and **types SSC-0501, SSC-0502, SSC-0503** solder splice connectors, *order separately on this page.*

91F2080 Type SSC050X. **1-9** **107.19**
(12935) (ne09861)

HIGH PERFORMANCE WIRE CONNECTORS



Provide maximum protection and wider wire range, while fitting in the most crowded electrical boxes. Long, flexible skirt with a rigid top to enable the connector to conform in a box as it protects the connector and covering overstrips. Square wire spring grips quickly, turns on fast and expands to accept various wire sizes—"biting" into conductors for a solid, secure connection.

(5534) (ne07433)

SOLDERLESS TERMINALS

BARREL-STYLE TERMINALS

Ring terminals are available with vinyl or nylon insulation. Type numbers with **prefix FVL** are vinyl insulated terminals. FVL-type funnel entry design for easy wire entry is flared to permit use of oversized wire. Temperature rating: 75°C (167°F). Type numbers with **prefix FND** are nylon-insulated terminals. Feature FND-type nylon over extra copper support sleeve. Temperature rating: 105°C (221°F). All terminals are available tape-mounted for automated crimping; *to order, contact your local Newark sales office.*

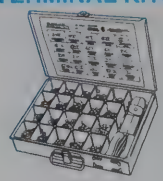
TERMINAL KITS



A21K4

Type A18K4 kit contains 175 insulated terminals and connectors in 18 styles. Heavy-duty plastic see-through hinged box with 18 compartments. Size: 8 × 4 × 1¼″. Complete with crimping tool . **Type A18K** does not include crimping tool.

Stock No.	Type	1-4
44F369	A18K4	11.49
44F368	A18K	9.73

Type A21K4 kit contains 500 insulated terminals and connectors. Heavy-duty metal box with handle and clasp. 21 compartments. Size: 13 × 9½ × 2″. Complete with **type Y801** crimping tool. **Type A21K** does not include crimping tool.

Stock No.	Type	1-4
44F371	A21K4	65.92
44F370	A21K	54.68

Type A24K4 kit contains 3000 insulated terminals and connectors with heavy-duty **type Y801** crimping tool. 24 compartments containing 24 styles of rings in 8 sizes, spades in 4 sizes, fully insulated and vinyl insulated quick disconnects in 6 sizes. 2 sizes closed end connectors. 3 sizes butt connectors, and 16-14 tap splices. Heavy-duty metal box with handle and clasp. Size: 18 × 3 × 12″.

CABLE TIE KITS

Handy kits provide everything you need to wrap cable into neat bundles. *Order cable tying tool and kit refills separately below.*

Type CTK-100 kit contains 780 pieces of 11 different cable ties and mounts.
66F6699 Type CTK-100. **Each** **30.31**

Type CTK-200 kit contains 1000 pieces of 15 different cable ties, mounts, twist ties, and clamps in a metal case.
66F6700 Type CTK-200. **Each** **46.35**

Type CTG-100 lightweight, hand-operated cable tying tool with 4-position setting. Obtains uniform, preset tension and flush cut-off every time. Rejects the cut-off portion without leaving sharp edges.
42F2286 Type CTG-100. **Each** **16.72**

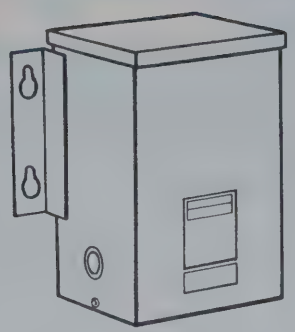
TRANSFORMERS

GENERAL PURPOSE DISTRIBUTION TRANSFORMERS



Style 2

Typical applications include: Hospitals, industrial plants, schools, shopping centers, office, commercial, apartment, high rise and institutional buildings. Sola/Hevi-Duty general purpose distribution transformers are available in single phase sizes. 0.050 to 250 kVA and 3 phase from 3 to 500 kVA in a wide range of primary and secondary voltage combinations. Benefits include free shielding on 1kVA and above, UL-3R enclosures standard, fast delivery, easy installation and the industry's only "10 + 2" factory warranty. UL listed, CSA certified.

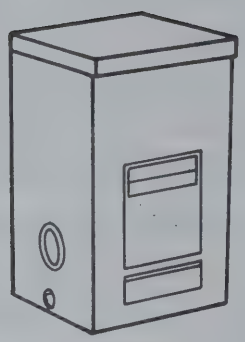
BUCK-BOOST TRANSFORMERS



Style 3

Sola/Hevi-Duty buck-boost transformers are an ideal solution for economically changing line voltage by small amounts. These small, single phase, dry-type distribution transformers have a dual voltage primary and secondary, making them unique in their ability to be connected in a wide range of voltage combinations. The most common use is to buck (lower) or boost (raise) the supply voltage a small amount, usually ±5 to 27%. Buck-boost are UL-3R listed for outdoor service, compact in size, and are execellent for use in low voltage lighting and control applications, or any systems requiring 12, 16, 24, 32, or 8 volts. UL listed, CSA certified.

INDUSTRIAL CONTROL TRANSFORMERS

SBE SERIES INDUSTRIAL CONTROL TRANSFORMERS

- **10-20% More Output VA Capacity**
- **Exceeds NEMA Standards**
- **Cooler Operation**
- **Excellent Voltage Regulation**

SBE series epoxy encapsulated design series meets high inrush loads with smaller transformers and less cost per VA. **SBE series** transformers are encapsulated to permit more efficient heat dissipation for cooler operation and higher VA capacity. The higher rated capacity provides you the opportunity of meeting high inrush electromagnetic load requirements for either 50 or 60Hz applications, with smaller transformers and less cost per VA. **SBE series** establishes a new VA rating criterion that makes traditional VA standards obsolete. UL listed, CSA certified.

SBE-3PB SERIES INDUSTRIAL CONTROL TRANSFORMERS

SPE-3PB series industrial control transformers simplify compliance with NEC and UL-5 fusing requirements. They feature an integrally mounted fuse block, available in five different fuse combinations, prewired to the transformer. This saves you the time and associated labor cost of buying and installing separate fuse blocks. UL listed, CSA certified.

POWERSTAT® SERIES VARIABLE TRANSFORMERS

- **Rugged Construction**
- **No Waveform Distortion**
- **Smooth, Linear Control of Output Voltage**
- **High Overload Capacity**
- **Low Resistance, High-Efficiency Coils**
- **UL Recognized, CSA Certified**

Variable transformers provide continuously adjustable output voltage from utility line voltage. Movable brush-taps ride on commutators. Rotation of brush by manual or motor-driven means delivers any voltage in the range between zero and line voltage. Feature epoxy-coated POWERKOTE® coils for long life, greater ratings/overload capacities and better resistance to fungus, salt spray and other contaminants. All models available with motor drives except **types 10C, L10C, 12. Types 1156DU, 1256DU** available with ratings to 365 kVA. Units with **prefix L** are totally enclosed with grounded NEMA cord/plug assembly, on/off switch, pilot light, fuse and grounded output receptacle. **Prefix 3PN** denotes models with 3-wire cord/receptacle. *Order Powerstat® transformer enclosures separately on this page.* Additional styles, assemblies and voltage ratings are available; *contact your local Newark sales office.*

(5608) (de01950)

PBA SERIES POWERSTAT® VARIABLE TRANSFORMER ENCLOSURE

Designed to house open construction **(U suffix)** Powerstat® transformers. Meets NEMA enclosure Type 1 per ICS 1-110 standard. Heavy-gauge steel construction. Units are assembled with a full range of knockouts and hardware. Designed to protect users against contact with enclosed transformer. NOTE: For use in indoor areas. Additional sizes are available; *contact your local Newark sales office.*

(5609) (de01951)

L2M SERIES POWERSTAT® VARIABLE TRANSFORMERS

Laboratory-type devices. Equipped with output voltage and current meters, binding post connections, on/off switch, and rocker style "on indicating" thermal magnetic circuit breaker. Input voltage: 120VAC single-phase. Output voltage: either 0-140VAC or 0-280VAC. Hertz: 50/60.

TRANSFORMERS

18T SERIES VARIABLE VOLTAGE CONTROLS

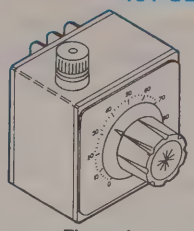

Figure 1

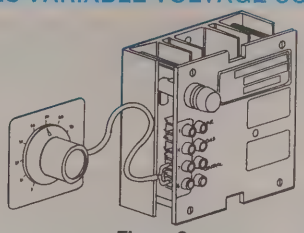

Figure 2

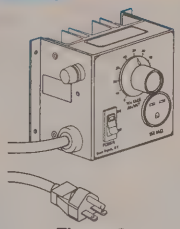

Figure 3

Applications:

- **Replace Variable Transformers**
- **Electric Oven Control**
- **Light Dimming**
- **Hot Wire Cutting**
- **Plastic Molding and Extruding**
- **Food Preparation**

Features:

- **Integral Heatsink**
- **Includes Fuses for Short-Circuit Protection**
- **All Solid-State**
- **No Thermal Derating**
- **Onboard "2ms Fuses"**

Solid-state power controls provide infinitely variable control of single-phase AC voltage to constant resistance heating elements. Replace variable transformers, saturable core reactors, and electromechanical contactors. When operated within stated ratings, **18T series** have no known MTBF or lifetime rating. Manual operation via potentiometer (included). **Types 18TBP** mount through enclosure door via the potentiometer shaft. **Types 18TB** are base mounted. **Types 18TP** are suitable for permanent mounting or use as a portable unit, and include three-prong receptacle, lighted On/Off rocker switch, and 3′ power cord with three-prong plug. Frequency: 50/60Hz. Output rating: 0-98% of input voltage. Power loss: 1.5 watts/amp of load current. Control input: manual potentiometer (included). Short-circuit protection: 2-millisecond fuses, factory-tested and selected. **Use only factory-recommended fuses.** Ambient temperature range: –10°C to +50°C.

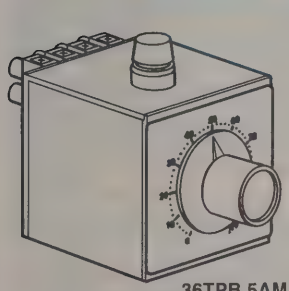
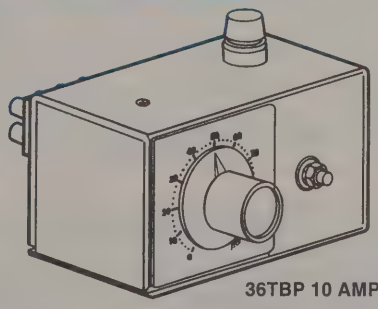
Above controls available with variable D.C. output at 120VAC and 240VAC inputs in 5 and 10 amp sizes (Fig. 1). *Contact your local Newark sales office.*

(5773) (ne08417)

SERIES 36TBP DC POWER CONTROLS



36TPB 5AMP



36TBP 10 AMP

Provide full-wave rectified, infinitely variable DC output voltage from a single-phase AC input. Phase-angle control via power semiconductors varies the AC input voltage, which in turn is full-wave rectified for infinitely variable DC output. Fast-acting fuses protect against load fault damage. Case serves as heat sink to allow continuous operation at nameplate rating to 50°C. MOV overvoltage protection.

120VAC INPUT, 0-107VDC OUTPUT, 50/60HZ

Stock No.	Type	Max. Amps	Figure	H x W x D	1-3	4-10

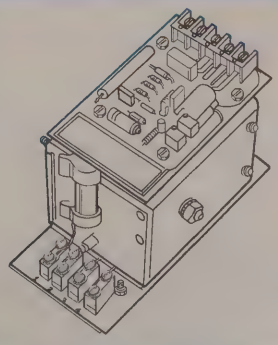
(31882) (ne31882)

SERIES 18D SOLID-STATE POWER CONTROLS



All solid-state single-phase SCR control allows smooth, silent, infinitely variable AC power control. SCRs are protected against load-fault damage by 2-millisecond fuses, against transient voltages on power lines by V_{bo} protection. Perform at full-rated operation up to 50°C ambient temperature. Single-phase, 480VAC input, 0-478VAC output, 50/60Hz (also for 380/415/4430VAC input). Also available in models up to 1200A; *contact your local Newark sales office.*

50/60 Hz VARIABLE TRANSFORMERS

Models available to suit a wide variety of applications: automation equipment such as vibrating parts feeders and finishing controls, test equipment, and industrial equipment such as motor speed controls and voltage regulators. Units operate on either 120 or 240 volts input; *contact your local Newark sales office.* Type numbers without suffixes are open styles. **"CT"** suffix have coils and terminals enclosed, for panel or conduit mounting. All are 50/60Hz except (*) 60Hz only, and † 60Hz on overvoltage. All models can be ordered clockwise or counter-clockwise rotation.

ISOLATED PORTABLE CORD AND PLUG VARIABLE TRANSFORMERS

Units help improve safety because separate primary and secondary windings on same core provide isolation. Limit amount of power transformed if shorted or overloaded. Suffix "V" with voltmeters; "A", ammeters.

FULLY ENCLOSED PORTABLE VARIABLE TRANSFORMERS

Housing protects controls from abuse and hazards. Has no holes, to prevent entry of foreign objects. Ideal for lab applications. Can also be custom mounted. "VA" suffix: Voltmeter/ammeter.

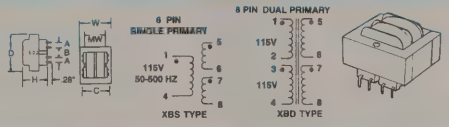
P.C. BOARD TRANSFORMERS - HIGHLY ISOLATED



These single primary and dual primary split-bobbin transformers are designed for high performance, miniaturized printed circuits and switching power supplies. Rugged dependability, low-profile, rigid mounting. Primary to secondary isolation 2500V. Low capacitance coupling. No electrostatic shield needed. Dual secondaries for series or parallel connection.

HIGH CURRENT FILTER CHOKES — INDUCTANCE MEASURED AT 1 VOLT 60 Hz.

High current filter chokes are normally used in low voltage, high current DC power supply filter applications, where low voltage drop across filter and good voltage regulation are required without any type of voltage regulator.

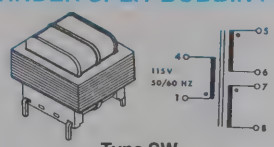
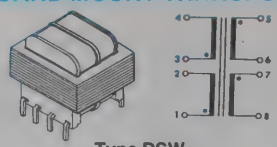
PC BOARD TRANSFORMERS

SIDE WINDER SPLIT BOBBIN PC BOARD MOUNT TRANSFORMERS



Type SW



Type DSW

Primary and secondaries non-concentrically wound side-by-side to reduce size. Split bobbin winding and low capacitive coupling design eliminate need for electrostatic shielding. Available 115V or dual 115/230V primaries, plus split secondaries allow series or parallel connection. 0.041 x 0.018" (1.04 x 0.457) pins insert directly into PC boards. Pins 0.28" (7.11) long. High isolation: 2500Vrms. Applications: electronic game systems, computer peripherals, switching power supplies, medical electronics, instrumentation, communications equipment, computer "on-board" power, machine control logic systems, and robotics.

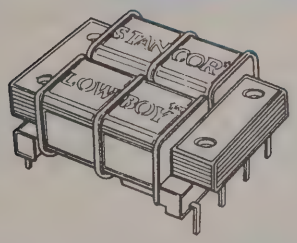
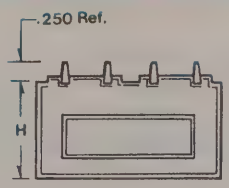
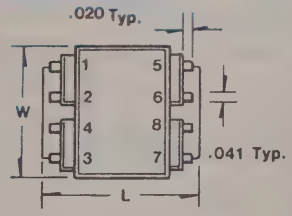
LOW BOY™ LOW-PROFILE PC BOARD POWER TRANSFORMERS







For low clearance, stacked PC board, and solid designs. Allow 0.75" (19.05) card spacing for 2VA and 3VA models; 1.00" (25.40) for 4VA, 5VA, 6VA models; 1.25" (31.75) for 12VA models. Semi-toroidal construction reduces radiated magnetic fields. Other VA ratings available; *contact your local Newark sales office.* UL recognized.

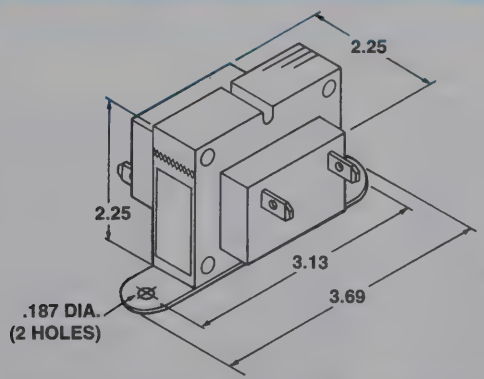
592 SERIES ENERGY-LIMITING TRANSFORMERS



Energy-limiting transformers have winding impedance so when primary is energized at maximum rated voltage and frequency and secondary is short circuited, secondary current will not exceed 8A after one minute. Output voltage: 24V. Output current: 1.67A. 40VA. All primaries 50/60Hz. Mount horizontally. Dimensions: 2.25 H x 3.69 W x 2.25″D. UL recognized, CSA certified.

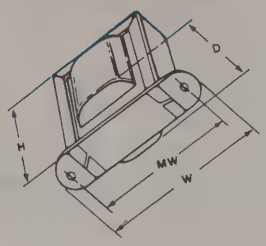
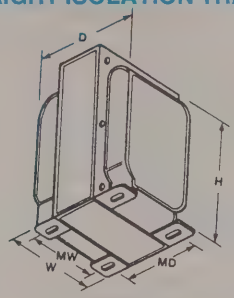
STANCOR®

POWER TRANSFORMERS

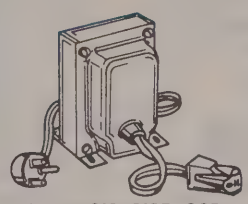
STEP-DOWN/STEP-UP AUTO-TRANSFORMERS
STEP-DOWN/STRAIGHT ISOLATION TRANSFORMERS



Style A
Step-Down Auto-Transformers



Style C



Types GIS, GISD, GSD

STEP-DOWN AUTO-TRANSFORMERS

Primaries 230V, 50/60Hz (can operate from 400Hz source with no change in output ratings). Secondaries 115V. Case and core internally connected to third conductor of NEMA standard cord and receptacle, except **type P-8620** which has leads.

HOSPITAL TYPE LOW-LEAKAGE ISOLATION PLUG-IN TRANSFORMERS

Leakage current primary-to-secondary is rated less than 50 micro-amps and is measured at less than 10 micro-amps. Connections include line cord, plug and receptacle, and socket circuit breaker. UL hospital grade verified to meet federal specifications W-C 596E.

115 VOLT, 50/60Hz PRIMARY PLUG-IN PC POWER TRANSFORMERS

Ideal for single or dual output DC supplies, isolated control circuits, reference supplies in transistorized control, and/or instrumentation. Voltage stepdowns and isolation from power lines can be obtained at 4 to 58V when connected in parallel and 8 to 116V in series.

SMD SERIES SURFACE MOUNT INDUCTORS

SMD

Well-suited for energy storage in the 50kHz to 500kHz region. Their small size makes them ideal for use in power supplies as the switching inductor or PCF inductor. In ordinary filter applications, they may be used up to 10MHz. Mounting Centers: **Type SMD36** 0.449 x 0.413″ (LxW), **Type SMD50** 0.685 x .532″ (LxW).

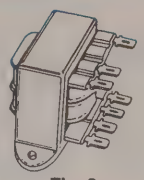

Fig. 3

PC-MOUNT FLAT PACK® 115/230 VOLT, 50/60 Hz POWER TRANSFORMERS—FIG. 1

Meet the needs of low-clearance PC boards and solid state power designs. Can also be used for control and instrumentation applications. Voltages and currents are chosen for widely-used power applications, and can be used in single or dual-output supplies. Designed to pass 2,000V HiPot test.

CHASSIS-MOUNT QUICK PACK 115 VOLT, 50/60 Hz POWER TRANSFORMERS—FIG. 3

Can offer significant reduction in size and weight for a given VA rating. Plus, these transformers come with a special quick connect or solder terminal. Available in 4 sizes. Split bobbin design permits 2500V HiPot testing. Available with single 115V or Dual 115/230V, 50/60Hz primary.

WORLD SERIES CHASSIS-MOUNT 115/230V, 50/60Hz TRANSFORMERS

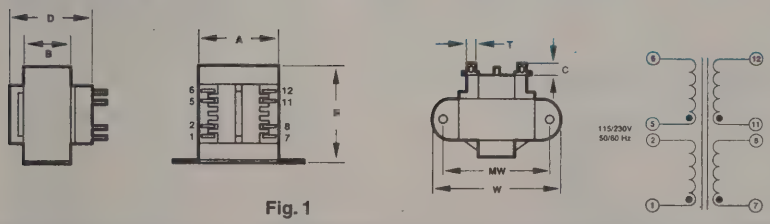

Fig. 1

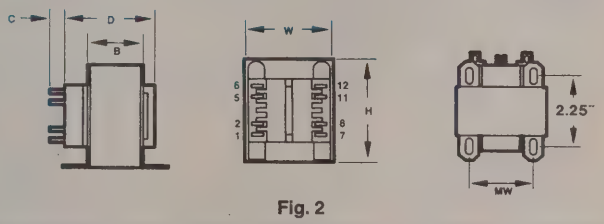

Fig. 2

Features dual-bobbin construction with an insulating shroud, keeping capacitance between the coils at a minimum. Very high isolation between primary and secondary, and between each winding and the core. Hi Pot tested at 4000 VRMS. Primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. UL recognized, CSA certified, IEC and VDE approved. Thru-hole mounting pins are square. Dimension "T" is 3⁄16″ for all types listed.

MODEM COUPLING TRANSFORMERS

Cost effective wet coupler for use in modem applications for speeds up to V.29. Small size and low profile permit use in compact applications such as notebook computers and portable external modems. Turns: 1:01. DC resistance: Pins 1-2: 108 ohms. Pins 3-4: 120 ohms. Mounting center dimensions: 0.45 x 0.55" (WxL).

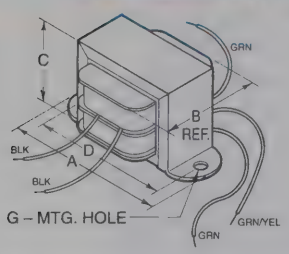
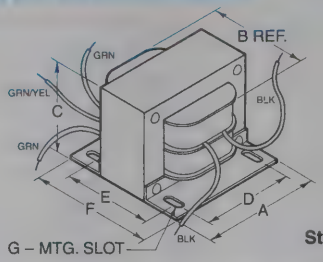
TRANSFORMERS

CHASSIS MOUNT-POWER TRANSFORMERS



Style C



Style H

Chassis mount, channel bracket, split bobbin power transformers do not require an electrostatic shield due to low primary-to-secondary coupling. Single primary: 115V, 60Hz. All secondaries are center tapped. 6″ leads minimum. Hi-pot tested at 2,000Vrms. UL listed, CSA certified.

NEWARK AND HAMMOND MANUFACTURING OFFER A WIDE RANGE OF PRODUCTS TO SUIT YOUR NEEDS!

SEE THE HAMMOND LISTING IN THE MANUFACTURERS INDEX FOR PAGE NUMBER REFERENCES WHERE YOU WILL FIND:

- BOXES
- CASES
- ENCLOSURES AND ACCESSORIES
- JUNCTION/TERMINAL BOXES
- RELAY RACKS
- RACK PANELS

OR CONTACT YOUR LOCAL NEWARK SALES OFFICE AT: 1-800-4-NEWARK (1-800-463-9275).

(15027) (ne10604)

IF YOU DON'T SEE THE PRODUCT YOU NEED LISTED HERE - CALL!

1-800-4-NEWARK

POWER TRANSFORMERS

CHASSIS MOUNT - GLOBAL USE POWER TRANSFORMERS

Type 185 chassis mount AC power transformers feature dual primary 115/230VAC, 50/60Hz, operation with dual secondaries for series or parallel connection. Each unit carries a 4,000Vrm Hi-pot test. Dual bobbin construction using terminals (solder lug or quick connect). UL recognized to UL 506, CSA certified. C22.2 #66 and CE certified to IEC 950.

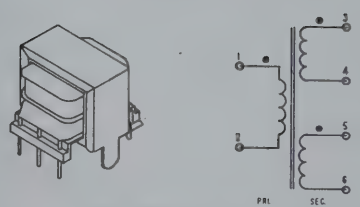
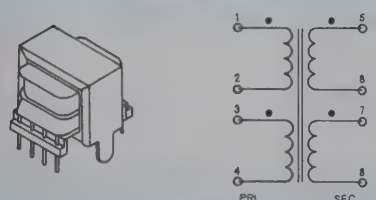
VERTICAL, PC BOARD MOUNT POWER TRANSFORMERS

160 and **161 series** vertical, PC board mount, split bobbin power transformers require no electrostatic shield due to low primary-to-secondary coupling. **161 series** are single primary 115V (60Hz); **160 series** are dual primary 115/230V (50/60Hz). Hi-pot tested at 2500Vrms. UL recognized, CSA certified.



161 - Single Primary



160 - Dual Primary

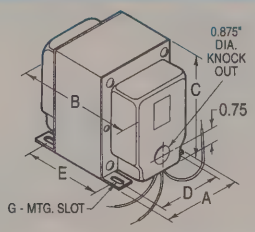
LINE AUTOTRANSFORMERS



Line autotransformers are for use where equipment is already isolated and step-up (115V to 230V) or step-down (230V to 115V) service is required. Chassis mount-enclosed, hardwired units. 50 or 60Hz. Minimum 8″ leads. CSA certified.

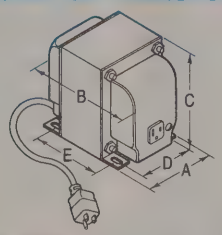
LINE ISOLATION TRANSFORMERS



171 series is for use where equipment isolation is required (primary 115V, secondary 115V), 50/60Hz operation. Electrostatic shield between primary and secondary, with standard 3-wire plug and outlet receptacle. Chassis mount-enclosed, minimum 5′ cord with plug. CSA certified.

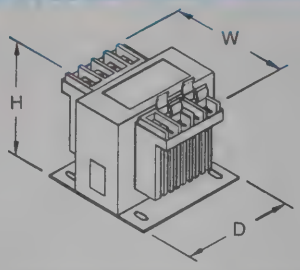
TRANSFORMERS AND FUSE KITS

PT SERIES MACHINE TOOL CONTROL TRANSFORMERS



PT series machine tool control transformers are designed to meet high inrush industrial applications where electromagnetic devices (relays, solenoids) are used. Feature molded construction. Transformer core and coils are vacuum impregnated with VT (vinyl-toluene) polyester resin to seal against airborne contaminants. Single secondary units supplied with factory-installed secondary fuse kits. Units operate from 50/60Hz AC power. Molded terminal blocks allow for easy primary and secondary fusing to meet UL 508 requirements. *Order covers for* **PT series** *separately on this page.* UL listed, CSA certified, CE compliant.

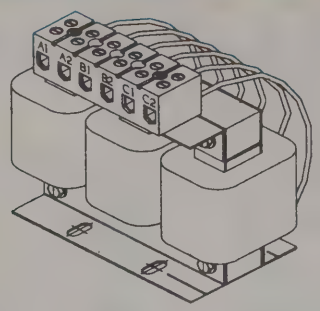
RM SERIES 3-PHASE LINE REACTORS

NEW



Line Reactor Part Number Guide

RM 0002 M 32 __ __

- Further suffix to follow. Add suffix "E" for Enclosure.
- Inductance Value. The inductance value is preceded with a letter to designate the position of the decimal point to determine the inductance. The letters are as follows:
  - 'M' XX. mH
  - 'N' X.X mH
  - 'P' 0.XX mH
  - 'U' .0XX mH or XX.0 uH

  Example: M32 is 32.0 mH
- 4 digits for current rating
- In-Line Reactor

Note: As all characters of the P/N represent performance values of the reactor, P/N's are not completely sequential. They are sorted by current rating.

BY USING A LINE REACTOR, THE INRUSH CURRENT IS LIMITED FROM THE RECTIFIER IN THE DRIVE. IT REDUCES PEAK CURRENT, ROUNDS FORM OF WAVE AND MINIMIZES HARMONIC DISTORTION TO 30%.

(38373) (ne38373)

Designed to reduce or eliminate most line problems. This includes nuisance tripping, harmonic distortion, line notching, etc. In addition, performance, life expectancy, and efficiency of both the motor and drive components will be extended and enhanced. These line reactors feature core and coils of the highest quality and performance, a superior insulation system, full "VPI" impregnation using VT polyester resin and custom-brazed connections. Both open local and enclosed-style line reactors are UL recognized and CSA certified. Line-reactors are available in both 3% and 5% impedances with HP ratings from 1 to 100; in Amperage from 2 amps to 1200 amps. *Contact your local Newark sales office for details.*

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

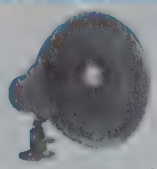
IH8A



SPT-15A, SPT-30A

BDT-30A

For indoor/outdoor use in plants, warehouses, schools, construction, recreational areas. Textured mocha enamel-finish metal. **Types SPT-15A, SP15-8A:** 9.00 diameter x 9.25″D (228.60 x 234.95); **type IH-8A:** 6.50 diameter x 6.63″D (165.10 x 168.40); **types SPT-30A, SP30-8A:** 11.00 diameter x 10.50″D (279.40 x 266.70); **type BDT-30A:** 16.50 diameter x 9.75″D (419.10 x 247.65).

Stock No.	Type	Description	Each
87F4410	IH8A	15W, 8 Ohms	**58.48**
79W433	SPT-15A	25/70V, 15W Continuous	**95.22**
87F4412	SP15-8A	8 Ohms, 15W Continuous, 20W Equalized	**75.92**
87F4411	SPT-30A	25/70V, 30W Continuous, 40W Equalized	**116.96**
87F4413	SP30-8A	8 Ohms, 30W Continuous	**94.86**
87F4414	BDT-30A	25/70V, 30W Continuous	**165.60**

(4681) (de01019)

AMPLIFIED SPEAKERS AND HORNS

AS-1

AH-5A

1-watt speakers are for telephone-paging interface with standard 600-ohm telephone lines. Built-in volume control. Self-contained amplifier eliminates need for central amplifier. 20mA idle current. 50mA operating current. 24VDC. "WB" in type number indicates baffle finish in simulated walnut; "WG" indicates white semi-gloss enameled steel ceiling grille; "AG" indicates satin aluminum ceiling grille.

Stock No.	Type	Description	Each
87F2702	AS-1	Speaker Only, 8.00″ Cone, 3.00″D	**38.66**
87F2703	ASWB-1	Speaker, Simulated Walnut Baffle	**59.78**
87F2704	ASWG-1	Speaker, 12.63″ dia. Steel Ceiling Grille	**45.80**

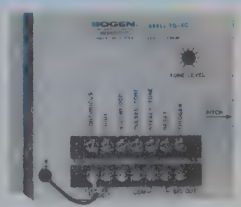
AMPLIFIED HORNS

9.00 diameter x 9.25″ D.

87F2710	AH-5A	5-Watt, 24VDC, 400mA	**120.06**
87F2711	AH-15A	15-Watt, 24VDC, 1A	**144.39**

(4683) (de01021)

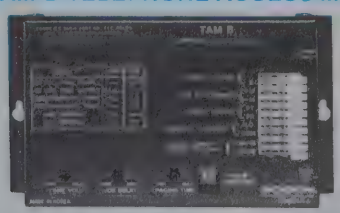
TYPE TG4C MULTIPLE TONE GENERATOR



Type TG4C produces a pulsed alarm tone, slow whoop, repeating chime or steady tone. Continuous or double-burst signal. Activated by external contact closure. Operates on 12-48VDC source. Output: 1 volt RMS into 600-ohm load, adjustable. 6.75 x 2.00 x 5.75″ (171.45 x 50.80 x 146.05).

87F2701 Type TG4C. **Each** **143.87**
(4671) (de00623)

TYPE TAM-B TELEPHONE ACCESS MODULE



Dual-mode voice paging adapter interfaces phone system to paging system. Easily installs in station or trunk port operation. Compatible with PABX, stand-alone 1A2-key, electronic key, hybrid electronic key or centrex. 24VDC @ 90mA or 48VDC @ 105mA trunk port mode. 1.875D x 8.125W x 4.50″H (47.63 x 28.58 x 114.30) wall mount.

87F2694 Type TAMB. **Each** **211.14**
(4685) (de01025)

MICROPHONES

MBS-1000

MGN-19

MBS-1000 desk top paging microphone. Omnidirectional. Dual impedance, low or high. Metal case. Push-to-talk with lock mechanism. 7-foot cable. **MGN-19** pushbutton omnidirectional. 19.00″ flexible gooseneck mounting flange and 7 feet of 4-conductor cable. 2000Hz.

90F7566 Type MBS1000. **Each** **178.02**
90F1964 Type MGN-19. **Each** **96.78**
(4674) (de00628)

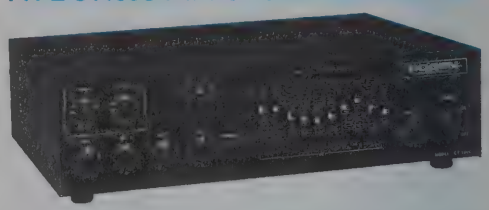
TPU SERIES TELEPHONE PAGING AMPLIFIERS

Provide input for 600-ohm balanced telephone line, low Z balanced microphone (no microphone **type TPU-15A**) and background music. Integral automatic level control. Voice-activated circuitry automatically mutes or fades music when paging. Built-in night ringer. Wall mount design.Thermal and electronic overload protection. Frequency response: **type TPU-15A,** 70Hz to 12Hz ±2dB. UL listed, CSA certified.

Stock No.	Type	Watts	Power Consumption @ 120VAC	Each
87F2695	TPU-15A	15	0.4A, 48W	**249.44**
87F2696	TPU-35B	35	0.75A, 90W	**404.69**
87F2697	TPU-60B	60	1.5A, 180W	**497.84**
87F2698	TPU100B	100	2A, 240W	**545.45**

(4684) (de01023)

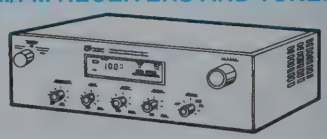
TYPE CT100C 7-INPUT SIGNAL AMPLIFIER



Type CT100C amplifier features six low-impedance, transformer-isolated microphone inputs plus auxiliary input with fader control. Built-in 2/3-octave equalizer boosts or attenuates any of ten selected frequencies. Built-in compressor assures uniform output. UL listed, CSA certified. *Order type* **RVC2B** *remote volume controller separately; contact your local Newark sales office .*

98F3895 Type CT100C. **Each** **816.62**
(4669) (de00620)

AM/FM RECEIVERS AND TUNERS



Type RM-350D AM/FM receiver (tuner amplifier) has digital display of station frequency. Microphone input for paging with automatic precedence over music. (Requires SPST switch in microphone). 25 & 70 Volt Output, 4, 8 and 16 ohms. 35 watts. All solid state circuitry. Radio frequency range: AM 535-1605 KHz, FM 88-108 MHz. **Type TP-30D** AM/FM digital tuner has 18 FM and 12 AM presets in 5 bands. PPL synthesized tuning. LCD display. Stereo output. 8 watts.

81F1335 Type RM350D AM/FM Receiver. **Each** **459.39**
48F3697 Type TP30D AM/FM Tuner. **Each** **227.70**
(4672) (de00625)

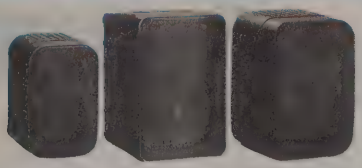
BOGEN COMMUNICATIONS, INC.

AMPLIFIERS AND P.A. EQUIPMENT

BACKGROUND AND FOREGROUND SPEAKERS



- **Smooth, Wide Frequency Response for Music or Voice**
- **Compact, Rugged Plastic Enclosures**
- **Individually Sweep-Tone Tested To Ensure Reliability**
- **Mounting Brackets Included**
- **1-Year Warranty**

FG-Series speakers have rugged molded plastic housings. Individually sweep-tone tested. **Type FG-15B**, which is black, and **FG-15W**, which is eggshell white, have drivers consisting of 3″ paper woofer and ¾″ mylar tweeter. Handle 15W @ 8 ohms or 1, 2, 4, 7.5, or 15W @ 70V. **Type FG-20S** is a black splash-proof speaker. Can be used outdoors and exposed to low-pressure water spray. Consists of a 5″ poly woofer and ¾″ mylar tweeter. Rated at 20W @ 8 ohms or 5, 10, 15, or 20W @ 70V. **Type FG-30** is a black speaker consisting of a 5″ paper woofer and a ¾″ mylar tweeter. Rated at 30W @ 8 ohms or 10, 15, 20, or 30W @ 70V. All **FG-series** speakers include a "U" mounting bracket. A black swivel mount (**type FG-SM**) and white swivel remount (**type FG-SMW**) are also available for **types FG-20S** and **FG-30**. *Contact your local Newark sales office.*

Stock No.	Type	Power	Frequency Range	H x W x L	Color	Each
16F068	FG15B	15W	100Hz-20kHz	7.25 x 4.6 x 4.9″	Black	79.18
16F069	FG15W	15W	100Hz-20kHz	7.25 x 4.6 x 4.9″	White	79.18
16F071	FG20S	20W	80Hz-20kHz	9.15 x 6.25 x 7.0″	Black	140.76
16F070	FG30	30W	80Hz-20kHz	9.0 x 5.9 x 5.5″	Black	131.97

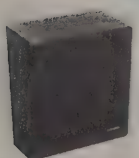
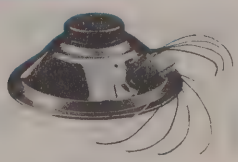
LOUDSPEAKERS



WBS8T725

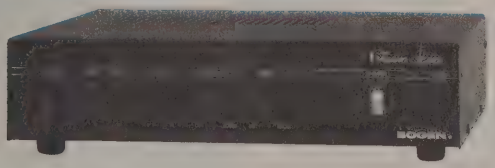


S86T725PG8W

WBS8T725 assembly has 8″ cone speaker, 25/70V transformer, wall mount baffle. **WBS8T725V** same but with volume control. **S86T725PG8W** 8″ cone speakers with 6 tap, 4W, 25/70V transformer, round white steel grille. **WBS8T725, S86T725PG8WKV** baffle assembly speakers with volume control.

46F3848 Type WBS8T725. **Each** **44.51**
50F2996 Type WBS8T725V. **Each** **54.86**
90F1968 Type S86T725PG8W. **Each** **23.81**
50F1905 Type S86T725PG8WVK. **Each** **36.23**
94F1452 Type TB8. Ceiling Tile Bridge **Each** **7.25**
(4673) (de00627)

C SERIES SOLID-STATE PUBLIC ADDRESS AMPLIFIERS WITH BUILT-IN TELEPHONE INPUT



- **Microphone Inputs Accept High or Low Impedance Microphones**
- **Built-in Microphone Precedence Circuit**
- **Built-in Telephone Page Input with Vox Muting**

Types C100 (100 watts), **C60** (60 watts) and **C3** (35 watts) mix 3 inputs; switch permits 2 mike/1 auxiliary or 1 mike/2 auxiliary operation. **C10** (10 watts) and **C20** (20 watts) mix 2 inputs, either 2 mike or 1 mike/1 auxiliary. All units feature thermal and electrical circuit breakers. UL listed. CSA certified. *Order* **type RPK-50** *rack and panel kit for* **C100, C60** *and* **C35** *amplifiers separately below.*

97F800 Type C100. **Each** **520.61**
97F801 Type C60. **Each** **441.95**
97F802 Type C35C. **Each** **353.97**
97F803 Type C20C. **Each** **257.72**
96F550 Type C10C. **Each** **204.31**
50F1904 Type RPK50. **Each** **32.45**
(4793) (ne00619)

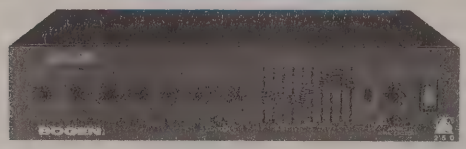
ALL PRODUCTS LISTED ARE STOCKED.

GA SERIES GENERAL PURPOSE AMPLIFIERS

Type GA-6A economy amplifier offers 1 microphone input (low impedance) and 1 auxiliary input (high impedance). Output: 8 ohms, 25V, 70V line. **GA-2** makes an ideal "music-on-hold" amplifier. 50 millivolts needed for full output. Output impedance: 8 ohms, 600 ohms balanced.

81F1342 Type GA6A. 6 Watts **Each** **167.16**
46F3846 Type GA-2. 1.5 Watts **Each** **107.33**
(4794) (ne00624)

GS SERIES AMPLIFIERS



GS Series feature dual equalizer for feedback control or graphic equalization, variable loudness control and Aphex Aural Exciter® circuitry for increased intelligibility. Frequency response: 20Hz to 20kHz, +0, –1dB (direct output) @ rated power. 3.50H x 16.50W x 12.00″D.

Stock No.	Type	Description	Each
48F4019	GS-250	250W Amplifier	938.85
95F3272	GS-150	150W Amplifier	738.99
95F3271	GS-100	100W Amplifier	642.74
95F3270	GS-60	60W Amplifier	563.04
95F3269	GS-35	35W Amplifier	441.95

(4689) (de01035)

TYPE HTA AMPLIFIERS AND TYPE TL TRANSFORMERS

Feature power MOSFET circuitry and have distortion of < 0.5% THD 20-20kHZ. 3-wire auxiliary receptacle, 300W maximum. Hum noise 90dB below rated output. Output loads 4 ohms, 8 ohms, 25VCT and 70.7V. Output regulation better than 2dB from no load to full load. Units have high input impedance of 50K ohms unbalanced. 60Hz. Black finish. **Type TL600** transformer provide balanced 600 ohm input for power amplifier. **Type TL100** provides balanced one-on-one input match and isolation for power amplifier.

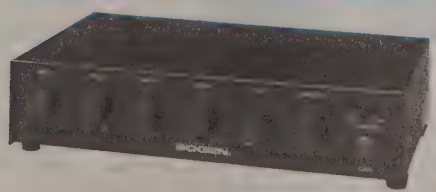
Stock No.	Type	Cont. Power Output	Each
87F2692	HTA-125A	125 Watts	690.35
87F2693	HTA250A	250 Watts	1108.49

LINE TRANSFORMERS

Stock No.	Type	Frequency Response	1-4	5-9
96F543	TL600	20Hz to 20kHz, ±1dB	66.87	64.19
46F3845	TL100	20Hz to 15kHz, ±2dB	51.03	48.99

(4687) (de01032)

TYPE CAM MIXER-PREAMPLIFIER



Features active mixing and 4 microphone channels. Interconnect units for more microphone inputs. Solid-state. Rated output 2.5V HI-Z output; 125mV HI-Z microphone output; 12.5mV LO-Z microphone output. Frequency response flat ±2dB 20Hz to 20kHz. 120VAC/0.02A, or 24-28VDC/0.01A. 60Hz. Minimum system mixing noise.

46F3842 Type CAM. **Each** **343.00**

ACCESSORIES

96F543 Type TL600. 600Ω line matching transformer. **Each** **66.87**
46F3845 Type TL100. 1:1 ratio transformer. **Each** **51.03**
(4688) (de01034)

SPEAKERS, MICROPHONES AND AMPLIFIERS

ALL-PURPOSE PAGING HORN

Type PA430 30W paging horn that provides high intelligibility. Field replaceable voice coil, weatherproof design, fully positional mount. Can mount to a standard electrical box, wall, pole, or other surface. The transformer version **(type PA430T)** includes connections for 25V, 70V, and 100V lines with taps at 2W, 3.7W, 7.5W, 15W, and 30W. Taps are screwdriver-adjustable.

52F8890 Type PA430. **Each** **101.43**
50F2933 Type PA430T. **Each** **115.92**
(4796) (ne01769)

ALL-WEATHER INDOOR/OUTDOOR FULL-RANGE SPEAKERS

Musicaster 100 **DTS-200W**

Type MUSICASTER 100 Musicaster® is a 60W weatherproof speaker designed for speech and music reproduction. 12″ driver, 8 ohms, 90-18,000Hz, light tan and all-angle "U" mounting bracket included. 17.5H x 17.5W x 8.5″D. UL listed. *Order* **Type TK60** *70V transformer separately below.* **Type DTS-200W** is a 200W full range weatherproof speaker with high-performance audio quality. 12″ driver, 8W, 90°x90° horn, 80-20kHz. *Order* **Type MB200** *mounting bracket separately below.*

93F9975 Type MUSICASTER 100. **Each** **559.42**
52F8891 Type TK-60. **Each** **139.73**
48F3865 Type DTS-200W. **Each** **774.00**
48F3866 Type MB200. **Each** **60.00**
(4831) (ne08947)

GENERAL PURPOSE PAGING HORNS

PA12F **PA60** **CDP**

Type PA12F, flush mount style, bell-type horn has die-cast zinc construction. 7.5″ dia. **Type PA60** (60W, 8 ohm) high-power paging horn has 80° coverage. **Type CDP-848AT** (30W transformer version) hi-fidelity, two-way paging horn has 150° dispersion. **Type CDP-850T** (60W transformer version) high-power, hi-fidelity, two-way paging horn has 150° dispersion.

Stock No.	Type	Response	Each
86F669	PA12F	700Hz-10kHz	91.08
46F7817	PA60	600Hz-6.5kHz	135.07
52F7292	CDP848AT	260Hz-10kHz	352.42
52F7293	CDP850T	260Hz-8kHz	439.88

(4708) (de01767)

SPECIAL APPLICATION SPEAKERS

MM-2 **S-40B**

Type MM-2 rugged speaker is immune to salt spray, gas, live steam, fungus, and harmful dust. 800Hz-5kHz, 25W, 16 ohms, 95° dispersion. 6.0″ diameter, 5″ deep. **Types MM-2F** and **MM-2TC** are the same as **type MM-2** except **type MM-2F** is available in flush mount and **type MM-2TC** comes with a transformer. UL listed. **Type S40B** 2-way, weatherproof full-range speaker features a 5.25″ woofer, 1 ″dome tweeter. **Type S40TB** has 70V transformer.

88F108 Type MM-2. **Each** **249.44**
93F9214 Type MM2TC. **Each** **365.36**
44F939 Type MM2F. **Each** **249.44**
48F3867 Type S-40B. **Pair** **380.00**
48F3868 Type S-40TB. **Pair** **486.00**
(4833) (ne08949)

LARGE PUBLIC ADDRESS HORNS

PH **COBRA3**

Large indoor/outdoor public address horns require drivers, *ordered separately on this page.* Match with any driver. All-angle mounting brackets.

Stock No.	Type	Low End Cutoff	Each
88F233	PH	200Hz	240.64
88F230	COBRA3	250Hz	189.93

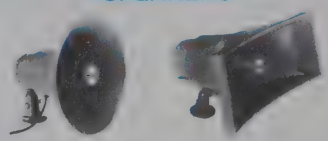
(4710) (de01770)

SPECIAL PURPOSE PROJECTORS

Type MLC 2-way, 15-watt, weatherproof loudspeaker system featuring a compact, folded horn design. For indoor and outdoor use. 175Hz-6kHz, 15W, 8 ohms, 120° dispersion. Size: 12.75H x 9.13W x 10.63D″. **Type MLCT** is the same as **type MLC** except with a transformer.

88F135 Type MLC. **Each** **306.36**
88F228 Type MLC-T. **Each** **329.13**
(4832) (ne08948)

WIDE-COVERAGE PAGING/TALKBACK SPEAKERS



IBC8 **CFID**

Indoor/outdoor units have built-in drivers. **Type IBC8** offers 105° dispersion, adjustable wall mounting bracket. 30W, 8 ohms. **CFID32-8** (32 watts, 8 ohms) is a rectangular reflex exponential speaker. Dispersion 120° horizontal, 80° vertical. Weatherproof. Uni-lok swivel mount. Wide frequency response and low distortion. **CFID32T** (32W) rectangular, reflex exponential speaker has built-in combination 25/70.7V line transformer and 6 screwdriver adjustable wattage taps. Weatherproof. Dispersion is 120° horizontal, 80° vertical. Uni-lok swivel mount. Wide throat design for wide frequency response and low distortion.

Stock No.	Type	Response	Each
88F110	IBC8	500Hz-7kHz	150.08
88F114	CFID32-8	300Hz-8kHz	139.21
88F115	CFID32-T	300Hz-8kHz	179.58

(4709) (de01768)

DRIVERS FOR P. A. HORNS

Weatherproof, high-efficiency 1.00″ throat drivers offer broad response, low distortion. 8 ohms except "T" versions: 70V line applications, include 70V transformer w/6 taps. Power rating: 30W except for **type ID-60**: 60W.

Stock No.	Type	Description	Each
88F231	7110XC	Explosion Proof, UL	361.22
88F142	1D30/1D30C8	Weatherproof	95.22
88F136	ID30CT	Includes Transformer	111.78
88F145	ID60C8/ID60	Weatherproof, Hi Power	173.37
88F146	ID60CT/ID60T	Includes Transformer	207.00

(4711) (de01771)

70-VOLT LINE-MATCHING TRANSFORMER

Type 5030 can be added to any 4-, 8-, or 16-ohm speaker to match to a 25 or 70V speaker line. Power taps at 1.25, 2.5, 5, 10, 15, and 30W.

88F128 Type 5030. **Each** **38.30**
(4706) (de01721)

BROADCAST-QUALITY MICROPHONE

NEW

Type RE20 microphone is a studio-quality Variable-D microphone for high-quality voice production and other close-proximity applications.

48F3869 Type RE20. **Each** **786.00**
(35270) (ne35270)

DESKTOP PUSH-TO-TALK MICROPHONE

Type US622L desktop push-to-talk microphone with noise cancelling. Flexible switch operates as "push-to-talk," "grip-to-talk," and "hands-free-talk." 7′ black PVC-jacketed cord attached, end tinned.

98F1010 Type US622L. **Each** **240.12**
(4707) (de01730)

EV BOUNDARY MICROPHONE

Type CT30 microphone is a tabletop, low-profile mike designed for audio conferencing, recording, or amplifying.

01F054 Type CT-30. **Each** **395.37**
(16128) (ne10741)

PUBLIC ADDRESS MICROPHONE

NEW

Type MC300 hand-held microphone has cardioid pattern pickup which helps reject feedback. On/Off switch.

48F3870 Type MC300. **Each** **84.00**
(35271) (ne35271)

GRIP-TO-TALK MICROPHONE

Type US602FL is a hand-held, noise-cancelling microphone for clear transmission in high-ambient noise areas. Special balanced port feature directs unwanted sound to rear of diaphragm. High-impact polycarbonate case, non-metallic Acoustal-loy® diaphragm. Includes "grip-to-talk" switch and 6′ heavy-duty coil cord. End tinned.

98F2054 Type US602FL. **Each** **138.69**
(4846) (de01727)

MIXER/AMPLIFIERS

Type MR-355C 35-watt mixer/amplifier has 5 separate inputs for control of 7 sources: microphone 1-4, aux 5-6 and page. Digital AM/FM tuner has 24 station presets. Built-in audio control circuit reduces music level for paging. Powers 4-, 8-, or 16-ohm loads; 25 or 70V distributed speaker lines. **MA series** same as **type MR-355C** without the tuner. 6 inputs (3 mics), telephone paging input.

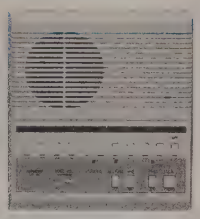
Stock No.	Type	Description	Each
93F9973	MR355B	35W Mixer/Amp w/Tuner	495.77
52F7294	MA355B	35W Mixer/Amplifier	474.03
52F7295	MA605B	60W Mixer/Amplifier	589.95
52F7296	MA1005B	100W Mixer/Amplifier	674.82

(4809) (ne07380)

COMMUNICATION AND INTERCOM SYSTEMS

LOUDSPEAKING INTERCOM SYSTEM

- 3-, 5-, 10-Station Surface-Mount Masters
- 5-Station Semi-Flush Masters (also available in 3- and 10-station units)
- Accepts Music Input
- All-Call from all Flush-Mount Master Stations with B6-10 or B6R-10A units
- Door Release Available on 5- and 10-Station Masters
- All-Call Available on Surface-Mount Type LEF-10S
- Substations Available With and Without Privacy
- Answer the Door from Any Master Station
- Requires Shielded Cable, 22AWG, up to 650 ft



LEF-10

Master Sentry Series' clear sound makes system ideal for loudspeaker intercom needs in homes, offices, stores, and factories. Ample volume for average office use. Privacy type subs and "Privacy" mode on master prevent eavesdropping. Same master used for master-to-master, master-to-substation, and intermixed systems. Calls can be answered "hands-free". **C suffix** in type number denotes semi-flush mount with music volume control and All-Call. Need only 2 or 3 wires from master to each substation. Instructions included. *Order* **type PS-12C** *power supply separately* (1 required for each system). All-Call requires **types BG-10C** (92F2603) and **PS-12F** (92F2605) or **BGR-10A** (92F2604) and **PS-2410A** (83F7631). *Contact your local Newark sales office for a complete line of LEF accessories and power supplies.*

TYPE LEF MASTER STATIONS

SELECTIVE-CALL PHONE-TYPE SYSTEM

- 1-, 3-, 6-, 12-, and 24-Call Phone-Type Stations
- Paging System Interface Available
- Multiple Talk Paths
- Semi-Private Communication
- Conference Call Capability
- Wireless Roamer May Be Added
- 50W, 100W Paging Amps w/PD-1 Available

TD-6H/B, TD-12H/B

Multi-channel, semi-private system is ideal for internal phone needs for stores, offices, schools, factories. Selective ring and talk function permits simultaneous use of all phones, plus conference calls. *Full line of accessories available; contact your local Newark sales office.*

DOOR ANSWERING INTERCOM SYSTEM

- Room-To-Room Intercom Plus Door Answering
- Up To 2 Door Stations, 6 Room Stations
- All Call From Any Room Station
- Selective Call With Pre-Tone And Voice

IE-8 series handset-style, multi-location entry security and communication system is ideal for residential and business applications. Easy wiring, only 4 conductors between stations and 2 conductors to doors. Built-in selective door release. 4- and 2-stroke chime from door stations. Pan-Tilt video door answering (**MY series**) can be added.

Stock No.	Type	Description	Each
52F9341	IE-8MD	Main Room Handset	305.18
52F9342	IE-8HD	Sub Room Handset for type IE-8MD	156.85

WIRELESS ROAMER SYSTEM

- Intercom Communication
- Paging From Cordless Phone
- Covers Large Area, Even Outdoors

Add a 900MHz cordless phone to the Market Com or TD-H selective call intercom system for fully integrated paging, intercom and telephone functions. The Wireless Roamer allows calling and communication between the in-store intercom system and the cordless phone, plus paging from the cordless phone. The cordless phone is an extension of the in-house phone system, therefore allowing full telephone capabilities as well. Compatible intercom systems (**types MC-3, MC-60/4, MC-60/4A, TD-H**) *also available; contact your local Newark sales office.*

Stock No.	Type	Description	Each
83F7632	WP100A	Systems Interface Unit	892.39
52F9347	ANA9500	900MHz Cordless Roamer Phone	709.87

LOUDSPEAKER/TILE REPLACEMENT CEILING SPEAKER SYSTEM

Type C5/BU/TR ceiling speaker system includes white steel grille to blend with interior decor, black steel speaker bridge, hidden mounting hardware, and T-bar trim piece to fit between the speaker and trimmed tile. The speaker and transformer are ready to lay on the existing ceiling grid. A backbox enclosure (**type ERD8TR**) can be added. **Type C5/BU/TR** comprises **type 8C5PAX** loudspeaker, **type TBLU** universal transformer (25/70.7V), and tile replacement system.

52F9721 Type C5-BU-TR. **Each** 35.31

(4830) (ne08939)

16W PAGING HORN

Type QH16T is a double re-entrant horn-type loudspeaker. For applications that require a highly efficient compression-driven horn for "talk-back intercom" and paging applications. Delivers high degree of speech intelligibility in noisy environments. Integral dual line transformer allows usage with either 25 or 70.7V distribution lines. Tap selection switch permits 3dB wattage adjustment for both lines. Power capability is 16W rms per EIA RS-426A test standard. Constructed of durable aluminum materials.

52F9722 Type QH16T. **Each** 68.74

(4829) (ne08938)

Type 562 unidirectional noise-cancelling dynamic microphone is suited for high-noise environments. Frequency response: 100-6,000Hz. Gooseneck mount. Impedance @ 1kHz: 180 ohms. #4 Allen wrench supplied.

50F2994 Type 562. **Each** **98.04**

Type 515SB-G18X unidirectional dynamic gooseneck microphone has momentary push-to-talk switch. Frequency response: 80-13,000Hz. Impedance @ 1kHz: 150 ohms. 18″ gooseneck and heavy-duty mounting flange.

61FX195 Type 515SB-G18. **Each** **104.93**

Type 596LB. Economical for budget-restricted installations. Silver plated push-to-talk switch for increased reliability. Durable vinyl-jacketed coil cord. Rugged ARMO-DUR® case. Increased output (matches most paging amplified inputs).

66F4227 Type 596LB. **Each** **40.66**

Type SM11 dynamic miniaturized lavalier is shorter than a paper clip. Flat natural frequency response ideal for broadcasting, motion pictures and sound reinforcement. 50-15,000Hz. Tie tack and tie bar mounting accessories included.

61FX777 Type SM11CN. **Each** **152.80**

NEWARK ELECTRONICS

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable** – We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel** – Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting** – Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging** – We can bag individual parts and label the bag to your specifications.
- **Assembly** – We perform basic assembly of compatible components.
- **Part Numbers and Special Information** – We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments** – Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

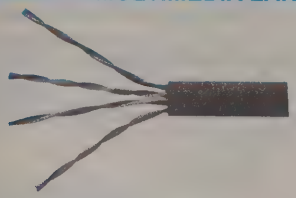
MEDIATWIST™ AND DATATWIST® LAN CABLE

MEDIATWIST™ MULTIMEDIA LAN CABLE



Mediatwist™ is video, data and voice cable in a single UTP (Unshielded Twisted Pair) cable. Provides stable performance to 350MHz with electrical characteristics exceeding TIA/EIA Category 5 standards. Unique crescent-shape design locks each pair in place. Pair-to-pair movement is greatly reduced during installation nullifying any electrical degradation resulting from various installation techniques. Jacket is marked at 2′ intervals. Nominal capacitance @ 1KHz: 15 pF/ft. Conductor guage: 24AWG. Resistance: 27.4ohms/1000′. **Sold in 1000′ spools**

DATATWIST® 350 TWISTED PAIR DATA CABLE

Tested to 350MHz, DataTwist® 350 cable is the new standard in high-performance LAN cable. Max. operating voltage: 300Vrms. Nom. cap. @ 1 kHz: 14 pF/ft. Max. pulling tension 41 lbs. Min. bend radius is 2.25″. CSA certified. For easier installation, the DataTwist® 350 cable stripping tool **type 1797A** is now available; *contact your local Newark sales office.*

NON-PLENUM VERSION, UNSHIELDED

24AWG solid bare copper conductors. Polyolefin insulated. Four twisted pairs (singles adjoined). Ripcord. Low-loss PVC jacket. Temp. range: –20°C to 80°C. Nom. diameter: 0.200″. NEC Type CM. Flame test: UL 1581 vertical tray, CSA FT4. Gray or blue. Also available in other colors; *contact your local Newark sales office.*

CATEGORY 5 DATATWIST® UNSHIELDED TWISTED PAIR DATA CABLE

- **Tested to 100 MHz**
- **Up to 100 Mbps Transmission Speed**
- **Computer Hardware Independent**
- **Meets/Exceeds IEEE 802.3 10 Base T Ethernet**
- **Meets/Exceeds TIA/EIA 568 Commercial Building Wiring Standard**
- **Compatible with Standard RJ45, RJ12, and RJ11 Jacks**
- **NEC-CM and CMP Rated**
- **CSA PCCFT1, FT4 and FT6 Rated**

Belden DataTwist® Five is the one constant in your diverse and rapidly changing communications network. Whether you're using Ethernet, Token Ring, Arcnet or the Twisted Pair Distribution Data Interface (TPDDI), Belden's DataTwist® Five is a cable you can rely on for your critical networking requirements. **Sold in 1000′ spools**.

NON-PLENUM VERSION, UNSHIELDED

24AWG solid bare copper conductors. Polyolefin insulation, gray or blue PVC jacket. Nominal impedance 100 ohms. CSA certified PCC and FT1. NEC Type CM rated. Number of pairs: 4 except **type 1588A**, 2.

INDIVIDUALLY SHIELDED PAIRED COMPUTER CABLE

Type 8777 tinned copper conductors, twisted pairs. Each pair individually shielded with Beldfoil® aluminum-polyester shield and stranded tinned copper drain wire. Overall chrome PVC jacket. 30V, 80°C. UL recognized 2919; NEC Type CM. **Type 8723** tinned copper conductors. Black and red under Beldfoil® aluminum-polyester shield, green and white under Beldfoil® aluminum-polyester shield. Stranded tinned common drain wire. Chrome PVC jacket. Pairs cabled on common axis to reduce diameter. 60°C. NEC Type CM. Capacitance for **Type 8777** is 30 pF/Ft. Capacitance for **Type 8723** is 35 pF/Ft.

SINGLE PAIR OVERALL BRAID SHIELDED COMMUNICATION & INSTRUMENTATION CABLE

Tinned copper conductors, PVC insulated, except **type 8208** which is rubber insulated, twisted pair. Tinned copper braid shield. Black PVC jacket except **type 8208**, which is chrome. **Types 8437** and **8441** have tinned copper drain wire; **type 8437** is polyester taped. **Type 8208** has separator. All types have 1 pair.

PAIRED SHIELDED PLENUM CABLE

For computers & instrumentation. Tinned copper, twisted pairs each individually shielded with Beldfoil® overall. Teflon insulated except for **82729** which is foam FEP Teflon insulated. Flamarrest® jacket. 24AWG stranded tinned copper drain wire. 300V RMS. **Types 82723, 82777** and **82778** AWG (Stranding): 22 (7 x 30). **Type 82729** AWG (Stranding): 24 (7 x 32). Non-conduit. NEC Article 800, Type CMP and CSA PCC FT4/FT6 rated, UL listed. Color: natural. **Sold in spools of 1000′.**

MULTICONDUCTOR CABLE

MULTICONDUCTOR UNSHIELDED CONTROL, AUDIO, & COMPUTER CABLE

Spooled, tinned copper stranded cable. PVC insulated, chrome PVC jacket **Type 9794** bare copper solid cable; polyethylene insulated, PVC jacket. NEC Type CM except **types 8620-24, 8627-39, 9620-23, 9721** which pass VW-1 vertical wire flame test. Working voltage: 600V, 80°C. **Type 8446** contains four 22 AWG (7x30) and two 18 AWG (16x30) conductors.

CONTROL, AUDIO, & COMPUTER CABLE FOR EIA RS-232 APPLICATIONS — AWG: 22 (7 X 30)

MULTICONDUCTOR OVERALL FOIL/BRAID SHIELDED COMPUTER CABLE—DATALENE® INSULATED

Low capacitance cables for EIA RS-232, EIA RS-423 and CAD/CAM applications. Tinned copper, Datalene® insulated, multi-conductor cable with overall Beldfoil® aluminum-polyester plus 65% tinned copper braid shield. 24 AWG stranded tinned copper drain wire. Chrome PVC jacket. Rated 30V, 80°C. UL recognized. Datalene® insulation features low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. 24AWG stranded conductors (& x 32) 1919, NEC Type CM. Capacitance pF/ft.: 12.

MULTICONDUCTOR CABLE

MULTICONDUCTOR OVERALL FOIL/BRAID SHIELDED COMPUTER CABLE

For EIA RS-232 and CAD/CAM applications. Tinned copper, SR-PVC insulated, multiconductor cable with overall Beldfoil® aluminum-polyester plus 65% tinned copper braid shield. Chrome PVC jacket. Rated 300V, 80°C. UL recognized 2464; CSA PCC FT4; NEC Type CM.

24 AWG STRANDED CONDUCTORS (7 x 32) TYPE 9608-9610, CAP. 35 pF/ft. Type 9611-9619, CAP.30 pF/ft.

MULTICONDUCTOR SHIELDED BROADCAST, AUDIO, AND INSTRUMENTATION PVC JACKET CABLE

Tinned copper stranded conductors. Polyethylene insulated except: **type 9770** polypropylene and paper wrap, and **type 9418** S-R PVC insulated. Beldfoil® aluminum-polyester shield with stranded tinned copper drain wire except **type 8729** which has 3 solid tinned copper-coated steel wires and 1 stranded tinned copper-coated steel drain wire. NEC Type CM except **type 8729**, which is NEC Type CL3. UL recognized except **type 9770**. Other spool sizes available, *contact your local Newark sales office.*

BRILLIANCE® 75-OHM VIDEO CABLES FOR ANALOG AND DIGITAL APPLICATIONS

Brilliance®

1505A, 1506A

1694A, 1695A

Solid bare copper conductor. Duofoil® foil shield plus 95% tinned copper braid shield. **Types 1505A** and **1506A** are RG-59/U size analog and digital video cables. 7731A is R6-11/U. **Types 1694A** and **1695A** are RG-6/U size cables designed to accommodate the high data speeds encountered with serial digital video distribution. **Types 1505A** and **1694A** are foam high-density polyethylene insulated with a PVC jacket available in red, yellow, green, light blue, white, brown, orange, gray, violet, and black. All types have 1 conductor. NEC Type CM rated. **Type 1694A** in 500′ spool comes in black only. **Types 1506A** and **1695A** are foam FEP Teflon™ insulated with natural white Flamarrest® jacket for plenum applications. NEC Type CMP rated. Normal impedance for all is 75 ohms.

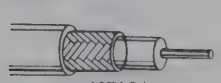
COMFORMABLE® 50-OHM COAXIAL CABLE

NEW



1671J

Comformable® coax cable is an alternative to semi-rigid and flexible coax for "black box" applications involving internal, head-end wiring of electronic equipment, delay lines, and high-frequency microwave applications. All have TFE Teflon® core insulation and copper-tin composite shield. 100% shield coverage. **Sold in spools of 100′.**

AUDIO/VIDEO AND COAXIAL CABLE

75-OHM MINIATURE BUNDLED RGB AND SVHS VIDEO COAXIAL CABLES

Tinned copper conductors. Foam high-density polyethylene insulation. Black PVC jacket. **Types 1520A** and **1522A** are flexible mini-size component video cables that withstand tighter bend radiuses to make installation easier. 3(RBG), 4(RBG/Sync) or 5(RBG/Sync/Hold) stranded tinned copper conductors. Overall Beldfoil® shield and 22 AWG drain wire. NEC type CL2 rated. **Types 1807A** and **1808A** SVHS parallel cables contain two coaxial cables that separate video signal transmissions. Tinned copper serve shield. AWG (Strand): 30 (7 x 38). 7700A is plenum rated (CMP) construction with french brain 98% shield coverage.

Designed for flexibility, service and reliable signal transmission at audio frequencies. Shielded single-conductor cable is used in high impedance systems and multi-conductor cable is used in low impedance applications. Rubber jacketed cable is recommended for abrasion and impact resistance offering extra limpness so cable lies flat. Neoprene and Hypalon® jacketed cable are recommended for outside use, cold weather applications. Sun, oil, and ozone resistant. PVC jacketed cable is recommended for lower capacitance, lower loss, and are lighter weight, smaller in diameter and ozone and oil resistant. **Types 8413, 8406** tinned cadmium bronze conductors, rubber insulated and tinned copper braid shield. **Types 8402, 8407, 8408, 8412, 8418, 8423-27** tinned copper conductors, rubber insulated, rayon and tinned copper braid shields. **Types 8428, 9778** tinned copper conductors, rubber insulated, tinned copper spiral and low noise conductive textile shields. **Type 9397** bare copper conductors, PVC insulated and bar copper double spiral shields. **Type 8420** tinned cadmium bronze conductor, polyethylene insulated, rayon and tinned copper braid shield. **Types 8422, 8403-05** tinned copper conductors, polyethylene insulated, textile and tinned copper braid shields. **Type 1172A** is polyethylene insulated with french braid 95% shield coverage.

AUDIO, MUSIC AND RETRACTABLE CABLE

1-PAIR BELDFOIL® SHIELDED PROFESSIONAL MUSIC CABLE

Tinned copper 24 AWG (19 x 36) stranded conductors, high-density polyethylene insulated twisted pair. Nom O.D.: 0.135″. Stranded tinned copper drain wire. Beldfoil® aluminum-polyester shield. Conductive textile tape to minimize triboelectric noise. Black PVC jacket. 200V, 75°. Capacitance: pF/ft. = 30.

FLEXIBLE CABLE FOR AUTOMATED SYSTEMS

INFINITY™ CABLE - CTC 9 MILLION + FLEX CYCLES

Ultra-flexible, oil, and abrasion-resistant cable ideal for use in automated applications involving extreme flexing. Maximum reliability and durability, even in harsh environments. Voltage rating: 600V. Temperature rating: –40°C to +90°C (static); –5°C to +90°C (flexing). Jacket type: oil-resistant PVC or PUR overall. Jacket color: orange. Color code: Red with numbers, green/yellow ground. UL recognized - 2587 PVC (90°), UL - 2023 PUR (80°), CSA certified - AWM 1 A/B, 1 A/B FTI. **Sold per foot. Cut to your specifications.**

INFINITY™ CABLE - CTC 4 MILLION + FLEX CYCLES

Oil and abrasion-resistant control cable for use in C-track, robotic and other automated systems where a high degree of continuous flexing is encountered. Voltage rating: 600V. Temperature rating: –5°C to +90°C (static); –40°C to +90°C (flexing). Jacket type: oil resistant PVC or PUR overall. Jacket color: yellow. Color code: black with numbers, green/yellow ground. UL recognized - 20234 PUR (80°C), CSA certified AWM 1 A/B 11 A/B FTI. **Sold per foot. Cut to your specifications.**

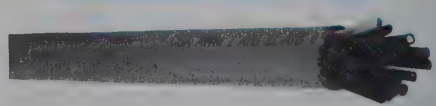
INFINITY™ CABLE - FLEX DATA 1 MILLION + FLEX CYCLES



For industrial applications where precise data transmission is combined with near-constant motion. Ideal for effective operation of computer controlled equipment or other automated production process, even in harsh environments. Voltage rating: 30V. Temperature rating: –20°C to +80°C (static); –5°C to +80°C (flexing). Jacket type: oil-resistant PVC or PUR overall. Jacket color: bright green. Color code: multipar usage chart #5, 1 PR = white/blue. UL recognized - 2532, CSA certified - AWM 1 A/B 11 A/B. **Sold per foot. Cut to your specifications.**

PLENUM AND TRAY CABLE

PAIRED SHIELDED TRAY CABLE — UL SUBJECT 13 AND 444

Tinned copper stranded conductors, PVC insulated pairs, except **types 9328-9332, 9368, 9369 and 9388** which are twisted pairs. All with Beldfoil® shield and tinned copper drain wire. Chrome sun-resistant PVC jacket. Multi-pairs are numbered at one-inch intervals; conductor pairs are color-coded black and red. Meets UL Subject 13 (NEC Article 725 Type CL3) for use as tray cable; 300V, 105°C. Meets UL Subject 444 (NEC Article 800 Type CM) for use as communication cable. Meets CSA, PCC and FAS90.

SHIELDED FIRE ALARM & TRAY CABLE

Beldfoil® aluminum-polyester cable has solid bare copper conductors, stranded tinned copper drain wire and a red PVC jacket. NEC Type FPLR; power limited fire protective signaling circuit cable used in NEC Article 760 power limited circuits. Use as power limited circuit cable in NEC Article 725 Class 2 or 3 circuits, when marked suitable for appropriate tray cable installations. 300V, 105°C. Pass U.L. 70,000 BTU Flame Test. UL recognized 2464; 300V, 80°C.

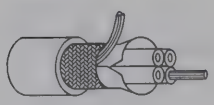
VARIABLE FREQUENCY DRIVE CABLE

NEW



Belden VFD cable is 600 volt, UL 1277 Type TC listed, with excellent shielding characteristics. Extremely durable and flexible. NEC Article 340 open wiring, CSA AWM I/II A/B. 90°C. Conductor: flexible, stranded tinned copper. Insulation: XLPE (black numbered with green ground). Shield: overall Beldfoil and 85% tinned copper braid. Jacket: industrial-grade PVC. All cables are three conductors (black numbered) with full-size ground (green).

Z-Fold®

3072F, 3073F, 3074F

Designed for UL-1277 tray cable (TC) applications. Can occupy same tray or conduit as 600V power and control cables. Meets UL-1277 Type TC/PLTC/CM/CL2 and CSA FT1. All cables use 1 pair of 18 AWG (7 x 26) tinned copper conductors. Insulation is color coded white, blue. Nominal impedance: 78Ω for **type 3073F**,100Ω for **type 3073F** and 124Ω for **type 3074F.** Insulation: FR Polyolefin.

INDUSTRIAL TWINAXIAL CABLE FOR PLCs AND DCSs

Suitable for programmable logic control systems (PLCs) and distributed control systems (DCSs). Belden Blue Hose™ cables are suitable for Allen-Bradley PLC systems. **Types 9463, 129463, 139463, YQ28763** have a AWG (Stranding) of 20 (7 x 28) and **types 9182** and **89182** of 22 (19 x 34). All types have a nominal impedance of 78Ω, except **types 9182** and **89182** which are 150Ω.

MASS-TER® MASS TERMINATION CABLE

Mass-ter®, multi-pair cable offers the construction advantages of both flat and round cable under one PVC jacket. 28AWG (7x36) stranded tinned copper conductors. 18″ of unlaminated twisted pairs separated by 2″ of laminated flat cable sections on 0.050″ centers for mass termination. PVC insulated and jacketed. Rated: 300V/105°C. NEC Type CL2; UL recognized.

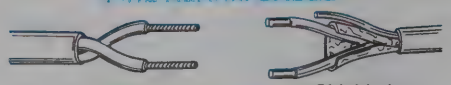
SOUND, SECURITY AND ALARM CABLE

FIRE ALARM CABLE



Unshielded Shielded

UNSHIELDED RISER CABLE

Belden New Generation cable protects against system failures. For high reliability applications like fire and security alarm systems Belden New Generation cable is the best choice. Applications include: fire protective, alarm, signal, and monitor/detection. Solid bare copper conductors, PVC insulation, red PVC jacket with ripcord, sequential footage marked. UL Type FPLR, NEC article 760, 75°C, California State Fire Marshall approved. **Sold in spools of 1000′.**

HOOK-UP WIRE DISPENSER KITS

Ideal for R&D labs, engineers and technicians. Choose kits containing five 100′ spools or eight 25′ spools of popular hook-up wire; each spool a different color. Spools come in portable dispenser rack, convenient for field work, for workbench or wall mount use. Passes VW-1 vertical wire flame test.

KITS OF FIVE 100-FOOT SPOOLS

Stock No.	Type	Wire	Colors	Each	2-4	5-9

HOOK-UP WIRE

PVC INSULATED HOOK-UP WIRE

All hook-up wire on this page have either tinned copper conductor insulated with extruded PVC or stranded silver-coated conductor insulated with extruded TFE Teflon®. PVC is flame and ozone resistant, as well as inert to most chemicals, oils, and solvents. Teflon® is a fluorinated thermoplastic with thermal, physical, and electrical properties. *For colors, see color coding chart on this page.*

UL STYLE 1007 300V, 80°C; PASSES VW-1 VERTICAL WIRE FLAME TEST—INSULATION THICKNESS 0.016″

Rated –10°C to +80°C, 300V. Rated 600V peak for electronic circuits, and internal wiring of electronic and electrical equipment.

POLY-THERMALEZE® HIGH-TEMPERATURE MAGNET WIRE

Dual polyester film coated magnet wire, rated 180°C. Exceptional ability to resist chemical solvents and abuse in intricate windings. Meets J-W-1177/14 specifications. **Sold on one-pound spools.**

INSULATED LEAD WIRE

HIGH-TEMPERATURE EPDM INSULATED LEAD WIRE

EPDM (ethylene-propylene diene elastomer) insulation offers excellent flexibility at high and low temperatures (150°C to –60°C), has good dielectric strength, abrasion/cut-through resistance, mechanical properties and ozone resistance. Compatible with most varnishes. EPDM wire is recommended for Class 130(B), 155(F) and in some 180(H) systems. Recommended maximum baking cycles: 350°F/177°C (24 hrs.), 375°F/190°C (4 hrs.). Also available in 5000′ lengths; *contact your local Newark sales office.*

EPDM INSULATION, 0.045″ THICK — UL STYLE 3374 600V, 150°C; CSA TYPE CL1254 600V, 125°C

XL-DUR™ INSULATED LEAD WIRE

XL-DUR™ insulation is a chemically cross-linked polyethylene that offers excellent thermal aging characteristics, moisture and solvent resistance. It has good abrasion and ozone resistance. Resists deformation when subjected to momentary high temperatures during assembly processes. Recommended for Class 130(B) as motor leads. Maximum baking cycles: 300°F/149°C(24 hrs.), 325°F/163°C(12 hrs.), 350°F/177°C(8 hrs.). Also available in 5000′ lengths; *contact your local Newark sales office.*

DUPONT HYPALON™ INSULATED LEAD WIRE

DuPont Hypalon™ insulation has excellent heat resistance, color stability and electrical properties. It offers good oil, ozone and abrasion resistance. Recommended for Class 130(B) as motor leads. Maximum baking cycles: 300°F/149°C(24 hrs.), 325°F/163°C(12 hrs.). Passes VW-1 vertical wire flame test.

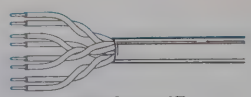
CATEGORY 5 TWISTED PAIR CABLE



9504C, 9504F

Solid bare copper conductors. 300V 60°C. EIA/TIA 568 applications. **Types 9504C, 9504CS** are non-plenum. Black PVC jacket. PCC FT4. NEMA low loss. Nominal capacitance is 17 pF/Ft @ 1kHz. **Types 9504F, 9504FS** are plenum. Gray plenum PVC jacket. PCC FT4 FT6. NEMA low loss. Nominal capacitance is 17 pF/FT @ 1kHz. **Sold in spools of 1000′.**

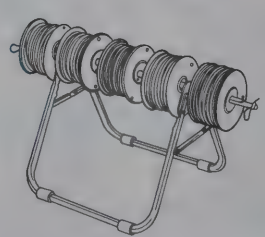
HANDI-REEL

SPC TECHNOLOGY



Sturdy design allows for outdoor installation. Makes one man wiring installations easier. Latch prevents spindle from detaching when inverted and used as carrying device. Spindle latch holds heavy reels. Handi-reel provides stability when used on a flat surface and can be left unattended while dispensing wire or cable.

Stock No.	Type	Max. Reel Dia.	Max. Reel Width	Spindle Dia.	Each

COMMUNICATION AND CONTROL CABLE

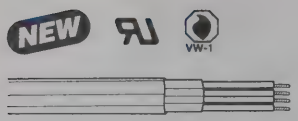
MULTICONDUCTOR IRRADIATED PVC UNSHIELDED CABLE



Multiconductor cable features the following: conductor: stranded tinned copper; insulation: color-coded irradiated PVC; jacket: white PVC. Operating temperature: -55°C to 105°C. Voltage rating: 600V. UL AWM 2576. MIL-W-16878 Type B. Passes UL VW-1 flame test.

80°C MULTICONDUCTOR FOIL-SHIELDED CABLE

2464C, 2465C

Stranded tinned copper conductors. Insulation color-coded gray. Shield aluminum/polyester tape with foil facing outward. NEC type CL2. **Type 2464C** has polypropylene insulation and 22 AWG, 7/30 stranded conductors; **type 2465** has PVC insulation and 20 AWG, 7/28 stranded conductors. Voltage rating: 300V. Temperature range: –20°C to +80°C (75°C-CM). UL listed, CSA certified.

COMMUNICATION AND CONTROL CABLE

60°C MULTICONDUCTOR FOIL SHIELDED CABLE

Conductor is made of stranded tinned copper. Insulation is color coded polyethylene. Shield is aluminum/polyester tape, foil facing outward; 100% coverage. Stranded tinned copper drain wire. PVC jacket. UL Type CM, AWM 2092, 2093, 2094. Rated 300V. Temperature range: –20°C to +60°C. UL listed. **Types 2460** and **2461** are color coded polypropylene insulated. Stranded or solid tinned copper conductor. 22 AWG tinned copper drain wire. UL Type CM. Rated 300V. Temperature range: –20°C to +105°C (75°C-CM). CSA PCC FT4. 500′ spools are also available; *contact your local Newark sales office.*

MILITARY-GRADE MULTICONDUCTOR, BRAID SHIELD CABLE

1000V, –55°C to +105°C insulated conductors meet MIL-W-16878D type C. Stranded tinned copper conductors, PVC insulation, braided tinned copper shield, 90% coverage. Gray PVC jacket. Typical applications include electronic equipment interconnection, remote control of sensitive recording instruments and controls, and telemetry data. Also available in 16 AWG; *contact your local Newark sales office.*

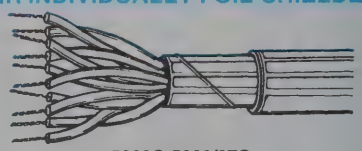
MULTIPAIR INDIVIDUALLY FOIL-SHIELDED CABLE



5902C-5909/27C

22 AWG solid tinned copper conductors with color-coded PVC insulation. Shield is aluminum/polyester tape with foil facing inward. 22 AWG stranded tinned copper drain wire. Voltage rating: 300V. Temperature range: –20°C to +80°C-AWM (75°C-CM). Gray PVC jacket. UL listed, Type CM, CSA certified, PCC FT4. 500′ spools are also available; *contact your local Newark sales office.*

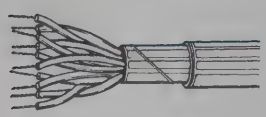
MULTIPAIR, FOIL-SHIELDED LOW-CAPACITANCE CABLE



Features lower dielectric constant, resulting in low loss, lower signal distortion, faster speeds and higher data rates. Capacitance of 12.5pF per foot allows for longer transmission lengths. Stranded tinned copper conductor. Color-coded cellular dielectric insulation. Polyester aluminum foil shield. Gray PVC jacket. 300V. rain wire. Applications: computer interconnects, EIA RS-232, RS-422, RS-449, CAD/CAM systems, and in areas where high levels of noise interference are anticipated. Temperature range: –20°C to +80°C. 100 Ohms. UL Type CM, AWM 2919, CSA PCC FT4. **Sold in spools of 1000′.**

MULTIPAIR FOIL-SHIELDED DATA CABLE

2471, 2472, 2473

2463C, 2466C, 2467C

Stranded tinned copper conductor with color-coded high density polyethylene insulation, except **types 2463C, 2466C,** and **2467C** which have polypropylene insulation. Aluminum/polyester tape shield. Stranded tinned copper drain wire. Gray PVC jacket. Applications include audio, pulse, or RF signal transmission; computer or electronic peripheral interconnectors in areas of high noise interference. **Types 2463C, 2466C,** and **2467C** have pairs cabled on common axis. **Types 2463C** and **2466C** have common drain wire. **Types 2463C, 2466C,** and **2467C** are CM rated, 75°C, 300V, CSA PCC FT4.

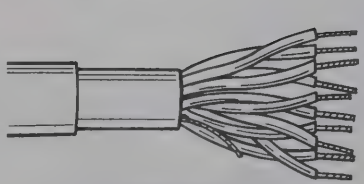
FOIL-SHIELDED PLENUM-RATED PAIRED AND MULTICONDUCTOR CABLE

- **UL Standard 13, Type CL2P**
- **Plenum Applications without Conduit**
- **NEC 725-38(b) (3), UL Listed as Class 2 Power Limited Circuit Cable**
- **Passes UL 910 Flame Test**
- **CSA PLC FT6**



58401-58144

Plenum-rated cable has stranded bare copper conductors, with fluorocopolymer .006″ thick insulation. Shielding is constructed of aluminum/polyester foil. Drain wire is stranded tinned copper. Maximum operating temperature: +125°C. Rated 150 volts. UL listed. Applications include remote control & intercom systems, burglar arlarms, cash registers, and other low voltage systems. **Sold in spools of 1000′.**

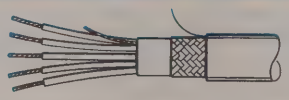
XTRA-GUARD® 1 CABLE

300-VOLT MULTICONDUCTOR SUPRASHIELDED™ COMMUNICATION AND CONTROL CABLE

UL CSA OSHA VW-1



- Rated 300 Volts, CM Rated
- Premium PVC Insulation Passes UL VW-1
- For FCC Docket 20780 Applications

Features aluminum/polyester/aluminum foil shielding with drain wire and overall braid tinned copper. Temperature range: –20°C to +80°C. UL Type CM, AWM style 2464, CSA PCC FT4. OSHA acceptable. Color: gray. Also available in 1000′ spools.

24 AWG 7/32, 0.010″ INSULATION THICKNESS

XTRA-GUARD® HIGH PERFORMANCE CABLE

GENERAL-PURPOSE CABLE WITH PREMIUM GRADE PVC JACKET

XTRA•GUARD® 1

General-purpose cable for internal or external wiring of OEM equipment. Features: fully color-coded tinned copper conductors, premium grade PVC insulation and jacket, flame and moisture resistance, and fast, easy stripping of insulation and jacket. Applications: EIA RS 232C interface, high technology applications in controlled environments, medical electronics, point-of-sale equipment, computer peripherals, and industrial process controls. Available unshielded, aluminum foil shielded, or SUPRASHIELD™ for extra protection. *To order, see following pages.*

INDUSTRIAL-STRENGTH CABLE WITH RUGGED POLYURETHANE JACKET

XTRA•GUARD® 2

Heavy-duty cable with PVC-insulated conductors and rugged polyurethane jacketing resists most oils, chemicals, fuels, solvents, mechanical abuse, and abrasion. Applications: CNC machine centers, automotive assembly plant operations, military ground support systems, packaging machinery, petrochemical plant operations, and geophysical exploration equipment. Available unshielded, aluminum foil shielded, or SUPRASHIELD™ for extra protection. UL recognized, CSA certified. Made to order; *contact your local Newark sales office.*

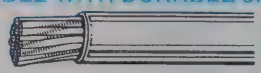
(6209) (ne09294)

OUTDOOR DIRECT-BURIAL CABLE WITH DURABLE JACKET

XTRA•GUARD® 3



Cable features PVC-insulated conductors and UV-stabilized ethylene propylene copolymer jacketing, which withstands direct burial in any outdoor installation without using costly conduit. Applications: inter-building communications, satellite communications equipment, land irrigation systems, outdoor security systems, outdoor scoreboards and displays, and pipeline sensor controls. Available unshielded, aluminum foil shielded, or SUPRASHIELD™ for extra protection. Made to order; *contact your local Newark sales office.*

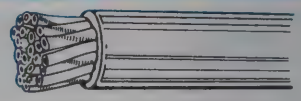
HIGH/LOW TEMPERATURE CABLE WITH TPE JACKET

XTRA•GUARD® 4



Cable features fully color-coded TPE (thermoplastic elastomer) insulated conductors and TPE jacketing for protection from –60°C to +125°C. Resists oils, fuels, solvents, and water. Rated UL Type TC (600V) and UL Type PLTC (300V) for cable tray applications; Pennsylvania Bureau Deep Mine Safety Approved (P-MWMS-1-85) for mine-wide monitoring systems. Applications: wood/paper/pulp plant operations, mining instruments and controls, mass transit systems, military electronic applications, food and beverage plants, petrochemical process controls, and arctic pipeline controls. Available unshielded, aluminum foil shielded, or SUPRASHIELD™ for extra protection. Made to order; *contact your local Newark sales office.*

HIGH-TEMPERATURE CABLE WITH CHEMICAL-RESISTANT FEP TEFLON® JACKET

XTRA•GUARD® 5

For unusually demanding applications. Resists any known chemical at room temperature and provides exceptionally high resistance at high temperatures. Also provides excellent abrasion and impact resistance. Low friction coefficient makes installation easy for an application. Temperature range: –80°C to +200°C. Applications: military electronic applications; steel, glass, and metal foundries; mining instruments and controls; food and beverage plants; clean room environments; and refinery cracker unit controls. Available unshielded, aluminum foil shielded, or SUPRASHIELD™ for extra protection. Made to order; *contact your local Newark sales office.*

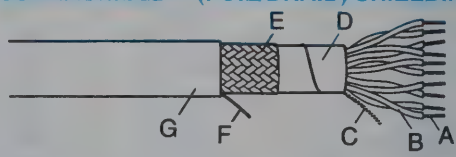
SUPRASHIELD™ (FOIL/BRAID) SHIELDING



LEGEND:

A. Conductor
B. Insulation
C. Drain Wire
D. Triple-Laminate Foil Shield
E. Braided Shield
F. Rip Cord
G. Jacket

- **FCC Docket 20780 Applications**
- **Ease of Termination with Use of Stranded Tinned Copper Drain Wire**
- **High-Frequency Interference Applications**
- **High Physical Strength**

SUPRASHIELD™ (foil/braid) Shielding System consists of a unique triple-laminate tape. An aluminum/polyester/aluminum tape is bonded in one layer with a 25% overlap and in contact with a stranded tinned copper drain wire equal in size to the insulated cable conductors. A 70% coverage tinned copper braid shield is applied overall.

XTRA-GUARD 1 FEATURES:

- PREMIUM-GRADE PVC JACKET FOR EXTENDED CABLE LIFE
- FLAME AND MOISTURE-RESISTANT
- FAST, EASY STRIPPING OF INSULATION AND JACKET
- FLEXIBLE CABLE ROUTING REQUIREMENTS
- UL RECOGNIZED AND UL LISTED

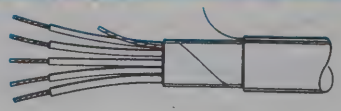
XTRA-GUARD 1 APPLICATIONS:

- HIGH TECHNOLOGY APPLICATIONS IN CONTROLLED ENVIRONMENTS
- MEDICAL ELECTRONICS
- POINT-OF-SALE EQUIPMENT
- COMPUTER PERIPHERALS
- INDUSTRIAL PROCESS CONTROLS

(6207) (ne08240a)

XTRA-GUARD® 1 MULTICONDUCTOR CABLE

300-VOLT MULTICONDUCTOR FOIL SHIELD CABLE



- **For Communication and Control Applications**

Features stranded tin-coated copper conductor. Operating temperature: -20°C to 80°C AWM (18 and 16 AWG operating temperature is -20°C to 75° CM) premium PVC insulation, and aluminum/polyester shield, with foil facing in plus stranded tin-copper drain wire equal in size to conductors. Cable styles UL type CM, AWM 2464 and CSA PCC FT4. Standard color: gray. 1000′ spools and black color are available through special order; *contact your local Newark sales office.*

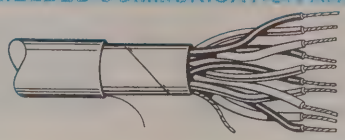
XTRA-GUARD® 1 MULTIPAIR CABLE

MULTIPAIR FOIL SHIELDED COMMUNICATION AND CONTROL CABLE



Stranded tin-coated copper conductors. 80°C premium PVC insulation and aluminum/polyester foil shield facing in. Stranded, tinned copper drain wire. Rated 300V. Jacket thickness: 0.032″. UL type CM, AWM 2464 and CSA PCC FT4. Also available in 1000′ spools.

24 AWG, 7/32 STRAND, 0.010″ INSULATION THICKNESS

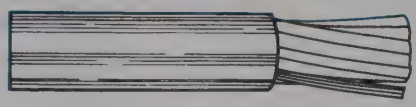
FLEXIBLE CONTROL CABLE

XTRA-GUARD® MULTICONDUCTOR FLEXIBLE CONTROL CABLE

Shielded



Unshielded

Multipurpose oil-resistant flexible control cable offers 3 times the flexibility of ordinary PVC cable and provides outstanding oil and chemical resistance. Designed for applications requiring increased flexibility, including: machine tools, CNC machine centers, data processing equipment, automation equipment and material handling equipment. Finely stranded bare copper conductors. Shielded versions have tinned copper braid shielding (85% coverage). Bend radius: 5x cable diameter (unshielded) and 8x cable diameter (shielded). Color code: numerically numbered black conductors with one green/yellow conductor on outside layer. Jacket: oil-resistant PVC. Jacket color: gray. Insulation thickness: 0.022″. Jacket thickness: 0.030″. Voltage rating: 600V. Operating temperature: –5°C to +90°C. UL recognized AWM style 2587, CSA certified AWM I A/B II A/B FT1.

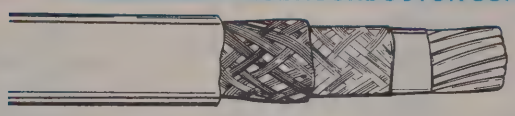
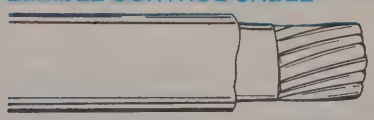
SUPER-FLEXIBLE CONTROL CABLE

XTRA-GUARD® MULTICONDUCTOR SUPER-FLEXIBLE CONTROL CABLE



Shielded



Unshielded

Continuous-use, heavy-duty control cable offers 2 times the flexibility of ordinary PVC cable and provides extra flexibility and durability for continuous motion. Super finely stranded bare copper conductors. Shielded versions have tinned copper braid shielding (85% coverage). Bend radius: 8x cable diameter (unshielded) and 10x cable diameter (shielded). Color code: numbered red conductors with one green/yellow conductor on outside layer. Jacket: oil-resistant PVC. Jacket color: black. Insulation thickness: 0.022″. Voltage rating: 600V. Operating temperature: –5°C to +90°C. UL recognized, CSA certified.

14 AWG, 266/38 STRANDED—SHIELDED

CATV COAXIAL CABLE

Solid copper covered steel center conductor. Foam Polyethylene dielectric. Black polyvinyl chloride jacket. Aluminum braid shield. UL types CL2 and CATV. Temperature range: –20°C to +75°C. Nominal impedance: 75 ohms, except **type 9833**: 80 ohms. **Types 9831** and **9832** have an aluminum/mylar/aluminum fusible tape inner shield. **Types 9833** and **9834** have an aluminum/mylar/aluminum non-fusible tape inner shield. Nominal capacitance: **type 9831**, 16.2 pF/ft; **type 9832**, 18.0 pF/ft.; **type 9833**, 17.0 pF/ft.; **type 9834**, 17.3 pF/ft. **Sold in spools of 1000′.**

TEFLON DIELECTRIC COAXIAL CABLE

Conductors are silver-plated copperweld. Operating temperature: –20°C to +200°C. Suitable for various commercial and industrial applications. All cable listed in table below have 30 AWG 7/38 stranded conductors, except **type 9188A** which has 25 AWG 7/0.006 stranded conductors. 500′ spools are also available; *contact your local Newark sales office.*

PLENUM-RATED COAXIAL CABLE

- **UL Standard 13, Type CL2P**
- **Plenum-Rated for Use without Conduit**
- **NEC 725-38(b) 3, UL Listed as Class 2 Power Limited Circuit Cable**
- **Passes UL 910 Flame Test**

Suitable for data, video and RF signal transmission. Use for precise transmission of quick pulse signals and short or long haul signal transmission. Construction for indoor and outdoor installations. Voltage rating 150V. Suggested operating temperature, –55°C to +125°C. **Sold in spools of 1000′.**

FLAT CABLE

GRAY FLAT CABLE 0.050″ (1.27) CENTERS

3580

- **For Use with Insulation Displacement Connectors**

Combining economy with reliable performance, this cable is designed for PC board-to-PC board interconnections where space is a premium; flexible interconnects within computer and business machine cabinets and areas where flexibility is needed, such as drawer-enclosed electronic circuitry. 28 AWG, 7/36 stranded tinned copper conductors. Gray PVC insulation has red stripe on leading edge. Rated 105°C 300V. Capacitance: 14 pF/ft. nominal at 1MHz. Impedance: 105 ohm nominal. Resists acids, alkalis, oil, moisture, solvents, ozone, and fungus. Passes VW-1 vertical wire flame test (UL listed internal only). UL recognized style 2651. **Sold in spools of 100′.**

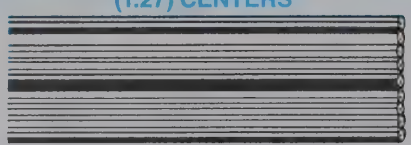
THERMALLY BONDED COLOR-CODED FLAT CABLE 0.050″ (1.27) CENTERS



3583

- **For Use with Insulation Displacement Connectors**

Designed for termination flexibility. Applications: PC board-to-PC board interconnections where space is a premium; flexible interconnects within computer and business machine cabinets; flexible connections such as a drawer-enclosed electronic circuitry. 28 AWG, 7/36 stranded tinned copper conductors. 0.010″ (0.254) nominal wall PVC insulation. Color code: brown, red, orange, yellow, green, blue, violet, gray, white, and black (colors repeat). Rated 105°C 300V. Capacitance: 14 pF/ft. nominal at 1MHz. Impedance: 105 ohms nominal. Resists acids, alkalis, oil, moisture, solvents, ozone, and fungus. Maximum thickness: 0.035″ (0.889). Passes VW-1 vertical wire flame test. UL recognized style 20029. **Sold in spools of 100′.**

GRAY FLAT CABLE 0.025″(0.635) CENTERS

3582

- **For Use with Insulation Displacement Connectors**

For easy termination to 0.025″(0.635) IDCs where space reduction is critical. Economical alternative to fluorocarbon transmission cables and for surface-mounted connectors with reduced contact spacing. 30 AWG solid bare copper conductors. Gray PVC insulation has red stripe on leading edge. Rated 105°C 150V. Capacitance: 20 pF/ft. nominal at 1MHz. Impedance: 75 ohms. Maximum thickness 0.025″(0.635). Passes VW-1 vertical wire flame test. UL recognized style 2678. **Sold in spools of 100′.**

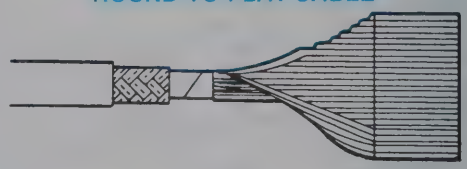
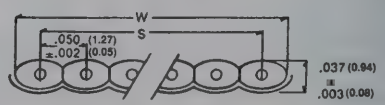
ROUND-TO-FLAT CABLE



3585



0.050″(1.27) center cable for routing in cramped spaces where flat cable is required and round shape is more workable. Jacketed cable features a dual shield of aluminum/polyester tape and a 90% coverage of tinned copper braid shield. Blends mass termination and ease of installation flexibility of round cable. Dual shield meets FCC regulations for EMI/RFI suppression. 28 AWG, 7/36 stranded conductor; 0.75″(19.05) termination area occurs every 1.5″(38.10). Rated 300V, –20°C to +105°C temperature rating. Capacitance: 24 pF/ft. nominal at 1MHz. Impedance: 70 ohms nominal. Inductance: 0.15H/ft. at 1MHz nominal. Passes CL2 flame test. UL recognized style: 2651 inner, 20381 cabled. **Sold in spools of 100′.**

HOOK-UP WIRE

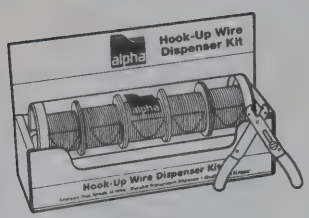
HOOK-UP WIRE KITS



HU-KIT

Alpha's hook-up wire kits feature a unique, convenient wire dispensing system. Kits include five spools of hook-up wire suitable for military or UL/CSA applications. Each kit contains five spools of hook-up wire in a unique, portable dispenser rack. The system keeps hook-up wire neat, clean and conveniently available. Can be mounted on a bench or wall or used as a tote for portability. Kits include cut and strip tool and use standard Alpha hook-up wire spools when refills are required.

KIT CONTENTS

Assorted colors (white, black, red, green, and blue) of stranded hook-up wire. Also contains 1 cut and strip tool.

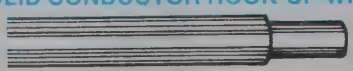
SOLID CONDUCTOR HOOK-UP WIRE



- Color-Coded PVC Insulation
- Solid Tinned Copper Conductor
- UL Regognized, CSA Certified

Ideal for R&D and MRO applications. Voltage: 300V. Insulation thickness: 0.016″. Stocked in colors 1-10; *see color chart on page 1211.* Passes UL VW-1 Vertical Wire Flame Test. UL AWM styles 1007 (–40°C to +80°C) and 1569 (–40°C to +105°C), CSA TR-64 (–40°C to +90°C). UL recognized, CSA certified.

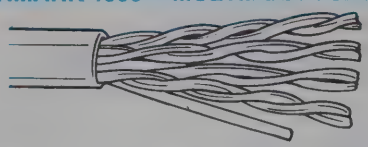
NETWORK CABLE

LANMARK-1000™ MULTIMEDIA CABLE

NEW



Designed to meet the stringent cable performance demands of future applications which utilize full duplex operation over four twisted pairs. Comprised of ANSI/TIA/EIA568-A Category 5 compliant cable specified and tested to 500MHz. Applications include full and half duplex operation, digital video, broadband and baseband analog video, 1000Base T, 622Mb/ps ATM, 155Mb/s ATM, 100Base Tx, IEEE 802.3, IEEE 802.5, and 100Mb/s TPPMD. Unshielded, 24 AWG solid bare copper wires. **Sold in spoolsof 1000′.**

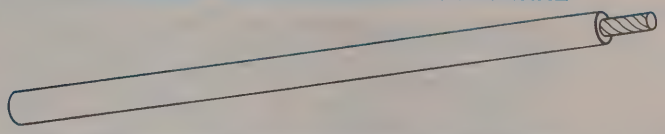
HIGH-VOLTAGE WIRE

U.L. 3239 HIGH-VOLTAGE SILICONE WIRE

VW-1



Rowe's **U.L. 3239** style high-voltage silicone lead wire uses Rowe compound R800. This compound was especially developed for high abrasion resistance requirements and also exhibits excellent dielectric capability in extreme environments.Can be used in power supplies, electronic equipment, and other applications requiring high abrasion, voltage, and flame resistance, while maintaining flexibility. Silicone insulation, corona-resistant, temperature rating: –40°C to +150°C, voltage rating: 50kVDC. Tin-plated copper conductor, flame retardant. Can be autoclaved. Passes UL VW-1 vertical wire flame test. UL recognized. Color: white. Other colors available; *contact your local Newark sales office.*

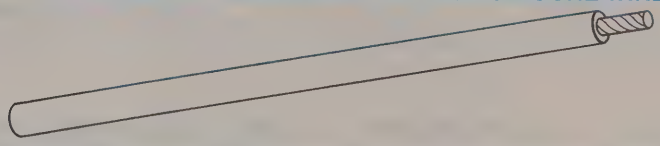
TYPE R790 SUPER TOUGH HIGH-VOLTAGE SILICONE WIRE



Type R790 super tough high-voltage silicone lead wire uses Rowe silicone compound R790. This compound was specially developed for high abrasion resistant requirements and also exhibits excellent dielectric capabilities in extreme environments. Used in military, space, and industrial areas. Temperature rating: –40°C to +200°C, voltage rating: 2 thru 60 kVDC. Silver-plated copper conductors, silicone insulation, corona-resistant, and high flexibility. Can be autoclaved Meets or exceeds MIL-W-16878 specifications. Can be used in military, aerospace, and industrial applications requiring high abrasion and voltage resistance while maintaining flexibility. Color: white. Other colors available, *contact your local Newark sales office.*

HIGH-TEMPERATURE TAPE

Self-adhering and self-fusing, it cures at room temperature. Extruded of high-performance silicone rubber, its high thermal conductivity permits rapid heat dissipation. Useful wherever a tough, high-temperature (to 260°C), permanently resilient insulation or seal is required. Provides a moisture-free seal around tubes and wire harness bundles. Dielectric strength, (min.): 400 v/mil.

CATEGORY 5 CABLE

ADVANCE NET™ 500 CATEGORY 6 ENHANCED UTP CABLE

24 AWG, 4 pair, unshielded twisted pair (UTP) for use in horizontal cabling systems as described in TIA/EIA 568-A. This cable exceeds Category 5 electrical characteristics and *meets the proposed TIA/EIA 568-A Category 6 DRAFT and proposed IEC 11801 Category 6.* Supported applications: IEEE 802.5.4 and 16 Mbps TOKEN RING, 10BASE-T, 100BASE-T, 100 VG-ANYLAN, TPDDI, CDDI, TP-PMD, ATM AT 155Mbps, 550 MHz BROADBAND VIDEO AND STANDARDS UNDER DEVELOPMENT such as IEEE 802.3ab GIGABIT ETHERNET (100BASE-T) and ATM AT 622Mbps, 1.2 AND 2.4 Gbps. Non-Plenum cable has thermoplastic insulation and jacket rated for use as a vertical run in a shaft and for general purpose communications in accordance with NEC Article 800; UL (USA) & cUL (CSA) Listed for Riser application by passing UL 1666 Riser Cable Flammability Test. Plenum cable has FEP Teflon® insulation and Thermoplem™ jacket rated for use in air handling ducts and spaces in accordance with NEC Article 800; UL (USA) & cUL (CSA) Listed for Plenum application by passing UL 910 (Steiner Tunnel) Test. **Sold in spools of 1000′**. Other colors and spool sizes are available; *contact your local Newark sales office.*

MEGALAN™ 400 CATEGORY 5 ENHANCED UTP CABLE

User-friendly Category 5 cable has enhanced performance parameters. Tested for parameters not yet specified for 4 pair UTP in TIA/EIA 568-A such as skew, PS-NEXT, and ACR. Verified to 400MHz with stable transmission performance. Suitable for CIM, real-time imaging, holograms and virtual reality. 10dB minimum ACR @ 155MHz; proven support for 155Mbps ATM, 100 Mbps TP-PMD; 6dB minimum improvement in near end crosstalk versus standard category 5; 0.10 ns/meter maximum skew tightly controlled propagation delay. 100 ohms. 14pF/ft. Solid bare copper conductors. Non-plenum cable has thermoplastic dielectric with PVC jacket; plenum has Thermoplen™ dielectric and Thermoplen™ jacket. Exceeds TIA/EIA 568-A requirements. UL listed, CSA certified. Non-plenum cable is NEC type CMR and MPR; plenum is NEC type CMP and MPP. **Sold in spools of 1000′**. Other colors and spool sizes are available; *contact your local Newark sales office.*

CATEGORY 5 CABLE

Category 5 cable features twisted pair flexibility. Compatible with Category 5 modular plugs. Verified to 100MHz. Excellent crosstalk and attenuation characteristics. 100 ohms nominal. 24 AWG solid bare copper conductors. Non-plenum cable has thermoplastic insulation with PVC jacket; plenum has Thermoplen™ insulation and jacket. Color: gray or white. Shielded versions have overall aluminum with drain. Exceeds TIA/EIA 568-A requirements. UL listed. Non-plenum cable is NEC type CMR and MPR; plenum is NEC type CMP and MPP. **Sold in spools of 1000′**. Other colors and spool sizes are available; *contact your local Newark sales office.*

UTP CATEGORY 5 PATCH CABLE

Features 24 AWG, 7/32 stranded copper conductors for twisted pair flexibility. Compatible with Category 5 modular plugs. Excellent crosstalk and attenuation characteristics. OEM tested and approved. Thermoplastic insulation. PVC jacket. Tested to 100MHz. Exceeds TIA/EIA 568-A requirements. UL listed type CM, CSA certified PCC FT4. Other colors are available; *contact your local Newark sales office.* **Sold in spools of 1000′**.

MULTIPAIR INDIVIDUAL SHIELDED PAIRS POWER-LIMITED CIRCUIT CABLE

Stranded tinned copper conductors, insulated with color-coded PVC. Shield: Alumylar™ shield over each pair with 22 AWG stranded tinned copper drain wire. PVC jacket with temperature range from –20°C to 105°C. Voltage rating: 300V. Suitable as tray cable for Class II and III circuits and ideal for telecommunication applications. UL subject 13, Power-Limited Circuit Cable. UL 70,000 BTU Flame and Tray Test. Meets NEC Article 725, 105°C, 300V. UL Style 2464, 80°C-300V. Passes VW-1 vertical wire flame test. CSA TR-64 Approval. OSHA Acceptable.

HIGH-TEMPERATURE WIRE AND CABLE

TEFLON®, HIGH-TEMPERATURE, MULTICONDUCTOR, SHIELDED CABLE

62403-61604

Suitable for ground support and interconnect applications. Conductors are stranded silver-plated copper, "Type E" extruded, color-coded, TFE Teflon® (0.010" wall thickness). Braided silver-plated copper shield, 90% coverage. White TFE Teflon® jacket, wrapped and sintered. Voltage: 600V. Temperature: –65°C to +200°C.

TGGT HIGH-TEMP LEAD WIRE 250°C

Nickel-plated copper conductors with TFE Teflon® tapes followed by double glass backed ceramic tapes. Treated glass braid overall. Voltage rating: 600 volts. Temperature range: 250°C continuous. Built to withstand repeated flexing and severe mechanical abuse. Moisture resistant and chemically inert. Color: tan. UL recognized, CSA certified.

TEFLON® HIGH-TEMPERATURE HOOK-UP WIRE

Suitable for high-frequency use at elevated temperatures in high-reliability programs where electrical and thermal stability are important. It provides excellent solder-iron resistance. Weighs less than other insulation types. Passes VW-1 Vertical Flame Test. OSHA.

TYPE E, TFE TEFLON® 200°C, 600V, MIL-W-16878E/4

Stranded silver-plated copper. Colors 0-9 available for 22-14 AWG; colors 0, 2, 5, 9 available for 12-10 AWG. *Contact your local Newark sales office to order.*

MIL-W-22759 TEFZEL™ HOOK-UP WIRE

Wire is designed for aerospace applications where light weight, tight tolerance, and excellent mechanical toughness are required. This insulation offers exceptional radiation and chemical resistance. Stranded tinned copper conductors. Temperature range: –55°C to +150°C, 600V. Available in black, red, green, and blue; *see color chart below.*

WIRE

APPLIANCE AND FIXTURE WIRE

Stranded tinned copper conductors, insulated with extruded silicone rubber. Voltage rating: 600 volts. Temperature range: 150°C. Braidless silicone is easy to strip, and has excellent physical strength and mechanical properties. Ideal for internal wiring of applicances such as stoves, dryers, motors, and electronic devices where high temperatures are incurred. UL recognized. UL Style 3212. Color: black.

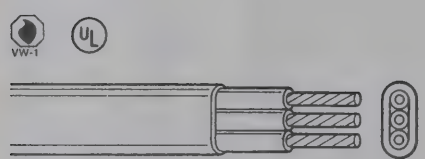
PREMIER FLAT MARINE AND POWER CABLE



PFM1603-PFM1003

Contains annealed tinned copper corrosion-resistant conductors and type 3 marine stranding for longer life. Ideal for power cable applications. 3 conductors. White flame-retardant VW-1 rated polyvinylchloride jacket: 105°C, 600VAC. UL listed standard 1426 boat cable. ABYC approved. **Sold in spools of 100′.**

THHN BUILDING WIRE

Stranded bare copper conductor. 18 AWG and 16 AWG are type TFFN. Specifically designed for use in wet locations and is resistant to oils, gasoline, water, acids, alkalies, ozone,sunlight and abrasion. For use in general purpose building wire, fixture, conduit and tubing raceways, internal wiring of fixtures, and applications requiring building wire, machine tool or applicance wiring. UL listed. Color listed is black. Color codes 0-9 available on 18 through 10 AWG. *Contact your local Newark sales office.* **Sold in spools of 500′.**

SOUND AND BRAIDED COPPER CABLE

BRAIDED TINNED COPPER SHIELD SOUND AND INTERCOM CABLE

Stranded tinned copper conductors. Conductors are twisted and shielded with a tinned copper braid. Temp. range: –20°C to +60°C. Ideal for all types of public address or sound work, recording studios, and other types of audio circuits requiring shielding. 350V working voltage. Gray PVC jacket, nominal 0.020″ thickness.

BRAIDED COPPER CABLE

TUBULAR CABLE

Woven tinned copper braid meets MIL-Spec QQ-B-575. The braid is self supporting, maintaining its round shape, and offer excellent coverage. Typical applications include military as well as offering maximum shielding against electrostatic interference for wires and cables, and as a protective covering against mechanical abrasion and stress. Offers 95% coverage when placed over equivalent diameter. **Sold in spools of 100′.**

FLAT CABLE

Woven tinned copper braid meets MIL-Spec QQ-W-343 Type S, and ASTM-B-33. Used as a high-current conductor at low voltages due to the high current-carrying capacity and extreme flexibility. Typical applications include batter grounding or bonding strap in vehicles and aircraft to help eliminate ignition interference. **Sold in spools of 100′.**

DATA AND CONTROL CABLE

OLFLEX® 190 CONTROL CABLE

Olflex® 190 multiconductor, oil-resistant, flexible control cable has a compact design that permits easier installation in confined operating areas. PVC jacket provides optimum resistance to mineral oils, synthetic oils, and water-based coolants. Designed for use in all electrical equipment in dry, damp, and wet conditions. For use in machine tools, assembly lines, control systems, data processing equipment, connections between control panels and machines, CNC machining centers, grinding machines, and bottling equipment. Temperature range: –40°C to +90°C. Minimum bending radius: 15x cable diameter. Rated voltage: 600V. Test voltage: 3000V. Insulation resistance: 20MΩ × km. Color code: black with white numbers, plus green/yellow ground. UL recognized AWM 90°C for PVC jacket, 80°C for PUR jacket. CSA certified AWM 11 A/B FT1, 90°C for PVC jacket, 80°C for PUR jacket. **Sold per foot in made-to-order spool sizes.**

OLFLEX-FD® 890 CONTROL CABLE

Olflex-FD® 890 is designed for continuous flex applications. Unique cabling techniques and specially formulated jacketing compounds increase flex life and provide optimum resistance to mineral oils, synthetic oils, and water-based coolants. Temperature range: –40°C to +90°C. Minimum bending radius: 8x cable diameter. Rated voltage: 600V, Test voltage: 3000V. Insulation resistance: 20MΩ x km. Color code: red with black numbers plus green/yellow ground. UL recognized AWM 90°C for PVC jacket, 80°C for PUR jacket. CSA certified AWM 11 A/B FT1, 90°C for PVC jacket, 80°C for PUR jacket. **Sold per foot in made-to-order spool sizes.**

UNITRONIC-FD® 890 DATA TRANSMISSION CABLE

Unitronic-FD® 890 data transmission cable is designed for automated production processes requiring increased flex life aspects and durability. Special assembly techniques make this cable suitable for use in mechanically controlled production machine tools. PVC jacket is resistant to mineral oils, synthetic oils, and water-based coolants. Temperature range: –5°C to +90°C. Minimum bending radius: 10x cable diameter. Rated voltage: 300V. Test voltage: 1500V. Insulation resistance: 20MΩ x km. Color code: DIN 47100. UL recognized AWM 90°C for PVC jacket, 80°C for PUR jacket. CSA certified AWM 11 A/B FT1, 90°C for PVC jacket, 80°C for PUR jacket. **Sold per foot in made-to-order spool sizes.**

UNITRONIC®-190CY SHIELDED SIGNAL & CONTROL CABLE

Flexible multiconductor cable is designed for use with computers, data transmission, office equipment, process control and instrumentation. Overall foil/tinned copper braid shield is recommended when electrical interference distorts signal transmission or when EMI emissions need to be suppressed. Constructed of finely stranded copper conductors, SR-PVC insulation, talc, nonwicking fillers, overall foil tape wrap, drain wire, tinned copper braid (85% coverage), and gray PVC jacket. Color coded. Jacket wall: 0.040″. Rated voltage: 300V. Test voltage: 2000V. Rated temperature: –10°C to +105°C. UL recognized AWM, CSA certified AWM II A/B FT1. **Sold per foot in made-to-order spool sizes.**

OLFLEX®-490P CONTROL CABLE

OLFLEX®-490P is a multiconductor, flexible control cable. Constructed of finely stranded tinned copper conductors, blended PVC insulation, nonwicking fillers, talc, overall textile wrap, and oil- and abrasion-resistant polyurethane jacket. Jacket wall: 0.053″. Rated voltage: 600V. Test voltage: 3000V. Rated temperature: –10°C to +80°C. UL recognized AWM, CSA certified AWM II A/B FT1. **Sold per foot in made-to-order spool sizes.**

VARIABLE FREQUENCY DRIVE CABLE

VFD

Type VFD cable is for use on variable speed drives that are subject to nonlinear power distortions. Can withstand all of the voltage spikes, harmonics, and power distortions that a variable speed drive can generate. Working voltage: 1000VAC (3000VAC peak). Temperature range: –25°C to +90°C. Passes VW-1 vertical wire flame test. UL listed. **Sold in spool of 500′.**

BLUEFLEX™ TWINAXIAL CABLE

3649FD

Blue jacketed twinaxial cable is designed for precise data transmission in high-speed continuous flex applications and is well suited for harsh environments. Minimum bending radius: 12x cable diameter. Voltage: 300V. Impedance: 78 ohms. Temperature range: –20°C to +80°C. UL recognized. **Sold in spools of 500′.**

(14839) (ne09862)

HARMONIZED EUROPEAN CORDAGE

Type H05VV-F is a flexible harmonized cord for use in electronic and electrical equipment designed for export to European countries that adhere to CENELEC guidelines. Constructed of finely stranded bare copper conductors, PVC insulation, talc, and a black PVC jacket. Mininum bending radius: 5x cable diameter. Rated voltage: 300/500V. Temperature range: –30°C to +70°C. Number of conductors: 3. Conforms to the following standards: HD 21.1 S2, HD 21.2 S2, HD 21.3 S2, HD 308, 361, 383, 385, 402, 405.1; VDE 0100, 0281, 0293, 0295 class 5; IEC 227.1, 227.2, 227.5, 228, 304, 332.1, 540; BS 6500, BS 6360. CE compliant. **Sold per foot in made-to-order spool sizes.**

HEAVY-DUTY HARMONIZED EUROPEAN CORDAGE

Type H07RN-F is a flexible harmonized cord for use in electronic and electrical equipment designed for export to European countries that adhere to CENELEC guidelines. Constructed of finely stranded copper conductors, synthetic rubber insulation, talc, and a black heavy-duty neoprene jacket. Minimum bending radius: 10x outer diameter. Rated voltage: 300/500V. Temperature range: –25°C to +60°C. Number of conductors: 3. Conforms to the following standards: HD 22.4 S2, HD 308, 361, 383, 385, 402, 405.1, IEC 245.4, 228, 0295 class 5, 245, IEC 66, 304, 332-1, 540, 0282, BS 6360. CE compliant. **Sold per foot in made-to-order spool sizes.**

HARMONIZED EUROPEAN HOOK-UP WIRE

Type H07V-K harmonized hook-up wire is for use with electronic and electrical equipment designed for export to European countries that adhere to CENELEC guidelines. Constructed of finely stranded bare copper conductors (to VDE 0295) with PVC insulation. Size: 16 AWG (30/30) 1.5mm^2. Nominal outer diameter: 0.118″ (3.0). Rated voltage: 450/750V. Test voltage: 2500W. Temperature range: –30°C to +70°C. CE compliant. **Sold per foot in made-to-order spool sizes.**

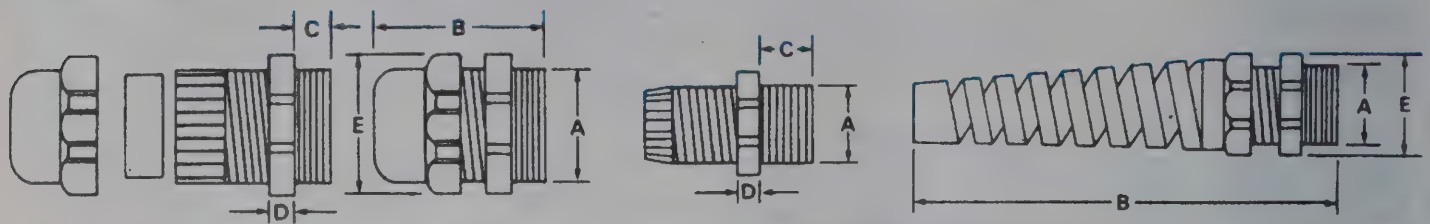
CABLE ACCESSORIES

SKINTOP® II LIQUIDTIGHT, NONMETALLIC, STRAIN RELIEF CORD CONNECTORS



Skintop® II is both a strain relief connector and a liquidtight seal. For use in panels, switches, control boxes, submersible pumps, appliances, and many machine tool applications. Vibration proof. Resistant to impact at low temperatures. Protection up to 70 psi. Rated temperature: –22°F to +212°F. Seal: IP 68 (comparable to NEMA 6). Material: nylon with neoprene bushing. UL listed, CSA certified, VDE approved, SEV approved. *Contact your local Newark sales office for diameter and thread pitch dimensions for PG type Skintop® II.*

MULTICONDUCTOR CABLE

MULTICONDUCTOR UNSHIELDED COMMUNICATION AND CONTROL CABLE

Features stranded tinned copper conductors with premium grade color-coded S-R PVC insulation. Jacket: PVC, gray. Applications include public address systems, intercoms, internal telephones, and remote control circuits. Suitable for EIA RS-232 applications. Passes VW-1 vertical wire flame test. UL recognized Style 2464 (80°C, 300V), CSA certified. NEC Type CM, CSA PCC. Made in the U.S.A.

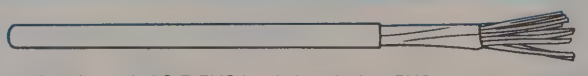
MULTICONDUCTOR FOIL SHIELDED COMPUTER CABLE



Features stranded tinned copper conductors with premium grade color-coded S-R PVC insulation. Jacket: PVC, gray. Stranded tinned copper drain wire. Applications include computer interconnections, data transmissions, control circuits, and industrial equipment control. Suitable for EIA RS-232 applications. Passes VW-1 vertical wire flame test. UL recognized Style 2464 (80°C, 300V), CSA certified. Made in the U.S.A.

HOOK-UP WIRE AND ACCESSORIES

DUAL-RATED UL STYLES 1007 (80°C) AND 1569 (105°C) HOOK-UP WIRE

OSHA VW-1 MADE IN USA

Features stranded tinned copper conductor with PVC insulation. Insulation thickness: 0.016″. Voltage rating: 300V. For internal wiring of appliances or electronic/electrical equipment not subjected to movement or mechanical damage. Passes VW-1 vertical wire flame test. UL recognized, CSA certified, OSHA compliant. Made in the U.S.A.

MADE IN USA

WIRE SPOOL RACKS

Heavy-duty wire spool racks offer a convenient way of storing and dispensing wire. Prime cold-rolled steel ⅝″ diameter rods with interlocking construction accommodate wire spools up to 10″ in diameter. Finish: gray baked enamel. For use in stockrooms, maintenance, and other industrial applications. Made in the U.S.A.

POLYOLEFIN HEAT-SHRINK TUBING

FPS SERIES (2:1) SHRINK RATIO GENERAL-PURPOSE FLEXIBLE POLYOLEFIN HEAT-SHRINK TUBING

Resistant to fungus/chemicals. Split-resistant, mechanically-tough. Easily marked and resists cold flow. Used as electrical insulation over cable splices and termination, lightweight harness covering, wire bundling, and fire-resistant covering. Operating temperature range: –55°C to +135°C. Minimum shrink temperature: 121°C (250°F). Color: black. Also available in green and clear. Blue, red and white available in some put-up sizes 3⁄32″ through ½″; *contact your local Newark sales office for details.* Meets MIL-I-23053/5, Class 1 and AMS 3636, AMS 3637 requirements. All colors except clear are UL recognized (file E52331), CSA certified (file LR382278M). **Sold in 100′ spools and boxes of 4′ and 6″ lengths.**

(6278) (de50702)

FPF SERIES (2:1) SHRINK RATIO FLAME-RETARDANT FLEXIBLE POLYOLEFIN HEAT-SHRINK TUBING

Offering same electrical, physical, and chemical qualities as the **FPS series,** the **FPF series** features superior flame resistance properties. For fire-resistant component coverings and flammable wire assemblies, as well as lightweight wire harness covering, wire marking, and wire bundling. Meets MIL-I-23053/5, Class 3 requirement. UL recognized VW-1, and CSA certified at 600V @ 125°C. Color: black. UL recognized (file E52331), CSA certified (file LR382278M). **Sold in boxes of 4′ and 6″ lengths.**

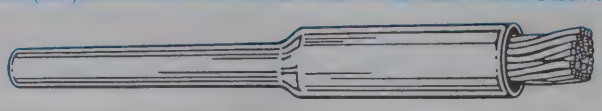
POLYOLEFIN HEAT-SHRINK TUBING

PHD SERIES (2:1) SHRINK RATIO ADHESIVE-LINED POLYOLEFIN HEAT-SHRINK TUBING



Made of flame-retardant polyolefin, **PHD series** is thin-walled with 2:1 shrink ratio. Features one-step, environmental protection for electronic, electrical, automotive, and marine wire splices, harness breakouts and strain reliefs. As tubing shrinks to skin-tight fit, melted adhesive covers substrate and solidifies to form permanent waterproof barrier. Has –55°C to +110°C operating range, 121°C (250°F) minimum shrink temperature, and –1 to +5% longitudinal change. Meets MIL-I-23053/4, Class 2 requirement. Color: black. **Sold in boxes of 4′ and 6″ lengths.**

SRS SERIES (2:1) SHRINK RATIO SEMI-RIGID POLYOLEFIN HEAT-SHRINK TUBING

Offering excellent electrical-insulation and resistance properties to fungus/chemicals, the **SRS series** features superior cut-through and abrasion resistance characteristics to enable optimum mechanical performance. Ideal for strain-relief application, wire marking, protective covering, packaging delicate components, and insulating mechanically weak or such susceptible points as solder joints, wire splices, and terminations. 2:1 uniform shrink ratio, ±5% longitudinal change, –55°C to +135°C operating range, and 135°C (275°F) min. shrink temperature. Cold-flow and split resistant, and marked easily. Meets MIL-I-23053/6, AMS 3638, and AMS 3639 requirements, and is UL recognized (file E52331) at 600V @ 125°C. Color: black. **Sold in boxes of 4′ and 6″ lengths.**

SRM SERIES (2.5:1) SHRINK RATIO SEMI-RIGID MULTIPLE WALL POLYOLEFIN HEAT-SHRINK TUBING

Co-extruded and selectively cross-linked to provide meltable inner wall enabling contact between underlying surfaces. For installations that may require rework, retrofit or repair in the field. **SRM series** offers the advantage of easy removability. Ideal for one-strip approach to jacketing, encapsulating, and environmental sealing of splices, terminations, and components. Capable of 2.5:1 shrink ratio, +1 to –10% longitudinal change, –55°C to +110°C operating temperature, and has +135°C (275°F) minimum shrink temperature. Meets MIL-I-23053/4, Class 1 and AMS 3634 requirements. **Sold in boxes of 4′ and 6″ lengths.**

HIGH RATIO, NEOPRENE AND KYNAR® TUBING

FPHS SERIES (3:1) SHRINK RATIO VERY FLEXIBLE POLYOLEFIN HEAT-SHRINK TUBING

FPHS series heat-shrink tubing is made of very flexible, thin wall polyolefin, which is mechanically tough and chemical resistant. It is also easily surface printed. Ideal for insulation of flexible wire bundles and for end-terminations where the tubing must slide over a connector. Offers a low shrink temperature of 100°C which can prevent damage to temperature-sensitive substrates. Meets MIL-I-23053/5 Class 1 requirements. UL recognized (file E52331). Color: black. **Sold in boxes of 4′ and 6″ lengths.**

TYPE PHS POLYOLEFIN (3:1) HIGH SHRINK RATIO ADHESIVE-LINED HEAT-SHRINK TUBING

Type PHS is a thin wall tubing offering the advantages of integral, multiple-wall construction. Flame-retardant, flexible polyolefin, lined with an internal layer of thermoplastic adhesive. Heat-shrinkable outer wall is radiation cross-linked, while the adhesive maintains high flow and excellent adhesion. Protects electronic components, wire splices, wire bundles, and harness breakouts. Rapidly shrinks to a skin-tight fit, forcing the melted adhesive to flow and cover the substrate. Upon cooling the adhesive solidifies, forming a permanent, non-drying, flexible and waterproof barrier. Minimum shrink temperature is 121°C (250°F). Specifications: Physical: Tensile strength of 2100 PSI, ultimate elongation of 5%, longitudinal change of –5%, secant modulus of 14,000 PSI. Electrical: dielectric strength of 500 V/mil, volume resistivity of 10^{12} ohm-cm. Chemical: corrosion-resistant, non-nutrient fungus-resistant, 0.3% water absorption. Excellent fluid resistance properties. Operating temperature range: –55° to +110°C with max. temp. (short period) of 250°C. Meets requirements of MIL-I-23053/4, Class 3 specifications. Color: black. UL recognized (file E165738). **Sold in boxes of 4′ and 6″ lengths.**

TYPE SHS SEMI-RIGID (4:1) HIGH SHRINK RATIO ADHESIVE-LINED HEAT-SHRINK TUBING

Type SHS is a medium-wall, semi-rigid, flame-retardant, flexible polyolefin tubing with an internal layer of thermoplastic adhesive. The adhesive has high flow and adhesion characteristics, forming a permanent, non-drying, flexible and waterproof barrier. Minimum shrink temperature: 121°C. Operating temperature range: –55°C (–67°F) to 110°C (230°F). Color: black. UL recognized (file E165738). **Sold in boxes of 4′ and 6″ lengths.**

KYS SERIES (2:1) SHRINK RATIO KYNAR® THIN-WALL HEAT-SHRINK TUBING

KYS series heat-shrink tubing made from semi-rigid, flame-retardent polyvinylidene fluoride. Meets MIL-I-23053/8, AMS3632 requirements. Thin wall and continuous operating temperature of +175°C. Operating temperature range: –55°C to +175°C. Minimum shrink temperature: 175°C (347°F). For VWH dielectric strength 900 V/mil. Color: clear. UL recognized (file E52331). **Sold in boxes of 4′ and 6″ lengths.**

NPS SERIES (2:1) SHRINK RATIO NEOPRENE THICK-WALL HEAT-SHRINK TUBING

Type NPS tubing provides superior cut-through and abrasion resistance. Excellent resistance to oils. Maintains flexibility at low temperature. Rated for continuous operation from –70°C (–94°)F to 121°C(250°F). Recommended for applications requiring a tough, highly flexible covering to operate in severe environmental conditions. Oil resistance properties make tubing ideal for auto, helicopter and construction equipment industries. It is particularly useful for fabrication and repair of flexible harnesses and wire bundles and for covering hydraulic couplings. Meets MIL-R-46846, Type I, Class 1; MIL-I-23053/1, Class 1, 2; AMS-3623. Color: black. **Sold in spools sizes indicated below.**

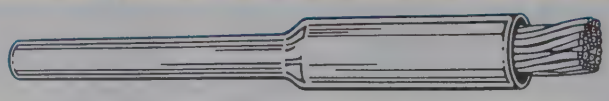
PVC HEAT-SHRINK TUBING

VOLTREX™ BRAND PVS SERIES (2:1) SHRINK RATIO NON-IRRADIATED PVC HEAT-SHRINK TUBING

VOLTREX™ brand MADE IN USA



PVS series is ideal for production insulation and jacketing of cable, bars, wire splices, and terminals. Resists most chemicals and oils as well as sunlight, fungus, and moisture. Operating temperature range: –20°C to +105°C. Minimum shrink temperature: 100°C (212°F). Maximum (short period) temperature: 118°C (244°F). When heated to temperatures exceeding 200°F, tubing shrinks to half its supplied diameter and less than 20% in length. All sizes through ½″ diameter are air spooled. Meets MIL-I-23053/2, ASTM D 922, MIL-I-631D, and AMS 3579 requirements. Marked in accordance with UL requirements. Color: black. UL recognized E52331. Made in the U.S.A. **Sold in spool sizes indicated.**

VOLTREX™ BRAND PVHR SERIES (2:1) SHRINK RATIO NON-IRRADIATED PVC HEAT-SHRINK TUBING

Offers excellent abrasion resistance and withstands most chemicals and oils as well as sunlight, moisture and fungus. Forms a smooth, tight fitting insulation for most applications with a high degree of flexibility. Shrinks quickly at temperatures below 200°F to provide dielectric and mechanical protection without damage to enclosed or adjacent components. MIL-I-23053/2 Class 1 and 2; L subject 224 VW-1, 105°C. Longitude shrinkage: approximately 5% allows ripple-free conformance around sharp bends as in appliance handles and bus bars. Operating temperature range: –20°C to +105°C. Minimum shrink temperature: 100°C (212°F). Maximum (short period) temperature: 118°C (275°F). Color: black. UL recognized E52331, CSA certified LR41513M5 M. Made in the U.S.A. **Sold in spool sizes indicated below.**

VOLTREX™ BRAND (2:1) SHRINK RATIO ADHESIVE-LINED NON-IRRADIATED PVC HEAT-SHRINK TUBING

Low-shrink temperature PVC tubing with inner adhesive liner that when heated melts, creating a moisture-resistant protective barrier that is ideal for splicing or strain relief applications. Tubing bonds with most substrate including PVC jacketed wire and cable which will not deteriorate over time. Ideal for production insulation, jacketed cable, bars, and terminals. Resists most chemicals and oils, as well as sunlight, fungus, and moisture. Recovered melt wall: 0.005″ nominal. Operating temperature range: –20°C to +105°C. Minimum operating shrink temperature: +100°C. Color: black. Made in the U.S.A. **Sold in spools of 25′ and 100′.**

VOLTREX™ BRAND (2:1) SHRINK RATIO ADHESIVE-LINED IRRADIATED PVC HEAT-SHRINK TUBING

UV resistant, irradiated PVC tubing with inner adhesive liner developed specifically to bond with most substrates, including PVC jacketed cable, to provide an impermeable seal. When heated, an adhesive lining melts, creating a moisture-resistant protective barrier that is ideal for splicing or strain relief applications. Performance comparable to polyolefin tubing in flammability, dielectric strength, oil resistance, tensile strength, and ultra-violet weatherability. Recovered melt wall: 0.005″ nominal. Operating temperature range: –20°C to +105°C. Minimum recommended shrink temperature: +105°C. Color: black. Made in the U.S.A. **Sold in spools of 25′ and 100′.**

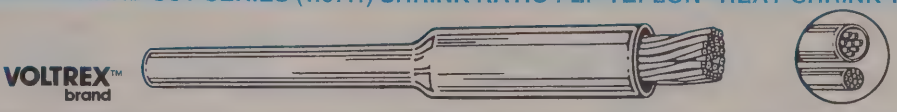
TEFLON® HEAT-SHRINK TUBING

VOLTREX™ BRAND SST SERIES (1.67:1) SHRINK RATIO FEP TEFLON® HEAT-SHRINK TUBING



Chemical and thermal characteristics of FEP (fluorinated ethylene propylene) Teflon®, an outstanding electrical insulator that offers resistance to many chemicals except molten alkali metals and fluorine. Has the ability to partially shrink at 150°F with complete recovery at 350°F. Use on soldering joints, parts, components, fittings of plastic, metal, and wood. Meets MIL-I-23053/11 specifications. Operating temperature range: –75°C to +200°C. Color: clear. **Sold in boxes of 2′ and 6″ lengths.**

VOLTREX™ BRAND HIGH (4:1) SHRINK RATIO PTFE TEFLON® SEMI-RIGID HEAT-SHRINK TUBING

PTFE (Polytetrafluoroethylene) Teflon® tubing is the most difficult of the four tubing materials to shrink because of the extreme shrink temperature. The most reliable way to shrink PTFE is in a controlled oven temperature. Extreme care must be exercised in heating PTFE tubing during the shrinking process. PTFE shrink tubing will become completely clear when it reaches the gel state. PTFE will completely recover to its specified size provided a slow cooling process is allowed. Shrink temperature: 625°F/327°C. Continuous use temperature range: –100°F to +500°F (–75°C to +250°C). Overheating will damage the tubing so do not heat above 700°F/327°C. Meets MIL-I-23053/12 Class 5, ATSM D2092 Type I, AMS3584. Color: natural. **Sold in boxes of 4′ and 6″ lengths.**

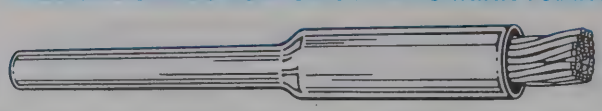
SPECIALTY HEAT-SHRINK TUBING

MEDICAL-GRADE NONTOXIC HEAT-SHRINK TUBING

NEW

VOLTREX™ brand



Flexible, nontoxic acrylic olefin heat-shrink tubing features superior dielectric properties that meet USP Class VI requirements. Unaffected by a wide range of chemicals, such as hexachlorophene (phisohex), saline solution, povidone-iodine (betandine), benzalkonium (zephiran), and alcohol, as well as moisture, sunlight, and fungi. Autoclavable for a variety of applications. Dielectric strength: 1800/2000vpm in air @ 500kV/min. rise. Tensile strength: 3200/3600 psi. Recommended shrink temperature: 121°C. Operating temperature range: -55°C to +121°C. Color: white. **Sold in spool sizes indicated below.**

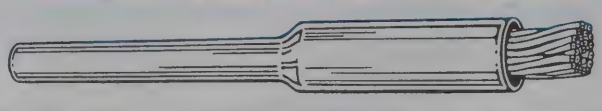
FOOD-GRADE NONTOXIC HEAT-SHRINK TUBING

NEW

VOLTREX™ brand



Nontoxic heat-shrink tubing meets the requirements of the USFDA Reg. CFR 117.1330 for food contact, nontoxic material. Adheres to most substrates, such as glass and metal, without the use of adhesives. Removable without cutting, making it ideal for tamperproof applications. Resists a wide range of chemicals and oils, as well as sunlight, moisture, and fungi. Forms a smooth, tight-fitting insulation for most applications with high degree of flexibility. Shrink ratio: 2:1. Recommended shrink temperature: 121°C (275°F) with heat gun, infrared, or other sources. **Sold in spool sizes indicated below.**

LAYFLAT PVC HEAT-SHRINK TUBING

Layflat PVC heat-shrink tubing is a thin-wall material offering good electrical and mechanical characteristics. When exposed to heat in excess of 275°F for a few seconds, the specially-formulated polyvinyl chloride material shrinks rapidly and uniformly to conform to the shape of the object being covered. Applications include insulating and jacketing of batteries, capacitors and similar objects; protective covering of precision machine parts and cutting tools; wire and cable identification; industrial equipment; toys, sporting goods, electronics, medical and consumer products. Operating temperature: +85°C to –20°C. Shrink ratio: 2:1. A heat gun can be used for shrinking in most applications; *order separately on page 1241.* Wall thickness: 0.004″. Meets flammability requirements of UL VW-1 and MIL-I-631 specifications. Color: White. UL listed. **Sold in 100′ spools.**

HEAT-SHRINK TUBING KITS AND HEAT GUNS

HEAT-SHRINK TUBING KITS

Kits contain a wide assortment of heat-shrink tubing, listed in the table below, enabling the engineer to choose the best kind for each application before putting a prototype into production. The basic kit contains 88 pieces of tubing, each 6″ (150) long. The advanced kit contains 174 pieces of tubing, each 3″ (75) long. Both kits are packaged in a sectioned, high-impact polystyrene storage box with "Quick-Scan" chart identifying contents.

KIT CONTENTS

Type	Description	Basic Kit Pcs.	Advanced Kit Pcs.
PVS	Flexible Polyvinylchloride 105 Shrink Tubing	18	18
FPS	Flexible Polyolefin Shrink Tubing	18	18
FPF	Flexible Polyolefin Flame-Retardant Shrink Tubing	18	18
KYS	Kynar® Polyvinylidene Shrink Tubing	15	16
PHD	Multiple Wall Polyolefin Shrink Tubing with Thermoplastic Adhesive Liner	9	10
SRM	Semi-Rigid, Multiple Wall Polyolefin Shrink Tubing	10	10
LTP	Flexible Polyolefin, Low-Temp. Shrink Tubing	...	18
PHS	Flexible, Multi-Wall, Adhesive-Lined, High-Ratio Shrink Tubing	...	10
PVHR	Irradiated PVC 105 Shrink Tubing	...	18
TTS	Teflon® (TFE) Shrink Tubing	...	12
SST	Teflon® Super-Shrink Tubing	...	14
TFM	Teflon® (TFE) w/ FEP Inner-Melt Teflon® Tubing	...	12

POLYOLEFIN HEAT-SHRINK TUBING KIT

102-piece kit includes samples of general-purpose polyolefin tubing. Tubing offers an outstanding balance of electrical, physical, and chemical properties for a wide variety of industrial and military applications. Rated 135°C for continuous operation. Tubing is typically used as a shrink-fit electrical insulation over cable splices and terminations. Also used for lightweight wire harness covering, wire marking, and wire bundling. 2:1 shrink ratio. All pieces are 6″ long. Meets MIL-I-23053/5 Class 1 and Class 2 specifications. Color: black. Kit contents described below. UL recognized, CSA certified.

KIT CONTENTS

Diameter	No. of Pieces	Diameter	No. of Pieces
1/16″	30	1/4″	15
1/8″	25	3/8″	7
3/16″	20	1/2″	5

92N5421 Type 2778. **Each** **51.74**
(13553) (ne10420)

PVC HEAT-SHRINK TUBING KIT

45-piece kit includes samples of **SPC, PVS,** and **VPV1 series.** Includes the following diameters and quantities: 3⁄16″ = 20 pieces; 1⁄4″ = 15 pieces; 3⁄8″ = 10 pieces. The **VPV1 series** features the only low shrink temperature PVC with an inner adhesive liner. Provides excellent electrical insulation along with low shrink temperature. Best for applications where high shrink temperatures can damage enclosed or adjacent components. 2:1 ratio. Shrinks to a full 50% quickly at 200°F. Resists most chemicals and oils, as well as sunlight, moisture, and fungus. All pieces are 6″ long. Meets MIL-I-23053/2 Class 2 specifications. UL listed, CSA certified.

92N5420 Type 2777 **Each** **57.95**
(13552) (ne10421)

TEFLON® HEAT-SHRINK TUBING KIT

40-piece kit includes teflon® heat-shrink tubing samples. Includes 8 pieces each of the following diameters: 0.084″ (#16), 0.125″, 0.188″, 0.250″, and 0.375″. Teflon® heat shrink tubing is a unique thermoplastic that possesses excellent characteristics for tubing used in high-temperature applications and corrosive atmospheres, and as electrical insulation. Teflon® possesses the lowest coefficient of friction of any known solid and is used widely because of its anti-stick properties. Non-wetting and self-lubricating. Offers excellent chemical-resistant qualities and is unaffected by weathering due to outdoor exposure. Features the widest working range of any plastics material (–250°C to +260°C). Shrink ratio: 2:1. Meets MIL-I-23053/12 specifications. All pieces are 6″ long. UL recognized.

DELUXE HIGH-TEMPERATURE HEAT GUN AND ACCESSORIES -- BY STEINEL

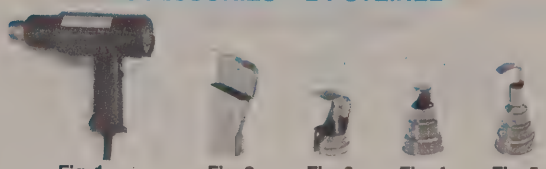

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5

Type 2390 heat gun features automatic temperature control and cool air stage. Built-in temperature sensor regulates and monitors temperature electronically, allowing user to select a specified temperature within the 120°F–1100°F range. High and low hot air flow settings up to 17cfm. Selectable cool air stage for drying, cleaning or cooling. Voltage: 120VAC. Output: 1500W. UL listed. *Order nozzle attachments separately below.* Manufactured for SPC Technology by Steinel (Steinel #HL1802E).

Stock No.	Type	Fig.	Description	Each
92N4506	2390	1	Heat Gun	**164.99**
92N4507	2391	2	3″ Reflector Nozzle for Large Dia. Applications	**15.95**
92N4508	2392	3	1¼″ Reflector Nozzle for Med. Dia. Applications	**11.95**
92N4509	2393	4	5⁄8″ Reflector Enclosed Nozzle with No Vents for Quick Heat to Solder Sink Wire Connectors	**11.95**
92N4510	2394	5	3⁄8″ Reflector Nozzle with 1½″ Reflector that is Formed for Shrinking Small Dia. Tubing	**13.95**

ECONOMY HEAT GUN

NEW

Economical, flameless, high-temperature heat gun is designed for shrinking Voltrex™ brand tubing in general heat-shrink applications. Quiet, efficient, multifunctional operation helps reduce operator fatigue and increases production. Lightweight, durable, impact-resistant plastic housing. Tough stainless steel nozzle accepts various attachments, *ordered separately on this page.* Features dual temperature settings: Low: 500°F to 700°F; High: 700°F to 1100°F; and Off. Power requirements: 120 volts, 50/60Hz, 15A. 8′ cord with grounding plug. UL listed.

92N6025 Type 3507. **Each** **45.95**
(32674) (ne32674)

INDUSTRIAL-GRADE HEAT GUN

NEW

Heavy-duty, flameless, high-temperature heat gun is designed for shrinking Voltrex™ brand tubing in general heat-shrink applications. Quiet, efficient, multifunctional operation helps reduce operator fatigue and increases production. Lightweight, tough, impact-resistant plastic housing. Durable nickel-plated steel nozzle accepts various attachments; *ordered separately on this page.* Dual temperature settings: Low: 500°F to 700°F; High: 700°F to 1100°F; and Off. Features electronic variable temperature control that is adjustable to one of 5 LED indicator settings. Power requirements: 120 volts, 50/60Hz, 15A. 8′ cord with grounding plug. UL listed.

92N6026 Type 3508. **Each** **53.95**
(32675) (ne32675)

NOZZLE ATTACHMENTS FOR ECONOMY AND INDUSTRIAL-GRADE HEAT GUNS

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6 Fig. 7

Durable metal attachments fasten onto heat gun easily. Designed for use on **type 3507** economy heat gun, *order separately on this page,* and on **type 3508** industrial-grade heat gun, *order separately on this page.* Convenient carrying case not shown.

INSULATING TUBING

VOLTREX™ BRAND PVI SERIES PVC INSULATING TUBING

Superior, high-dielectric strength tubing offers high-heat stability and is flame-retardant and self-extinguishing. Passes UL VW-1 flame test and meets MIL-I-631D, MIL-I-22129C specifications. Ideal for abrasion resistant applications, wire harnesses, flexible wire and ground strap protection. PVC sleeving is unaffected by most acid and alkali solutions. Retains flexibility throughout operating temperature range of –20°C to +105°C. Dielectric strength: 750V/MIL. Tensile strength: 2800psi. Color: black. Also available in clear, except type numbers with (*); *contact your local Newark sales office for details.* UL recognized, CSA certified. Made in the U.S.A. **Sold in 50′ and 100′spools.**

VOLTREX™ BRAND TEFLON® INSULATING TUBING

Non-toxic, chemically inert tubing offers superior insulating and highly stable electrical properties. Features excellent electrical resistance and translucent clarity. Withstands wicking, moisture absorption, and contamination. Continuous operating temperature: –230°C to +260°C. Meets MIL-I-22129C specifications. UL 94V-0 flammability rating. **TTI series** is used for miniaturized and compact installations. **TSI series** is used where extra-dielectric or mechanical strength is needed. UL recognized E52331. Made in the U.S.A. **Sold in 100′ spools.**

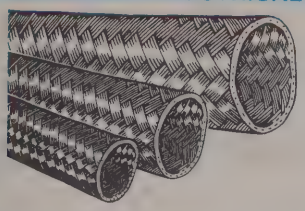
ELECTRICAL SLEEVING

BRAIDED FIBERGLASS ELECTRICAL SLEEVING



- **Class 240C Insulation**
- **Heat Annealed**
- **UL Recognized (File E92997)**

Tightly braided fiberglass sleeving designed as Class 240C insulation that is heat annealed to remove organic impurities, improve handling and reduce end fraying. Compatible with varnishes, epoxies and bonding agents where maximum reinforcement between the glass and encapsulant is needed. Can be used as primary and secondary insulation for motor leads, small appliances, brush assemblies, electric resistance heating elements, and similar low voltage applications. Ideal for abrasion and cut-through protection over insulated leads. Operating temperature: –76°F (-60°C) to +1200°F (649°C). **Sold in spools of 100′.**

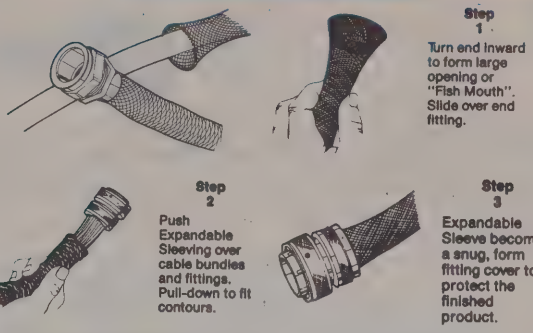
EXPANDABLE SLEEVING



Step 1
Turn end inward to form large opening or "Fish Mouth". Slide over end fitting.
Step 2
Push Expandable Sleeving over cable bundles and fittings. Pull-down to fit contours.
Step 3
Expandable Sleeve becomes a snug, form fitting cover to protect the finished product.

Expandable sleeving is a lightweight, woven, polyester monofilament tubing designed to encapsulate and protect cable bundles and wire harnesses. Self-fitting and adjusts to irregular surfaces and contours. Provides abrasion and fungus resistance in addition to being unaffected by most chemical environments and common solvents. Wall thickness: 0.025″. Standard operating temperature: –70°C to +125°C. Short-term maximum temperature to +230°C. Flame-retardent sleeving features white criss-cross threaded tracer. Meet UL VW-1 specifications. Color: black. Standard sleeving also available in clear, neon red, orange, neon yellow, neon green, neon blue, and purple; *contact your local Newark sales office for details.* UL recognized. **Sold in spool lengths indicated.**

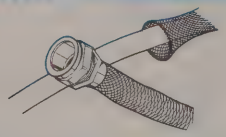
(6341) (ne08574)

FRAY-RESISTANT EXPANDABLE SLEEVING



Available in standard and flame-retardant grades. Designed for use on wire harness or hose applications where abrasion protection, full coverage, and sleeve fray resistance is required. Fray-resistant, monofilament polyester construction can be cut to length with scissors or hot knife for a clean, finished end. Allows for frequent expansion at the cut ends without unraveling. Easy installation for new assemblies or rework and repairs. Wall thickness: 0.024″ ±0.005″. Temperature rating: -70°C to +125°C. Melt temperature: 230°C. Color: black. UL recognized (file E107055), CSA certified (file LR66145-1). **Sold in spool lengths indicated.**

CABLE MANAGEMENT PRODUCTS

SHRINK-A-SHIELD TUBING KIT

NEW

Heat-shrink tubing with EMI/RFI shielding. 2:1 shrink ratio polyolefin with conductive cloth liner combines an efficient shield with a shrink-fit jacket. Ideal for shielding wire or cable, adding additional shielding, or repairing shielding that has been stripped back for wire termination. Meets MIL-I-25053/5, Class 1 specifications. Passes VW-1 vertical wire flame test. Dielectric strength: 300 volts/mil. Attenuation averages 85dB from 1MHz to 1GHz. Temperature range: -40°F to +250°F. Kit includes: 1′ of shielding tubing and 3′ of 24 AWG grounding wire.

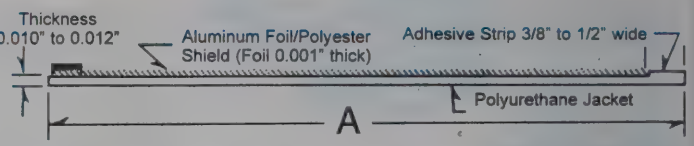
WRAP-A-SHIELD TUBING

NEW



Wraparound EMI/RFI shielding in sizes that allow coverage up to 2″ round and 3″ flat. Ideal shielding for longer lengths, diameters from 1⁄4″ to 3″, and for flat cable applications. Allows stacking of flat cable and shielding as a multilayer package. Adhesive strip closure allows for a custom fit. Attachable braid strap provides for soldering of drain wire. Polyurethane jacket with aluminum foil/polyester shield. Simply cut to length needed, attach drain wire, wrap around cable, and close the adhesive strip. **Sold in 10′ lengths.**

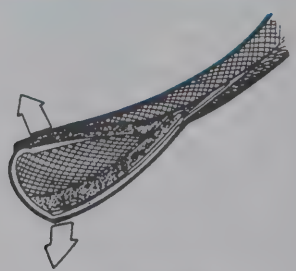
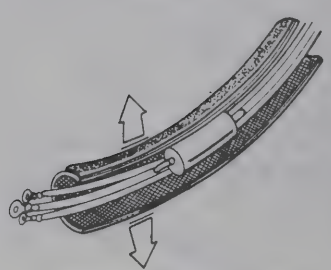
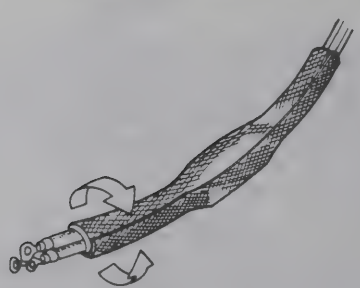
HOOK & LOOP WRAP SLEEVING



1. Opens Easily



2. Insert Wire, Cable, or Tubing



3. Just Wrap and Seal

Lightweight, expandable, braided monofilament sleeving with hook & loop fastening system is designed to allow easy wrap bundling and protection for wire, cable, hoses, and tubes. Monofilaments are constructed from durable P.E.T. providing continuous protection against abrasion, fungus, and rotting in addition to being unaffected by most chemical environments, and solvents. Meets UL VW-1 standard. Temperature rating: –75°C to +125°C. Melt temperature: +250°C. **Sold in 25′ spools.**

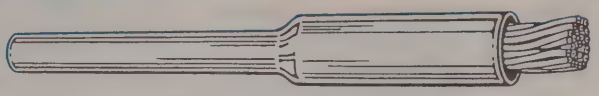
HEAT-SHRINK TUBING

FIT®-221 MULTIPURPOSE IRRADIATED POLYOLEFIN SHRINK TUBING



FIT®-221 is an irradiated flexible, flame-retardant polyolefin tubing. Use for harnessing, wire bundling, strain reliefs, or any application where components must be insulated or packaged. Operating temperature: –55°C to +135°C, 2:1 shrinkage ratio @ 121°C. MIL-I-23053/5B. Black tubing is UL recognized standard 224, CSA certified standard 198. Clear tubing is not UL recognized or CSA certified. Also available in white, red, yellow, blue, or green; *contact your local Newark sales office.* **Sold in packages of 4′ (1.219m) and 6″ (152.4mm) lengths.**

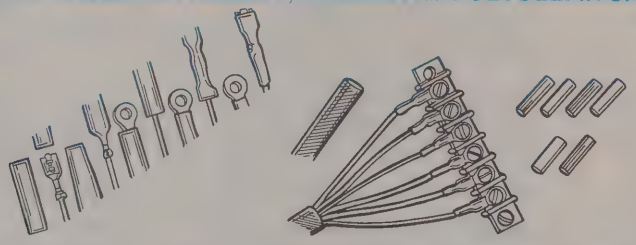
FIT®-221V HIGHLY FLAME-RETARDANT, IRRADIATED POLYOLEFIN SHRINK TUBING

VW-1



FIT®-221V is radiation cross-linked polyolefin heat shrinkable tubing. Passes VW-1 vertical wire flame test. For electrical insulation, harness bundling, and cable jacketing. Shrinkage ratio: 2:1 at 121°C. Operating temperature: –40°C to +125°C. Color: black. UL recognized standard 224 and CSA certified standard 198. Also available in white, red, yellow, blue, or green; *contact your local Newark sales office.* **Sold in packages of 4′ (1.219m) and 6″ (152.4mm) lengths.**

FIT®-321V, NON-ADHESIVE, 3 TO 1 SHRINK RATIO SHRINK TUBING

Use for wire harnesses, wire splices, insulation of terminals, and cable/connector protection/repair. **FIT®-321V** has a shrinkage ratio of approximately 3 to 1 at 90°C. Operating temperature: -45°C to 125°C. UL Standard 224, CSA Standard 198, passes UL VW-1 Flame Test. Available in black or white, *contact your local Newark sales office.*

PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

HEAT-SHRINK TUBING

FIT®-321 IRRADIATED POLYOLEFIN SHRINK TUBING

FIT®-321

FIT®-321 offers 3:1 shrink ratio at 125°C. Meets MIL-I-23053/4C, Class 3. Meltable encapsulating adhesive inner wall. Water resistant. Excellent bonding to substrates. Flexible flame-retardant outer wall. Uses include: replace potting/molding compounds; strain relief for electrical connections; cable-to-connector transitions. **Sold in packages of 4′ (1.219m) or 6″ (152.4mm) lengths.**

FIT®-300 SURFACE IRRADIATED POLYOLEFIN SHRINK TUBING

FIT®-300

FIT®-300 tough outer wall shrinks, inner wall melts and seals; operating temperature 110°C, 3:1 to 6:1 shrinkage ratio depending on size. Used for component encapsulation, end cap transitions, connector strain relief. Meets MIL-I-23053/4C, Class 1. UL recognized standard 224. **Sold in packages of 4″ (1.219m) or 6″ (152.4mm) lengths.**

FIT®-600 HIGHLY-FLEXIBLE IRRADIATED ELASTOMER

FIT®-600

FIT®-600 is a highly flexible irradiated elastomer tubing with outstanding abrasion resistance properties. For outdoor use as a cable jacketing and harness material where maximum abrasion protection is required. Shrinkage ratio: appoximately 1.75 to 1 at 135°C. 600V maximum per UL Standard 224. CSA Standard 198. MIL-I-23053/1B Class 2†, MIL-R-46846, Type 1, Class 1†. Operating temperature: –70°C to +121°C. Color: black. **Sold in spools of 25′.**

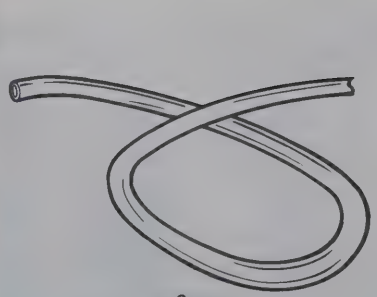
FIT® FLEX HIGHLY-FLEXIBLE IRRADIATED SILICONE RUBBER



Fit® Flex

Fit® Flex provides strain relief, terminal insulation, cable jacketing, and wire harnessing protection in applications where flexibility and durability are mandatory. Durable in wide range of temperature extremes. Flame retardant. Passes UL VW-1 flame test. Resists extreme heat shock. Outstanding thermal insulator. Suitable sheathing for fiber-optic bundles. Other applications include: electrical appiances, medical equipment, robotic, and other moving equipment. Provides outstanding strain relief and thermal insulation. Resistant to most acids and alkalis. Conforms to peculiar shapes and sizes. UL Standard 224. Operating temperature: –75°C to +200°C. Comes in gray. **Sold in spools of 25′.** Also available in 100′ spools; *contact your local Newark sales office.*

FIT® WRAP HEAT SHRINKABLE WRAPAROUND SLEEVE WITH ADHESIVE

FIT® WRAP

FIT® WRAP is a flame-retardant wraparound sleeve that repairs damaged or split cables without cutting or disconnecting them from equipment. Acts as a pressure-sensitive adhesive for ease of installation; ensures complete waterproofing, abrasion and corrosion resistance. Provides strain relief, flexibility and an environmental seal. Eliminates need for epoxy, tape, and vulcanizing. Conforms to irregular shapes and sizes. Meets flammability requirements of MIL-I-23053/15A. Insulates and seals cable rated to 600 volts. Operating temperature: –55°C to +110°C. **Sold in packages of 5.**

FIT® HEAT GUNS

Fit Gun

Alpha Fit Gun-1 and **Fit Gun-3**: Lightweight, quiet, two-temperature heat guns. Multipurpose for industrial applications; 3-position rocker switch (off-low-high) quiet, brushless DC motor. Ceramic encapsulated heating element protects against coil breakage, reduces internal heat concentration, prolongs coil life and concentrates air flow; lightweight, high impact housing for increased durability. UL listed. CSA certified. Temperature settings: **Fit Gun-1**: Low: 300°C (570°F); High: 566°C (1050°F). **Fit Gun-3**: Low: 400°C (750°F); High: 590°C (1090°F). Price of **Fit Gun-3** includes built-in stand and hanging ring as well as accessory **type GA-20** hook reflector and **type GA-21** concentrator nozzle.

FIT®-PRINT HEAT SHRINKABLE IDENTIFICATION SYSTEM

FIT®-PRINT

FIT®-PRINT is designed to economically meet the wire identification needs of the electronic interconnect, industrial, computer, office automation, marine, and electrical markets. Constructed of polyolefin tubing with a 3:1 shrink ratio, smear-resistant sleeves feed directly into standard typewriters or dot matrix printers. All markers are 2″ wide. UL recognized standard 224. **Sold in spools of 250 markers.**

HEAT-SHRINK FIT® SAMPLER KITS

Alpha FIT®-KITS provide a complete sampler selection of the most popular FIT® tubing types, colors, and sizes. Kits include assortments of replaceable, task-specific FIT® heat-shrinkable tubing and hardware devices for portability and convenience. In some cases, heat guns and termination tools are included. Kits contain all necessary materials to satisfy strain relief, splicing, connecting, environmental protection, and cable repair needs. Includes rugged, molded carrying case with formed compartments for all components. All kit contents can be purchased individually; *contact your local Newark sales office.*

EMI/RFI COPPER SHIELDING TAPE

Provides a low impedance connection between metal connector backshell and braided cable shield in molded cables. The pressure-sensitive adhesive contains a uniform dispersion of unique oxidation-resistant conductive particles resulting in shielding performance approx. 50dB (5dB better than other metal foil shielding tapes). Meets ASTM-D-1000 and MIL-Standard 202C. UL recognized. **Sold in rolls of 36 yards.**

FNT

FLEXIBLE NONMETALLIC ELECTRICAL TUBING

- **UL Recognized; CSA Certified (except for ¼ sizes)**
- **Fusion of PVC Construction to Rigid PVC Core Forms Integral Extra-Flexible Tubing**
- **Smooth Inside Facilitates Easy Wire Pulling and Installation**
- **Uses Alpha Connectors to Ensure Liquidtight Integrity**

UL rated: 70°C. Black. **Sold in 100′ spools except *50′.**

COPPER BRAIDS AND FIBERGLASS SLEEVING

TINNED COPPER BRAID

TUBULAR BRAID
- Woven Tinned Copper
- Each Strand Meets ASTM-B-33

OVAL BRAID
- Round Construction per QQ-B-575B
- Shield Coverage 95% Minimum

FLAT BRAID
- Woven Tinned Copper
- Combines High Current Carrying Capacity and Flexibility
- Suitable for Grounding and Bonding Strap Applications

The shielding of electronic interconnect cables can play a critical role in overall system performance. System configuration, type of signals transmitted and proximity to noise generating sources all must be considered. These factors plus the type of interference, whether electromagnetic (EMI), electrostatic (ESI) or radio frequency (RFI), will determine the necessity and type of shielding required. Alpha's copper braid conforms to FCC socket 20780 governing EMI and RFI shielding. **Sold in spools of 100′.**

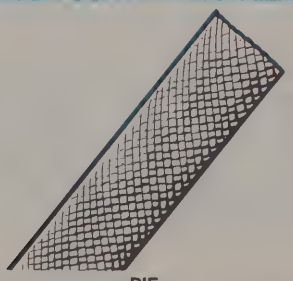
SILICONE RUBBER-COATED FIBERGLASS SLEEVING



PIF

Closely woven, braided fiberglass uniformly coated with silicone rubber. Superior flexibility is unaffected by weather. Easy-to-handle sleeving cuts cleanly and will not fray. UL standard 1441. Operating temperature: –70°C to +200°C. Color: natural. **Sold in spools of 100′.**

SPIRAL WRAP TUBING

Type SW spiral wrap tubing is designed to provide a professional finish to harness installations by eliminating exposed wire and cable. All materials maintain flexibility when bent around sharp edges or corners. Unlimited breakouts and tap off connections may be made through spiral openings. Polyethylene operating temperature: -20°C to +80°C. Nylon operating temperature: -40°C to +120°C. Teflon® operating temperature: –70° to +250°C.

EXPANDABLE BRAIDED POLYESTER SLEEVING

GRP series lightweight, expandable woven polyester sleeving offers high flexibility with high resistance to abrasion and cutting. Ideal for protecting wire bundles, harnesses, pneumatic hoses, hydraulic lines, cable, and highly polished or threaded machine parts. New fry-resistant version available; *contact you local Newark sales office.*

EXPANDABLE POLYESTER WEBBED SLEEVING

VW-1 UL

ZIP-GRP series expandable webbing offers superb flexibility and high tensile strength, while providing added protection against flame, chemicals, and abrasion. With its velcro-type enclosure wires, cable assemblies and wire harnesses are always accessible. Great for cable management. Temperature rating: –70°C to +125°C. Passes UL VW-1 Flame Test. Color: black. **Sold in spools of 25′.**

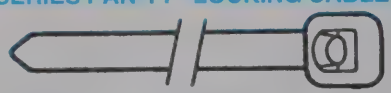
PLT SERIES PAN-TY® LOCKING CABLE TIES



Natural nylon 66 cable ties for most applications pass UL 94V-2 flammability test requirements. Tie bundle diameters up to 13″ and have minimum loop tensile strength from 12-120 lbs. Can be joined together for even larger diameters. Operating temperature range: –40°C to +85°C. Minimum loop tensile strength stated is strength when tested in accordance with MIL-S-23190E specifications. UL recognized. Outdoor and high-temperature cable ties also available; *contact your local Newark sales office for details.* **Sold in package quantities indicated below.**

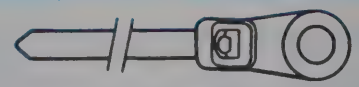
PLC SERIES PAN-TY® LOCKING CLAMP TIES



Natural nylon 66 cable ties for most applications pass UL 94V-2 flammability test. Used to attach a bundle of wires to another surface such as a control panel, wall or ceiling. Design allows for bundling before or after screwing clamp in place. Operating temperature range: –40°C to +85°C. Minimum loop tensile strength stated is strength when tested in accordance with MIL-S-23190E. UL recognized. Outdoor and high-temperature cable ties also available; *contact your local Newark sales office for details.* **Sold in package quantities indicated below.**

PAN-TY® MARKER TIES

Fig. 1 Fig. 2

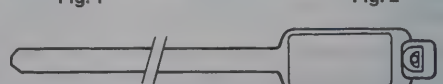

Fig. 3

Natural nylon 66 cable ties for most applications pass UL94V-2 flammability test requirements. Marker ties fasten and identify bundles simultaneously. Operating temperature range: –40°C to +85°C. Minimum loop tensile strength stated is strength when tested in accordance with MIL-S-23190E specifications. UL recognized. Outdoor and high-temperature cable ties also available; *contact your local Newark sales office for details.* **Sold in package quantities indicated below.**

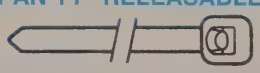
PRT SERIES PAN-TY® RELEASABLE CABLE TIES



Natural nylon 66 cable ties for most applications pass UL94V-2 flammability test. Exclusive extended tab end of releasable cable ties permit easy release and reuse even after tie has been pulled up snug by hand. Useful in harnessing where changes are anticipated. Minimum loop tensile strength: 50 lbs. (strength when tested in accordance with MIL-S-23190E). Cross-section width: std. 0.018″. Operating temperature range: –40°C to +85°C. UL recognized. Outdoor and high-temperature cable ties also available; *contact your local Newark sales office for details.* **Sold in packages of 100 and 1000.**

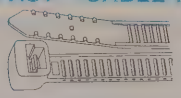
CABLE TIES AND ACCESSORIES

TY-FAST™ CABLE TIES



Nylon 6/6 design lowers installation costs and provides features to ease fastening for harness fabrication and wire bundling in the manufacturing environment. Integrally formed nylon pawl combines low insertion and high locking strength. Rounded, low-profile head reduces number of snags. Tails have two-sided finger-grip design that helps the operator grasp and pull ties snug. "Sure Grip" tab keeps the tail from popping out while being threaded, then holds it securely for final tightening by hand or tool. Quick, easy pull-through increases productivity and reduces operator fatigue. Smooth edges are designed to prevent damage to wire insulation, reducing the opportunity for shorting. Color: natural (standard) or black (outdoor weatherable). Temperature range: –40°F to +185°F.

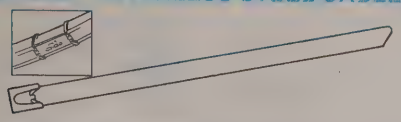
NEWARK STOCKS MORE PRODUCTS THAN ANY OTHER ELECTRONICS DISTRIBUTOR!

PAN-STEEL™ STAINLESS STEEL CABLE TIES



High-strength 304 nonmagnetic stainless steel cable ties are designed for bundling, identifying and fastening applications in harsh environments. Fast and easy to install. Resistant to abrasion, radiation, weathering corrosion, and temperature extremes. Self-locking, no sharp edges, and easily installed by hand or tool; *order installation tool separately on this page.* For extra protection, choose Nylon II-coated 316 stainless steel ties, *ordered separately below.* **Sold in packages of 50 and 100.**

Cable mounts and wiring accessories include **type ARC.68** adjustable releasable clamp. Clamp provides a fast and convenient method of securing bundles. **Type ACC** cord clip easily snaps bundles into or out of the clips. Available in three sizes to hold cords, tubing, cable or wire bundles. **Type BEC** and **type BECP** offer beveled entry for easy snapping. Available in adhesive-backed and pushback styles. **Type AMC** holds a single cable and can be mounted on any flat, smooth surface. **Type LC** latching clip retains and supports wire. Offers a quickly-installed mount with a locked cover for withstanding vibration. **Type MACC** metal adhesive cord clip can be opened and closed without damage to the clip. **Type AJC** low-profile "J" clips retain cords, wires or tubing. Flexible design for easy insertion but secure performance. **Type PMCC** push-mount cord clip snaps easily into pre-drilled hole in panels up to .105" thick. Integral mounting device and winged design holds mount in place. **Type PLA25** locking and **type PRA25** releasable adhesive-mount screws for added mounting strength. **Type CCS** fixed diameter cable clamps are constructed of durable nylon. **Type CCH** are heavy-duty nylon. **All mounts below are sold in package quantities indicated.**

Cable mounts and wiring accessories include **type VWS** wire saddles with funnel-entry design. Used in pre-drilled 0.187″ holes in 0.03″ to 0.08″ thick panels. **Type SICH** snap-in clips are designed for pre-drilled 0.250″ holes in 0.03″ to 0.10″ thick panels. Placed on the bundle first, then attached to panel. **Type LWC-A** adhesive-backed mounts feature releasable latch, large mounting base for high bonding strength. **Type LWC-H25** push-in mounts snap into 0.250″ hole. **Type TWR** tension wire retainer allows wires to be "slid" into the clip and held in place by tension. Top-loading **type VCC** vertical cord clip features funnel-entry design. **Types FCC** and **FCM** clips accommodate any width flat cable for a maximum stack height of 0.17″. **Type LPFCM** low-profile mount offers cable containment and identification for stack heights up to 0.105″. **Sold in package quantities indicated below.**

TYPE G PANDUCT® PLASTIC WIRING DUCTS

- **Route, Protect, and Conceal Wires**
- **Removeable Duct Cover (*) For Easy Wire Access**

Type G duct is interchangeable with **type E** slotted-wall wiring duct. Features the same external dimensions and mounting hole pattern as **type E** duct, but provides increased wire capacity. Offered in sizes from 0.5 x 0.5″ to 4 x 5″. Like all Panduit wiring ducts, **type G** features smooth, rounded edges to protect wires and installer's hands from abrasion. Color: light gray. Also available in dark gray and white; *contact your local Newark sales office. *Order nonslip duct cover separately on page 1267.* A full line of accessories is available; *contact your local Newark sales office for details.* UL recognized, CSA certified. **Sold in packages of four 6′ lengths.**

WIRING DUCT AND ACCESSORIES

TYPE F PANDUCT® PLASTIC WIRING DUCT

- **Restricted Longer Slot Design**
- **Safe, Rounded Slot Edges**
- **Numerous Mounting Holes**
- **Routes, Protects, and Conceals Wires**
- **Removeable Duct Cover* For Easy Wire Access**

Type F duct is a slotted-wall wiring duct offered in 29 sizes. Features smooth rounded edges to protect wires and installer's hands from abrasion. Narrow fingers and more slots allow greater wiring flexibility for newer, compact terminal blocks. Ideal for use in control panels and communications closets. Flammability rating of 94V-0. Color: light gray. Also available in dark gray and white; *contact your local Newark sales office. (*) Order nonslip cover separately on this page.* UL recognized, CSA certified. **Sold in packages of four 6′ lengths.**

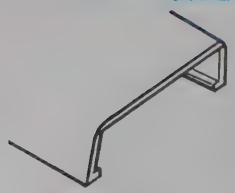
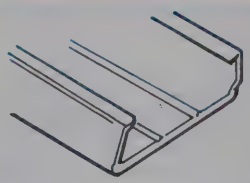
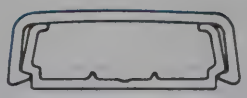
TYPE PD LOW-PROFILE SURFACE RACEWAY



Snap-on Cover



Base



Assembled Raceway (Cover and Base)

Low-profile surface raceway can be used for communication or electrical wiring. 2-piece plastic surface for power or low-voltage wiring. Choose screw-applied base or adhesive-backed base for fast and easy applications. UL listed for electrical power up to 300 volts when screw mounted. CSA certified. Meets NEC specifications for nonmetallic surface raceways. Use with MOD-COM™ products; *contact your local Newark sales office for details.* **Sold in packages of 8′ lengths.**

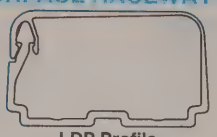
PAN-WAY™ TYPES LDP AND LD SURFACE RACEWAY



LDP Profile

Types LDP and **LD** surface raceway protect premises cabling with a complete routing system. Hinged-cover design allows cable to be laid-in instead of pulled through. Adhesive back speeds installation process. **Type LD** is an adhesive-back, one-piece raceway for low-voltage cable (under 48V). **Type LDP** is UL listed to 600V and can be used for routing low-voltage communication cabling, including fiber-optic cables. Both can be used with the PAN-NET™ networking cabling system for Category 5 UTP, ScTP, coax and fiber-optic cabling applications. Color: electrical ivory. Also available in brown, light gray, off-white, and white; *contact your local Newark sales office. Order raceway fittings separately on this page.* **Sold in packages of four 6′ lengths.**

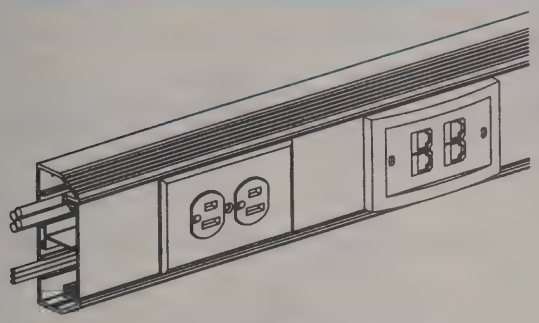
PAN-WAY™ TYPE T-70 SURFACE RACEWAY



T70BCE116N

Type T-70 surface raceway allows accessibility for future revisions. Can be used with the PAN-NET™ networking cabling system for Category 5 UTP, ScTP, coax and fiber-optic cabling applications. Raceway can also be used with any standard communications faceplates. Maintain the EIA/TIA required 1″ minimum bend radius of Category 5 and fiber-optic cabling. Color: electrical ivory. Also available in light gray, off-white, and white; *contact your local Newark sales office.* 1″ bend radius control fittings available; *contact your local Newark sales office.* **Raceway base and cover sold in packages of four 6′ lengths; other items sold individually.**

HIGH-DENSITY SLOTTED WIRING DUCTS

High-density slotted wall ducts come with narrow fingers, equaling a 2-to-1 ratio compared to standard slotted wiring ducts. The narrow fingers reduce fanning of the wires to the terminal blocks for a neater appearance and to accommodate more compact designs and components in control panels, communications closets, and other applications. Made with a versatile mounting hole pattern which lines up with DIN 35 rail; the mounting hole rows are also consistent with standard slotted wiring duct, so the two ducts can easily be interchanged. Double-scored breakaway duct fingers make larger breakouts easy. Restricted opening design prevents unintended removal of wires. Color: gray. Flammability rated UL94V-0. UL recognized, CSA certified. Made in the U.S.A. *Order duct covers separately on this page.* **Sold in packages of 24′ in four 6′ lengths.**

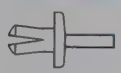
DUCT MOUNTING RIVETS AND TOOL



WDRT-1A

WDRT-1

MADE IN USA

Plastic, 1-piece rivets provide a fast, economical means of affixing wiring ducts. The rivet is inserted into a 3⁄16″ pre-punched hole and the pin is driven into the base, thereby expanding the rivet legs and locking the duct and sub-panel in place. Maximum duct/panel thickness is 3⁄16″. Installation tool, *ordered separately below,* installs any plastic rivet. Made in the U.S.A.

Stock No.	Type	Description	1-9	10-24
51N2380	WDRT-1A	Plastic Rivets **(Pkg. of 100)**	11.97	8.08

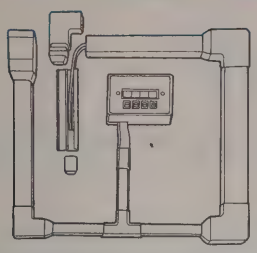
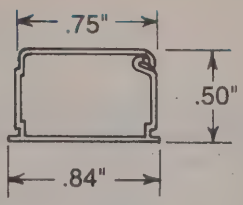
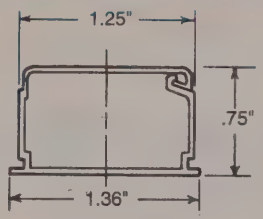
RACEWAYS AND ACCESSORIES

ADHESIVE-BACKED SURFACE MOUNT RACEWAY SYSTEMS

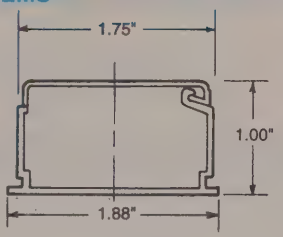




¾″ Duct



1¼″ Duct



1¾″ Duct

Surface mount raceway system is a one-piece latching duct designed to contain, route, and protect wire and cable when it can't be run within a wall. Designed with a special flexible hinge, the raceway allows numerous openings without creating stress cracking, or discoloration. The self-locking, hidden positive latch allows for quick re-entry and secure installation of wire and cable. Raceways are paintable with a latex-based paint to fit any office or home decor. System is made from PVC, rated UL 94V-0. Adhesive is 1/16″ thick urethane foam tape which features good high-temperature and solvent resistance. **Duct sold in packages of four 6′ lengths.**

FITTINGS AND ACCESSORIES FOR SURFACE MOUNT RACEWAY SYSTEMS

Accessories made of PVC, rated UL94V-0. 1″ minimum bend radius accessories are EIA/TIA compliant which helps provide consistent data transmission performance of Category 5 communications systems. Cables within raceway meet recommended bend radius requirements for Category 5 systems.

HARNESS WRAP AND EDGING

PROTECTIVE HARNESS WRAP

- **Easy to Apply and Remove**
- **Reusable and Flexible**
- **Strong and Versatile**

For temporary or permanent wire harness application where abrasion protection is required. Useful for harnesses which carry wiring around sharp corners. Leads can be brought out at any point to make a "tailor-made," tight-fitting harness. Color: natural. **Sold in coils of 100′.**

Stock No.	Type	O.D.	Bundle Range	Material	Per 100′ Coil 1-4	Per 100′ Coil 5-9

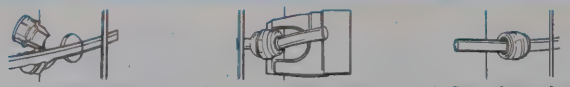
STRAIN RELIEF BUSHINGS AND ACCESSORIES

VOLTREX™ BRAND EZ SERIES STRAIN RELIEF BUSHINGS



1. Place bushing on cable 2. Press with pliers 3. Snap into place

EZ series nylon strain relief bushings save installation time and money. To install, fold bushing's hinged-halves over wire or cable. No special orientation or alignment is necessary. **Type 8508-050** installation tool, *ordered separately on this page*, inserts then locks the bushing in place with one smooth motion. Bushings securely anchor, absorb, and protect cable and wire from push/pull and twist forces while insulating them from irregular or sharp panel edges. For use in confined areas, its bullet-shaped design and streamlined nose does away with large cumbersome straps that complicate other bushing styles. Color: black. UL recognized. Made in the U.S.A. **Sold in packages of 100.**

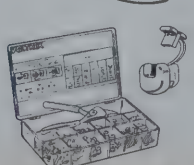
VOLTREX™ BRAND STRAIN RELIEF BUSHING INSTALLATION TOOL

Tool makes assembly of bushings a snap. Designed for use with Voltrex™ brand strain relief bushings.

23N3647 Type 8508-050. **Each** **15.52**
(6409) (de50557)



VOLTREX™ BRAND CORD STRAIN RELIEF BUSHING ASSORTMENT KIT

120-piece strain relief bushing assortment prevents insulation/conductor injury and lengthens cord life. Features a variety of products to fit different cord sizes and contours. Rugged 1-piece nylon construction. Withstands temperatures to 221°F. Eliminates need to tie or knot cord. Includes 10 pieces each of **types SRR-05, SRF-10, SRF-15,** and **SRF-30** bushings; 20 pieces each of **types SRF-40, SRF-50, SRR-10,** and **SRR-20** bushings. Also contains installation pincers and polystyrene sectioned box with ID chart on lid. Made in the U.S.A.

23N3612 Type 8408-SRF. **Each** **39.99**
(17635) (de50561)

MULTI-POSITION LIQUIDTIGHT CONNECTORS

Allow straight feed of wires, then turn to any position from straight to 90° and back. Same fitting for all applications. Non-metallic nylon in gray for use with PolyTuff I conduit or black for use with PolyTuff II tubing, *on this page.* Color: **Suffix BK** = black; **Suffix GY** = gray. UL listed, CSA certified.

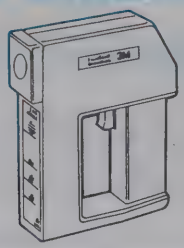
SCOTCHTRAK™ INFRARED HEAT TRACERS



Portable non-contact (infrared) thermometer designed for monitoring operating temperatures of mechanical and electrical plant and production equipment without removing equipment from service. Highly accurate: ±1% of reading, ±1 digit. Adjustable emissivity: 0.10 to 1.00. Switch selectable °F and °C temperature display. Operating temperature: 0°C to 55°C. **Type IR-16EX** extended performance model has data memory capabilities, current, maximum, minimum, difference, average temperature measurement parameters and 30:1, 0.8″ spot at 2′ distance field of view. **Type IR-16EXL3** laser sighted model offers switch-selectable digital or analog data output, audible high/low alarm and 30:1, 0.8″ spot at 2′ distance field of view. All models include carrying case and instruction manual.

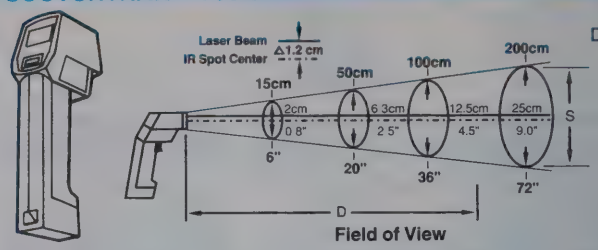
SCOTCHTRAK™ 750 SERIES INFRARED HEAT TRACERS



Scotchtrak™ infrared heat tracers provide an accurate and safe way to measure a wide range of temperatures at a safe distance. Plant engineers and technicians can now monitor equipment more closely, more accurately and more often–helping to spot trouble before it leads to costly malfunction and repair. Applications include reading surface temperatures of most objects including motors, electrical/electronic devices and industrial equipment. Hand-held portable heat tracers are noncontact thermometers and provide the user with the actual temperature. **Type IR-750CEXL2** features Class II infrared laser sighting.

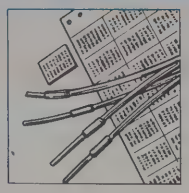
E-Z-CODE® WIRE MARKING SYSTEM

E-Z-CODE® WIRE & CABLE MARKER SHEETS



Customize, personalize markers using information stored in word processors, automatic typewriters, computer printers. Using pin-fed holes and fan-folded sheets that fit standard printers or laser printable sheets, these markers can provide entire schematic wiring data, serial numbers, sequencing data, data coding, date coding, routing and connecting information. Self-laminating vinyl provides maximum protection against most common elements. **Sold in packages of 25 sheets.**

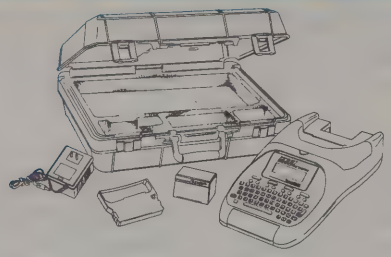
E-Z-CODE® IS951 IDENTIFICATION SYSTEM



The E-Z Code™ **IS951** dot-matrix printer provides high-resolution printing of labels up to 2″ wide in a broad range of materials, including heat-shrink sleeves. Backlit, tilt LCD display. Fast manual and auto label pin feed features allow precise scrolling and registration. Includes ink ribbon, (1) roll of markers, user manual, registration card and UL listed AC adapter. Weight: 7.5 lbs (without case). 1 year warranty. FCC Class A approved. DC stepper motor drive mechanism.

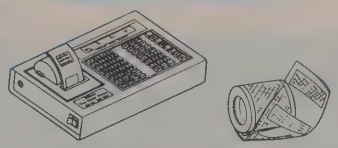
TYPE WD-26P PROGRAMMABLE ALPHA-NUMERIC WIRE MARKER PRINTER



WD-26P E-Z-Coder® wire marker printer produces letters, numbers and symbols allowing you to mark insulated wire ranging in size from 18AWG to 750MCM. Storage capacity offers such features as: auto recall of last legend; storage of up to 100 labels and job lists; marker recall option; delete function for obsolete markers; instant marker identification; and prints job list. Printing may be stopped and resumed. Letters and numbers can be sequenced in any position on any line. Single to double sequencing is capable and sequenced characters are identified by the flashing cursor. Prints up to four different legend lines. Included are: 120VAC wall adapter; internal Ni-Cad batteries; marker roll; ribbon cartridge; and carrying case. *Order refill tape rolls separately on this page.*

Electronic Terms and Measurements

Resistance

Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage

Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current

Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency

Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time

Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Temperature Conversion

°C	°F
100	212
80	175
60	140
40	105
35	95
30	85
25	75
20	70
15	60
10	50
5	40
0	32

Conversion Table

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

NEWARK ELECTRONICS®

ORDER ADDITIONAL COPIES OF THE NEWARK CATALOG 117 NOW!

It's your guide to the largest selection of electronic components in the world. Featuring products from over 300 top manufacturers, you'll be sure to find exactly what you need. Even if you can't — no problem! Newark adds products daily and can special order many others. Call us at **1-800-4-NEWARK** (1-800-463-9275), and a friendly sales representative will assist you with your electronic needs.

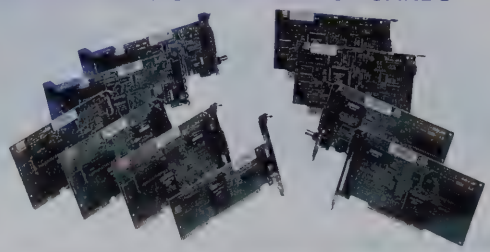
ETHERLINK® NETWORK INTERFACE CARDS

Call for current price



- **Optimize Server Performance and Desktop Clients in 10Mbps Networks**
- **Patented Parallel Tasking® Technology for Fastest Throughput, Lowest CPU Utilization**
- **Windows®-Based Installation Wizard Cuts Setup Time and allows configuration of Dynamic *Access*® Software and TCP/IP During Setup**
- **Cards are Automatically detected and Configured by Windows® Plug-and-Play Feature**

PCI cards offer exceptional performance in a coaxial and twisted-pair 10Mbps network. Parallel Tasking technology allows highest throughput and lowest CPU utilization for optimal control. ISA cards operate with a broad range of wiring and hubs as well as half- and full-duplex switches. Compatible with every major PC and network OS. RMON SmartAgent software support. EISA cards utilize bus mastering for low CPU utilization and Parallel Tasking technology. Supports full-duplex operations and are Desktop Management Interface enabled. All cards have support for Desktop Management Interface (DMI) which allows manageability by any DMI-compliant software.

FAST ETHERLINK® NETWORK INTERFACE CARDS

Call for current price

- **Reliable Networking at 10- or 100Mbps for Many CPU Buses**
- **Parallel Tasking Technology for Fastest Throughput, Lowest CPU Utilization**
- **Remote Wake Up and Managed PC Boot Agent Affords Greater Control Over Network Configuration for More Efficient Operations**

Dual-speed, fast EtherLink® XL PCI cards allow high-performance personal computers and servers to run at the fastest available data throughput rates in both 10Base-T and 100Base-T environments. The card senses the speed of the switch or hub port and configures itself automatically. 32-bit bus mastering. Supports 10/100Base-T for the PCI bus. Plug-and-play compliant with Windows® 95. AutoLink™ software for one-step configuration of NetWare drivers. **Type 3C980-TX** is specially designed for high-performance network servers. Full-duplex auto-negotiation. **Type 3C985-SX** provides Gigabit Ethernet over 850mm multimode fiber.

PORTABLE LAN & MODEM PC CARDS

NEW Call for current price

- **Cards Install Automatically with Windows® 95 Plug-and-Play and in NetWare LANs with Autolink™ Software**
- **Parallel Tasking® Technology Allows the Completion of Tasks and Data Transfer with Maximum Efficiency**
- **Cards Support All Major Notebook Operating Systems and Are Compliant with Leading Notebooks**
- **Cards with XJACK® Connector Allow Direct Connections to RJ-11 or RJ-45 Cable; No Special Cabling Needed**
- **Low Power Consumption Improves System Reliability**

LAN PC cards deliver top performance on Ethernet LANs. **Type 3CCFE575BT** CardBus PC card works either with a 32-bit CardBus slot or a 16-bit slot. **Type 3C574-TX** works with notebooks equipped with a 16-bit Type II PC card slot and supports full duplex operation at 10Mbps. Both use Nway auto-negotiation to configure cards automatically for 10Mbps or 100Mbps networks and connect directly to Catagory 5 UTP wiring. **Types 3CXE589EC** and **3CXE589ET** function on 10Mbps networks. LAN+Modem PC cards combine the features of LAN cards with a 56Kbps modem. Support V.90 and legacy x2™ technology. Built-in mobile speakerphone, Caller ID, and telephone answering device capability. 10/100 LAN version features Nway auto-negotiation to configure itself automatically for Fast Ethernet.

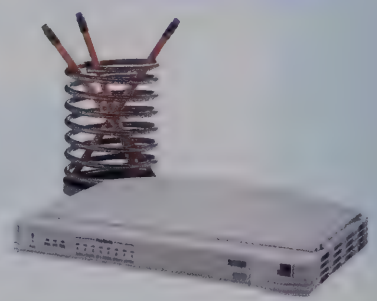
OFFICECONNECT® HUBS

Call for current price



- **Designed to Provide Smaller Offices and Workgroups the Productivity and Connectivity Benefits of Larger Office LANs**
- **Diagnostic LEDs Monitor Network Status for Quick Reviews**
- **Easily Expandable for Future Use**

Fast Ethernet hubs offer high-speed networking with plug-and-play installation and easy-to-read operation LEDs for simple network setups and use. Internal MDI/MDIX switch allows hubs to stack and serve as a Fast Ethernet Class II repeater. Unmanaged operation. Compact CoolCurve design provides self-ventilating operation; fits tight spaces. RJ-45 ports. Ethernet hubs are designed for scalability. Expand easily by connecting additional devices. Repeater hubs are FCC Class B compliant.

SUPERSTACK® II HUBS

NEW Call for current price

- **Provides an All-in-One, Self-Contained Solution**
- **5+ Lifetime Limited Warranty Guarantees Hub Investment for Life**

Dual-speed hubs full autosensing for automatic match and run at the maximum allowable speed of attached end stations. An internal 2-port bridge automatically provides data connectivity between internal 10- and 100Mbps segments. Includes 12 or 24 RTJ-45 ports plus 2 transceiver ports. Stackable up to 8 units, the hub supplies up to 208 connections per single stack. Ships as an unmanaged hub. An optional management module can be used to add advanced management capabilities, including Web-based management. *Contact your local Newark sales office for details.*

Stock No.	Type	Description	Ports	Each
83F3460	3C16610-US	SuperStack II Dual-Speed Hub 500	12 10/100-Base-TX/RJ-45	1095.00

SUPERSTACK® II SWITCHES

NEW Call for current price

Switch 3300 features:

- **Matrix Connection Delivers 4 x 1 Gbps Bandwidth Within the Switch Stock**
- **Support for IEEE 802.1p/Q Standards enables Packet Prioritization and Standard-Based VLANs**
- **Fast IP and IGMP Snooping Provide Layer 3 Capabilities**

Features for fault tolerance in mission-critical environments Include resilient links, spanning tree support, and Superstack II advanced redundant and uninterruptible power systems. Allows connection of Ethernet/Fast Ethernet switches, Fast Ethernet hubs, and high-speed servers in a truly stackable solution. Provide 12 or 24 switched autosensing 10/100Mbps Fast Ethernet ports.

NEW DATA COMMUNICATION PRODUCTS

ASYNC SHORT-HAUL MODEMS

- **Transmits Data up to 4 Miles (6.4km) on 4 Wires at Speeds up to 19.2 Kbps**
- **Flip-Top Lid for Quick DTE/DCE Selection**
- **Provides Surge Protection on Both Transmit and Receive Lines**
- **RS-232 Interface**
- **Full-Duplex Operation**

Feature transformer and optical isolation to protect data from electrical interference. Run loopback test to check operation at both ends by simply pressing front panel button. Includes 6′ cable, AC adapter, and sturdy metal case. **Type ME805C-R2** rack mountcard CE compliant. Flip-top lid for quick DTE/DCE selection. Must be used in pairs. 1-year Fido Protection™.

ASYNC SHORT-HAUL MODEM-B PLUS

- **Transmits Data up to 4 Miles (6.4km) on 4 Wires at Speeds up to 115.2Kbps**
- **Extends Distance for RS-232 Communications**
- **External DTE/DCE Switch**
- **Includes Its Own Cables**

Type ME800A-PLUS modem features built-in optical isolation and external switch for flow control. Transmits data at 9600bps to to 2 miles (3.3km). Line-status LEDs indicate transmit and receive activity, correct cabling, and online status. Includes AC adapter and sturdy plastic case. Connectors, one each: DB-25 female, 4-screw terminal block, and RJ-11. Dimensions.: 1.3H x 4.2W x 4.1″D. CE compliant. 1-year Fido Protection™.

83F7479 Type ME800A-PLUS. **Each** **159.95**
(37570) (ne37570)

DATA CENTER MODEMS

- **Ideal for Managing Wide-Ranging Access to a Central Host or Network**
- **Programmable Dialback Security Remembers Codes for 50 Modes**
- **Transmits Synchronous or Asynchronous Data on Leased or Dialup Analog Lines**

3400-type modems are 100% compliant with V.34 standard. 28.8Kbps. 3600-type modems are 100% compliant with V.34+ standard. 33.3Kbps. Both provide a full range of standard functions required in today's data centers: multiple configuration options (remote, front-panel LCD, or AT command set), full Group III fax capability, V.8 compliant automode and automatic rate adaptation. Provide the fastest possible data rates between 2 modems (with fully conditioned lines). Include 6′ DB-25 male-to-female cable and DB-25 male-to-female adapter, RJ-45 to RJ-11 cable, RJ-45 to 4-spade lug adapter. Diagnostics: V.54 remote loopback control; V.52 511 PN pattern; analog and digital loopback; test pattern. Operation: 2-wire full-duplex dialup or leased lines; 4-wire full-duplex leased lines. Includes cable and adapter. Dimensions: 2.5H X 7W x 9.6″D.

SERVSWITCH SERVER SELECTORS

SERVSWITCH™ ULTRA SWITCH BOXES

- **Built-in on-Screen Menus Make it Fast and Easy to Identify and Switch servers**
- **Flash-ROM upgradeable**
- **PS/2® Mouse Conversion for Mixing PS/2® and Serial Mice**
- **Cable Distances up to 100 Feet with Coax Cable**

ServSwitch™ Ultraswitch boxes features on-screen menus for convenient switching between servers. Identify servers with custom names. Expand up to 16 ports in full-sized chassis. Daisychain up to 256 servers. LED indicators for power, CPU selected, CPU power, and each CPU port. Cable distances up to 100′ (30.5m) with coax cable. PC and Mac: up to 19.6′ (6m) with standard ServSwitch™ cable. Connectors: 5-pin DIN for power, RJ-11 for serial control and flash-ROM upgrades, DB-25F for common KVM, DB-25F or each CPU port. Supported CPUs: IBM® PS/2s, 286, 386, 486, Pentium® or compatible processors. System requirements: Computer platform, monochrome, CGA, XGA, EGA, VGA, SVGA. Max. video resolution: 1280 x 1024.

ETHERNET PRODUCTS

DYNA-FAST 100BASE-T STACKABLE FAST ETHERNET HUBS

FEP-20012T-S

- **Comply with IEEE 802.3µ and 100Base-TX Fast Ethernet Class I and Class II Standards**
- **Automatically-Partition Bad Ports to Protect Network**
- **LEDS Indicate Port Connect and Utilization Status**
- **Up to 4 Hubs Can Be Cascaded Together to Form a Larger Network**
- **Either UTP or STP Category 5 Cable Can Be Used for Port Connection**

Up to 4 hubs can be stacked together to generate one repeater with DB25 cable to build a larger network without disturbing the existing network. Six 12-port Fast Ethernet hubs could generate one repeater and connect up to 48 stations in a Fast Ethernet LAN system. Port 1 on **type FEP-20004T-S** could also be used as uplink port with proper uplink switch setting; allows stacking of 2 hubs using DB-15 cable. **Types FEP-20008T-S** and **FEP-20012T-S** are 19″ rack mountable; allow stacking of 4 hubs using DB-25 cable. LEDs indicate power, collision, link/activity, error, and utilization status. 5-year warranty.

Stock No.	Type	Ports	Description	1-3	4-6

(17428) (ne10592)

MICRO-NET 10BASE-T HUBS

- **Comply with IEEE 802.3 Repeater, 10Base-T, 10Base-2, and 10Base-5 Standards**
- **Partition Off Bad Ports to Protect Network**
- **Allow Cascading up to 4 Hubs via STP/UTP**

Type ETP-20005TM-1 is a super-compact, 5-port Ethernet hub that is ideal for connecting 2 to 5 10Base-T workstations. A separate uplink port is provided for cascading up to 4 hubs, giving network expansion capabilities of up to 14 workstations. **Type ETP-20008TM-1** is an 8-port Eternet hub with a coaxial backbone connection that allows for up to 30 hubs to be cascaded. **Type ETP-20016TM-1** is a 16-port Ethernet hub with coaxial or AUI connections for expansion up to 100 hubs. All hubs provide the flexibility to expand to larger networks.

Stock No.	Type	Ports	Description	1-3	4-6
83F3367	ETP-20005TM-1	5	5 RJ-45 Jacks	**51.86**	**47.82**

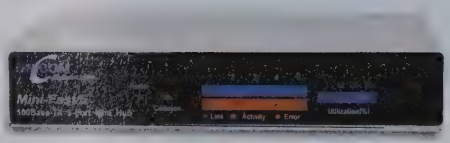
NEW

MINI-FAST 100BASE-TX HUBS



- **Comply to IEEE 802.3µ 100Base-TX Class II Standards**
- **LED Indicators for Power, Collision, Link/Activity, Error, Utilization**
- **Automatically Partition Off Bad Ports to Protect Network**

These compact, powerful Fast Ethernet hubs are the perfect choice for small to medium size networks. Simply cascade two hubs together with UTP cable to support either 8 (**type FEP-20005T**) or 14 (**type FEP-20008T**) workstations. Cable distance: 5 meters hub-to-hub, 100 meters hub-to-workstation. Power supply: 12V DC, 800mA external adapter. Operating temperature: 0°C to +55°C.

DYNA-NET 10BASE-T HUBS

Dyna-Net 10Base-T Hubs

- **Automatically Partitions Off Bad Ports to Protect Networks**
- **Equipped with Power, Coax, AUI, Reset, and Collision LEDs to Indicate Connection**

ETP series Dyna-Net 10Base-T hubs can be added to existing networks without disturbing operation. **Types ETP-20012T** and **ETP-20016T** integrate into larger networks via Thick or Thin Ethernet, or UTP (unshielded twisted pair) can be used to make it part of an Ethernet backbone. **Type ETP-20008T** with Thinnet or UTP and **type ETP-20004T** are perfect for adding one or two additional workstations. Conform to IEEE 802.3 repeater and 10Base-T standards. **Type ETP-20004T** features 9V external power adapter; other types feature 115VAC internal power supply.

ADAPTER CARDS AND ACCESSORIES

10BASE-2/T CONVERTER

Type ETP-20038T converts existing thin Ethernet to a 10Base-T network. Transceiver converts and repeats signals from the existing Thin Ethernet to a suitable form for transmission over unshielded twisted pair (UTP) cable to a 10Base-T hub. Includes a flexible 3-position terminator switch (open, 25-ohm, and 50-ohm) for Thin Ethernet and female BNC connector and RJ-45 jack. 185 meter maximim transmission distance over Thin Ethernet cable, 100 meter maximum for UTP cable. 9V external power adapter included. Conforms to IEEE 802.3 repeater, 10Base-T, and 10Base-2 standards.

Stock No.	Type	1-9	10-24	25-49

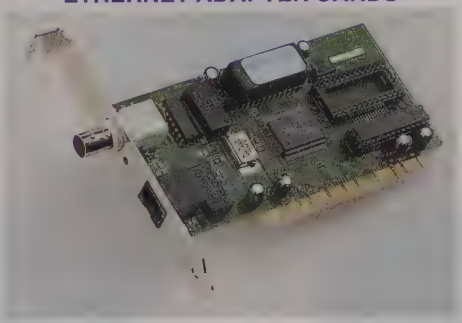
ETHERNET ADAPTER CARDS



Adapter cards are Windows® 95 plug-and-play compatible. Compy with IEEE 802.3 standard. **Type FEP-4206-E** supports half- and full-duplex operation. Bus-master design for maximum throughput and minimum CPU utilization. Complies with 10Base-T and IEEE 802.3u 100Base-TX standards. **Type ETP-4204-E** features a special driver that boosts network performance up to 50% higher than 16-bit ISA NE-2000 compatible cards. Software configuration for interrupt line, I/O, and PROM address. **Type ETP-4104-EP** has jumperless, jumper, and Windows® 95 plug-and-play modes. Accepts UTP or thin coaxial connections. Novell® NE2000 and Western Digital/SMC™ Ethernet card compatible. Complies with 10Base-T and 10Base-2 standards.

Stock No.	Type	Description	Media	1-14

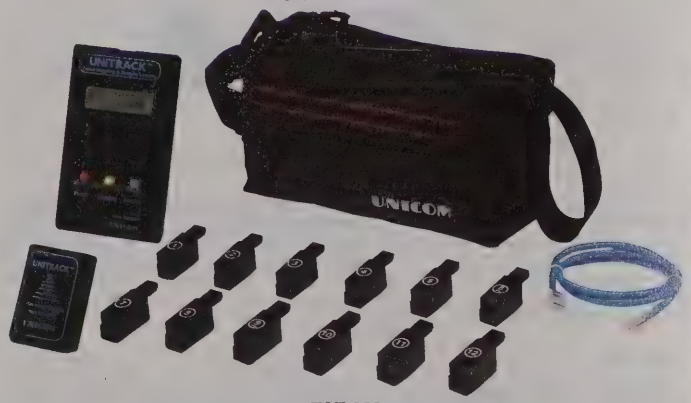
TYPE TST-038 UNITRACK™ WIRE MAPPING AND REMOTE LOCATOR KIT



TST-038

Type TST-038 tester features wire mapping, remote locating, and patch cord testing all in one unit. Tests up to 1000′ of any UTP cable. Wire mapping function tests end-to-end connections on local and remote locations. Remote locator function pinpoints remote location numbers for a terminal or workstation. A 32-character LCD screen displays wiring information on breaks, shorts, crossovers, or any combination of mapping between end-to-end modular jacks and plugs. Kit contents: 1 main unit, remote mapping device, 12 remote locators, two 3′ RJ-45 patch cords, one 9V battery, and carrying case. Also features battery low-indicator warning. Weight: 8 oz.

92F6333 Type TST-038. **Each** 391.81

(17747) (ne10802)

XTEND-5/T CONVERTER

Type ETP-20088T converts existing Thick Ethernet to 10Base-T networking. Super-slim design. Repeats signals from the Thick Ethernet to a suitable form for transmission over UTP wires. Includes power, link, collision, and TP RCV LED indicators. Cable lengths: 100 meters maximum for UTP cable; 50 meters maximum for AUI cable; 500 meters maximum per Thick Ethernet segment. Conforms to IEEE 802.3 repeater, 10Base-T, and 10Base-5 standards.

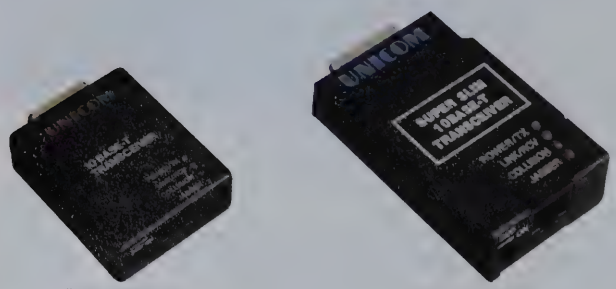
10BASE-T TRANSCEIVER

yes It runs with NetWare



ETP-20028-T ETP-20028T-S

Small, lightweight transceivers connect existing Thick Ethernet adapter card to a 10Base-T UTP network. Transceivers convert signals from standard Ethernet cable to a format suitable for transmission over UTP wires. Conforms to IEEE 802.3 10Base-T and 10Base-5 standards. Provides 1 RJ-45 jack for 10Base-T hub connection and 1 male AUI connector for Thick Ethernet adapter card connection. SQE switch provided. LEDs simplify troubleshooting and maintenance. **Type ETS-20028T-S** has the same features as **type ETP-20028-T** but in a slim design for narrow slot spaces.

Stock No.	Type	Description	1-9	10-24
50F9456	ETP-20028T	10Base-T Transceiver	27.66	25.51
92F9006	ETP-20028T-S	Slim Design 10Base-T Transceiver	34.57	31.88

VIDEO/AUDIO ADAPTERS

Video/Audio Adapters

- **Built-In Impedance Matching Device and Filter for Baseband Video Channel Signal Transmission over Category 5 UTP Cable**
- **Handle Either NTSC or PAL Video Signals**
- **2 Optional Audio Channels Can Be Used for HF Stereo Signal**
- **Easy Installation with Existing Premises Wiring and Wall Jacks**

Video/audio adapters convert the impedance from video and/or audio signal to a 100-ohm signal for transmission over Category 5 cables which are typically used for voice and data transmission rates up to and including 100MHz. Signal distortion is minimized as high-frequency noise is filtered from the received signal. A male BNC-to-phono jack adapter (**type CBP-MF**) is also available for applications where a phono jack is used for video interface.

Stock No.	Type	Description	1-24	25-49
91F2174	VAA-U501-VA	Adapter with Video and Audio Interface	91.68	86.31
91F2175	VAA-U501-V	Adapter with Video Interface Only	79.73	75.07
91F2176	CBP-MF	BNC (Male) to Phono Jack Adapter	1.80	1.69

(17427) (ne10596)

10BASE-T TRANSCEIVERS

yes It runs with NetWare

ETP-20028T

The Trans-One double pigtail transceiver is designed to connect Thick Ethernet interface to a 10Base-T UTP application. Conforms to IEEE 802.3 10Base-T and 10Base-5 standards. LEDs simplify troubleshooting and network maintenance. Includes a 6″ AUI cable and a 15′ 24 AWG stranded UTP cable, 1 RJ-45 plug for 10Base-T hub connection and 1 male AUI connector for Thick Ethernet adapter card connection. Convert signals from Thick Ethernet to a proper form for transmission over cable to each workstation. Suitable for workstations with a narrow slot space design.

TRANS-ONE

Stock No.	Type	Description	1-9	10-24
84F774	ETP-20028T-2	Double Pigtail	36.30	33.48
92F9005	ETP-20028T-3	Double Pigtail w/Long Screws	36.30	33.48

(8130) (ne08836)

10BASE-T/FL CONVERTER

Designed to connect existing 10Base-T Ethernet network to a 10Base-FL network with fiber-optic cable ranging up to 2000m long. The unit simply repeats signals from 10Base-T Ethernet to a suitable form for transmission over fiber-optic cable to the 10Base-FL link. Provides backward compatibility for communication between FOIRL and 10Base-FL transceivers over 1000m of fiber-optic cable max. LEDs indicate LMON, COL, XMT, power, RCV, JAB, and link. Interface: RJ-45 jack for 10Base-T connection; ST® connector for 10Base-FL fiber-optic connection. Accepts Category 3, 4, or 5 UTP cable for 10Base-T; 62.5/125µm multimode duplex fiber-optic cable for 10Base-FL connection. Includes 9VDC external adapter. Conforms to IEEE 802.3 10Base-T and 10Base-FL standards.

Stock No.	Type	Description	1-3	4-6
92F6332	ETP-20108	10 Base-T/FL Converter	241.99	223.15

(8121) (ne08366)

TRANS-2/5 ETHERNET TRANSCEIVERS

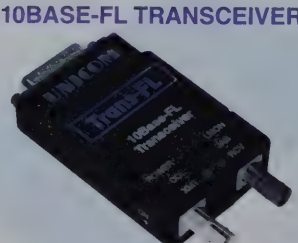
ETP-20048T

Trans-2/5 Ethernet transceivers convert existing Thick Ethernet adapter cards to 10Base-2 applications. Feature flexible 3-position terminator switch for Thin Ethernet. SQE switch provided. Conform to IEEE 802.3, 10Base-5 and 10Base-2 standards. Available in mini (**type ETP-20048T**) and super-slim (**type ETP-20048T-S**) sizes. **Type ETP-20048T-S** is ideal for narrow slot spaces such as SUN, SPARC, IBM® RISC/6000, and Apple® Macintosh.

Stock No.	Type	Description	1-9	10-24
93F5278	ETP-20048T	Mini 10Base-2/5	36.30	33.48
92F9007	ETP-20048T-S	Super-Slim 10Base-2/5	38.03	35.07

(17426) (ne10595)

10BASE-FL TRANSCEIVER



Converts existing Thick Ethernet adapter card to a 10Base-FL connection. Provides backward compatibility for communications between FOIRL and 10Base-FL transceivers over 1000m of fiber-optic cable. Super-slim design for tight spaces. LEDs indicate power, LMON, COL, JAB, XMT, and RCV. Interface: DB-15 male connector to Thick Ethernet adapter cards; dual ST connectors to 10Base-FL fiber-optic connection. Accepts optional AUI cable for DB-15 connection; 6.25/125µm multi-mode duplex fiber-optic cable for 10Base-FL connection. Switch: SQE On/Off. Conforms to IEEE 802.3, 10Base-5 and 10Base-FL Ethernet standards. Allows up to 2000 meters between connectors.

Stock No.	Type	Description	1-3	4-6
92F6331	ETP-20098T	10 Base-FL Transceiver	164.21	151.42

NETWORK MANAGEMENT PRODUCTS

FASTHUB® 112T AND 124T 10/100 HUBS

NEW

12 or 24 10Base-T/100Base TX autosensing ports with internal bridging. Provide a fast exchange of information between users and workgroup servers without additional network hardware. Delivers the LAN performance necessary for high-bandwidth multimedia applications. One MDI port enables users to connect to another switch, hub or router without a special crossover cable. Permits direct connection to other Class II hubs, including the Cisco Fasthub® **300** and **200 series**. Convenient LEDs provide simple visual management. Fits in either standard 19″ or 24″ rack. Supports either 10- or 100Mbps. Connect up to 12 or 24 PCs at either Ethernet or fast Ethernet speeds. Complete technical support and 1-year warranty.

83F3439 Type WS-C112T 24-port unmanaged hub. **Each** **995.00**
83F3441 Type WS-C124T 12-port unmanaged hub. **Each** **1595.00**

FASTHUB® 100/200/300 SERIES 100BASE-T HUBS AND REPEATERS

NEW

High-performance hubs combine all the benefits of stackable hubs with unmatched flexibility. Powerful and affordable, these repeaters are perfect for power users, server farms and high-speed local backbones for switch-based networks. A range of densities are available to support the appropriate number of servers using UTP or fiber media options. 100Mbps peak and aggregate throughout. Several configuration options give you flexibility. Standard software, power supply and cable assembly are included.

Stock No.	Model	Description	Each
01F1185	WS-C116T	16-Port, 100Base-TX Unmanaged Repeater Hub	995.00
83F3440	WS-C216T	16-Port, 100Base-TX Managed Repeater Hub	1595.00
01F1189	WS-C316T	16-Port, 100Base-TX Hub, 16RJ-45	1495.00

MICRO WEBSERVER

- **Interfaces with Netscape or Internet Explorer Browsers**
- **Removable Zip Drive Provides 100MB of Data and Storage**

Type MWEB100 features plug-and-play technology to provide solutions from web page hosting to workgroup intranets. Java GUI management application offers seamless operating in all networking environments. Embedded microkernel offers a high level of security. Supports over 2Mbps data throughput and more than 10 connections per second.

01F1190 Type MWEB100. **Each** **995.00**

700 SERIES ISDN ROUTERS

CISCO761M-CH

700 series ISDN routers offer telecommuters and small professional offices affordable, high-speed ISDN access to corporate networks and the Internet. ClickStart™ software configures router using a standard browser like Netscape Navigator®. **Type CISCO761M-CH** provides a low-cost solution for connecting an Ethernet LAN to ISDN Basic Rate Interface services. **Type CISCO762M-CH** router includes an integrated Network Termination 1 device. **Types CISCO765M-CH** and **CISCO766M-US-CH** include two analog telephone interfaces. **Types CISCO771M-CH** are similar to **types CISCO761M-CH** but also include a 4-port Ethernet hub and a "Call Connect/Disconnect" switch. Software, memory upgrades, cable assembly, and power supply are sold separately; *contact your local Newark sales office.*

Stock No.	Type	Description	Each
01F1192	CISCO761M	Access Router	599.00
01F1193	CISCO762M-US	Access Router with NT1	549.00
01F1194	CISCO765M-US	Access Router with 2 POTS	649.00
01F1195	CISCO766M-US	Access Router with NT1 and 2 POTS	799.00
01F1196	CISCO771M	Access Router with 4-Port Hub	599.00
01F1197	CISCO772M	Access Router with NT1 and 4-Port Hub	749.00
01F1198	CISCO775M	Access Router with 2 POTS and 4-Port Hub	749.00
01F1199	CISCO776M	Access Router with NT1, 2 POTS, and 4-Port Hub	899.00

ETHERNET AND TOKEN RING ROUTERS

Ethernet and Token Ring routers optimize configuration options for different network sizes and protocols. Dual-LAN configuration provides low-cost network segmentation. Flash memory provides easy software image maintenance. **Types CISCO2501-CH, CISCO2503-CH,** and **CISCO2514-CH** provide multiprotocol routing capability between WANs and LANs. Preconfigured and tailored for easy inventory, installation and maintenance. A software feature pack (not included) must be specified when ordering; *contact your local Newark sales office for details.* Memory upgrades, cable assembly, and power supply are sold separately; *contact your local Newark sales office.*

ETHERNET ROUTERS

Stock No.	Type	Description	Each
01F1128	CISCO2501-CH	1 Ethernet/2 Synchronous Serial Ports	2195.00
01F1130	CISCO2503-CH	1 Ethernet AUI/2 Synchronous Serial/1 ISDN BRI Ports	2695.00

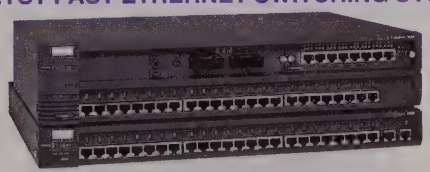
CATALYST FAST ETHERNET SWITCHING SYSTEMS



WS-C1924-A

WS-1924-A series switching systems feature 24 switched ports for attachment to workstations and 10Base-T hubs. Two switched 100Base-T ports give 100Mbps connectivity to help eliminate bottlenecks. **WS-C2822-A** and **WS-C2828-A** series switching systems feature 25 switched Ethernet ports and 2 high-speed expansion slots for maximum configuration and backbone flexibility. Both **WS-C1900** series and **WS-C2822-A** and **WS-C2828-A** series have 25 switched 10Base-T ports and 1 AUI port that deliver 10Mbps of throughput. Software, memory upgrades, cable assembly, and power supply are sold separately; *contact your local Newark sales office.*

Stock No.	Type	Description	Each
01F1169	WS-C1924-A	24 10Base-T & 2 100Base-TX Ports/1024 Address Cache	1495.00

LAN INTERCONNECT PRODUCTS

CATEGORY 5e ENHANCED PERFORMANCE PATCH PANELS

The latest technology in printed circuit board manufacturing provides consistent high-speed voice/data transmission. Meet or exceed TIA/EIA 568-A Category 5 standards. Panels are part of Hubbell's 5E6 system that's specially balanced for optimal results. Performance tested to 350MHz. The paired punch down sequence allows pair twist within ½" of termination. A new, separate label field over each 8-port cluster on the front of the panel provides for added flexibility in port identification, as well as a new rear label scheme. UL listed, CSA certified. *Order support bar for rear cable management separately below.*

Stock No.	Type	No. of Ports	Wire Cap.	Each
83F3615	MCC5802110A19E	16	64 Pair	104.92
